The action taken by the FHWA in this document will amend the commercial motor vehicle marking requirements to apply to every commercial motor vehicle subject to the FMCSRs. The FHWA has determined that this document does not contain a major rule under Executive Order 12291 or a significant regulation under the regulatory policies and procedures of the DOT. It is anticipated that the economic impact of this rulemaking will be minimal. Therefore, a full regulatory evaluation is not required.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (Pub. L. 96-354), the agency has evaluated the effects of this proposal on small entities. This proposal, if adopted, would require motor carriers to mark commercial motor vehicles. The FHWA believes that the cost of this marking will be minimal. Therefore, under the criteria of the Regulatory Flexibility Act, the FHWA hereby certifies that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12612 (Federalism Assessment)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Paperwork Reduction Act

This rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act

The Agency has analyzed this action for the purpose of the National Environmental Policy Act of 1969 and has determined that this action would not have any effect on the quality of the environment.

Regulation Identifier Number

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 390

Highway safety, Highways and roads, Motor carriers, Motor vehicle marking, Motor vehicle safety.

Issued on June 11, 1991.

T.D. Larson,

Administrator.

In consideration of the foregoing, the FHWA proposes to amend title 49, Code of Federal Regulations, subtitle B, chapter III, part 390, as follows:

PART 390—[AMENDED]

1. The authority citation for part 390 continues to read as follows:

Authority: 49 U.S.C. app. 2503 and 2505; 49 U.S.C. 3102 and 3104; 49 CFR 1.48.

§ 390.21 [Amended]

2. Paragraph (a) of section 390.21 is revised to read as follows:

§ 390.21 Marking of commercial motor vehicles.

(a) *General.* Every self-propelled commercial motor vehicle operated in interstate commerce and subject to the rules of subchapter B of this chapter must be marked as specified in paragraphs (b), (c) and (d) of this section. Self-propelled commercial

BILLING CODE 4910-60-M

NATIONAL TRANSPORTATION SAFETY BOARD

49 CFR Part 840

Notification of Railroad Accidents

AGENCY: National Transportation Safety Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to add a new § 840.7 to part 840, the NTSB Rules Pertaining to Notification of Railroad Accidents. It requires that the operator of a railroad that notifies the NTSB of an accident under § 840.3 must preserve intact and make no attempt to extract data from any event recorder or event recorder data pack, any speed tape, or any other data recording medium that was aboard the accident train or that recorded events pertaining to the accident train during the time surrounding the accident. Recent railroad accident experience has prompted the need for action by the NTSB to ensure the integrity and utility of recorded data pertaining to railroad accidents.

DATES: Interested persons are invited to submit written comments on or before July 19, 1991.

ADDRESSES: Comments should be sent in duplicate to Daniel D. Campbell, General Counsel, National Transportation Safety Board, room 816, 800 Independence Avenue SW., Washington, DC 20594.

FOR FURTHER INFORMATION CONTACT: Daniel D. Campbell, General Counsel (202) 382-6540.

SUPPLEMENTARY INFORMATION: Section 840.3 requires notification to the National Transportation Safety Board of certain railroad and rail rapid transit accidents. By the addition of a new section to part 840, the Board is proposing to require that the operator of a railroad that notifies the NTSB of an accident under § 840.3 also be required to preserve intact, and make no attempt to extract data from, any event recorder or data pack from any event recorder, any speed tape, or any other recording medium, that contains or that may contain information pertaining to the operation of the accident train, until the NTSB takes custody thereof or a release is made to the operator by a representative of the NTSB.

Recent railroad accident experience has prompted the need for action by the NTSB to ensure the integrity and utility of recorded data pertaining to railroad accidents. Two examples are the August 9, 1990, collision between two Norfolk Southern freight trains near Sugar Valley, Georgia, and the December 12, 1990, collision between an Amtrak train and a Massachusetts Bay Transportation Authority train in Boston. In both of these accidents, valuable information was lost because the available event recorder data packs were mishandled. In the latter accident an end-of-tape mark was placed over approximately 13.6 minutes of recorded data that extended from approximately 1.2 minutes before the last stop of the train prior to the accident to approximately 3.0 minutes after the accident. NTSB laboratory personnel worked for weeks to recover and interpret the remaining raw electrical data in the area of the end-of-tape mark. Similarly, a read-out induced anomaly obscured needed information in the earlier Norfolk Southern collision. Other investigations have also been delayed or potentially compromised because of delayed release of recorders to the NTSB for recovery of data. These occurrences have made it apparent that there is, within the rail community, some lack of appreciation regarding the NTSB's authority over the instrumentalities of transportation that have been involved in an accident within NTSB jurisdiction.

It should be beyond question (1) that the Safety Board can require the production of evidence in the context of a safety investigation and, (2) that the Board has the authority to secure and control the scene of an accident and the instrumentalities of transportation involved.[1] Similarly, the Board has the authority to do such testing of equipment and facilities as is necessary, with recognition of an operator's need to be free of unnecessary obstruction to continue operation of his business.[2] In general, testing is to be accomplished with the cooperation of the owner and in a manner that preserves, to the maximum extent possible, any evidence related to the accident. But the manner of testing and control of the accident scene are ultimately committed to the Board's discretion.[3]

The rule here proposed is fully consistent with the scope and intent of the Independent Safety Board Act.[4] The rule is meant only to preserve evidence. It imposes no requirement as to the use of event recorders. The proposal merely requires that if an event recorder or similar device were installed at the time of an accident, the recorder and all data packs, paper tapes or other recording media should be preserved as evidence for initial examination by the Board. The rule will not obstruct unnecessarily the use of transport facilities or unnecessarily delay their reopening. Further, it has been the Board's customary practice to return event recorders to their owners as soon as practical after data has been extracted. Consequently, operators will not suffer significant inconvenience regarding their own post-accident analysis.[5] And, as a result of implementation, the likelihood of preservation of evidence will, if anything, be enhanced.

Regulatory Flexibility Act

Under the criteria of the Regulatory Flexibility Act (5 U.S.C. 605(b), the NTSB has determined that this proposed rule, if adopted, will not have a significant economic impact on any entity. Because the new rule will simply require preservation of available data and information in the form in which it is already contained, the costs of complying with the rule are not substantial, and the NTSB has so certified.

Executive Order 12291

The NTSB has determined that, if adopted, this is not a major rule under Executive Order 12291.

Paperwork Reduction Act

This regulation will not impose any information collection requirements requiring Office of Management and

[1] See 49 U.S.C. 1903 (b)(1) and (b)(2).

[2] 49 U.S.C. 1903(b)(2).

[3] 49 U.S.C. 1903(b)(2), as amended by section 3 of Public Law 101-641, November 28, 1990.

[4] The Board's authority to promulgate rules necessary for the exercise of its functions is found at 49 U.S.C. 1903(b)(12).

[5] Currently, event recorders are used aboard locomotives to accomplish such tasks as fuel conservation, speed monitoring between points for which limits have been set, and the monitoring of brake systems. The brief delay imposed on any operator by the requirement that the event recorder be preserved until the NTSB either takes custody or releases it will not result in postponement of any tasks for which the event recorder was installed because the occurrence of the accident itself typically suspends accomplishment of all tasks other than those that pertain to accident investigation.

Budget approval under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

List of Subjects in 49 CFR Part 840

Administrative practice and procedure, investigation, hazardous materials transportation, railroad safety, reporting and recordkeeping requirements, recording media, event recorder, speed tape, information retrieval.

The Proposed Amendments

In consideration of the foregoing, the NTSB proposes to amend 49 CFR part 840 as follows:

1. The authority citation for part 840 is revised to read as follows:

Authority: 49 U.S.C. 1903.

2. A new § 840.7 is added to read as follows:

§ 840.7 Preservation of event recorders or data packs from event recorders, speed tapes, and other recording media.

The operator of a railroad involved in a railroad accident for which notification must be given to the NTSB, as specified in § 840.3, must preserve intact and make no attempt to extract data from any event recorder or data pack from any event recorder, any speed tape, or any other recording medium that contains or that may contain information in any way pertinent to the accident for which notification has been given, until the NTSB takes custody thereof or until released by a representative or the NTSB.

Issued in Washington, DC on this 13th day of June, 1991.

James L. Kolstad,
Chairman.

[FR Doc. 91-14455 Filed 6-18-91; 8:45 am]
BILLING CODE 7533-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 32 and 33

RIN 1018-AB25

Addition of Five National Wildlife Refuges to the Lists of Open Areas for Hunting, Two to the List for Sport Fishing and Pertinent Refuge-Specific Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish Wildlife Service (Service) proposes to add five national wildlife refuges (NWRs) to the lists of open areas for migratory game bird hunting, upland game hunting, and/or big game hunting, two NWR's to the list for sport fishing and pertinent refuge-specific regulations for those activities. The Service has determined that such uses will be compatible with and, in some cases, enhance the major purposes for which each refuge was established. The Service has further determined that this action is in accordance with the provisions of all applicable laws, is consistent with the principles of sound wildlife management, and is otherwise in the public interest by providing additional recreational opportunities of a renewable natural resource.

DATES: Comments must be received on or before July 19, 1991.

ADDRESSES: Address comments to: Assistant Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Room 3248, 1849 C Street, NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: U.S. Fish and Wildlife Service, Division of Refuges, MS 670-ARLSQ, 1849 C Street NW., Washington, DC 20240; Telephone; (703) 358-2043.

SUPPLEMENTARY INFORMATION: National wildlife refuges are generally closed to hunting and sport fishing until opened by rulemaking. The Secretary of the Interior (Secretary) may open refuge areas to hunting and/or fishing upon a determination that such uses are compatible with the major purpose(s) for which the refuge was established, and that funds are available for development, operation, and maintenance of a hunting or fishing program. The action must also be in accordance with provisions of all laws applicable to the areas, must be consistent with the principles of sound wildlife management, and must otherwise be in the public interest. This rulemaking proposes to open five refuges to hunting and two to sport fishing. All of the hunting and fishing programs have proposed refuge-specific hunting or fishing regulations which are included in this rulemaking.

This rulemaking will delist Desert National Wildlife Range, Nevada from upland game hunting and sport fishing because these activities have not been permitted since the jurisdictional change in 1966. The refuge does not harbor sport fish species and there is no public demand for hunting of the few upland game species that exist.

The Willow Creek NWR was at some point wrongly listed under Montana. This rulemaking will also delist Willow Creek NWR from Montana and relist it correctly under California.

Department of the Interior policy is whenever practicable, to afford the public an opportunity to participate in the rulemaking process. It is the purpose of this proposed rulemaking to seek public input regarding the proposed opening of the refuges cited below to migratory game bird hunting, upland game hunting, big game hunting, or sport fishing. Accordingly, interested persons may submit written comments concerning this proposal to the Assistant Director—Refuges and Wildlife (address above) by the end of the comment period. All relevant comments will be considered by the Department prior to issuance of a final rule.

Conformance With Statutory and Regulatory Authorities

The National Wildlife Refuge System Administration Act of 1966, as amended (NWRSAA) (16 U.S.C. 668dd), and the Refuge Recreation Act of 1962 (RRA) (16 U.S.C. 460K) govern the administration and public use of national wildlife refuges. Specifically, Section 4 (d)(1)(A) of the NWRSAA authorizes the Secretary to permit the use of any areas within the National Wildlife Refuge System (Refuge System) for any purpose, including but not limited to hunting, fishing, public recreation and accommodations, and access, when he determines that such uses are compatible with the major purposes for which each refuge was established. The Service administers the Refuge System on behalf of the Secretary. The RRA gives the Secretary additional authority to administer refuge areas within the Refuge System for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary purposes for which the refuges were established. In addition, prior to opening refuges to hunting or fishing under this Act, the Secretary is required to determine that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

In accordance with the NWRSAA and the RRA, the Secretary has determined that these openings for hunting and fishing are compatible and consistent with the primary purposes for which each of the refuges listed below was established, and that funds are available to administer the programs. The hunting and fishing programs will be general within State and Federal (migratory game bird) regulatory frameworks. A brief description of the proposed hunting and fishing programs follows:

VOL 56 ISS 118 JE 19 1991 UMI

Salinas River NWR, located 11 miles north of Monterey, California, was established in 1973 for wildlife conservation purposes and, in particular, for carrying out the national migratory bird management program. The 366-acre Refuge consists of several ecotypes and provides habitat for large numbers of wading birds, waterfowl, pelicans, gulls, and terns. The proposed migratory bird hunting would take place on a 48-acre portion of the Salinas River and a 14-acre portion of adjacent uplands. The hunt is designed to contribute to and be compatible with refuge purposes and objectives and in compliance with the NWRSAA. It would provide high quality, wildlife-oriented recreational use of a renewable resource that is expected to be enjoyed by about 140 hunting visitors. A section 7 evaluation under the Endangered Species Act found that the proposed action is not likely to adversely affect any listed species. The current Refuge budget provides adequate funds to administer the proposed hunt and is in compliance with the RRA.

Hakalau Forest NWR, located on the island of Mauna Kea, was established October 29, 1985, to assure the protection, perpetuation and maintenance of five endangered forest bird species and their rainforest habitat. The Service, in cooperation with the State of Hawaii and other agencies, has undertaken a number of actions to ensure the continued existence of endangered Hawaiian forest birds and protection of their habitats. These include land acquisition, control of feral animals and alien plants, reforestation, and research to determine the limiting factors on the distribution and number of native birds. The initial guiding force behind these actions was the recovery plan for Hawaii Forest Birds. The Plan states that "the biggest threat to the continuing survival of Hawaii's forest birds is the destruction and severe disruption of their habitat as a result of * * * grazing and browsing by feral animals * * *," namely the feral pig. A section 7 evaluation under the Endangered Species Act found that opening the refuge to big game hunting would have a highly beneficial effect on the listed species and their habitat. The proposed hunt is designed to contribute to and be compatible with refuge purposes and objectives and would be in compliance with the NWRSAA. It would also provide high quality, wildlife-oriented recreational use of a renewable resource that is expected to be enjoyed by about 600 hunter visits. The current annual budget provides adequate funds to administer the proposed hunting programs and is in compliance with the RRA.

Bayou Sauvage NWR, located in the eastern portion of Orleans Parish, Louisiana, was established in 1986, to enhance the population of migratory, shore and wading birds; to encourage the natural diversity of fish and wildlife species, to protect the endangered and threatened species and to provide opportunities for fish and wildlife oriented public uses and recreation in an urban setting. The proposed sport fishing program would take place on the 13,000 acres of fresh water marsh and impoundments and the 10,000 acres of tidal marsh on the Refuge. All access to the fresh water marsh or impoundments must be made via Refuge property thereby affording the opportunity to ensure that all State laws and Refuge regulations are observed by anglers. The proposed sport fishing program would provide high quality wildlife-oriented recreational use of a renewable resource that because of its close proximity to New Orleans is expected to be enjoyed by about 11,000 fishing visitors each year. It has been designed to contribute to and be compatible with the legislated purposes for which the Refuge was established and would be in compliance with the NWRSAA. The current Refuge budget provides adequate funds to administer the proposed fishing program and is in compliance with the RRA. A section 7 evaluation under the Endangered Species Act found that the proposed action is not likely to adversely affect any listed species.

Dahomey NWR, located approximately 30 miles north of Greenville, Mississippi, was established to preserve and enhance endangered species, protect waterfowl and their habitat, preserve bottomland hardwood habitat and provide for wildlife-oriented recreational opportunities. Based on qualitative and quantitative measures of habitats present on the Refuge, and on population parameters of proposed species of gray and fox squirrel, raccoon, cottontail and swamp rabbits, opossum, beaver and white-tailed deer, the proposed big game and upland game hunting program would allow for the maintenance of wildlife and its supporting habitat in a desirable and healthy status. The proposed hunting programs has been designed to contribute to and be compatible with refuge purposes and objectives and be in compliance with the NWRSAA. It would provide high quality, wildlife-oriented recreational use of a renewable resource that is expected to be enjoyed by about 1,000 hunting visitors. A Section 7 evaluation under the Endangered Species Act found that the proposed action is not likely to adversely affect any listed species. The current Refuge budget provides adequate funds to administer the proposed hunts and is in compliance with the RRA.

St. Catherine Creek NWR, located about seven miles south of the City of Natchez, Mississippi, was established in 1989, to protect and preserve a portion of internationally significant waterfowl habitat. At present, approximately 6,950 acres of bottomland and upland hardwoods, cypress swamps, cleared land and fallow fields have been acquired. Old St. Catherine Creek and Butler Lake are the two permanent water bodies on the Refuge. Areas that will support the fisheries resource are limited to the impounded water areas, creeks, and the backwater areas of the Refuge. The proposed sport fishing program has been designed to contribute to and be compatible with Refuge purposes and would be in compliance with the NWRSAA. It would provide high quality, wildlife-oriented recreational use of a renewable resource that is expected to be enjoyed by about 6,000 fishing visitors each year. A Section 7 evaluation under the Endangered Species Act found that the proposed action is not likely to adversely affect any listed species.

Supawna Meadows NWR, located along the Delaware River in Salem, New Jersey, was established in 1994 as a refuge and breeding ground for migratory birds and animals, and administered under the Tinicum National Environmental Center Complex. Over 85 percent of the Refuge is in wetlands and serves as an important migration area. The proposed migratory bird hunting would occur on the "Goose Pond" section of the Refuge under Special Conditions. The proposed hunt has been critically designed to contribute to and be compatible with the legislated purposes for which the Refuge was established and has been so certified. In re-establishing a former use of the area prior to Refuge ownership, it is expected to provide some 625 hunting visitors with high quality wildlife-oriented recreational use of a renewable resource. The Refuge budget provides adequate funds to administer the proposed program and is in compliance with the RRA. A Section 7 evaluation under the Endangered Species Act found that the proposed hunt is not likely to adversely affect any listed species.

Roanoke River NWR, located near Windsor, North Carolina, was established August 14, 1988, to protect and enhance approximately 33,000 acres of strategically located wooded wetlands consisting of bottomlands and swamps with high waterfowl value. Upland and big game hunting would be open on the majority of the Refuge with migratory game bird hunting allowed on no more than 40 percent of the refuge. Properly administered public deer hunting will reduce the potential of refuge habitat being overbrowsed and upland game hunting (raccoon) will reduce competition with wood ducks for nesting cavities and reduce predation on eggs and incubating females. In a Memorandum of Understanding signed by the Service and the North Carolina Wildlife Resources Commission for cooperative management of the Refuge, hunting was recognized as a legitimate use of joint venture lands where no conflict with primary project objectives would be created by such an activity. As such hunting would be allowed within the framework established by the two bureaus. The proposed hunts have been designed to contribute to and be compatible with Refuge purpose and objectives and is in compliance with the NWRSAA. It would provide high quality, wildlife-oriented recreational use of a renewable resource that is expected to be enjoyed by about 1,200 hunting visitors. A section 7 consultation under the Endangered Species Act found that the proposed hunt is not likely to adversely affect any listed species. The refuge budget provides adequate funds to administer the proposed program and is in compliance with the RRA.

Economic Effect

Executive Order 12291, "Federal Regulation," of February 17, 1981, requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, government agencies or geographic regions; or significant adverse effects on the ability of United States-based enterprises to compete with foreign-based enterprises. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.) further requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions. It is estimated that opening these refuges to hunting and fishing will generate approximately 21,034 visits annually. Using data from the 1985 National Survey of Hunting, Fishing, and Wildlife-Associated Recreation, total annual receipts generated from purchases of food, transportation, hunting and fishing equipment, fees, and licenses associated with these programs are expected to be approximately $12,751,586 or substantially less than $100 million. In addition, since these estimated receipts will be spread over six states, the implementation of this rule should not have a significant economic impact on the overall economy of a particular region, industry, or group or industries, or level of government.

With respect to small entities, this rule will have a positive aggregate economic effect on small businesses, organizations, and governmental jurisdictions. The openings will provide recreational opportunities and generate economic benefits that may not now exist, and will impose no new costs on small entities. While the number of small entities likely to be affected is not known, the number is judged to be small. Moreover, the added cost to the Federal government of law enforcement, posting, and other actions needed to implement activities under this rule will be considerably less than the income generated from the implementation of these hunting and/or sport fishing programs. Accordingly, the Department of the Interior has determined that this rule is not a "major rule" within the meaning of Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Paperwork Reduction Act

The information collection requirements contained in parts 32 and 33 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1018–0014. The information is being collected to assist the Service in administering these programs in accordance with statutory authorities which require that recreational uses be compatible with the primary purposes for which the areas were established. The information requested in the application form is required to obtain a benefit.

The public reporting burden for the application form is estimated to average six (6) minutes per response, including time for reviewing instructions, gathering and maintaining data, and completing the form. Direct comments on the burden estimate or any other aspect of this form to the Service Information Collection Officer, U.S. Fish and Wildlife Service, 1849 C Street NW., MS 224 ARLSQ, Washington, DC 20240; and the Office of Management and Budget, Paperwork Reduction Project (1018–0014), Washington, DC 20503

Environmental Considerations

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), environmental assessments have been prepared for these proposed openings pursuant to the Endangered Species Act. These documents are available for public inspection and copying in Room 670, 4401 North Fairfax Drive, Arlington, Virginia, or by mail, at the address listed in the section **"ADDRESSES"** above.

Nancy Marx, Division of Refuges, U.S. Fish and Wildlife Service, Washington, DC, is the primary author of this proposed rulemaking document.

List of Subjects 50 CFR Part 32

Hunting, National Wildlife Refuge System, Wildlife, Wildlife refuges.

50 CFR Part 33

Fishing, National Wildlife Refuge System, Wildlife refuges.

Accordingly, it is proposed to amend parts 32 and 33 of chapter I of Title 50 of the Code of Federal Regulations as set forth below:

PART 32—[AMENDED]

1. The authority citation for part 32 would continue to read as follows:

Authority: 5 U.S.C. 301; 16 U.S.C. 460k, 664, 668dd, 715i.

2. Section 32.11 would be amended by adding alphabetically by State, Salinas River NWR, CA, Supawna Meadows NWR, NJ, and Roanoke River NWR, NC:

§ 32.11 List of open areas; migratory game birds.

* * * * *

California

* * * * *

Salinas River National Wildlife Refuge

* * * * *

New Jersey

* * * * *

Supawna Meadows National Wildlife Refuge

* * * * *

North Carolina

* * * * *

Roanoke River National Wildlife Refuge

* * * * *

3. Section 32.12 would be amended by redesignating paragraphs (f)(4) (1) and (2) as paragraphs (f)(4) (i) and (ii), and (f) (11) through (16) as paragraphs (f) (12) through (17); adding paragraph (f)(11); redesignating paragraphs (aa) (1) through (7) as (aa)(1) (i) through (vii) and paragraph (aa) as (aa)(i); adding

VOL 56 ISS 118 JE 19 1991 UMI

paragraphs (aa)(2) and (aa)(2) (i) through (v); redesignating paragraph (dd)(5) as (dd)(6); adding paragraphs (dd)(5) and (dd)(5) (i) and (ii) as follows:

§ 32.12 Refuge-specific regulations; migratory game birds.

* * * * *

(f) *California* * * *

(11) *Salinas River National Wildlife Refuge.* Hunting of geese, ducks, coots, and moorhens is permitted on designated areas of the refuge subject to the following condition: Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(aa) *New Jersey* * * *

(2) *Supawna Meadows National Wildlife Refuge.* Hunting of geese and ducks is permitted on designated areas of the refuge subject to the following conditions:

(i) All goose and duck hunting will close after the last day of the regular duck season for the south zone of New Jersey.

(ii) Snow goose hunting will begin with the Canada goose season for the south zone of New Jersey only.

(iii) Loaded and uncased firearms are permitted in an unanchored boat only when retrieving crippled birds.

(iv) All hunting blind materials, boats, and decoys must be removed at the end of each hunting day. Permanent blinds are not permitted.

(v) Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(dd) *North Carolina* * * *

(5) *Roanoke River National Wildlife Refuge.* Hunting of ducks and coots is permitted on designated areas of the refuge subject to the following conditions:

(i) Permits are required.

(ii) Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

4. Section 32.21 would be amended by adding alphabetically by State, Dahomey NWR, MS and Roanoke River NWR, NC; and removing Desert National Wildlife Range, NV as follows:

§ 32.21 List of open areas; upland game.

* * * * *

Mississippi

* * * * *

Dahomey National Wildlife Refuge

* * * * *

North Carolina

* * * * *

Roanoke River National Wildlife Refuge

* * * * *

5. Section 32.22 would be amended by redesignating paragraphs (v) (2) through (7) as (v) (3) through (8); adding paragraphs (v) (2) and (cc) (3); and redesignating (dd)(4) (1) and (2) as (dd)(4) (i) and (ii) and (dd)(5)(1) as (dd)(5)(i) as follows:

§ 32.22 Refuge-specific regulations; upland game.

* * * * *

(v) *Mississippi.* * * *

(2) *Dahomey National Wildlife Refuge.* Hunting of squirrel, rabbit, beaver, raccoon, and opossum is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

(cc) *North Carolina.* * * *

(3) *Roanoke River National Wildlife Refuge.* Hunting of squirrel, raccoon and opossum is permitted on designated areas of the refuge subject to the following condition: Permits are required

* * * * *

6. Section 32.31 would be amended by adding a new state, Hawaii and adding alphabetically by State, Hakalau Forest NWR, HI, Dahomey NWR, MS, and Roanoke River NWR, NC as follows:

§ 32.31 List of open areas; big game.

* * * * *

Hawaii

Hakalau Forest National Wildlife Refuge

* * * * *

Mississippi

* * * * *

Dahomey National Wildlife Refuge

* * * * *

North Carolina

* * * * *

Roanoke River National Wildlife Refuge

* * * * *

7. Section 32.32 would be amended by redesignating paragraphs (k) through (uu) as (l) through (vv); adding paragraph (k); redesignating newly redesignated paragraphs (u)(3)(1) as (u)(3)(i) and (z)(2) through (7) as (z)(3) through (8); adding paragraphs (z)(2) and (hh)(6); and redesignating newly redesignated paragraphs (ss)(4)(1) through (5) as (ss)(4)(i) through (v) as follows:

§ 32.32 Refuge-specific regulations; big game.

* * * * *

(k) *Hawaii—Hakalau Forest National Wildlife Refuge.* Hunting of feral pigs is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

(z) *Mississippi.* * * *

(2) *Dahomey National Wildlife Refuge.* Hunting of deer is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

(hh) *North Carolina.* * * *

(6) *Roanoke River National Wildlife Refuge.* Hunting of white-tailed deer and turkey is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

PART 33—[AMENDED]

8. The authority citation for Part 33 would continue to read as follows:

Authority: 5 U.S.C. 301; 16 U.S.C. 460k, 664, 668dd, 715i.

9. Section 33.4 would be amended by adding alphabetically by State, Willow Creek NWR, CA, Bayou Sauvage NWR, LA, and St. Catherine Creek NWR, MS; and removing Willow Creek NWR, MT and Desert NWR, NV as follows:

§ 33.4 List of open areas; sport fishing.

* * * * *

California

* * * * *

Willow Creek National Wildlife Refuge

* * * * *

Louisiana

Bayou Sauvage National Wildlife Refuge

* * * * *

Mississippi

* * * * *

St. Catherine Creek National Wildlife Refuge

* * * * *

10. Section 33.22 would be amended by redesignating paragraphs (a) through (j) as (b) through (k); adding paragraphs (a) (1) through (6) as follows:

§ 33.22 Louisiana.

(a) *Bayou Sauvage National Wildlife Refuge.* Finfishing and shellfishing are permitted on designated areas of the refuge subject to the following conditions:

(1) Fishing is permitted during daylight hours only from March 16 through October 31, with the following exceptions: bank fishing from U.S. Highway 11 is permitted year-round; the area south of intracoastal Waterway is permitted year-round; the areas outside the Hurricane Protection Levee, the main Canal from U.S. Highway 11 to the borrow pits (2) within the Blind lagoon Unit, and the area bounded by I–10, Lake Pontchartrain, and Levee #27 is permitted from the end of the State waterfowl season (East Zone) through October 31.

(2) Only rod and reel or pole and line is permitted for finfishing. All hand lines and crabbing equipment must be attended.

(3) The use of trotlines, slat traps, or nets is prohibited, with the following exceptions: bait shrimp may be taken with cast nets; crayfish and crabs with ring nets up to 20 inches in diameter.

(4) Daily crab and crayfish limit is 100 pounds per vehicle or boat.

(5) Outboard motors not to exceed 25 horsepower are permitted in waterways, canals, and pools within the Hurricane Protection Levee (#26, #27, and #28).

(6) Air-thrust boats, motorized pirogues, and go-devils are prohibited in refuge waters.

* * * * *

11. Section 33.28 would be amended by adding paragraph (c) to read as follows:

§ 33.28 Mississippi.

* * * * *

(c) *St. Catherine Creek National Wildlife Refuge.* Sport fishing is permitted on designated areas of the refuge subject to the following conditions:

(1) Fishing and access is permitted during daylight hours only from March 1 through September 15 in areas designated by refuge signs and/or leaflets with the exception that fishing and access may be permitted year-round in some areas if designated by refuge signs and/or leaflets.

(2) Access to the refuge fishing areas is restricted to roads and trails designated by refuge signs and/or leaflets.

(3) Boats may not be left on the refuge overnight.

DEPARTMENT OF COMMERCE

Bureau of Export Administration

[Docket No. 910358-1132]

Foreign Availability Determination: 5-Axis Computer Numerical Control Units

AGENCY: Office of Foreign Availability, Bureau of Export Administration, Department of Commerce.

ACTION: Notice of negative determination.

SUMMARY: On May 14, 1991, consistent with the provisions of section 791 of the Export Administration Regulations (EAR), the Department of commerce determined that foreign availability of 5-Axis Computer Numerical Control Units controlled under ECCN 1091A of the commodity Control List (CCL) (15 CFR 799.1, Supp. 1), does not exist to controlled countries. As a result of this negative determination, the Department of Commerce will not amend the existing export controls on this item.

FOR FURTHER INFORMATION CONTACT: Steven C. Goldman, Director, Office of Foreign Availability, room SB-097, Department of Commerce, Washington, DC 20230; Telephone: (202) 377-8074.

SUPPLEMENTARY INFORMATION:

Background

Although the Export Administration Act (EAA) expired on September 30, 1990, the President invoked the International Emergency Economic Powers Act and continued in effect, to the extent permitted by law, the provisions of the EAA and the EAR in Executive Order 12730 of September 30, 1990.

Part 791 of the EAR (15 CFR 730 *et seq.*) implements and establishes the procedures and criteria for determining the foreign availability of goods and technology whose export is controlled for national security reasons. The Secretary of Commerce or his designee determines whether foreign availability exists.

With limited exceptions, the Department of Commerce may not maintain national security controls on exports of an item to affected countries if the Secretary or his designee determines that items of comparable quality are available in fact to such countries from a foreign source in quantities sufficient to render the controls ineffective.

On January 14, 1991, the Office of Foreign Availability (OFA) initiated a foreign availability assessment of 5-Axis Computer Numerical Control Units to controlled countries. These items are controlled under ECCN 1091A of the CCL. On March 29, 1991, the Department published a notice of the initiation of this assessment in the **Federal Register** (56 FR 13114).

OFA provided its assessment and recommendation to the Deputy Assistant Secretary for Export Administration. The Deputy Assistant Secretary considered the assessment and other relevant information and determined that foreign availability does not exist to controlled countries within the meaning of section 791 of the EAR for 5-Axis Computer Numerical Control Units. The Department provided all interested government agencies, including the Departments of State and Defense, with the opportunity to review and comment on the assessment and determination. As a result of this negative determination, the Department of Commerce will not amend the existing export controls on these items.

If OFA receives new evidence concerning this foreign availability determination, OFA may reevaluate its assessment. Inquiries concerning the scope of this assessment should be sent to the Director of the Office of Foreign Availability at the above address.

Dated: June 13, 1991.

James M. LeMunyon,
Deputy Assistant Secretary for Export Administration.

International Trade Administration

Automotive Parts Advisory Committee; Renewal

The delegate of the Secretary of Commerce renewed the U.S. Automotive Parts Advisory Committee (APAC). The renewal of the committee is in accordance with the Federal Advisory Committee Act, 5 U.S.C. app. 2, and 41 CFR part 101-6.10 (1990), Federal Advisory Committee Management Rule.

The APAC was established by the Secretary of Commerce on June 6, 1989 to advise Department of Commerce officials on issues related to sales of U.S.-made auto parts to Japanese markets.

The Committee functions as an advisory body in accordance with the Federal Advisory Committee Act. Additional information may be obtained from Stuart Keitz, U.S. Department of Commerce, International Trade Administration, (202) 377-0669.

Dated: June 2, 1991.

Mary A. Toman,
Deputy Assistant Secretary for Automotive Affairs and Consumer Goods.

[A-351-605]

Frozen Concentrated Orange Juice From Brazil; Preliminary Results and Termination in Part of Antidumping Duty Administrative Review; Intent To Revoke in Part the Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Preliminary Results and Termination in Part of Antidumping Duty Administrative Review; Intent to Revoke in Part the Antidumping Duty Order.

SUMMARY: In response to a request by respondents, the Department of Commerce has conducted an administrative review of the antidumping duty order on frozen concentrated orange juice from Brazil. The review covers five producers and/or exporters of this merchandise to the United States and the period May 1, 1989 through April 30, 1990. We preliminarily determine the weighted-average dumping margins for all respondents during this period to be zero or *de minimis*. Because Branco Peres Citrus S.A. and Citro-Pectina S.A. withdrew their requests for review, we are terminating the review with respect to those firms. If, by virtue of the final results of this review, Cargill Citrus Limitada, Citrosuco Paulista, Coopercitrus Industrial Frutesp S.A. and Montecitrus Trading S.A. have three consecutive years of sales at not less than fair value, and it is likely that they will not sell the subject merchandise at less than fair value in the future, the Department will revoke the antidumping duty order with respect to these firms upon publication of these final results. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: June 19, 1991.

FOR FURTHER INFORMATION CONTACT: Philip Pia or Paul McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On May 8, 1990, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" (55 FR 19003) of the antidumping duty order on frozen concentrated orange juice from Brazil (52 FR 16426; May 5, 1987). In May 1990, seven respondents, Cargill Citrus Ltda., Citrosuco Paulista S.A., Coopercitrus Industrial Frutesp S.A., Montecitrus Trading S.A., Frutropic S.A., Citro-Pectina S.A., and Branco Peres Citrus S.A., requested an administrative review of the order. We initiated the review, covering the period May 1, 1989 through April 30, 1990, on July 6, 1989 (55 FR 27359). A timely request for revocation of the antidumping duty order, accompanied by the required certification, was submitted by Cargill Citrus Ltda., Citrosuco Paulista S.A., Coopercitrus Industrial Frutesp S.A., and Montecitrus Trading S.A. Because Citro-Pectina S.A. and Branco Peres Citrus S.A. subsequently withdrew their requests for review, the Department is terminating the review of their sales for this period. The Department has now conducted the review for the remaining companies in accordance with section 751 of the Tariff Act of 1930 (the Tariff Act). The final results of the last administrative review were published on November 14, 1990 (55 FR 47502).

Scope of the Review

Imports covered by the review are shipments of frozen concentrated orange juice (FCOJ) from Brazil. The merchandise is currently classifiable under item 2009.11.00 of the *Harmonized Tariff Schedule* (HTS). The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period May 1, 1989 through April 30, 1990 and five producers and/or exporters of Brazilian FCOJ to the United States: Cargill Citrus Ltda., Citrosuco Paulista S.A., Coopercitrus Industrial Frutesp S.A., Frutropic S.A., and Montecitrus Trading S.A. The review of this period with respect to Citro-Pectina S.A., and Branco Peres Citrus S.A. is being terminated.

The Department intends to revoke the antidumping duty order with respect to four firms: Cargill Citrus Ltda., Citrosuco Paulista S.A., Coopercitrus Industrial Frutesp S.A. and Montecitrus Trading S.A. if, at the time the Department publishes the final results of this review, the four firms have demonstrated three consecutive years of sales at not less than fair value, and it is not likely that these firms will sell subject merchandise at less than fair value in the future. The additional respondent who submitted a revocation request, Frutropic S.A., is not eligible for revocation as provided in § 353.25(a) of the Department's regulations because it failed to meet the requirement of having sold the merchandise at not less than fair value for three consecutive years. As required by § 353.25(c) of the Department's regulations, the Department conducted a verification of all factual information submitted by those firms eligible for revocation.

United States Price

In calculating the United States price, we used both purchase price and exporter's sales price (ESP) as defined in section 772 of the Tariff Act. Purchase price was used for those sales to the United States which were made prior to importation, while exporter's sales price was used for those sales which were made after importation. Purchase price was based on the packed f.o.b. price to unrelated purchasers in the United States. ESP was based on the packed delivered price to the first unrelated purchaser in the United States. For purchase price sales, where applicable, we made deductions for Brazilian brokerage expenses, discounts, export taxes, port fees, foreign inland freight and insurance. For ESP sales, we made deductions for discounts, U.S. duty and Customs' fees, harbor maintenance fees, U.S. inland freight and insurance, brokerage and handling expenses, ocean freight and marine insurance, credit expenses and indirect selling expenses. Where foreign market value was based on home market prices, we made an addition to U.S. price for taxes which were not collected by reason of exportation of the merchandise to the United States. No other adjustments were claimed or allowed.

Foreign Market Value

The Department based foreign market value on ex-factory or delivered prices to unrelated purchasers in the home market or on third country f.o.b. prices, in accordance with section 773 of the Tariff Act. We made deductions, where appropriate, for foreign inland freight, marine insurance, and export taxes. Where applicable, we deducted foreign packing expenses and added U.S. packing to home market price (packing costs were not incurred on bulk sales). We adjusted foreign market value for differences in credit expenses, post-sale warehousing expenses, indirect taxes, and differences in the physical characteristics of the merchandise. In the case of comparisons to ESP sales, we made an adjustment for indirect selling expenses, limited by the amount of indirect selling expenses incurred in the United States. No other adjustments were claimed or allowed. Where distortions would have been created through the use of a monthly foreign market value, we calculated foreign market value based on shorter periods.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine the weighted-average margins for the period May 1, 1989 through April 30, 1990 to be:

Manufacturer/Exporter	Margin (percent)
Citrosuco Paulista S.A.	0.03
Cargill Citrus Ltda.	zero
Coopercitrus Industrial Frutesp S.A.	0.11
Montecitrus Trading S.A.	0.09
Frutropic S.A.	0.06

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service upon completion of this review.

VOL 56 ISS 118 JE 19 1991 UMI

Further, as provided for by section 751(a)(1) of the Tariff Act, because there were either *de minimis* or no margins for Cargill Citrus Ltda., Citrosuco Paulista S.A., Coopercitrus Industrial Frutesp S.A., Frutropic S.A. and Montecitrus Trading S.A. no cash deposit will be required for these manufacturers. The cash deposit rate for all other exporters/producers shall continue to be at the rate established in the final results of the last administrative review (55 FR 47502; November 14, 1990) or the antidumping duty order (52 FR 16426; May 5, 1987), as applicable. These deposit requirements/waivers, when imposed, shall remain in effect until publication of the final results of the next administrative review.

Parties to the proceeding may request disclosure within five days and interested parties may request a hearing not later than ten days after the date of publication of this notice. Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted no later than seven days after the time limit for filing the case brief. Any hearing, if requested, will be held seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 353.38(e).

Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than ten days after the representative's client or employer becomes a party to the proceeding, but in no event later than the date the case briefs, under 19 CFR 353.38(c), are due.

The Department will publish the final results of this administrative review, including the results of its analysis of issues raised in any case or rebuttal brief or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22 and 353.25.

Dated: June 12, 1991.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

[FR Doc. 91-14632 Filed 6-18-91; 8:45 am]

BILLING CODE 3510-DS-M

Exemption of Foreign Air Carrier From Customs Duties and Taxes; Request for Finding of Reciprocity (Saudi Arabia)

Notice is hereby given that the Department of Commerce is undertaking to determine whether, pursuant to sections 309 and 317 of the Tariff Act of 1930, as amended (19 U.S.C. 1309 and 1317), and section 4221 of the Internal Revenue Code of 1954, as amended (26 U.S.C. 4221), the Government of Saudi Arabia allows substantially reciprocal customs and tax exemptions to aircraft of U.S. registry in connection with international commercial operations to those exemptions granted to aircraft of foreign registry under the aforementioned statutes. The basis of this undertaking is the request of Saudi Arabian Airlines Corporation (Saudia) for a finding of such reciprocity effective retroactively to April 1, 1990.

The above-cited statutes provide exemptions for aircraft of foreign registry from payment of import duties and certain internal revenue taxes on the import or purchase of supplies in the United States for such aircraft in connection with their international commercial operations. "Supplies" as used in this context indicates a wide range of articles used by aircraft in international operations, including fuel and lubricants, spare parts, consumable supplies, and ground handling and support equipment. These exemptions apply upon a finding by the Secretary of Commerce, or his designee, and communicated to the Department of the Treasury, that such country allows, or will allow, "substantially reciprocal privileges" to aircraft of U.S. registry with respect to imports or purchases of such supplies in that country.

Interested parties are invited to submit their views and comments in writing concerning this matter to Ms Linda F. Powers, Deputy Assistant Secretary for Services, Room 1128, U.S. Department of Commerce, Washington, DC 20230. All submissions should be made in five copies and should be received no later than thirty (30) days following the publication of this notice.

Copies of all written comments received will be available for public inspection between the hours of 8:30 a.m. and 5 p.m. Monday through Friday in the Freedom of Information Records Inspection Facility, International Trade Administration, room 4102, U.S. Department of Commerce, Washington, DC.

FOR FURTHER INFORMATION CONTACT: C. William Johnson, Transportation, Tourism and Marketing Industries Division, Office of Service Industries, International Trade Administration, Room 1120, U.S. Department of Commerce, Washington, DC 20230, or telephone (202) 377-5071.

Dated: June 13, 1991.

Linda F. Powers,

Deputy Assistant Secretary for Services

[FR Doc. 91-14557 Filed 6-18-91; 8:45 am]

BILLING CODE 3510-DR-M

Export Trade Certificate of Review

ACTION: Notice of Issuance of an Amended Export Trade Certificate of Review, Application No. 87-6A004.

SUMMARY: The Department of Commerce has issued an amendment to the Export Trade Certificate of Review granted to the National Machine Tool Builders' Association on May 19, 1987. Notice of issuance of the Certificate was published in the **Federal Register** on May 22, 1987 (52 FR 19371).

FOR FURTHER INFORMATION CONTACT: George Muller, Director, Office of Export Trading Company Affairs, International Trade Administration, 202-377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001-21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing Title III are found at 15 CFR Part 325 (1990) (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a Certificate in the **Federal Register**. Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Amended Certificate

Export Trade Certificate of Review No. 87-00004, was issued to the National Machine Tool Builders' Association ("NMTBA") on May 19, 1987 (52 FR 19371, May 22, 1987) and previously amended on December 11, 1987 (52 FR 48454, December 22, 1987), January 3, 1989 (54 FR 837, January 10, 1989), April 20, 1989 (54 FR 19427, May 5, 1989), May 31, 1989 (54 FR 24031, June 12, 1989), and May 29, 1990 (55 FR 23576, June 11, 1990).

NMTBA's Export Trade Certificate of Review has been amended to:

1. Add each of the following companies as a new "Member" of the Certificate: Advanced Technologies, Incorporated, Bay City, MI; Black Brothers Co., Mendota, IL; Blue Valley Machine and Mfg. Co., Inc., Kansas City, MO; Broaching Machine Specialties, Novi, MI (controlling entity: Machinery & Equipment Exchange, Inc.); Coherent General, Inc., Sturbridge, MA (controlling entity: Coherent Inc.); Crouch Machinery, Inc., Pinehurst, NC; Curtin Hebert Co. Inc., Gloversville, NY; Debur Corporation, Chelmsford, MA; Easco Sparcatron, Whitmore Lake, MI (controlling entity: Liquid Drive Corp.); Gold Crown Machinery, Inc., Cincinnati, OH; Haas Automation, Inc., Sun Valley, CA; Hess Engineering, Inc., Niles, MI (controlling entity: Hess Industries, Inc.); Jorgensen Conveyors, Inc., Mequon, WI; MBD Machines Division, Warsaw, IN (controlling entity: Tyler Machinery Co., Inc.); Maho Machine Tool Corporation, Naugatuck, CT (controlling entity: Maho A.G., Germany); Mega Manufacturing Inc., Hutchinson, KS; Mikron Corp. Monroe, Monroe, CT (controlling entity: Mikron Holding); Murata Wiedemann Inc., King of Prussia, PA (controlling entity: Murata Machinery Ltd); Roto-Finish Co., Inc., Kalamazoo, MI (controlling entity: Kalamazoo Co.); Seneca Falls Machine Tool Co., Inc., Seneca Falls, NY (controlling entity: SFM Corporation); Wadell Machine & Tool Co., Inc., Somerset, NJ; and Xermac, Inc., Royal Oak, MI;

2. Delete each of the following companies as a "Member" of the Certificate: Autonumerics, Inc.; CAM-APT Inc.; CM Systems, Inc.; Eltee Pulsitron; Innovex; George T. Schmidt Inc.; Timmco International, Inc.; Wes-Tech Automation Systems; Western Machine Tool Works; and Wisconsin Drill Head Co.; and

3. Change the listing of current "Member" Sheffield Machine Tool Company to Sheffield Schaudt Grinding Systems, Inc.

A copy of the amended Certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Dated: June 14, 1991.

George Muller,

Director, Office of Export Trading Company Affairs.

BILLING CODE 3510-DR-M

University of California, Santa Barbara; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4204, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 89-232R. *Applicant:* University of California, Santa Barbara, Santa Barbara, CA 93106. *Instrument:* Mass Spectrometer, Model PRISM SERIES II. *Manufacturer:* VG Isotech, United Kingdom. *Intended Use:* See notice at 55 FR 2861, January 29, 1990.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. *Reasons:* The foreign instrument provides: (1) An automatic cold finger micro volume inlet with a guaranteed internal precision of 0.006 per mil for 20 bar μ1 samples of N^2 and (2) a reproducibility for hydrogen isotope ratio analysis of 0.5 per mil. This capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

Frank W. Creel,

Director, Statutory Import Programs Staff.

National Institute of Standards and Technology

[Docket No. 910528-1128]

RIN 0693-AA91

Proposed Withdrawal of Twelve Federal Information Processing Standards

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The purpose of this notice is to announce the proposed withdrawal of twelve Federal Information Processing Standards (FIPS). These standards are proposed for withdrawal because the technical specifications that they adopt are obsolete and are no longer supported by industry.

The standards proposed for withdrawal are the following:

—FIPS 3-1, Recorded Magnetic Tape for Information Interchange (800 CPI, NRZI) (ANSI X3.22-1973).

—FIPS 25, Recorded Magnetic Tape for Information Interchange (1600 CPI, Phase Encoded) (ANSI X3.39-1973).

—FIPS 50, Recorded Magnetic Tape for Information Interchange, 6250 cpi (246 cpmm), Group Coded Recording (ANSI X3.54-1976).

—FIPS 51, Magnetic Tape Cassettes for Information Interchange (3.810 mm [0.150 in] Tape at 32 bpmm [800 bpi], PE) (ANSI X3.48-1977).

—FIPS 52, Recorded Magnetic Tape Cartridge for Information Interchange, 4-Track, 6.30 mm (¼ in), 63 bpmm (1600 bpi), Phase Encoded (ANSI X3.56-1977).

—FIPS 79, Magnetic Tape Labels and File Structure for Information Interchange (ANSI X3.27-1978).

—FIPS 93, Parallel Recorded Magnetic Tape Cartridge for Information Interchange, 4-Track, 6.30 mm (¼ in), 63 bpmm (1600 bpi) Phase Encoded (ANSI X3.72-1981/R1987).

—FIPS 114, 200 mm (8 in Flexible Disk Cartridge Track Format Using Two-Frequency Recording at 6631 bprad on One Side—1.9 tpmm (48 tpi) for Information Interchange (ISO 5654/2-1985).

—FIPS 115, 200 mm (8 in) Flexible Disk Cartridge Track Format Using Modified Frequency Modulation Recording at 13262 bprad on Two Sides—1.9 tpmm (48 tpi) for Information Interchange (ISO 7065/2-1985).

—FIPS 116, 130 mm (5.25 in) Flexible Disk Cartridge Track Format Using Two-Frequency Recording at 3979 bprad on One Side—1.9 tpmm (48 tpi) for Information Interchange (ISO 6596/2-1985).

—FIPS 117, 10 mm (5.25 in) Flexible Disk Cartridge Track Format Using Modified Frequency Modulation Recording at 7958 bprad on Two Sides—1.9 tpmm (48 tpi) for Information Interchange (ISO 7487/3-1984).

—FIPS 118, Flexible Disk Cartridge Labelling and File Structure for Information Interchange (ISO 7665-1983).

Prior to the submission of this proposed withdrawal to the Secretary of Commerce for review and approval, it is essential to assure that consideration is given to the needs and views of manufacturers, the public, and State and local governments. The purpose of this notice is to solicit such views.

National Institute of Standards and Technology Visiting Committee on Advance Technology

AGENCY: National Institute of Standards and Technology, DOC.

ACTION: Notice of closed meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. app., notice is hereby given that the National Institute of Standards and Technology Visiting Committee on Advanced Technology will meet on Wednesday, June 26, 1991, from 2:30 p.m. to 3:30 p.m. The Visiting Committee on Advanced Technology is composed of nine members appointed by the Director of the National Institute of Standards and Technology who are eminent in such fields as business, research, new product development, engineering, labor, education, management consulting, environment, and international relations. The purpose of this meeting is to fully examine and discuss FY 1993 budget planning information for the National Institute of Standards and Technology.

DATES: The meeting will convene June 26, 1991, at 2:30 p.m. and adjourn at 3:30 p.m. on June 26, 1991.

ADDRESSES: The meeting will be held in room 5840, Department of Commerce, 14th and Constitution, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Dr. Dale E. Hall, Executive Director, Visiting Committee on Advanced Technology, National Institute of Standards and Technology, Gaithersburg, Maryland, 20899, telephone number (301) 975–2158.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, for Administration, with the concurrence of the General Counsel, formally determined on August 30, 1990, that portion of the meeting of the Visiting Committee on Advanced Technology which involve examination and discussion of the budget for the Institute may be closed in accordance with section 552(b)(9)(B) of title 5, United States Code, since the meeting is likely to disclose financial information that may be privileged or confidential.

Dated: June 14, 1991.

John Lyons,

Director.

BILLING CODE 3510–13–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amendment to the Export Licensing System for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of China

June 14, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs providing for the use of export licenses/commercial invoices printed on blue paper.

EFFECTIVE DATE: July 1, 1991.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Governments of the United States and the People's Republic of China have agreed, effective on July 1, 1991, to amend further the export licensing system to provide for the use of textile export licenses/commercial invoices, issued by the Government of the People's Republic of China for shipments exported from China on and after July 1, 1991, which are printed on blue guilloche patterned background paper. The blue form replaces the green and yellow licenses/invoices currently in use. The visa stamp is not being changed at this time.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

June 14, 1991.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on February 23, 1984, as amended, by the Chairman, Committee for the Implementation of Textile Agreements. That directive, as amended, establishes an export licensing system for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China.

Effective on July 1, 1991, the textile export license/commercial invoice, issued by the Government of the People's Republic of China, will be printed on blue guilloche patterned background paper for merchandise currently subject to the export licensing system, and exported from China on and after July 1, 1991. The blue form will replace the green and yellow form currently being used.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

DEPARTMENT OF DEFENSE

Office of the Secretary of Defense

Consolidation and Conversion of Defense Research and Development Laboratories Advisory Commission; Meeting

AGENCY: Department of Defense (DoD) Advisory Commission on Consolidation and Conversion of Defense Research and Development Laboratories.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the provisions of Public Law 92–463, the "Federal Advisory Committee Act," notice is hereby given that the Federal Advisory Commission on Consolidation and Conversion of Defense Research and Development Laboratories will hold meetings on June 19–20, 1991, and on July 17–18, 1991, in Washington, DC area. These meetings will convene at 8:30 a.m. and adjourn at 5 p.m. on each day of the meetings. These sessions will be closed to the public.

The purpose of these meetings is to discuss technological factors involved in developing recommendations to the Secretary of Defense on consolidating, converting, or realigning various laboratories of the Department of Defense. The entire agenda for the meeting will consist of discussions of the key issues related to future military research and technology development. These matters constitute classified information that is specifically authorized by Executive Order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive Order. Accordingly, the Director of Defense Research and Engineering has determined, in writing, that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552(c)(1) of title 5, United States Code.

This Notice of the June 19–20, 1991, meeting of the Commission is being published late due to the need to accelerate the schedule to meet the reporting dates mandated in section 246 of the National Defense Authorization Act for 1991. Operational necessity constitutes an exceptional circumstance not allowing Notice to be published in the Federal Register at least 15 days before the date of this meeting.

For further information concerning this meeting, contact: Dr. Michael Heeb, Executive Secretary to the DoD Advisory Commission on Consolidation and Conversion of Defense Research and Development Laboratories, 5109 Leesburg Pike, suite 317, Falls Church, VA 22041, Phone (703) 756–8999.

Dated: June 14, 1991.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 91–14573 Filed 6–18–91; 8:45 am]

BILLING CODE 3810–01–M

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Naval Reserve Officers Training Corps Scholarship Program Applicant Questionnaire; NAVCRUIT 1131/6; OMB No. 0703–0028

Type of Request: Revision.

Average Burden Hours/Minutes Per Response: .33 Minutes.

Responses Per Respondent: 1.

Number of Respondents: 40,000.

Annual Burden Hours: 13,200.

Annual Responses: 40,000.

Needs and Uses: An assessment of an individual's basic eligibility for the NROTC Scholarship Program is necessary for the initial screening of prospective applicants. In order to pre-screen applicants it is necessary to have information concerning date of birth, citizenship, high school graduation date, etc. Address and phone are needed to contact those individuals who are eligible and to inform those who are not. Information is provided to the individual who wishes to apply for the Four-Year NROTC Scholarship Program. The information gathered is used by Headquarters, Navy Recruiting Command to determine basic eligibility. Without this information, this could not be accomplished.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Mr. Edward C. Springer. Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DOD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce. Written request for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202–4302.

Dated: June 14, 1991.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

A new system report, as required by 5 U.S.C. 522a(r) of the Privacy Act, was submitted on June 10, 1991, to the Committee on Government Operations of the House of Representatives, the Committee on Governmental Affairs of the Senate, and the Office of Management and Budget (OMB) pursuant to paragraph 4b of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985 (50 FR 52738, December 24, 1985).

Dated: June 14, 1991.

L. M. Bynum,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

N05100-2

SYSTEM NAME:
Scheduled Parachute Jump Program.

SYSTEM LOCATION:
Naval Safety Center, Naval Air Station, Norfolk, VA 23511-5796.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:
All Navy and Marine Corps personnel and trainees who participate in the Scheduled Parachute Jump Program.

CATEGORIES OF RECORDS IN THE SYSTEM:
Unit reports of each scheduled jump, which includes name of parachutist, Social Security Number, Unit Identification Code (UIC), and model of parachute; total scheduled jump activity survey reports; and annual scheduled jump activity reports.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:
5 U.S.C. 301, Departmental Regulations and Executive Order 9397.

PURPOSE(S):
To track scheduled jump activity data for specific individuals or types of parachutes and correlate the information with parachute jump mishap data; analyze information to determine the relationship between various categories and combinations of jump experience and accident involvement.

To provide results of these studies to all echelons within the Navy and Marine Corps having responsibility for jump operations, parachute training, and allocation of resources to and within the parachute jump program.

To provide an annual summary of jump activity by parachute type to each reporting individual for his/her verification and personnel records. Upon request, a detailed by jump report for a specified time frame is also provided.

To provide records to the Chief of Naval Personnel for promotional screening, detailing, and compliance with minimum standards.

To provide summaries of jump activity for Marine Corps personnel to the Commandant of the Marine Corps.

To provide records of specific jump designated personnel to contractors, if required, for projects either funded by or deemed potentially valuable to the Department of the Navy.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:
The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:
STORAGE:
Magnetic tape and computer printouts.

RETRIEVABILITY:
Name, Social Security Number, Unit Identification Code (UIC), and model of parachute.

SAFEGUARDS:
Computer area is locked after hours and access is strictly controlled. Hard drive locked to preclude unauthorized access. Only two individuals have a key to access hard drive. Building is under 24 hour watch.

RETENTION AND DISPOSAL:
Permanent. Magnetic tape files contain all available records and are never purged.

SYSTEM MANAGER(S) AND ADDRESS:
Director of Aviation Safety Programs, Naval Safety Center, Naval Air Station, Norfolk, VA 23511-5796.

NOTIFICATION PROCEDURE:
Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Director of Aviation Safety Programs, Naval Safety Center, Naval Air Station, Norfolk, VA 23511-5796.

The request should include full name, Social Security Number, and address of the individual concerned and should be signed.

RECORD ACCESS PROCEDURE:
Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Director of Aviation Safety Programs, Naval Safety Center, Naval Air Station, Norfolk, VA 23511-5796.

The request should include full name, Social Security Number, and address of the individual concerned and should be signed.

CONTESTING RECORD PROCEDURE:
The Department of the Navy rules for accessing records and contesting contents and appealing determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:
Navy and Marine Corps jumpers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:
None.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.
ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites cosuments on proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: An expedited review has been requested in accordance with the Act, since allowing for the normal review period would adversely affect the public interest. Approval by the Office of Management and Budget (OMB) has been requested by July 12, 1991.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection request should be addressed to Mary P. Liggett, Department of Education, 400 Maryland Avenue, SW., room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Mary P. Liggett, (202) 708-5174.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 3517) requires that the Director of OMB provide interested Federal agencies and persons an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Office of Information Resources Management, publishes this notice with the attached proposed information collection request prior to submission of this request to OMB. This notice contains the following information: (1) Type of review requested, e.g., expedited; (2) Title; (3) Abstract; (4) Additional Information; (5) Frequency of collection; (6) Affected public; and (7) Reporting and/or Recordkeeping burden. Because an expedited review is requested, a description of the information to be collected is also included as an attachment to this notice.

Dated: June 13, 1991.

Mary P. Liggett,
Acting Director, Office of Information Resources Management.

Office of Special Education and Rehabilitative Services

Type of Review: Expedited
Title: Application for Grants Under the Minority Outreach Program.
Abstract: This form will be used by State Educational agencies and non-profit institutions to apply for funding under the Minority Outreach Program.
Addition Information: An expedited review is requested in order to keep the grant awards under the Minority Outreach Program in FY 1991. This application contains General Information and instructions for the program narrative, Part II of the Budget Information, Standard Form 424 (Application for Federal Assistance), Standard Form 424B (Assurances), Lobbying Certifications, Debarment Certifications, Drug-Free Certifications, and Lobbying Activities Disclosures.
Frequency: Annually.
Affected Public: State or local governments; Non-profit institutions.
Reporting Burden:
Responses: 15.
Burden Hours: 630.
Recordkeeping Burden:
Recordkeepers: 0.
Burden Hours: 0.

DRAFT

General Information

Over the past several decades, the field of special education has experienced considerable growth. Development in the preparation of committed, skilled personnel have accompanied the substantial advances in the application of knowledge, theory, and promising diagnostic and instructional practices in diverse educational settings. The Training Personnel for the Education of Individuals with Disabilities program is designed to assist institutions of higher education (IHEs) and other appropriate nonprofit agencies (NPAs) in the development and implementation of quality preservice and inservice training programs. Since its inception, the program has provided professional, technical, and financial assistance to improve the quality and increase the supply of special education and support personnel across the nation.

One Competition: This package covers a new application for one separate competition, distinguished by an independent training focus and review schedule. A description of the purpose, available resources, and program focus pertinent to this competition is provided in this application package.

Specify Absolute and Competitive Priorities: In applying for new grant funds under this program, please specify the individual competition (absolute priority) to which your agency/institution is submitting. Should

VOL 56 ISS 118 JE 19 1991 UMI

situations arise in which a training activity appears to be appropriate for more than one competition, applicants are advised to select the single competition that most accurately reflects the primary training audience to be served by the project. Applicants are responsible for selecting the most appropriate competition for proposed activities. In the event that an agency or institution develops several activities which cut across competitions, it is better to submit separate applications for activities which accurately correspond to each individual competition. It is relatively unusual for a given application to be equally appropriate under more than one competition.

Conversely, it is quite common for applications to address one or more of the competitive priorities listed. In 1990, 74 percent of applications received addressed one or more areas now listed as competitive priorities in addition to major areas identified as absolute priorities.

Applicants must complete Item 10 of ED Form 424 to identify the selected absolute priority. Applicants are urged to include in the descriptive project title (Item 11) information further clarifying the intent of the application in terms of the absolute priority. Such identification will insure the accurate and timely processing of applications.

Content and Format: Applicants are urged to review the criteria upon which applications will be evaluated, we strongly recommend that you use this form as a guide in preparing the application narrative. Peer reviewers have been consistent in their preference for applications arranged to conform with the evaluation criteria.

Public reporting burden for this collection of information is estimated to average 42 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, Information Management and Compliance Division, Washington, DC 20202–4651; and to the Office of Management and Budget, Paperwork Reduction Project 1820–NEW *, Washington, DC 20503.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Assistant Secretary for International Affairs and Energy Emergencies

Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation between the Government of the United States of America and the Government of Canada concerning Civil Uses of Atomic Energy, as amended, and the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above-mentioned agreements involves approval of the following retransfer: RTD/EU(CA)–10, for the transfer of 25 kilograms of enriched uranium scrap, enriched to 93.15 percent in the isotope uranium-235 from Chalk River, Ontario, Canada to Dounreay, Scotland, the United Kingdom, for recovery of the uranium. The recovered uranium metal is to be returned to Canada.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

Issued in Washington, DC on June 17, 1991.

Richard H. Williamson,

Associate Deputy Assistant Secretary for International Affairs.

Federal Energy Regulatory Commission

[Project No. 10909–000 New York]

Kinderhook Hydro, Inc.; Availability of Environmental Assessment

June 12, 1991.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for minor license for the proposed Kinderhook Project located on the Kinderhook Creek in Columbia County, near the Village of Valatie, New York, and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff has analyzed the potential environmental impacts of the proposed project and has concluded that approval of the proposed project, with appropriate mitigative measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3308, of the Commission's offices at 941 North Capitol Street NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[Docket No. JD91–07190T Mississippi–4]

State Oil and Gas Board of Mississippi; Notice of Determination Designating Tight Formation

June 12, 1991.

Take notice that on June 4, 1991, the State Oil and Gas Board of Mississippi (Mississippi) submitted the above-referenced notice of determination to the Commission, pursuant to § 271.703(c)(3) of the Commission's regulations, that the LT–3 Tuscaloosa Formation in the Maxie Field, in Forrest County, Mississippi, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The notice of determination cover sections 1, 2, 11, and 12 in Township 1 South, Range 13 West, sections 4–7 in Township 1 South, Range 12 West, and sections 31–33 in Township 1 North, Range 12 West. The notice of determination also contains Mississippi's findings that the referenced portion of the LT–3 Tuscaloosa Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR, 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

[Docket No. JD91–07206T West Virginia–6]

State of West Virginia; Notice of Determination Designating Tight Formation

June 12, 1991.

Take notice that on June 10, 1991, the Oil and Gas Section of the Division of Energy, within the Department of Commerce, Labor and Environmental Resources, for the State of West Virginia (West Virginia), submitted the above-referenced notice of determination to the Commission, pursuant to § 271.703(c)(3) of the Commission's regulations, that the Keefer Sandstone Formation in Mineral and Hampshire Counties, West Virginia, qualifies as a tight formation under § 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The notice of determination covers all of Mineral and Hampshire Counties. The notice of determination also contains West Virginia's findings that the referenced portion of the Keefer Sandstone Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR § 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR, sections 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

[Docket No. MT88–1–006]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

June 12, 1991.

Take notice that Algonquin Gas Transmission Company (Algonquin) on June 7, 1991, tendered for filing as part of its FER Gas Tariff, Third Revised Volume No. 1, six copies of the tariff sheets listed in the attached appendix.

Algonquin states that the revised tariff sheets are being filed to comply with the Commission's Order Nos. 497 and 497–A and in Docket No. MT88–1–000 *et al.* and MG88–3–000 *et al.* issued May 23, 1991.

The proposed effective date of the tariff sheets listed above is June 7, 1991.

Algonquin states that copies of the filing are being served on Algonquin's jurisdictional sales and transportation customers, and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedures, 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 19, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Mississippi River Transmission Corp.; Proposed Change in FERC Gas Tariff

June 12, 1991.

Take notice that on June 7, 1991 Mississippi River Transmission Corporation (MRT) tendered for filing Substitute Fourth Revised Sheet No. 72 to its FERC Gas Tariff, Original Volume No. 1–A, with a proposed effective date of November 15, 1990.

MRT states that this filing is being made in compliance with an Order issued by the Commission on May 23, 1991, in which the Commission directed MRT to set forth the title of the operating personnal shared with its affiliated marketing or brokering company.

MRT states that a copy of this filing has been mailed to each of MRT's jurisdictional customers and to the State Commissions of Arkansas, Illinois and Missouri.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 19, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

National Fuel Gas Supply Corp.; Proposed Changes in FERC Gas Tariff

June 12, 1991.

Take notice that on June 7, 1991, National Fuel Gas Supply Corporation ("National") tendered for filing Second Revised Sheets Nos. 248, 249 and 250 to its FERC Gas Tariff, Second Revised Volume No. 1, proposed to become effective on July 8, 1991.

National's proposed tariff sheets are filed in response to an order requiring compliance issued by the Commission to National on May 23, 1991 in Docket Nos. MT91–2–000, MT91–2–002 and MT91–2–003. That order required various changes in the form of National's Transportation Service Request Form to bring National into compliance with the requirements of Order No. 497–A applicable to interstate pipelines which conduct transportation transactions with affiliated marketing or brokering entities.

National states that copies of this filing were served upon the Company's jurisdictional customers and the regulatory Commissions of the States of New York, Ohio, Pennsylvania, Delaware, Massachusetts and New Jersey.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 19, 1991. Protests will be considered by the Commission in

VOL 56 ISS 118 JE 19 1991 UMI

determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Northern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

June 12, 1991.

Take notice that Northern Natural Gas Company (Northern) on June 7, 1991, tendered for filing to become part of Northern's FERC Gas Tariff, Third Revised Volume 1, the following tariff sheets:

Third Revised Volume No. 1

First Revised Sheet No. 52F.12a
Second Revised Sheet No. 52F.12b

Northern states that such tariff sheets, with a proposed effective date of July 7, 1991, are being submitted in compliance with the Commission Orders on the following Dockets:

RM87-34-065, et al. issued April 4, 1991 related to Order 500 crediting regulations
MT88-01-000, et al. issued May 23, 1991 related to Order 497 affiliate identification

Northern futher states that copies of the filing have been mailed to each of its customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of Practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 19, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

[Project No. 2687 California]

Pacific Gas & Electric Co.; Intent To File an Application for a New License

June 12, 1991.

Take notice that Pacific Gas & Electric Company, the existing licensee for the Pit 1 Hydroelectric Project No. 2687, filed a timely notice of intent to file an application for a new license, pursuant to 18 CFR 16.6 of the Commission's Regulations. The original license for Project No. 2687 was issued effective May 1, 1965, and expires December 31, 1995.

The project is located on the Fall River in Shasta County, California. The principal works of the Pit 1 Project include Pit 1 forebay and dam; a diversion dam and intake structure; a tunnel; penstocks; Pit 1 powerhouse with an installed capacity of 61 MW; a transmission line connection; and appurtenant facilities.

Pursuant to 18 CFR 16.7, the licensee is required henceforth to make available certain information to the public. This information is now available from the licensee at 245 Market Street, San Francisco, CA 94106, Attn: Mr. Steve Christ, room 514, Telephone No. (415) 973-2629.

Pursuant to 18 CFR 16.8, 16.9 and 16.10, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applciations for license for this project must be filed by December 31, 1993.

BILLING CODE 6717-01-M

[Docket No. MT88-32-003]

Sea Robin Pipeline Co.; Proposed Changes to FERC Gas Tariff

June 12, 1991.

Take notice that on June 7, 1991, Sea Robin Pipeline Company (Sea Robin) tendered for filing the following revised sheets to Original Volume No. 1 of it's FERC Gas Tariff:

Third Revised Sheet No. 45
First Revised Sheet No. 45-B
Second Revised Sheet No. 47
Third Revised Sheet No. 52
Second Revised Sheet No. 71

Sea Robin states that its proposed tariff sheets are being submitted in accordance with the Commission's Order No. 500-K and its order in Sea Robin Pipeline Company. Docket No. MT88-32-000 and reflect.

(1) The elimination from Sea Robin's tariff of all references to the Order No. 500 take-or-pay crediting program; and
(2) A change in the time in which Sea Robin will respond to complaints from 2 business days to 48 hours.

Sea Robin states that copies of the filing are being served on Sea Robin's jurisdictional shippers, and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, 20426, in accordance with Rules 214 and 211 of the commission's rules of practices and procedures, 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 19, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

First Revised Sheet No. 115
First Revised Sheet No. 116
Original Sheet No. 116a

Sea Rim states that the purpose of this filing is to comply with the Commission's Order Nos. 497 and 497-A Compliance Filing issued in Docket No. MT88-1-000, *et al.* on May 23, 1991.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's rules of practice and procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 19, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91-14536 Filed 6-18-91; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. MT88-14-003]

Williams Natural Gas Co.; Notice of Proposed Changes in FERC Gas Tariff

June 12, 1991.

Take notice that Williams Natural Gas Company (WNG) on May 31, 1991, tendered First Revised Sheet Nos. 273 and 276 to its FERC Gas Tariff, First Revised Volume No. 1. The proposed effective date of these tariff sheets is July 1, 1991.

WNG states that First Revised Sheet Nos. 273 and 276 are being filed in compliance with Commission Order (order) issued May 23, 1991. Ordering Paragraph (B)(13) required WNG to file within 15 days of the issuance of the order to include in its transportation request form the item required by § 250.16(b)(2)(vii).

WNG states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All such protests should be filed on or before June 19, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3966-5]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for reivew and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATE: Comments must be submitted on or before July 19, 1991.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 382-2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: NSPS for Phosphate Rock Plants (Subpart NN). (ICR No. 1078.03; OMB No. 2060-0111). This is a reinstatement of a previously approved collection.

Abstract: Owners or operators of phosphate rock plants must notify the delegated State authority or EPA of construction, reconstruction, anticipated and actual startup, and dates and results of the initial performance tests. Records must be maintained of the performance test results and all startups, shutdowns, and malfunctions. Owners or operators must install and maintain a continuous monitoring system (CMS) to measure opacity, or if a wet scrubber is used, monitor pressure drop and flow rate. Semiannual reports of excess emissions or monitoring system performance are required. The States and EPA use the data to ensure compliance with the standards and to target inspections.

Burden Statement: The public reporting burden for this collection of information is estimated to average 12 hours per response for reporting, and 262.5 hours per recordkeeper annually. The estimated reporting burden includes the time needed to review instructions, search existing data sources, gather the data needed and review the collection of information.

Respondents: Owners or operators of phosphate rock plants.

Estimated No. of Respondents: 13.

Estimated No. of Responses per Respondent: 6.

Estimated Total Annual Burden on Respondents: 4,324 hours.

Frequency of Collection: Once and semiannually.

Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy

Branch (PM-223Y), 401 M Street, SW., Washington, DC 20460.

and

Troy Hillier, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, DC 20530.

Dated: June 12, 1991.

Paul Lapsley,

Director, Regulatory Management Division.

[FR Doc. 91-14622 Filed 6-18-91; 8:45 am]

BILLING CODE 6560-50-M

[FRL-3966-6]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before July 19, 1991.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 382-2740.

SUPPLEMENTARY INFORMATION:

Title: Records of Polychlorinated Biphenyls (PCBs) Use, Storage and Disposal—(EPA ICR No. 0583.04; OMB #2070-0061). This is an extension of the expiration of a currently approved collection.

Abstract: In compliance with TSCA Section 6(e), owners of PCBs or equipment containing PCBs, must record the dates of PCBs removal from service, and they must record the quantity of PCBs removed from service; they must record the name of the owner of the initial storage and disposal facility, and they must record the quantity of PCBs remaining in service at the end of each calendar year. Owners of storage and disposal facilities must record the date when PCBs are received; they must record the date and identification of specific PCBs that are transferred or disposed of at another storage or disposal facility. Owners or operators of incinerators must record the quantity of PCBs fed into the incinerator, and they must track and maintain records of PCBs' incineration processes. Owners of chemical waste landfills must collect samples of surface and ground water at locations and frequencies specified by EPA; they must conduct analysis of the samples for PCBs, pH, specific conductance, and chlorinated organics, and they must record results of all analysis. Owners of high efficiency boilers must record the amount of PCBs burned each month; they must monitor the combustion processes, and they must record the results of all analysis. In addition, owners and operators of storage for disposal facilities (including high efficiency boiler operations) must maintain documents on the various facility approval actions required by Federal regulations, as well as any State or local government approval actions. Records must be maintained by the owners of PCBs and PCBs containing equipment, or the owners of the facility using, storing or disposing of PCBs. The EPA uses these data to monitor the movement and final disposal of PCBs.

Burden Statement: The annual public burden for this collection of information is estimated to average 35 hours per recordkeeper. This estimate includes the time needed to review instructions, search data sources, gather the data needed, and review the collection of information.

Respondents: Owners of PCBs' owners and operators of PCBs containing equipment; owners and operators of facilities using, storing or disposing of PCBs.

Estimated No. of Respondents: 5,501.

Estimated Total Annual Burden on Respondents: 192,535 hours.

Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y), 401 M Street, SW., Washington, DC 20460.

and

Matthew Mitchell, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, DC 20530.

Dated: June 12, 1991.

Paul Lapsley,

Director, Regulatory Management Division.

SUPPLEMENTARY INFORMATION:

Office of Solid Waste and Emergency Response

Title: Continuous Release Reporting under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (EPA ICR #1445.02; OMB #2050-0086). This ICR requests renewal of the existing clearance.

Abstract: CERCLA 103(f)(2) provides relief from the per-occurrence notification requirements of section 103(a) for hazardous substance releases that are "continuous" and "stable in quantity and rate," provided that such releases are reported annually, or at such time as there is any statistically significant increase in the quantity of the release. Under the continuous release reporting regulation (CRRR), developed by EPA's Emergency Response Division in the Office of Solid Waste and Emergency Response, the term "continuous" includes routine, anticipated, intermittent releases, in addition to releases that are continuous without interruption. Similarly, the CRRR considers a release to be "stable in quantity and rate" if it is predictable and regular in quantity and rate of release.

The information collected under the CRRR is used to evaluate the acute and chronic effects of a continuous release in order to determine if a response action is necessary to prevent or mitigate any adverse effects. Any hazardous substance release that equals or exceeds its RQ warrants a timely evaluation of its source, emission rate, and chemical form, the proximity of sensitive populations or ecosystems, and the ambient conditions, to ensure the protection of human health, welfare, and the environment. The information is also used by State and local government authorities for emergency planning and response purposes.

To report a "continuous" release, the regulated community is expected to perform the following activities: (1) One or more initial phone calls to the National Response Center (NRC); (2) an initial written report to the EPA Region; (3) a follow-up written report to the EPA Region one year after the submission of the initial written report; (4) notification to the EPA Region of any changes in release information previously submitted; (5) the immediate notification of any statistically significant increase (SSI) in the quantity of release to the NRC; (6) comply with EPA-mandated response activities; (7) and keep records on the release, including documentation of the annual evaluation. Activities (4), (5), and (6) are conditional activities expected to be necessary for only a small fraction of the continuous releases reported each year.

Burden Statement: The estimated public reporting burden for this collection of information is 14.6 hours per affected facility. This estimate includes time for determining if the hazardous substance release qualifies for reporting under the continuous release final rule, gathering and maintaining the required information, completing and reviewing the telephone and written reports, and recordkeeping.

Respondents: Any facility subject to the hazardous substance notification requirements of CERCLA section 103(a).

Estimated No. of Respondents: 12,628 affected facilities.

Estimated Total Annual Burden on Respondents: 187,379 hours.

Frequency of Collection: On occasion, when "continuous" releases meet the criteria of CERCLA 103(f)(2).

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y), 401 M Street, SW., Washington, DC 20460.

and

Tim Hunt, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, DC 20530.

Dated: June 12, 1991.

Paul Lapsley,

Director, Regulatory Management Division.

BILLING CODE 6560-50-M

[PP OG3819/T605; FRL 3925-8]

Chloroethoxyphos; Extension of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has extended temporary tolerances for the combined residues of the insecticide chloroethoxyphos (phosphorothioic acid, O,O-diethyl O-(1,2,2,2,-tetrachloroethyl) ester) in or on certain raw agricultural commodities.

DATES: These temporary tolerances expire April 9, 1992.

FOR FURTHER INFORMATION CONTACT By mail: Dennis Edwards, Product Manager (PM) 12, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 202, CM#2, 1921 Jefferson Davis Highway, Arlington, VA (703)-557-2386.

SUPPLEMENTARY INFORMATION: EPA issued a notice, which was published in the Federal Register of June 14, 1990 (55 FR 24151), announcing the establishment of temporary tolerances for the combined residues of the insecticide chloroethoxyphos (phosphorothioic acid, O,O-diethyl O-(1,2,2,2,-tetrachloroethyl) ester) in or on the raw agricultural commodities field corn, grain, forage and fodder at 0.02 part per million (ppm). These tolerances were issued in response to pesticide petition (PP) 0G3819, submitted by E. I. du Pont de Nemours and Co., Inc., Agricultural Products, P.O. Box 80038, Wilmington, DE 19880-0038.

These temporary tolerances have been extended to permit the continued marketing of the raw agricultural commodities named above when treated in accordance with the provisions of experimental use permit 352-EUP-152, which is being extended under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 95-396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that the extension of these temporary tolerances will protect the public health. Therefore, the temporary tolerances have been extended on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. E. I. du Pont de Nemours and Co., Inc., must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire April 9, 1992. Residues not in excess of this amount remaining in or on the raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

Authority: 21 U.S.C. 346a(j).

Dated: May 21, 1991.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-F

[PP 9G3797/T607; FRL 3892-3]

Quinclorac; Establishment of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established temporary tolerances for residues of the herbicide quinclorac in or on certain raw agricultural commodities. These temporary tolerances were requested by BASF Corp., Agricultural Chemicals Division.

VOL
56
ISS
118
JE
19
1991
UMI

DATES: These temporary tolerances expire March 1, 1992.

FOR FURTHER INFORMATION CONTACT: By mail: Robert Taylor, Product Manager (PM) 25, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA (703)–557–1800.

SUPPLEMENTARY INFORMATION: BASF Corp., Agricultural Chemicals Division, P.O. Box 13528, Research Triangle Park, NC 27709-3528, has requested in pesticide petition (PP) 9G3797, the establishment of temporary tolerances for residues of the herbicide quinclorac 3,7-dichloro-8-quinoline carboxylic acid in or on the raw agricultural commodities rice at 5.0 parts per million (ppm); rice straw at 12.0 ppm; rice bran at 15.0 ppm; milk at 0.05 ppm; eggs at 0.05 ppm; meat and fat of cattle, goats, hogs, sheep, horses, and poultry at 0.05 ppm; meat byproducts of cattle, goats, hogs, sheep, and horses at 0.05 ppm; and meat byproducts of poultry at 0.10 ppm. EPA issued a related food additive regulation (40 CFR 186.5225) for quinclorac, published in the **Federal Register** of April 10, 1991 (56 FR 14473). These temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit 7969–EUP–25, which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (Pub. L. 95–396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. BASF Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire March 1, 1992. Residues not in excess of these amounts remaining in or on the raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirement of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Authority: 21 U.S.C. 346a(j).

Dated: May 29, 1991.

BILLING CODE 6560–50–F

[OPP–66146; FRL 3885–7]

Sodium Arsenite; Receipt of Request to Cancel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Receipt to Cancel Registrations.

SUMMARY: This Notice, pursuant to section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136 et seq., announces EPA's receipt of a November 13, 1990 request from Agtrol Chemical Products to voluntarily cancel their registrations for products containing sodium arsenite.

DATES: Unless the request is withdrawn, a cancellation order is likely to be issued on or about September 17, 1991.

FOR FURTHER INFORMATION CONTACT: By mail: Lisa Engstrom, Special Review and Reregistration Division (H7508W), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Special Review Branch, rm. 2N6, Westfield Building # 3, 2800 Jefferson Davis Highway, Arlington, VA. (703) 308–8010.

SUPPLEMENTARY INFORMATION: This notice announces receipt of a request to cancel the registrations for products containing sodium arsenite.

I. Background

Sodium arsenite is used to control two types of fungus on grapes, Phomopsis and Black Measles, for which no alternative chemical control is known to exist. The use of sodium arsenite is limited to California since outbreaks occur only in that state. The chemical, which is packaged as a spray and applied by a unique vertical boom application, is used during December and January on dormant grape vines. The amount used is determined by the extent of disease infestation: while no treatment is required some years, other years up to 60,000 gallons may be used on up to 40,000 acres of grape vines.

II. Intent to Cancel and Delist

On November 13, 1990, the registrant, Agtrol Chemical Products submitted a letter to EPA requesting voluntary cancellation of their two products containing sodium arsenite, Sodium Arsenite Solution # 4 (EPA # 55146–35) and Sodium Arsenite Solution # 6 (EPA # 55146–25). As the basis for requesting voluntary cancellation, the company concluded the cost of generating required data did not justify continued registration of their products. It should be noted that several studies were overdue on or about the time of the cancellation request. Had voluntary cancellation not been requested, EPA would have proceeded with suspension action pursuant to FIFRA section 3(c)(2)(B). In addition, sodium arsenite is currently undergoing a Special Review for carcinogenicity concerns for workers. Sodium arsenite, an inorganic arsenical, is classified as a Group A, or known human carcinogen.

Section 6(f) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, provides that a pesticide registrant may, at any time, request that any of its pesticide registrations be cancelled. The Act further provides that EPA must publish a notice of receipt of any such request in the **Federal Register** before acting on the request.

If a valid registration for a sodium arsenite pesticide is transferred from Agtrol Chemical Products to another person desiring retention of theregistration during the 90–day period pursuant to 40 CFR 152.135, EPA will not issue the cancellation order. Nevertheless, the new registrant would be responsible for all outstanding data requirements. As noted above, at the time voluntary cancellation was requested, Agtrol Chemical Products was overdue on several data requirements and EPA planned to initiate a suspension action. Thus, if a sodium arsenite registration is transferred during the 90–day period, the new registrant would be at risk of suspension until all outstanding data requirements are met.

Comments on this voluntary cancellation request may be submitted to the contact person listed under **FOR FURTHER INFORMATION CONTACT** by September 17, 1991. In addition, interested persons desiring retention of a registration should contact the registrant directly during this 90–day period at the following address: Dr. Herbert O'Neal, Agtrol Chemical Products, 7322 Southwest Freeway, suite 1400, Houston, TX 77074, (713) 995–0111.

Unless the request for voluntary cancellation is withdrawn by the registrant, or a registration is transferred as described above, within 90 days of publication of this notice, an order is likely to be issued cancelling all registrations for sodium arsenite.

Unless the burden of supporting sodium arsenite through reregistration is assumed by the current registrant or another party who acquires the rights to a current registration containing it, sodium arsenite will no longer be a registered active ingredient and will be removed from List B. Once an active ingredient is cancelled, any person wishing to bring the pesticide back on the market would need to apply to EPA for a "new chemical" registration. Such a registration generally would not be approved until all applicable data requirements are satisfied.

III. Procedures for Withdrawal of Request

If the registrant chooses to withdraw its request for cancellation, it must submit such withdrawal in writing to Lisa Engstrom at the address given earlier, postmarked before September 17, 1991. This written withdrawal of the request for cancellation must include a commitment to pay any reregistration or registration maintenance fees due, and to fulfill any applicable unsatisfied data requirements. It should be noted, however, that because Agtrol Chemical Products is currently overdue on several studies, it may be subject to a suspension action until all outstanding data requirements are met.

IV. Existing Stocks Determination

Also included in Agtrol's voluntary cancellation request was provision for allowing the registrant to sell all stocks until depletion. The company noted they have 30,000 gallons of stock ready for the next growing season. It is not EPA policy to allow a registrant unlimited stocks provision, especially in light of an imminent suspension action. EPA therefore proposes to allow the registrants to sell and distribute their products containing sodium arsenite for 1 year after the date of cancellation. EPA will allow sale and use of products containing sodium arsenite by those holding stocks already in chains of distribution (i.e., stocks already in the hands of dealers or users). Because sodium arsenite use each year is unpredictable, EPA believes it is appropriate to allow sale and use until stocks already in chains of distribution are exhausted rather than impose a time limit on use of existing stocks, so that persons who have legally purchased stocks of sodium arsenite will be able to sell or use those stocks without violating the cancellation order.

Dated: May 24, 1991.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Access to Confidential Business Information by Research and Evaluation Associates, Incorporated

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized its contractor, Research and Evaluation Associates, Incorporated (REA), of Chapel Hill, North Carolina, for access to information which has been submitted to EPA under section 5 of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

DATES: Access to the confidential data submitted to EPA will occur no sooner than July 1, 1991.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, TSCA Environmental Assistance Division (TS–799), Office of Toxic Substances, Environmental Protection Agency, rm. E–545, 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: Under contract number 68–D8–0118, contractor REA, of 100 Europa Drive, suite 500, Chapel Hill, North Carolina, will assist the Office of Toxic Substances (OTS) in preparing hazard and health assessments of existing chemicals, and Community Right-to-Know Fact Sheets for substances regulated under TSCA and the Superfund Amendments and Reauthorization Act (SARA).

In accordance with 40 CFR 2.306(j), EPA has determined that under EPA contract number 68–D8–0118, REA will require access to CBI submitted to EPA under section 5 of TSCA to perform successfully the duties specified under the contract. REA personnel will be given access to information submitted to EPA under section 5 of TSCA. Some of the information may be claimed or determined to be CBI. EPA is issuing this notice to inform all submitters of information under section 5 of TSCA that EPA may provide REA access to these CBI materials on a need-to-know basis only. All access to TSCA CBI under this contract will take place at EPA Headquarters and 411 Chapel Hill St., Durham, North Carolina facilities only.

Clearance for access to TSCA CBI under this contract may continue until September 30, 1992.

REA personnel will be required to sign non-disclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Dated: June 13, 1991.

George A. Bonina,

Acting Director, Information Management Division, Office of Toxic Substances.

BILLING CODE 6712-01-M

[GEN Docket No. 90-217; DA 91-713]

Filing Requirements for Pioneer's Preference

Dated: June 13, 1991.

In the *Report and Order* in GEN Docket No. 90-217, the Commission adopted rules that provide preferential treatment in its licensing processes for parties requesting spectrum allocation rule changes associated with the development of new communications services and technologies.[1] This public notice is issued to address inquiries received by Commission staff regarding application of the *Report and Order* to matters now pending before the Commission.

For Commission proceedings initiated before April 9, 1991 (the date of adoption of the *Report and Order*), a preference applicant will not be required to submit a petition for rule making provided that it has previously submitted a petition for rule making or experimental license application or submits an experimental license application (or demonstration of technical feasibility) before the July 30, 1991 effective date of the *Report and Order*.[2] As the Commission stated in the *Report and Order*: "In situations where a petition for rule making has been filed or a notice of inquiry adopted, a request for a pioneer's preference may be filed by entities that either filed a petition for rule making proposing a new service or innovative technology or who filed some other request with the Commission (*e.g.*, an experimental license application) proposing a new service or innovative technology. This approach will avoid treating unfairly entities who did not file separate petitions for rule making at a time when doing so did not provide any licensing benefits, but who had come forward with a new service or innovative technology proposal."[3]

A preference request may be filed at any time subsequent to release of the *Report and Order*. While the *Report and Order* specified an effective date of July 30, 1991, preference requests filed after release of the *Report and Order* on May 13, 1991, will be accepted. However, such requests will not receive a higher ranking or other special consideration in relation to other preference requests also submitted during this initial filing period.

The Commission periodically will issue public notices soliciting comment on those requests for a pioneer's preference filed in proceedings initiated prior to the adoption of the *Report and Order*. An applicant submitting such a request should reference on the first page the rule making or docket number to which the request relates. Each such request will be assigned a file number and will be available for public inspection at the Commission's Dockets Reference Center, Room 239, 1919 M Street, NW, Washington, DC 20554, or through purchase from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, 1114 21st Street, NW, Washington, DC 20036.

This action is taken by the Chief Engineer pursuant to authority found in §§ 0.31 and 0.241 of the Commission's Rules. For further information, contact Rodney Small, (202) 653-8116.

Federal Communications Commission.
Donna R. Searcy,
Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-906-DR]

Mississippi; Amendment to a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Mississippi (FEMA-906-DR), dated May 17, 1991, and related determinations.

DATES: June 11, 1991.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3614.

NOTICE: The notice of a major disaster for the State of Mississippi, dated May 17, 1991, is hereby amended to add Public Assistance and include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of May 17, 1991:

The counties of Pontotoc, Prentiss, and Union for Individual Assistance and Public Assistance; and the counties of Humphreys, Itawamba, Lee, Leflore, Monroe, Quitman, Sunflower, Tallahatchie, Tishomingo, and Washington for Public Assistance (already designated for Individual Assistance).

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Grant C. Peterson,
Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

FEDERAL MARITIME COMMISSION

Port of New Orleans/Coastal Cargo Company, Inc; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice that the following agreement(s) has been filed with the Commission pursuant to section 15 of the Shipping Act, 1916, and section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10220. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments and protests are found in §§ 560.602 and/or 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: 224-200447-002.

Title: Port of New Orleans/Coastal Cargo Company, Inc. Terminal Agreement.

Parties: Port of New Orleans (Port)
Coastal Cargo Company, Inc.

Filing Party: Joseph W. Fritz, Jr., Staff Attorney, The Port the New Orleans, P.O. Box 60046, New Orleans, LA 70160.

Synopsis: The Agreement, filed June 7, 1991, provides for an increased rental rate for the second year of the basic agreement for the lease of certain portions of the Port's Mandeville Street Wharf.

By Order of the Federal Maritime Commission.

Dated: June 13, 1991.

Joseph C. Polking,
Secretary.

FEDERAL RESERVE SYSTEM

[Docket No. R-0716]

Federal Reserve Bank Services

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of Final Action.

DATE: June 13, 1991.

SUMMARY: The Board has approved a requirement that all depository institutions that originate or receive commercial automated clearing house (ACH) transactions through Federal Reserve Banks establish electronic access to the Reserve Banks for ACH services by July 1, 1993. The Board anticipates significant increases in nonelectronic input and output fees in January 1992 and January 1993, reflecting the higher cost of providing those aspects of the ACH service in an increasingly electronic environment. The Board has determined that the anticipated increases in nonelectronic input and output fees should provide sufficient encouragement for depository institutions to convert to electronic access. Therefore, the Board has not adopted the per transaction surcharge to nonelectronic endpoints that was proposed to be implemented in January 1993.

An all-electronic ACH will improve the efficiency of the ACH mechanism by promoting timely posting of ACH payments to customer accounts and will enhance the attractiveness of the ACH system by allowing greater processing flexibility. Also, an all-electronic ACH will enhance the integrity of the ACH mechanism by reducing credit and fraud risk, providing a higher level of security, and improving contingency and disaster recovery capabilities.

EFFECTIVE DATE: The requirement that institutions that originate or receive commercial ACH transactions through Federal Reserve Banks establish electronic connections to the Reserve Banks for ACH services will be effective July 1, 1993. The new fee structure for the nonelectronic aspects of the ACH service will be effective January 1, 1992.

FOR FURTHER INFORMATION CONTACT: Louise L. Roseman, Assistant Director (202/452-3874), Gayle Brett, Manager (202/452-2934), or Scott Knudson, Senior Financial Services Analyst, (202/452-3959), Division of Reserve Bank Operations and Payment Systems; for the hearing impaired only: Telecommunications Device for the Deaf, Dorothea Thompson (202/452-3544).

SUPPLEMENTARY INFORMATION:

Background

The ACH is a value-dated electronic payments mechanism that supports both debit and credit payments. In ACH debit transactions, funds flow from the depository institution receiving the transaction to the institution originating the transaction. Debit payments include the collection of insurance premiums, mortgage and loan payments, consumer bill payments, point-of-sale transactions, and corporate cash concentration transactions. In ACH credit transactions, funds flow from the depository institution originating the transaction to the institution receiving the transaction. Examples of credit payments include direct deposit of payroll and corporate payments to contractors and vendors. In 1990, the Reserve Banks processed 490.8 million commercial debit transactions valued at $3.18 trillion, and 424.5 million commercial credit transactions valued at $980.2 billion.[1]

Unlike Fedwire, in which funds transfers are processed individually and settled immediately at the time of processing, the ACH is a batch-processing system in which transactions are generally deposited at Reserve Banks for processing one or two days before the settlement date and are processed and delivered to receiving institutions during either the day or night processing cycle.

As of March 31, 1991, approximately 7,200 of the 10,050 endpoints that receive commercial ACH services directly from the Reserve Banks did not have electronic data communications links with the Reserve Banks for ACH services. These nonelectronic endpoints receive ACH transactions using magnetic tape, diskette, or paper media. Some nonelectronic endpoints use messengers to deposit ACH input and either pick up ACH output or receive it by Federal Reserve check courier or by mail.

Because of the additional time required to deliver ACH output to nonelectronic endpoints, ACH credit payment information necessary to update customers' accounts may not be received by some receiving institutions until after the opening of business on the settlement day. In addition, the need to deliver some ACH output nonelectronically restricts the Federal Reserve's ability to offer ACH deposit and distribution schedules that better meet the needs of depository institutions and their customers. Moreover, the need to originate many ACH credit payments up to two days prior to settlement date in order to help ensure timely receipt by the nonelectronic endpoints makes the ACH system unattractive for certain payment applications and increases credit risk in the system. Finally, the security and disaster recovery capabilities associated with nonelectronic delivery of ACH payments are inferior to those associated with electronic transmission.

---

[1] *See Report and Order*, GEN Docket No. 90-217, released May 13, 1991, FCC 91-112.

[2] A proceeding will be considered to have been initiated before the adoption of the *Report and Order* if the Commission adopted a notice of inquiry before this date (as was the case, for example, in GEN Docket No. 90-314, dealing with new personal communications services, and GEN Docket No. 90-357, dealing with new digital audio radio services) or if a petition for rule making was filed and accepted before this date (as was the case, for example, in RM No. 7394, dealing with a petition filed by Orbital Communications Corporation to establish a low-Earth orbit satellite service).

[3] *Report and Order*, at para. 70.

[1] Commercial ACH transactions are ACH transactions originated by depository institutions. Government ACH transactions are originated by the federal government.

VOL 56 ISS 118 JE 19 1991 UMI

Proposal to Implement an All-Electronic ACH

The Board believes that the Federal Reserve could make significant improvements to its ACH service if all participating institutions accessed the service electronically to originate and receive ACH transactions. Some of these improvements cannot be fully acheived unless all ACH endpoints send and receive ACH transactions electronically.

The Monetary Control Act directs the Federal Reserve to consider, in its pricing principles, the provision of an adequate level of service nationwide. This provision relates not only to the availability of the service to all depositary institutions, but also to the level of service that is provided. The Board believes that the establishment of an all-electronic ACH is consistent with the Monetary Control Act and Federal Reserve policies concerning payment services in that it will enable the Federal Reserve to make major improvements to its ACH service.

An all-electronic ACH will enable Federal Reserve Banks to make significant improvements to their processing schedules. Current schedules are constrained by the timing of check courier dispatches because check couriers deliver ACH output to many receiving institutions. The elimination of these constraints will allow for later deposit deadlines, thereby facilitating the use of the ACH for a broader range of payment applications.

Another benefit of an all-electronic ACH is the increased speed with which ACH payments can be delivered. This would ensure that all institutions, regardless of their volume or location, would receive ACH output on a timely and consistent basis to enable them to post payment information to customers' accounts sooner and thereby provide more prompt funds availability. The assurance of timely delivery may facilitate the use of the ACH for payments, such as hourly payroll, that are not generally made via the ACH today.

Depository institutions in an all-electronic environment will be able to reduce the credit risks associated with ACH credit transfers because the time between the time of deposits and settlement of transactions can be reduced. Credit risk associated with debit return items is also reduced because the originating institution generally will receive the return item one or two days sooner than if it were received in nonelectronic form.

An all-electronic ACH network will result in a higher level of security for all ACH transactions. The Reserve Banks currently offer data encryption and other security procedures to electronic endpoints to assure confidentiality of ACH transactions and authenticity of the sender. This provides a significantly higher level of security than for nonelectronic deposit and delivery alternatives.

Finally, an all-electronic ACH will improve disaster recovery and contingency processing capabilities. Electronic access to ACH services will eliminate delays associated with transporting nonelectronic input and output media to and from a remote site in a contingency processing or disaster recovery situation.

The Reserve Banks have already taken certain steps to require electronic access. Beginning January 1, 1991, new commercial ACH receiving points (including endpoints that had received only government ACH transactions but begin to receive commercial transactions) were required to receive ACH transactions from the Reserve Banks electronically. In addition, beginning July 1, 1991, new sending points will be required to originate ACH transactions to Reserve Banks electronically.

If the benefits of an all-electronic ACH are to be realized within the next few years, the Board believes that the Federal Reserve will have to encourage more actively the development of an all-electronic ACH network. In December 1990, the Board requested comment on a proposal to require depository institutions that originate or receive commercial ACH transactions through the Federal Reserve Banks to establish electronic connections with the Reserve Banks for ACH services (55 FR 53051, December 26, 1990). Specificially, the Board proposed that the Federal Reserve's commercial ACH service would no longer be provided to institutions that could not deposit and receive ACH transactions electronically, beginning July 1, 1993. In order to encourage institutions to establish electronic connections prior to the conversion deadline and thus avoid a large number of requests for electronic access immediately prior to the deadline, the Board also proposed that a per transaction surcharge on commercial ACH transactions originated or received be assessed to depository institutions using nonelectronic ACH deposit or delivery alternatives, beginning January 1, 1993. In addition, to further encourage nonelectronic endpoints to convert to electronic access, the Board indicated that ACH fees for nonelectronic input and output media likely would be increased significantly.

Summary of Comments

The Board received 61 comments on the proposal. The following table reflects the number of comments by category of respondent.

	Comments Received
Commercial Banks/Bank Holding Companies	42
ACH Associations	15
Trade Associations	8
Credit Unions	6
Data Processors	4
Savings Bank	1
Corporation	1
Department of the Treasury	1
Federal Reserve Banks	3
Total	81

Seventy commenters supported the Board's proposal to establish an all-electronic ACH. Thirty-three commenters supported the proposal in its entirety, and thirty-seven commenters supported the Board's objective to establish an all-electronic ACH but expressed some reservations about certain aspects of the proposal. The reservations generally centered on the use of incentive pricing (i.e., the proposed transaction surcharge and the anticipated increase in nonelectronic input and output fees), and the cost to small depository institutions of establishing an electronic connection. The commenters that opposed the use of transaction surcharges and nonelectronic input and output fee increases argued that incentive pricing is inconsistent with provisions of the Monetary Control Act and were concerned that the Federal Reserve would use the revenue obtained from the incentive fees to subsidize other ACH fees, thereby creating potential competitive inequities between the Federal Reserve and private-sector ACH processors.

Eleven commenters opposed the proposal. These commenters, which were small depository institutions concerned about the cost to establish an electronic connection for delivery of ACH transactions, generally questioned the benefits to them of an all-electronic ACH. These commenters were generally less than $50 million in asset size and generally originated and/or received an average of approximately 1,000 items per month.

Commenters generally supported the establishment of a conversion deadline for electronic access. These commenters indicated that transaction surcharges and nonelectronic input and output fee increases alone would not be sufficient to encourage all depository institutions (particularly smaller institutions) to convert to an electronic connection. Commenters generally indicated that there are no significant obstacles to prevent them from converting by the mid-1993 proposed conversion deadline. Several commenters expressed concern that the Federal Reserve may not be able to provide training and installation support sufficient to meet the proposed conversion deadline. Several other commenters expressed a preference for an earlier conversion date.

Overall, the commenters believed that the Federal Reserve's electronic access alternatives—computer interface (bulkdata or vendor software), Fedline, and FLASH-Light [3]—are sufficient to meet the institutions' needs. There was some concern, however, that these alternatives may be too expensive for very low-volume institutions. Finally, several commenters suggested that in order to ensure the success of the conversion effort, there needs to be more publicity and awareness of the effort, and the Federal Reserve System should work closely and cooperatively with the ACH associations and other industry groups.

The Board, after considering the comments received, has adopted a mandatory conversion deadline for an all-electronic ACH of July 1, 1993. In addition, the Board anticipates that it will increase significantly, beginning January 1992, the nonelectronic tape input and output fees and paper output fees to reflect the higher cost of providing these aspects of the ACH service in an increasingly electronic environment. The Board believes that these fee increases also will serve to provide sufficient encouragement for depository institutions to convert to electronic access for Federal Reserve ACH services and therefore has not adopted the per transaction surcharge to nonelectronic endpoints proposed to be implemented in January 1993. The following discusses the specific issues raised by the commenters and the Board's response.

[3] The Federal Reserve currently offers depository institutions several connection alternatives to facilitate the conversion to electronic access for ACH services. The alternatives are designed to meet the needs of institutions with various transaction volume levels. Medium- to high-volume institutions can use a computer interface connection using either the Federal Reserve's bulkdata software or vendor software that meets Federal Reserve protocol specifications. Low- to medium-volume institutions can use Fedline intelligent-terminal software, and low-volume institutions can use FLASH-Light intelligent-terminal software with receive-only capabilities.

Conversion Deadline. The Board proposed that the Federal Reserve will no longer provide commercial ACH services to depository institutions that have not established an electronic connection for ACH services, beginning July 1, 1993. Sixty-seven commenters supported the imposition of a conversion deadline for electronic access. Of those, six commenters expressed concerns regarding the Federal Reserve's ability to convert the large number of nonelectronic endpoints by that date. Seven commenters that supported a conversion deadline indicated that the Federal Reserve could set an earlier target date to achieve an all-electronic ACH and two commenters recommended that the Federal Reserve set an earlier conversion date. Two commenters that supported the concept of an all-electronic ACH questioned the need for a mandatory conversion date.

The Board has adopted the proposed July 1, 1993, conersion deadline. This deadline should provide reasonable time for depository institutions to establish electronic access. The Board believes that this schedule is ambitious but realistic in terms of the ability of the Federal Reserve Banks to support the conversion. The Reserve Banks have developed conversion plans and are devoting additional resources to the electronic conversion effort. To ensure that the conversion deadline is achieved and to avoid a large number of conversions at the end of the transition period, nonelectronic endpoints should allow sufficient lead time when requesting electronic access to allow for ordering equipment, testing, and training their staffs. Therefore, depository institutions requiring computer interface (bulkdata or vendor software) connections should place orders for the connections no later than February 28, 1993. Depository institutions planning to use Fedline or FLASH-Light connections should place orders no later than March 31, 1993. The earlier date for computer interface connections reflects the additional time required for testing and training when installing these connections.

Nonelectronic Input and Output Fee Increases and transaction Surcharge

The Board proposed that a transaction surcharge be assessed on commercial ACH transactions originated and received by nonelectronic deposit and delivery alternatives, beginning January 1, 1993. The Board also indicated that ACH fees for nonelectronic input and output media would be increased significantly, beginning January 1, 1992. Forty-one commenters supported the fee increases or indicated that higher fees would encouarge the conversion to electronic connections. Fourteen commenters opposed the use of the surcharge. Although the Board did not anticipate that the proposed fee increases would result in an overrecovery of the cost of providing ACH services, eleven commenters opposed the nonelectronic input and output fee increases and transaction surcharges on the gorunds that all fees should be based on the cost of providing the service. They argued that, if the Federal Reserve were to base fees on factors other than cost, these fees could be used to subsidize the ACH transaction fee assessed to electronic endpoints, which could create competitive inequities between the Federal Reserve and private-sector ACH processors. Other commenters opposing the surcharge stated that the higher costs could be punitive for small depository institutions, which may elect to cease participation in the ACH.

Under the current fee structure, both paper and tape output are assessed the same fee, with a higher fee assessed for output delivered by the Federal Reserve rather than picked up by the depository institution. To reflect more accurately the significant differences in cost between tape and paper output, separate fees will be assessed for tape and paper output, beginning January 1, 1992.

Nonelectronic input and output fees have increased significantly in recent years to better reflect the cost of providing these aspects of the ACH service. In its request for comment, the Board indicated that nonelectronic input and output fees may increase by 50 to 100 percent in January 1992. The Board anticipates that the tape input and output fees and paper output fees will increase substantially in 1992 because, in the case of the tape fees, the current fees do not fully recover the cost of providing these nonelectronic aspects of the ACH service, and because the fixed costs of providing these input and output options will be spread over fewer nonelectronic endpoints as conversions occur. These fees will further increase in 1993 as the number of nonelectronic endpoints continues to decrease.

The Board anticipates that it will set the tape input fees at the same level as the tape output fees and that these fees will be in the range of $12.00 to $15.00 (compared to $4.50 or $5.25 for output or $6.00 for input in 1991). The Board anticipates that paper output fees in 1992 will be in the range of $6.00 to $9.00 (compared to $4.50 or $5.25 in 1991). Output fees may be set somewhat higher for output delivered by the Federal

VOL 56 ISS 118 JE 19 1991 UMI

Reserve rather than picked up by the depository institution. The Board anticipates that these increases in nonelectronic input and output fees should be sufficient to encourage an orderly migration to an all-electronic environment, and thus has not adopted the proposed transaction fee surcharge.

Depository institutions that wish to establish an electronic connection in 1991 and thus avoid the 1992 nonelectronic input and output fee increases should allow sufficient lead time when requesting electronic access. Depository institutions planning to establish Fedline or FLASH-Light connections in 1991 should request their conversion to electronic access no later than September 30, 1991. Depository institutions that plan to establish computer interface (bulkdata or vendor software) connections in 1991 should request their conversion no later than August 31, 1991. To avoid further nonelectronic input and output fee increases in 1993, depository institutions that plan to establish computer interface connections (bulkdata or vendor software) during 1992 should request their connections by August 31, 1992. Institutions that plan to establish Fedline or FLASH-Light connections during 1992 should request their connections by September 30, 1992. A depository institution that requests, by the applicable date noted above, to establish an electronic connection will not be assessed the increased input and output fees that take effect the following year if there is a delay in the installation of the electronic connection that is not attributable to the depository institution.

Several commenters suggested an alternative approach to the proposed pricing incentives that would encourage depository institutions to convert to electronic access prior to the conversion deadline. They recommended that the Federal Reserve waive the installation and training fees that are assessed when an electronic connection is established, noting that this approach would be similar to measures taken by the New York Clearing House in its all-electronic ACH conversion effort. Although the Board agrees that this approach would provide further incentive to depository institutions to establish electronic access for ACH services, it believes this approach would be unfair to those depository institutions that have already established an electronic connection and paid the applicable training and installation fees.

Electronic Access Alternatives

Twenty-six respondents commented on the acceptability of the currently available electronic access alternatives. Ten of these commenters indicated that the alternatives are acceptable and meet the needs of depository institutions. Fourteen commenters, however, believed that the alternatives are expensive, especially for low-volume institutions, and may not provide enough features to be cost effective for all institutions. A few commenters believed that the personal computers on which Fedline is run cannot be used efficiently for other purposes, and noted that institutions with FLASH-Light connections lack the ability to originate return items and notifications of change (NOCs) electronically.

Depository institutions are not required to dedicate a personal computer to Fedline use. The personal computer used for Fedline can be used to support other software applications. A recent System study of Fedline users indicated that currently about 40 percent of the users also use their Fedline personal computer for other purposes. Federal Reserve Bank personnel are working closely with institutions to improve their level of service by dedicating their personal computers for Fedline use to only certain peak times during the day. The Federal Reserve will continue its efforts to improve the ease of use and the efficiency of the Fedline software. Software compression techniques have been developed to make the Fedline applications run more efficiently, and the capability of offering Fedline on a modular basis is being researched. In addition, the Federal Reserve will enhance the FLASH-Light software to enable it to receive Fedwire funds transfers, in addition to ACH transactions.

To enable FLASH-Light users to have a more automated means of originating return items and NOCs via telephone access, all Reserve Banks will offer return item database services by year-end 1991, and telephone voice-response access capabilities by year-end 1992. These services will create the return item or NOC transaction from information about the transaction that is stored on a database and accessed via touch-tone telephone by the depository institution. Although the cost of these services is more than the cost of an electronically originated return item or NOC, it is considerably less than the current cost of a paper return or NOC.

Two respondents indicated that reductions in the up-front cost of establishing an electronic connection could be achieved if a larger variety of personal computers is certified by the Federal Reserve. The Federal Reserve System has certified Fedline software to run on IBM and some IBM-compatible personal computers. In addition, some districts have certified other compatible personal computer hardware. The majority of personal computers in use should be capable of running Fedline software. The Federal Reserve Banks will work with institutions to identify whether a specific model of personal computer will support Fedline software if there is sufficient demand. To assist those depository institutions that might not have a compatible computer, the Federal Reserve Banks have entered into group purchase agreements with a number of vendors in order to obtain equipment at a reasonable cost.

The Board acknowledges that in some cases very low-volume depository institutions may conclude that they cannot justify the cost of an electronic connection for their ACH activity and may elect to stop participating in the ACH. In lieu of incurring the cost of an electronic connection, these institutions can continue to participate in ACH through a correspondent institution or other service provider that has established an appropriate electronic connection with the Federal Reserve.

Two commenters that indicated that the current electronic access alternatives are too expensive identified the need for a low-cost fax alternative for the very low-volume depository institutions. The Federal Reserve System recently completed a pilot test using current fax technology for low-volume ACH receivers. The results of the study indicated that current fax technology does not meet the minimum security standards required by the Federal Reserve for its ACH service. Once adequate security features are added, the cost of fax would exceed the cost of intelligent-terminal access.

Additional Issues Fourteen commenters stated that in order for the Federal Reserve System to establish an all-electronic ACH within the projected timeframe, there needs to be a strong education and marketing effort that is closely coordinated between the Federal Reserve Banks and ACH associations and other industry trade groups. The Federal Reserve Banks are working closely with the appropriate ACH groups to encourage conversion to electronic connections. For example, the Federal Reserve Banks have informed the local ACH associations of which of their members obtain Federal Reserve ACH services electronically and nonelectronically and have provided a contact name at each Federal Reserve Bank, enabling the associations to work with their members interested in establishing electronic connections to the Federal Reserve. In addition, the Federal Reserve will continue to work with other trade associations that are interested in disseminating information regarding the all-electronic ACH effort to their memberships.

Seven commenters stated that government-only ACH receivers should be treated the same as commercial ACH receivers and also be required to establish electronic connections to more fuly realize the benefits of an all-electronic ACH. The Board believes that the majority of the benefits of an all-electronic ACH environment can be derived for commercial ACH participants even if some government-only endpoints remain nonelectronic. Nonetheless, an all-electronic environment for government ACH transactions would provide benefits both to the receiving institutions and to the U.S. government. Therefore, the Board is continuing to work with the Treasury on plans to establish an all-electronic ACH for government-only receivers, and anticipates that it will request comment in late 1991 on a proposal to achieve this objective.

Several commenters raised issues related to contingency backup in an all-electronic ACH environment. They suggested that magnetic tape capabilities should continue to be made available for backup purposes. Improved contingency processing and disaster recovery capabilities are benefits of an all-electronic processing environment. Electronic access to ACH services would eliminate the delays associated with delivering physical input and output media from a remote processing site in a contingency processing or disaster recovery situation. Moreover, depository institutions can send payment file corrections to their Reserve Bank more quickly through electronic transmission than if physical delivery of the payment file information were necessary, reducing the likelihood of a delay in normal processing as well as in a contingency processing situation. For those contingency situations where electronic backup cannot be utilized, the Federal Reserve plans to maintain capabilities for nonelectronic input and output options.

The Federal Reserve Bank of Minneapolis recently lost its primary computer processing capability and was required to begin processing its ACH and other electronic payments at the Federal Reserve's backup processing center in Culpepper, Virginia. This experience demonstrated that depository institutions that were electronically connected to the Federal Reserve Bank were able to send and receive ACH transactions on a more timely and efficient basis than were nonelectronic depository institutions.

Competitive Impact Analysis

The Board does not believe that this action will have any adverse effects on the ability of other ACH service providers to compete effectively with the Federal Reserve in providing ACH services. The New York Automated Clearing House currently requires its members to send and receive ACH transactions electronically. Other ACH service providers also predominately serve participants electronically.

By order of the Board of Governors of the Federal Reserve System, June 13, 1991.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

NBD Bancorp, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 8, 1991.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. NBD Bancorp, Inc., Detroit, Michigan; to acquire 100 percent of the voting shares of FNW Bancorp, Inc., Mount Prospect, Illinois, and thereby indirectly acquire Countryside Bank of Stratford, Bloomingdale, Illinois; The First National Bank of Elgin, Elgin, Illinois; The Larkin Bank, Elgin, Illinois; The First National Bank of Lake Zurich, Lake Zurich, Illinois; The Heritage Bank of Lemont, Lemont, Illinois; Countryside Bank, Mount Prospect, Illinois; The First National Bank of Mount Prospect, Mount Prospect, Illinois; and The Heritage Bank, Woodridge, Illinois.

In connection with this application, Applicant also proposes to acquire FNW Capital, Inc., Mount Prospect, Illinois, and thereby engage in commercial leasing activities pursuant to § 225.25(b)(5) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, June 13, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

National City Corporation, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for

VOL 56 ISS 118 JE 19 1991 UMI

processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than July 8, 1991.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. National City Corporation, Cleveland, Ohio; to acquire 100 percent of the voting shares of Gem Bank, National Association, Dayton, Ohio, a *de novo* bank.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. First of Huron Corporation, Bad Axe, Michigan; to acquire 100 percent of the voting shares of State Bank of Port Hope, Port Hope, Michigan.

C. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Laredo National Bancshares, Inc., Laredo, Texas; to acquire 100 percent of the voting shares of Southshares, Inc., Laredo, Texas, and thereby indirectly acquire South Texas National Bank of Laredo, Laredo, Texas.

Board of Governors of the Federal Reserve System, June 13, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

Transactions Granted Early Termination Between: 052791 and 060791

[File No. 892-3081]

Taylor Woodcraft, Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a Malta, Ohio, furniture company from representing that any household furniture product is constructed of a solid wood, unless every exposed surface of the furniture is made of that solid wood.

DATES: Comments must be received on or before August 19, 1991.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Kelly Larrick-Serrat, Cleveland Regional Office, Federal Trade Commission, 668 Euclid Ave., suite 520-A, Cleveland, OH 44114, (216) 522-4210.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

Agreement Containing Consent Order to Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Taylor Woodcraft ("proposed respondent"), a corporation, and it now appearing that proposed respondent is willing to enter into an agreement containing an Order to Cease and Desist from the use of the acts or practices being investigated,

It is Hereby Agreed by and between proposed respondent, by its duly authorized officer and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent is a corporation organized, existing, and doing business under and by virtue of the laws of the State of Ohio, with its office and principal place of business located in Malta, Ohio.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft Complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's Decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the Order entered pursuant to this Agreement; and

(d) Any claim under the Equal Access to Justice Act, 5 U.S.C. 504.

4. This Agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this Agreement is accepted by the Commission, it, together with the draft Complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information with respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this Agreement and so notify proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its Complaint (in such form as the circumstances may require) and Decision, in disposition of the proceeding.

5. This Agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft Complaint here attached.

6. This Agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant

VOL 56 ISS 118 JE 19 1991 UMI

to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its Complaint corresponding in form and substance with the draft Complaint and its Decision containing the following Order to Cease and Desist in disposition of the proceeding, and (2) make information public with respect thereto. When so entered, the Order to Cease and Desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The Order shall become final upon service. Delivery by the United States Postal Service of the Complaint and Decision containing the agreed-to Order to proposed respondent's address as stated in this Agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The Complaint attached hereto may be used in construing the terms of the Order. No agreement, understanding, representation, or interpretation not contained in the Order or the Agreement may be used to vary or contradict the terms of the Order.

7. Proposed respondent has read the proposed Complaint and Order contemplated hereby. It understands that once the Order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the Order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the Order after it becomes final.

Order

For purposes of this Order, the following definition applies:

(A) *Exposed surface* means those parts and surfaces exposed to view when furniture is placed in the generally accepted position for use. Included in this definition are visible backs of such items of furniture as open bookcases, hutches, etc.

I

It Is Ordered that respondent Taylor Woodcraft, a corporation, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the the manufacture, advertising, offering for sale, sale, or distribution of any household furniture in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or by implication, that such furniture is constructed of a solid wood, unless every exposed surface of such product is made of that solid wood.

II

It Is Further Ordered that respondent shall maintain for a period of three (3) years, and upon request make available to the Commission for inspection and copying, accurate records of all materials relied upon by respondent to substantiate any representation covered by this Order.

III

It Is Further Ordered that respondent shall notify the Commission at least thirty (30) days prior to any proposed change in respondent, such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of the Order.

IV

It Is Further Ordered that respondent shall:

A. Notify any purchaser, prior to delivering the purchaser's order from household furniture and excluding those purchasers to whom the respondent has distributed this order under B of this paragraph, that the furniture contains exposed veneered surfaces, if the respondent has made representations that the furniture is solid wood and the furniture, in fact, contains exposed veneered surfaces.

B. Distribute this order to the following:

1. Each of its operating divisions, officers and other personnel responsible for the preparation or review of promotional material;

2. Each distributor, retail outlet, and wholesale outlet that stocks or has stocked Taylor Woodcraft's furniture and to which it has sold or delivered household furniture since January of 1987; and

3. Each distributor, retail outlet and wholesale outlet to which Taylor Woodcraft has sold or delivered household furniture for which it received payment of $2,000 or more in any year since January of 1987.

V

It Is Further Ordered that respondent shall, within sixty (60) days after service of this Order, file with the Commission a report, in writing, setting forth in detail the manner in which it has complied with this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted, subject to final approval, an Agreement to a proposed Consent Order from Taylor Woodcraft. The agreement would settle charges by the Commission that Taylor Woodcraft violated section 5 of the Federal Trade Commission Act by misrepresenting its furniture in promotional materials.

The proposed Consent Order has been placed on the public record for sixty (60) days for receipt of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the Agreement and the comments received, and will decide whether it should withdraw from the Agreement and take other appropriate action or make final the proposed Order contained in the Agreement.

This matter concerns promotional materials for Taylor Woodcraft's household furniture which claim that certain furniture is made of solid wood.

The Commission's Complaint in this matter charges Taylor with disseminating promotional materials containing false and unsubstantiated representations regarding the content of its furniture. Some of the promotional materials imply that certain of Taylor's furniture pieces are constructed entirely of solid wood. The Complaint alleges that these claims are, in fact, false, because such furniture contains veneered exposed surfaces. Claims such as these are inconsistent with the Commission's "Guides for the Household Furniture Industry," 16 CFR 250.2(b).

The Consent Order contains provisions designed to remedy the violations charged, as well as prevent Taylor from engaging in similar acts and practices in the future. Part I of the Order prohibits Taylor from representing, directly or by implication, that its furniture is constructed of solid wood, unless every exposed surface of the furniture is made of solid wood.

Part II of the Order requires Taylor Woodcraft to retain all substantiation relied upon for its promotional materials for a period of three (3) years.

Part III of the Order requires Taylor to report to the Commission at least thirty (30) days before certain corporate changes are made.

Part IV of the Order requires that Taylor Woodcraft provide a copy of the Order to many of its distributors, retail outlets and wholesale outlets and notify certain future purchasers that furniture contains exposed veneered surfaces if Taylor has falsely represented that the furniture is solid wood.

The purpose of this Analysis is to facilitate public comment on the proposed Order. It is not intended to constitute an official interpretation of the Agreement and proposed Order or to modify in any way their terms.

Donald S. Clark,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 89D-0363]

Action Levels for Residues of Certain Pesticides in Food and Feed; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; general statement of policy; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a document that published in the **Federal Register** on July 27, 1990 (55 FR 307976). The July 27, 1990, document was also intended to correct an error that appeared in the **Federal Register** of April 17, 1990 (55 FR 14350), by changing the residue level in the table under the heading "C. Chlordane" for the last five commodity entries to read "0.01" rather than ".1". However, this was not appropriate and the residue level should have remained ".1". This notice intends to resolve any confusion that may have resulted from the July 1990 publication.

FOR FURTHER INFORMATION CONTACT: John R. Wessel, Office of Regulatory Affairs (HFC-6), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1815.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of April 17, 1990, FDA published a notice explaining how the agency will use action levels in regulating residues of certain pesticides (55 FR 14359). FDA subsequently published corrections to the April 17, 1990, notice in the **Federal Register** of July 27, 1990 (55 FR 30796). Item 3 of the correction notice stated "On page 14361, in the third column, in the table for C. Chlordane, the last five entries in the second column should read '0.01'." FDA has since determined that the correction set out in item 3 of the July 7, 1990, notice was in error. Accordingly, FDA confirms that the correct action level for chlordane residues in sweet potatoes, swiss chard, tomatoes, turnips (with or without tops), and turnip greens should read ".1," as originally set out in the April 17, 1990, notice.

Dated: June 13, 1991.

Ronald G. Chesemore,

Associate Commissioner for Regulatory Affairs.

Public Health Service

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection request it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). The following requests have been submitted to OMB since the list was last published on June 7, 1991.

(Call PHS Reports Clearance Officer on 202-245-2100 for copies of request.)

1. National Exposure Registry—0923-0001—ATSDR will establish a National Registry of individuals exposed to toxic substances. This Registry will serve as a permanent record of persons exposed to toxic chemicals and will aid in assessing long-term health consequences of this exposure. *Respondents:* Individuals or households; *Number of Respondents:* 23,244; *Number of Responses per Respondent:* 1; *Average Burden per Response:* .396 hours; *Estimated Annual Burden:* 11,175 hours.

2. Surveillance and Associated Epidemiologic Investigations of Occupationally-Related Infection with Human Immunodeficiency Virus in Health Care & Public Safety Settings—N/A—The data collection instrument is designed to gather information on documented or presumed occupational exposure to HIV and to establish whether seroconversion or an illness consistent with an acute retroviral illness has occurred. *Respondents:* Individuals or households; Number of *Respondents:* 100; *Number of Responses per Respondent:* 1; *Average Burden per Response:* 1 hours; *Estimated Annual Burden:* 100 hours.

3. Infant Feeding Practices Study—0910-0220—A sample of women will be followed by mail questionnaires from late pregnancy through the baby's first year to provide data for describing infant feeding patterns, health promotion activities, and market related behaviors. The information will be used to meet FDA's commitments in the feeding safety and health promotion of infants. *Respondents:* Individuals and households; *Number of Respondents:* 610; *Number of Responses per Respondent:* 11; *Average Burden Per Response:* .228 hours; *Estimated Annual Burden:* 1,530 hours.

4. Nursing Student Education Loan Demonstration Program—New—Full-time nursing students wishing to participate in the Nursing Student Education Loan Program must complete an application. Applicants must arrange employment at an eligible facility and secure an employer's commitment to repay the education loans in return for services provided by the applicant. *Respondent:* Individuals or households, businesses or other for-profit, small businesses or organizations.

	No. of respondents	No. of responses per respondent	No. of hours per response
Nursing Student Applicant	30	1	15
Employment Confirmation	30	1	1
School Documents	30	1	1

Estimated Annual Burden ..... 510 hours

5. National Survey of Worksite Health Promotion Activities 1991—New—The Office of Disease Prevention and Health Promotion is sponsoring this survey of worksites with 50 or more employees to determine the nature and extent of activities, to measure progress since a 1985 survey and to assess success on achieving 1990 and Year 2000 disease prevention/health promotion objectives. *Respondents:* Businesses or other for-profit, non-profit institutions; *Number of Respondents:* 1,551; *Number of Responses per Respondent:* 1; *Average Burden per Response:* .475 hours; *Estimated Annual Burden:* 739 hours.

6. Loans for Disadvantaged Students and Scholarships for Disadvantaged Students—New—Health Professions schools applying to participate in the Loans for Disadvantaged Students (LDS) and/or Scholarships for Disadvantaged Students (SDS) programs provide information on the application about the schools' programs and the race/ethnicity of full-time students and minority faculty. This information is needed to determine program eligibility. *Respondents:* Non-profit insitutions; *Number of Respondents:* 500; *Number of Responses per Respondent:* 1; *Average Burden per Response:* 5 hours; *Estimated Annual Burden:* 2,500.

VOL 56 ISS 118 JE 19 1991 UMI

7. NIDA Quick Response Surveys—Concept—New—The National Institute on Drug Abuse (NIDA) proposes to undertake an indefinite quantity of telephone, mail, and public interception surveys at the request of the Office of National Drug Control Policy and other Federal policy bodies. *Respondents:* Individuals or households, State or local governments, businesses or other for-profit, non-profit institutions, small businesses or organizations; *Annual Reporting Burden:* Since this is a concept clearance, definitive burden estimates are not yet available. These estimates will be provided when the study design and questionnaires are final and the final clearance request is submitted.

8. National Sample Survey of Registered Nurses V—New—The Bureau of Health Professions (BHPr), Health Resources and Services Administration, does not have current national data on the employment and practice of registered nurses needed to assess the current supply and project the future availability of nurses. This proposed project will provide detailed statistics on the registered nurse population needed to prepare the mandated Secretary's Report to Congress. *Respondents:* Individuals or households; *Number of Respondents:* 33,000; *Number of Responses per Respondent: 1; Average Burden per Response:* .33 hours; *Estimated Annual Burden:* 11,000 hours.

OMBB Desk Officer: Shannah Koss-McCallum.

4. Nursing Student Education Loan Demonstration Program—New—Full-time nursing students wishing to participate in the Nursing Student Education Loan Program must complete an application. Applicants must arrange employment at an eligible facility and secure an employer's commitment to repay the education loans in return for services provided by the applicant. *Respondents:* Individuals or households, businesses or other for-profit, small businesses or organizations.

BILLING CODE 4160-17-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-91-3283]

Notice of Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comment on the subject proposals.

ADDRESSES: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to:

Wendy Swire, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708-0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals for the collections of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: June 11, 1991.

John T. Murphy,

Director, Information Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Monthly Report of Excess Income.

Office: Housing.

Description of the Need for the Information and its proposed use: Owners of Section 236 insured and uninsured projects are required by law to pay to HUD the total rental charges collected that are in excess of the basic rents approved for all occupied units. Owners use the HUD-93104/A to compute any required payment due HUD.

Form: HUD-93104 and 93104A.

Respondents: Businesses or Other For-Profit, Federal Agencies or Employees, and Non-Profit Institutions.

Frequency of Submission: Monthly.

Reporting Burden:

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AZ-020-01-4212-12; AZA 25309]

Realty Action; Exchange of Public Lands, Pima County, AZ

BLM proposes to exchange public land in order to achieve more efficient management of the public land through consolidation of ownership.

The following public land is being considered for disposal by exchange pursuant to the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716.

Gila and Salt River Meridian, Arizona

T. 17 S., R. 10 E.,
Sec. 23, Lots 1, 2, NW¼NE¼, W½;
Sec. 27, S½;
Sec. 34, N½.
T. 18., R. 12 E.,
Sec. 11, Lots 1, 2, S½NE¼, E½NW¼, NE¼SW¼, N½SE¼;
Sec. 12, All unpatented land.
Containing approximately 1600 acres.

Final determination on disposal will await completion of an environmental analysis.

In accordance with the regulations of 43 CFR 2201.1 (b), publication of this Notice will segregate the affected public lands from appropriation under the public land laws, including the mining laws, but not the mineral leasing laws or Geothermal Steam Act.

The segregation of the above-described lands shall terminate upon issuance of a document conveying such lands or upon publication in the **Federal Register** of a notice of termination of the segregation; or the expiration of two years from the date of publication, whichever occurs first.

For a period of forty-five (45) days, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: June 10, 1991.

Henri R. Bisson,

District Manager.

BILLING CODE 4310-32-M

Fish and Wildlife Service

Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT-758359

Applicant: Rey Stroube, Houston, TX.

The applicant requests a permit to import a sport-hunted trophy of a bontebok (*Damaliscus dorcas dorcas*) culled from the captive herd maintained by F.W.M. Bowker, Jr., Grahmstown, Republic of South Africa for the purpose of enhancement of propagation of the species.

PRT-758340

Applicant: St. Louis Zoological Park, St. Louis, MO.

The applicant requests a permit to import a captive born male Malayan tapir (*Tapirus indicus*) from Zoo Mulhouse, Mulhouse, France for breeding educational purposes. The tapir will be held and maintained at the Minnesota Zoological Garden, Apple Valley, Minnesota.

PRT-757093

Applicant: Hummer's Acid-Wetland Flora, Arlington, VA.

The applicant requests a permit to export for sale in foreign commerce the following species of artificially propagated pitcher plants: *Sarracenia alabamensis alabamensis* and *S. jonesii*.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication.

VOL 56 ISS 118 JE 19 1991 UMI

Documents and other information submitted with these applications are available for review by any party who submits a written request for a copy of such documents to, or by appointment during normal business hours (7:45–4:15) in, the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203. Phone (703/358–2104); FAX (703/358–2281)

Dated: June 14, 1991.

Maggie Tieger,

Acting Chief, Branch of Permits, Office of Management Authority.

Minerals Management Service

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collections of information and related forms may be obtained by contacting the Bureau's Clearance Officer at the telephone number listed below. Comments and suggestions on the proposal should be made directly to the Bureau Clearance Officer and to the Office of Management and Budget; Paperwork Reduction Project (1010–0006); Washington, DC 20503, telephone (202) 395–7340, with copies to John V. Mirabella; Acting Chief, Engineering and Standards Branch; Engineering and Technology Division; Mail Stop 4700; Minerals Management Service; 381 Elden Street; Herndon, Virginia 22070–4817.

Title: Outer Continental Shelf Minerals, General (30 CFR part 256).

OMB approval number: 1010–0006.

Abstract: Respondents submit information necessary for MMS to determine which tracts will be leased, to identify areas for environmental study and further consideration for leasing, and to determine if the applicant or bidder for an Outer Continental Shelf (OCS) lease is qualified to hold such a lease.

Bureau form numbers: None.

Frequency: On occasion.

Description of respondents: Federal OCS oil and gas lessees, potential bidders, and the public.

Estimated completion time: 1.8 hours (rounded).

Annual responses: 2,683.

Annual burden hours: 4,809.

Bureau clearance officer: Dorothy Christopher, (703) 787–1239.

Dated: May 15, 1991.

Thomas Gernhofer,

Associated Director for Offshore Minerals Management.

BILLING CODE 4310–MR–M

National Park Service

Rock Creek Park—Tennis Stadium and Surrounding Recreational Fields and Facilities; Intention To Prepare an Environmental Impact Statement

SUMMARY: Over the past months National Park Service staff from Rock Creek Park have met with several neighborhood citizen associations and the Carter Barron Community Task Force regarding recent proposals to introduce additional activities to the Rock Creek Park tennis complex at 16th and Kennedy Streets. The Park Service is aware of the concerns expressed by the park's neighbors regarding the additional activities and is sensitive to the potential impacts such activities may cause.

The National Park Service intends to establish a policy which will regulate additional activities and govern the use of those park fields and facilities.

Given that potential conflicts may arise from additional activities at the Tennis Center, and in accordance with section 102(c) of the National Environmental Policy Act of 1969, the National Park Service is preparing an Environmental Impact Statement (EIS) for the management of Rock Creek Park Tennis Stadium and its surrounding facilities.

The area is more specifically identified as being within Rock Creek Park, Washington, DC bounded by 16th Street on the east, Colorado Avenue on the south, Stage Road on the West, and Kennedy Place on the north. The area is known as the Brightwood Park area and is frequently referred to as Carter Barron, which is the name of the nearby amphitheater located on Colorado Avenue. The operation of the Carter Barron Amphitheater is not included within the scope of this EIS.

The role of Rock Creek Park in the community has traditionally been interpreted to include providing community focused recreation in the Brightwood Park area. There is an extensive history of meeting that role with the fields along 16th Street being used for recreational purposes as early as the 1920's. Later, the National Park Service provided a recreation center which included tennis courts, a small tennis stadium and concession facilities. More recently, the Park Service entered into an agreement with the Washington Tennis Foundation to expand these facilities in an effort to promote instructional tennis programs for youth, seniors and special populations.

This use policy will in no way abrogate any right or privilege which the United States has previously agreed to with the Washington Tennis Foundation with respect to the sponsoring of a men's professional tennis tournament and a women's professional tennis tournament.

The primary mission of the area is to provide for the recreational needs of the public. It is recognized that activities which limit public access to park facilities must be balanced with the needs of the public.

A public scoping meeting will be held at the Rock Creek Park Nature Center July 11, at 7:30 p.m. to elicit public comment on issues and alternatives for the Environmental Impact Statement. A scoping document will be prepared as an outcome of this meeting.

The responsible official is Robert Stanton, Regional Director, National Capital Region, National Park Service.

Dated: June 13, 1991.

Robert Stanton,

Regional Director, National Capital Region.

BILLING CODE 4310–70–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–324]

Certain Acid-Washed Denim Garments and Accessories; Decision Not To Review an Initial Determination Terminating the Investigation as to One Respondent on the Basis of a Consent Order

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Commission has determined not to review the presiding administrative law judge's (ALJ's) initial determination (ID) (Order No. 8) granting a joint motion to terminate the investigation as to respondent Bon Jour International, Ltd., Inc., on the basis of a consent order.

FOR FURTHER INFORMATION CONTACT: William T. Kane, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436; telephone: (202)–252–1116. Copies of the ID, consent order, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E. Street, SW., Washington, DC 20436; telephone: (202)–252–1000. Hearing-impaired individuals are advised that information on this matter can be obtained by contracting the Commission's TDD terminal at (202)–252–1810.

SUPPLEMENTARY INFORMATION: On January 2, 1991, Greater Texas Finishing Corporation and Golden Trade S.R.L. filed a complaint alleging a violation of section 337 in the importation, sale for importation, or sale after importation of acid-washed denim products by reasons of infringement of claims 6 and 14 of U.S. Letters Patent 4,740,213 (the '213 patent). The Commission voted to institute an investigation of the complaint on January 28, 1991, and published notice of institution of the investigation in the Federal Register. 56 FR 4851 (Feb. 6, 1991).

On April 19, 1991, complainants and respondent Bon Jour moved jointly pursuant to interim rule 210.51 to terminate the investigation as to Bon Jour on the basis of a consent order and consent order agreement (Motion Docket No. 324–10). The Commission investigative attorney filed a response in support of the joint motion. On May 3, 1991, the presiding administrative law judge issued an ID granting the motion (ALJ Order No. 8). Notice of the ID was published in the Federal Register on May 22, 1991. 56 FR 23596. No petitions for review or agency or public comments were received.

This action is taken pursuant to section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and Commission interim rules 210.53 and 211.21 (19 CFR 210.53 and 211.21, as amended).

Issued: June 10, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 91–14600 Filed 6–18–91; 8:45 am]

BILLING CODE 7020–02–M

[Investigation No. 332–227]

Annual Report on the Impact of the Caribbean Basin Economic Recovery Act on U.S. Industries and Consumers

AGENCY: International Trade Commission.

ACTION: Notice of deadline to submit comments in connection with 1990 annual report.

EFFECTIVE DATE: June 6, 1991.

FOR FURTHER INFORMATION CONTACT: James E. Stamps (202–252–1227), Trade Reports Division, Office of Economics, U.S. International Trade Commission, Washington, DC 20436.

BACKGROUND: Section 215(a) of the Caribbean Basin Economic Recovery Act (CBERA) (19 U.S.C. 2704(a)) requires that the Commission submit annual reports to the Congress and the President on the impact of the act. The Commission instituted the present investigation under section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)) on March 21, 1986, for the purpose of gathering and presenting such information through the termination of duty-free treatment under the CBERA. Notice of institution of the investigation and the schedule for such reports was published in the Federal Register of May 14, 1986 (51 FR 17678). The sixth report, covering calendar year 1990, is to be submitted by September 11, 1991.

In the original notice of investigation, it was announced that, as provided in section 215(b) of the CBERA, the Commission in such reports is required to assess the actual effect of the act on the United States economy generally as well as on appropriate domestic industries and to assess the probable future effect which the act will have on the United States economy generally and on such domestic industries.

WRITTEN SUBMISSIONS: The Commission does not plan to hold a public hearing in connection with the sixth annual report. However, interested persons are invited to submit written statements concerning the matters to be addressed in the report. Commercial or financial information that a party desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Priactice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons in the Office of the Secretary to the Commission. To be assured of consideration by the Commission, written statments relating to the Commission's report should be submitted at the earliest practical date and should be received no later than July 26, 1991. All submissions should be addressed to the Secretary to the Commission, U.S. International Trade Commission, 500 E St., SW., Washington, DC 20436.

Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 252–1809.

Issued: June 10, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 91–14599 Filed 6–18–91; 8:45 am]

BILLING CODE 7020–02–M

[Investigations Nos. 731–TA–474 and 475 (Final)]

Chrome-Plated Lug Nuts From the People's Republic of China and Taiwan

AGENCY: Untied States International Trade Commission.

ACTION: Revised schedule for the subject investigations.

EFFECTIVE DATE: June 13, 1991.

FOR FURTHER INFORMATION CONTACT: Bruce Cates (202–252–1187), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain informaiton on this matter by contacting the Commission's TDD terminal on 202–252–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–252–1000.

SUPPLEMENTARY INFORMATION: On April 18, 1991, the Commission instituted the subject investigations and established a schedule for their conduct (56 FR 21380, May 8, 1991). Subsequently, the Department of Commerce extended the date for its final determinations in the investigations from June 24, 1991 to July 25, 1991, for Taiwan and to September 3, 1991, for China. The Commission, therefore, is revising its schedule in the investigations to conform with Commerce's new schedules.

The Commission's new schedule for the investigaitons is as follows: requests to appear at the hearing must be filed with the Secretary to the Commission not later than July 25, 1991; the prehearing conference will be held at

VOL 56 ISS 118 JE 19 1991 UMI

the U.S. International Trade Commission Building on July 29, 1991; the prehearing staff report will be placed in the nonpublic record on July 19, 1991; the deadline for filing prehearing briefs is July 29, 1991; the hearing will be held at the U.S. International Trade Commission on August 1, 1991; and the deadline for filing posthearing briefs is August 9, 1991. In addition, the Commission will allow parties in the investigation involving China to comment on Commerce's final determination; such comments will be due no later than one working day after the day Commerce announces its final determination.

For further inforamtion concerning these investigations see the Commission's notice of investigations cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201, as amended by 56 FR 11918, Mar. 21, 1991), and part 207, subparts A and C (19 CFR part 207, as amended by 56 FR 11918, Mar. 21, 1991).

Authority: These investigations are being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to section 207.20 of the Commission's rules.

Issued: June 14, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-473 (Final)]

Certain Electric Fans From the People's Republic of China

AGENCY: United States International Trade Commission.

ACTION: Institution and scheduling of a final antidumping investigation.

SUMMARY: The Commission hereby gives notice of the institution of final antidumping investigation No. 731-TA-473 (Final) under section 735(b) of the Tariff act of 1930 (19 U.S.C. 1673d(b)) (the act) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from the People's Republic of China of certain electric fans,[1] provided for in subheading 8414.51.00 of the Harmonized Tariff Schedule of the United States.

For further information concerning the conduct of this investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201, as amended by 56 FR 11918, Mar. 21, 1991), and part 207, subparts A and C (19 CFR part 207, as amended by 56 FR 11918, Mar. 21, 1991).

EFFECTIVE DATE: May 31, 1991.

FOR FURTHER INFORMATION CONTACT: Woodley Timberlake (202-252-1188), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-252-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-252-1000.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted as a result of an affirmative preliminary determination by the Department of Commerce that imports of oscillating fans and ceiling fans from the People's Republic of China are being sold in the United States at less than fair value within the meaning of section 733 of the act (19 U.S.C. 1673b). The investigation was requested in a petition filed on October 31, 1990, by Lasko Metal Products, Inc., West Chester, PA.

Participation in the investigation and public service list.—Persons wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's rules, not later than twenty-one (21) days after publication of this notice in the **Federal Register**. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entires of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this final investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in this investigation will be placed in the nonpublic record on August 5, 1991, and a public version will be issued thereafter, pursuant to section 207.21 of the Commission's rules.

Hearing.—The Commission will hold a hearing in connection with this investigation beginning at 9:30 a.m. on August 22, 1991, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before August 13, 1991. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on August 14, 1991, at the U.S. International Trade Commission Building. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.23(b) of the Commission's rules.

Written submissions.—Each party is encouraged to submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of section 207.22 of the Commission's rules; the deadline for filing is August 15, 1991. Parties may also file written testimony in connection with their presentation at the hearing, as provided in section 207.23(b) of the Commission's rules, and posthearing briefs, which must conform with the provisions of section 207.24 of the Commission's rules. The deadline for filing posthearing briefs is August 29, 1991; witness testimony must be filed no later than three (3) days before the hearing. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before August 29, 1991. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules.

[1] For the purposes of this investigation, the term "certain electric fans" is defined as oscillating fans and ceiling fans, with a self-contained electric motor of an output not exceeding 125 watts. Oscillating fans direct a flow of air using a fan blade/motor unit that pivots back and forth on a stationary base ("oscillates"). Ceiling fans direct a downward and/or upward flow of air using a fan blade/motor unit; ceiling fans are designed for permanent or semi-permanent installation. The petition does not include industrial or commercial ventilation fans or window fans.

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to section 207.20 of the Commission's rules.

Issued: June 14, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-516 (Preliminary)]

Fresh Kiwifruit From New Zealand

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673(a)), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from New Zealand of fresh kiwifruit, provided for in subheading 0810.90.20 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (LTFV).

Background

On April 25, 1991, a petition was filed with the Commission and the Department of Commerce by the Ad Hoc Committee for Fair Trade of the California Kiwifruit Commission and individual California kiwifruit grower members of the Committee, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports of fresh kiwifruit from New Zealand. Accordingly, effective April 25, 1991, the Commission instituted preliminary antidumping investigation No. 731-TA-516 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of May 1, 1991 (56 FR 20022). The conference was held in Washington, DC, on May 15, 1991, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on June 10, 1991. The views of the Commission are contained in USITC Publication 2394 (June 1991), entitled "Fresh kiwifruit from New Zealand: Determination of the Commission in Investigation No. 731-TA-516 (Preliminary) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

Issued: June 11, 1991.

By order of the Commission:

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[Inv. No. 731-TA-523 (Preliminary)]

Commercial Microwave Ovens, Assembled or Unassembled, From Japan

AGENCY: International Trade Commission.

ACTION: Institution and scheduling of a preliminary antidumping investigation.

SUMMARY: The Commission hereby gives notice of the institution of preliminary antidumping investigation No. 731-TA-523 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Japan of commercial microwave ovens, assembled or unassembled, (CMOs),[1] that are alleged to be sold in the United States at less than fair value. The Commission must complete preliminary antidumping investigations in 45 days, or in this case by July 25, 1991.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201, as amended by 56 FR 11918, Mar. 21, 1991), and part 207, subparts A and B (19 CFR part 207, as amended by 56 FR 11918, Mar. 21, 1991).

EFFECTIVE DATE: June 10, 1991.

FOR FURTHER INFORMATION CONTACT: Fred Fischer (202-252-1179), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-252-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-252-1000.

SUPPLEMENTARY INFORMATION:

Background. This investigation is being instituted in response to a petition filed on June 10, 1991, by Menumaster, Inc., Sioux Falls, SD.

Participation in the investigation and public service list. Persons (other than petitioners) wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven (7) days after publication of this notice in the **Federal Register**. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list. Pursuant to 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this preliminary investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made not later than seven (7) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference. The Commission's Director of Operations has scheduled a conference in connection with this investigation for 9:30 a.m. on Monday, July 1, 1991, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Parties wishing to participate in the conference should contact Fred Fischer (202-252-1179) not later than Wednesday, June 26, 1991, to

[1] The products covered by this investigation are commercial microwave ovens, whether assembled or unassembled. These products are provided for in subheading 8516.60.40 but may enter under subheading 8516.60.80 of the Harmonized Tariff Schedule of the United States (HTS).

VOL 56 ISS 118 JE 19 1991 UMI

arrange for their appearance. Parties in support of the imposition of antidumping duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the conference.

Written submissions. As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before Friday, July 5, 1991, a written brief containing information and arguments pertinent to the subject matter of the investigation. Parties may file written testimony in connection with their presentation at the conference no later than three (3) days before the conference. If briefs or written testimony contain BPI, they must conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.12 of the Commission's rules.

Issued: June 12, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-323]

Certain Monoclonal Antibodies Used for Therapeutically Treating Humans Having Gram Negative Bacterial Infections: Decision To Grant Application for Appeal of Administrative Law Judge Order No. 5; Reversal of Order Denying Respondent's Renewed Motion To Suspend the Investigation

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to grant respondents' motion for interlocutory appeal of Administrative Law Judge Order No. 5, denying respondents' renewed motion to suspend the above-captioned investigation. On appeal, the Commission has determined to reverse Order No. 5. The Commission's action suspends the investigation until after completion of post-trial briefing in *Xoma Corp* v. *Centocor, Inc.* Civil Action No. C 90 1129 (RHS)(N.D. Cal.).

ADDRESSES: Copies if the ID, the Commission's order, the Commission memorandum opinion, and all other non-confidential documents filed in connection with this investigation are or will be able for inspection during official business (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000.

FOR FURTHER INFORMATION CONTACT: Jean Jackson, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-252-1104. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810.

SUPPLEMENTARY INFORMATION: On December 20, 1990, Xoma Corp. of Berkeley, California filed a complaint with the Commission alleging violations of section 337 of the Tariff Act of 1930 in the importation and sale of certain monoclonal antibodies covered by claims 6 and 7 of U.S. Patent No. 4,918,163 under license to Xoma. Such monoclonal antibodies are used to treat patients having gram negative bacterial infections. The Commission instituted an investigation of Xoma's complaint on January 30, 1991. 56 FR 3484-85. The Commission's notice of institution named Centocor, Inc., and Centocor Partners II, L.P., both of Malvern, Pennsylvania, and Centocor B.V. of Leiden, The Netherlands (collectively, Centocor) as respondents.

On February 15, 1991, Centocor moved to suspend the Commission's investigation until the U.S. District Court for the Northern District of California issued its final judgment in concurrent litigation between Xoma and Centocor, *Xoma Corp. v. Centocor, Inc.*, Civil Action No. C 90 1129 (RHS). On April 3, 1991, the Commission reversed the ID suspending the investigation. 56 FR 14538 (April 10, 1991).

On May 21, 1991, Centocor filed a renewed motion to suspend the investigation, this time until the completion of post-trial briefing in *Xoma Corp. v. Centocor, Inc.* Centocor's motion requested suspension of the Commission investigation so that a conflict between the Commission evidentiary hearing and the district court trial would be avoided. The renewed motion was opposed by Xoma and supported by the Commission investigation attorney. On May 24, 1991, the ALJ issued an order denying Centocor's motion. On the same date, the ALJ certified Order No. 5 for interlocutory review by the Commission. On May 30, 1991, Xoma filed an opposition to the application for interlocutory appeal. The Commission investigation attorney responded in support of the application on May 31, 1991.

Authority: This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and §§ 210.59(b) and 210.70(b) of the Commission's Interim Rules of Practice and Procedure (19 CFR 210.59(b) and 210.70(b)).

Issued: June 11, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-517 (Preliminary)]

Refined Antimony Trioxide From the People's Republic of China

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. § 1673b(a)), that there is a reasonable indication that an industry in the United States is threatened with material injury by reason of imports from the People's Republic of China of refined antimony trioxide, provided for in subheading 2825.80.00 of the Harmonized Tariff Schedule of the United States,[3] that are alleged to be sold in the United States at less than fair value (LTFV).

Background

On April 25, 1991, a petition was filed with the Commission and the Department of Commerce by the Coalition for Fair Trade in Refined Antimony Trioxide,[4] alleging that an industry in the United States is materially injured and it threatened with material injury by reason of LTFV imports of refined antimony trioxide from the People's Republic of China. Accordingly, effective April 25, 1991, the Commission instituted preliminary antidumbing investigation No. 731-TA-517 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of May 3, 1991 (56 FR 20443). The conference was held in Washington, DC, on May 16, 1991, and all persons who requested the opportunity were permitted to appear in person or by counsel.

Issued: June 12, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-464 (Final)]

Sparklers From China

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the act), that an industry in the United States is materially injured by reason of imports from China of sparklers, provided for the subheading 3604.10.00 of the Harmonized Tariff Schedule of the United States, that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).

Background

The Commission instituted this investigation effective December 17, 1990, following a preliminary determination by the Department of Commerce that imports of sparklers from China were being sold at LTFV within the meaning of section 733(b) of the act (19 U.S.C. 1673b(b)). Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of January 16, 1991 (56 FR 1650). The hearing was held in Washington, DC, on April 30, 1991, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on June 10, 1991. The views of the Commission are contained in USITC Publication 2387 (June 1991), entitled "Sparklers from the People's Republic of China: Determination of the Commission in Investigation No. 731-TA-464 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

Issued: June 11, 1991.

By Order of The Commission.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-325]

Certain Static Random Access Memories and Integrated Circuit Devices Containing Same, Processes for Making Same, Components Thereof, and Products Containing Same; Determination Not to Review an Initial Determination Designating the Investigation "More Complicated"

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review the presiding administrative law judge's (ALJ) initial determination (ID) designating the above-captioned investigation "more complicated". The deadline for completion of the investigation is extended by six months, *i.e.*, from February 21, 1992, to August 21, 1992.

FOR FURTHER INFORMATION CONTACT: Cynthia P. Johnson, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-252-1096.

SUPPLEMENTARY INFORMATION: On April 23, 1991, all of the respondents filed a motion to designate the investigation "more complicated". The complainant opposed the motion and the Commission investigative attorneys supported the motion. On May 9, 1991, the presiding ALJ issued an ID (Order No. 5) designating the investigation as "more complicated". The ID states that the case involved 26 claims of four SRAM patents, and that because of the complexity of semiconductor technology, the subject matter of the case supports the "more complicated" designation.

This action is taken under the authority of section 337 of the Tariff Act of 1930, 19 U.S.C. 1337, and Commission interim rule § 210.53, 19 CFR 201.53.

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000. Hearing-impaired persons are advised that information on the matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810.

Issued: June 10, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-55 (Sub 396X)]

CSX Transportation, Inc.; Abandonment Exemption—in Raleigh County, WV

Applicant has filed a notice of exemption under 49 CFR part 1152, subpart F—*Exempt Abandonments* to abandon its 2.24-mile line of railroad between milepost 0.00, at Pettus, and milepost 2.24, at Marfolk, in Raleigh County, WV.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed

---

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)) (as amended, 56 FR 11924 (March 21, 1991)).

[2] Acting Chairman Brunsdale determines that there is a reasonable indication that an industry in the United States is materially injured by reason of dumped imports of refined antimony trioxide from the People's Republic of China.

[3] For purposes of this investigation, refined antimony trioxide (also known as antimony oxide) is a crystalline powder of the chemical formula (Sb_2O_3). The refined antimony trioxide which is the subject of this investigation includes blends with organic or inorganic additives comprising up to and including 20 percent of the blend by volume or weight.

[4] The individual member firms comprising the coalition include: (1) Anzon, Inc., Philadelphia, PA; (2) Atochem North America, Inc., Philadelphia, PA; (3) Laurel Industries, Inc., Cleveland, OH; (4) United States Antimony Corp., Thompson Falls, MT; and (5) United States Antimony Sales Corp., Natick, MA.

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

VOL 56 ISS 118 JE 19 1991 UMI

by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on July 19, 1991 (unless stayed pending reconsideration). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by July 1, 1991.[3] Petitions for reconsideration or requests for public use conditions under 49 CFR 1152.28 must be filed by July 9, 1991, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Karen A. Koster, 500 Water Street, Jacksonville, FL 32202.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by June 24, 1991. Interested persons may obtain a copy of the EA from SEE by writing to it [room 3219, Interstate Commerce Commission, Washington, DC 20423] or by calling Elaine Kaiser, Chief, SEE at (202) 275-7684. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: June 12, 1991.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-286 (Sub-No. 2X)]

The New York, Susquehanna and Western Railway Corporation Abandonment Exemption; Portion of the Edgewater Branch in Bergen Co., NJ

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from the prior approval requirements of 49 U.S.C. 10903, *et seq.*, the abandonment by the New York, Susquehanna and Western Railway Corporation of 1.6 miles of rail line in Bergen County, NJ, subject to standard labor protective conditions and completion of the section 106 process of the National Historic Preservation Act.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on July 19, 1991. Formal expressions of intent to file an offer [1] of financial assistance under 49 CFR 1152.27(c)(2) must be filed by June 29, 1991, petitions to stay must be filed by July 1, 1991, and petitions for reconsideration must be filed by July 9, 1991.

ADDRESSES: Send pleadings referring to Docket No. AB-286 (Sub-No. 2X) to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423, and

(2) Petitioner's representatives: Nathan R. Fenno, Michael F. Armani, The New York, Susquehanna and Western Railway Corporation, One Railroad Avenue, Cooperstown, NY 13326.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275-7245, [TDD for hearing impaired: (202) 275-1721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289-4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 275-1721.]

Decided: June 11, 1991.

By the Commission, Chairman Phillips, Vice chairman Emmett, Commissioners Simmons, Phillips, and McDonald. Commissioner McDonald concurred in the result with a separate expression. Chairman Phillips did not participate in the disposition of this proceeding.

Sidney L. Strickland, Jr.,

Secretary.

[1] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. See *Exemption of Out-of-Service Rail Lines*, 5 I.C.C. 2d 377 (1989). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[2] See *Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C.2d 164 (1987).

[3] The Commission will accept a late-filed trail use statement so long as it retains jurisdiction to do so.

[1] See *Exempt. of Rail Line Abandonment—Offers of Finan. Assist.*, 4 I.C.C.2d 164 (1987).

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to Resource Conservation and Recovery Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on June 10, 1991 a proposed Consent Decree in *United States* v. *Metropolitan Council at al.*, Civil Action No. 4-88-600, was lodged with the United States District Court for the District of Minnesota. The proposed Consent Decree concerns the Blue Lake Wastewater Treatment Plant located in Shakopee, Minnesota, and the Seneca Wastewater Treatment Plant in Eden, Minnesota. The proposed Consent Decree requires defendants Metropolitan Council and the Metropolitan Waste Control Commission ("defendants") to pay the United States $395,000, in settlement of defendants' liability for violations of the Clean Water Act, 33 U.S.C. 1251 for failure to comply with final effluent limits on July 1, 1988. In addition to paying the civil penalty, the defendants will also carry out a study of infiltration and inflow problems in the area of the Blue Lake and Seneca plants.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Metropolitan Council*, D.J. Ref. 90-5-1-1-3160.

The proposed Consent Decree may be examined at the office of the United States Attorney, District of Minnesota, 234 U.S. Courthouse, 110 South 4th Street, Minneapolis, Minnesota 55401, and at the Region V Office of the Environmental Protection Agency, 111 West Jackson Street, Chicago, Illinois 60604. The proposed Consent Decree may be examined at the Environmental Enforcement Section Document Center, 1333 F Street, NW., suite 600, Washington, DC 20004, 202/347-2072. A copy of the proposed Consent Decree may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check in the amount of $13.00 (25 cents per page reproduction cost), payable to Consent Decree Library.

Richard B. Stewart,

Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

Antitrust Division

Notice pursuant to the National Cooperative Research Act of 1984—High Speed Serial Data Communication Research and Development Partnership

Notice is hereby given that, on May 20, 1991, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the High Speed Serial Data Communication Research and Development Partnership ("Partnership") has filed written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the Partnership and (2) the Partnership's nature and objectives. The notification was filed for the purpose of invoking the Act's provisions limiting the potential recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the Partnership and its general area of planned activities are given below.

The Current members to the Partnership are: Chrysler Corporation; Ford Motor Company; and General Motors Corporation. The computerization and Research Program of SAE International is not a party to the Partnership, but has provided administrative assistance during its ongoing development and intends to continue to provide such assistance.

The parties intend to identify opportunities of joining aspects of their independent research and development efforts pertaining to high speed serial data communication within motor vehicles. The objectives are to avoid inefficient duplication of effort and expense, improve general scientific knowledge in this area by answering fundamental questions, and accelerate the development of this technology so that all companies can intelligently participate on an individual basis in standard activities. To meet these objectives, the Partnership will collect, exchange and analyze research information in these areas; conduct tests and develop basic engineering techniques of use in proof of theories and concepts in the relevant topics; interact with domestic or international organizations to further this research; encourage the use of its fruits through actions short of petitions for standard-setting; and perform further acts allowed by the National Cooperative Research Act that would advance the Partnership's objectives in this area. The parties intend to file additional written notification disclosing all changes in membership of this project.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

Drug Enforcement Administration

Manufacturer of Controlled Substances Application

Pursuant to § 1301.43(a) of title 21 of the Code of Federal Regulations (CFR), this is notice that on January 30, 1991, Ganes Chemicals, Inc., Industrial Park Road, Pennsville, New Jersey 08070, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Amobarbital (2125)	II
Secobarbital (2315)	II
Pentobarbital (2270)	II
Methadone (9250)	II
Metopon (9254)	II
Dextropropoxyphene, bulk (non-dosage forms) (9273)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than July 19, 1991.

Dated: May 31, 1991.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 91-14550 Filed 6-19-91; 8:45am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances; Application

Pursuant to 1301.43(a) of title 21 of the Code of Federal Regulations (CFR), this is notice that on January 4, 1991, Mallinckrodt Specialty Chemicals Company, Mallinckrodt and Second Streets, St. Louis, Missouri 63147, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic class of controlled substances listed below:

Drug	Schedule
Cocaine (9041)	II
Codeine (9050)	II
Diprenorphine (9058)	II
Etorphine Hydrochloride (9059)	II
Dihydrocodeine (9120)	II
Oxycodone (9143)	II
Hydromorphone (9150)	II
Diphenoxylate (9170)	II
Hydrocodone (9193)	II
Levorphanol (9220)	II
Methadone (9250)	II
Methadone-intermediate (9254)	II
Dextropropoxyphene, bulk (non-dosage forms) (9273)	II
Morphine (9300)	II
Thebaine (9333)	II
Opium extracts (9610)	II
Opium fluid extract (9620)	II
Opium tincture (9630)	II
Opium, powdered (9639)	II
Opium, granulated (9640)	II
Oxymorphone (9652)	II
Fentanyl (9801)	II

VOL 56 ISS 118 JE 19 1991 UMI

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, attention: DEA Federal Register Representative (CCR), and must be filed no later than July 19, 1991.

Dated: May 31, 1991.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 91-14551 Filed 6-19-91; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances, Registration

By Notice dated April 8, 1991, and published in the **Federal Register** on April 16, 1991, (56FR15382), Knoll Pharmaceuticals, 30 North Jefferson Road, Whippany, New Jersey 07981, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Dihydromorphine (9145)	I
Hydromorphone (9150)	II
Hydrocodone (9193)	III

No comments or objections have been received. Therefore, pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and title 21, Code of Federal Regulations, § 1301.54(e), the Deputy Assistant Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic classes of controlled substances listed above is granted.

Dated: June 5, 1991.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 91-14552 Filed 6-19-91; 8:45 am]

BILLING CODE 4410-09-M

Importation of Controlled Substances; Application

Pursuant to section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(i)), the Attorney General shall, prior to issuing a registration under this section to a bulk manufacturer of a controlled substance in Schedules I or II and prior to issuing a regulation under section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with § 1311.42 of title 21, Code of Federal Regulations (CFR), notice is hereby given that on February 13, 1991, Sigma Chemical Company, 3500 Dekalb Street, St. Louis, Missouri 63118, made application to the Drug Enforcement Administration to be registered as an importer of a basic classes of controlled substances listed below:

Drug	Schedule
Etorphine (Except HCl)(9056)	I
Heroin (9200)	I
Mescaline (7381)	I
1-Methyl-4-Phenyl-4-propionoxypiperidine (MPPP)(9661).	I
Dilenodin (9168)	II
Pyrrolidine analog of phencyclidine (7458).	II
Fenethylline (1503)	I
Morphine-N-Oxide (9307)	I
4-methoxyamphetamine (7411)	I
3,4-methylenedioxyamphetamine (MDA)(7400).	I
3,4-methylenedioxymethamphetamine (MDMA)(7405).	I
Alpha-methylfentanyl (9814)	I
3-Methylfentanyl (9813)	I
Psilocyn (7438)	I
Dimethyltryptamine (7435)	I
Diethyltryptamine (7434)	I
Marihuana (7360)	I
Ethylamine analog of phencyclidine (7455).	II
4-bromo-2,5-Dimethoxyamphetamine (7391).	I
4-methyl-2,5-dimethoxy-amphetamine (7395).	I
Thiophene analog of phencyclidine (7470).	II
Lysergic acid diethylamide (7315)	I
2,5-dimethoxyamphetamine (DMA)(7396).	I
Psilocybin (7437)	I
Bufotenine (7433)	I
Tetrahydrocannabinols (7370)	I
Ibogaine (7260)	I
Normorphine (9313)	II
Thiophene analog of phencyclidine (7470).	I
Tetrahydrocannabinols (7370)	I
Methaqualone (2565)	I
Beta-hydroxyfentanyl (9830)	I
Pentobarbital (2270)	II
Alfentanil (9737)	II
Sufentanil (9740)	II
1-piperidinocyclohexanecarbonitrile (PCC)(8603).	II
Oxymorphone (9652)	II
Ethylmorphine (9190)	II
Morphine (9300)	II
Ardidine (9020)	II
Diprenorphine (9058)	II
Secobarbital (2315)	II
Benzoylecgonine (9180)	II
Amphetamine (1100)	II
Cocaine (9041)	II
Codeine (9050)	II
Methamphetamine (1105)	II
Fentanyl (9801)	II
Methadone (9250)	II
Morphine (9300)	II
Phencyclidine (7471)	II
Dextropropoxyphene, bulk (non-dosage forms) (9273).	II
Oxymorphone (9652)	II
Meperidine (pethidine) (9230)	II

Any manufacturer holding, or applying for, registration as a bulk manufacturer of this basic class of controlled substance may file written comments on or objections to the application described above and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than July 19, 1991.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1311.42 (b), (c), (d), (e) and (f). As noted in a previous notice at 40 FR 43745-46 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Deputy Assistant Administrator of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1311.42 (a), (b), (c), (d), (e) and (f) are satisfied.

Dated: May 31, 1991.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 91-14554 Filed 6-19-91; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances; Application

Pursuant to § 1301.43(a) of title 21 of the Code of Federal Regulations (CFR), this is notice that on February 5, 1991, Smithkline Beecham Chemicals, Division of Smithkline Beecham Corporation, 900 River Road (L-11), Conshohocken, Pennsylvania 19428, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
4-methoxyamphetamine (7411)	I
Amphetamine (1100)	II
Phenylacetone (8501)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, attention: DEA Federal Register Representative (CCR), and must be filed no later than July 19, 1991.

Dated: May 31, 1991.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 91-14553 Filed 6-19-91; 8:45 am]

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Office of the Secretary

Use of Alternative Dispute Resolution and Negotiated Rulemaking Procedures by the Department of Labor

AGENCY: Office of the Secretary.

ACTION: Extension of comment period.

SUMMARY: The Department is extending the period for interested parties to submit comments which will be used in developing a policy to implement two important and recently enacted amendments to the Administrative Procedure Act. These amendments are the result of the Administrative Dispute Resolution Act (ADR) and the Negotiated Rulemaking Act (Neg-Reg). Both of these acts authorize and encourage agencies to use arbitration, mediation, negotiated rulemaking, and other consensual methods of dispute resolution.

Section 3(a) and the ADR requires the Department to adopt a policy as to how it intends to implement that statute in each of the following areas: (a) Formal and informal adjudications; (b) rulemakings; (c) enforcement actions; (d) issuing approvals and variances; (e) contract administration; (f) litigation brought against or by any part of the Department; and (g) other Departmental actions. The Department is seeking comments at this time so that the affected public may be involved at the outset in the development of procedures to implement both ADR and Neg-Reg in the Department of Labor.

On May 22, 1991, the Department published a notice in the **Federal Register** (56 FR 23509) requesting that comments be submitted by July 22, 1991. In order to provide interested parties sufficient time to prepare and submit substantive comments, the period for submission is being extended.

DATES: Comments are due by August 23, 1991.

ADDRESSES: Send comments to Roland Droitsch, Deputy Assistant Secretary for Policy, U.S. Department of Labor, room S-2312, Frances Perkins Building, 200 Constitution Avenue NW., Washington, DC 20210. Telephone 202-523-6197.

FOR FURTHER INFORMATION CONTACT: Roland Droitsch, Deputy Assistant Secretary for Policy, U.S. Department of Labor. Telephone 202-523-6197.

SUPPLEMENTARY INFORMATION: In response to a requirement of the Administrative Dispute Resolution Act, Public Law 101-552, the Department intends to develop a general policy which encourages greater use of alternative dispute resolution techniques whenever the parties involved agree to them and it is practical to do so in light of other statutory requirements. Among the alternative dispute resolution techniques mentioned in the law is the use of negotiated rulemaking under appropriate circumstances, the criteria for which are set forth in more detail in a separate enactment, the Negotiated Rulemaking Act, Public Law 101-648.

The scope of these two new statutes is broad. In enacting the ADR, Congress expressed concern that administrative proceedings have become too formal and lengthy, and asserted that alternative procedures may, in at least some instances, be faster, less contentious, and more economical. However, ADR techniques will not be appropriate in every situation; the statute indicates, for example, they should not be used for precedent setting cases, those where a formal record is essential, and those bearing on significant policy questions. Within such limitations, the Department plans to explore extensive use of ADR techniques, including whether any of its current procedures and rules need to be modified to allow for greater use of ADR.

In enacting the Neg-Reg statute, Congress indicated its concern that traditional rulemaking procedures may discourage affected parties from communicating openly with each other with Federal agencies, and encourages them to assume extreme conflicting positions which often results in costly and time-consuming litigation. While agencies have been able to experiment with alternative techniques to avoid these consequences, the Neg-Reg Act amended the Administrative Procedure Act to clearly establish a process for negotiating a proposed rule.

The Department will develop its ADR policy with full consultation with the Administrative Conference of the United States and the Federal Mediation and Conciliation Service as required by Section 3(a) of the ADR Act. To this end, the Department has already designated its ADR Specialist (the Assistant Secretary for Policy) to serve as liaison with those agencies and as coordinator of the Department's ADR implementation. A full survey of existing Departmental practices is planned.

Commenters are encouraged to provide specific comments that relate to activities of the Department; and most particularly, to bring to the attention of the Department any experience to date with ADR or Neg-Reg activities of the Department, areas of the Department's operations which might readily benefit from the use of such techniques, areas in which such techniques should be limited or not used at all, or any other matter which they believe would be of interest to the Department as it develops its policy in these areas.

Signed at Washington DC this 13th day of June, 1991.

Debra R. Bowland,

Acting Assistant Secretary for Policy.

BILLING CODE 4510-23-M

NATIONAL SCIENCE FOUNDATION

Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of Permit Applications Received Under the Antarctic

VOL 56 ISS 118 JE 19 1991 UMI

Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act of 1978 at title 45 part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to these permit applications by July 22, 1991. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, room 627, Division of Polar Programs, National Science Foundation, Washington, DC 20550.

FOR FURTHER INFORMATION CONTACT: Charles E. Myers at the above address or (202) 357–7817.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Public Law 95–541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States Citizens. The Agreed Measures, developed by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest.

The applications received is as follows:

1. Applicant

Deneb Karentz, Laboratory for Radiobiology & Environmental Health, University of California, San Francisco, CA 94143.

Activity for Which Permit Requested

Introduction of non-indigenous species into Antarctic. The applicant is conducting research on the physiological ecology of UV-absorbing compounds in Antarctic organisms. The research requires culturing of invertebrate larvae in enclosed tanks. A permit is requested to take unicelluar algae to Antarctic to use as food for the larvae. These algae will be species of *Dunaliella* and/or *Rhodomonas*. None of these cultures will be released to the Antarctic environment.

Location: Palmer Station, Antarctica
Dates: August 1991

2. Applicant

Wayne Z. Trivelpiece, Old Dominion University Research Foundation, P.O. Box 955, Bolinas, CA 04924

Activity for Which Permit Requested

Taking, import into U.S.A., enter site of special scientific interest. The applicant is conducting research on the behavioral ecology and population biology of penguins and their principal avian predators. He proposes to band up to 2000 Adelie, Gentoo, and Chinstrap penguins. Up to 50 adults of each penguin species will be fitted with radio transmitters and time depth recorders. All birds will be released after the experiments are completed. The study site is within the borders of site of special scientific interest #8, Admiralty Bay, King George Island. The applicant also proposes to salvage and import to the U.S.A. carcasses or skeletons of penguins or other birds for educational and scientific study. No birds would be killed to obtain these materials.

Location: Antarctica peninsula area
Dates: October 1991–March 1992

3. Applicant

G.A. McFeters, Department of Microbiology, Montana State University, Bozeman, Montana 59717

Activity for Which Permit Requested

Inroduction of non-indigenous species into Antarctica. The applicant is conducting research on enteric bacteria in the Antarctic environment. Permission is requested to take three bacterial cultures to McMurdo Station, Antarctica: *Escherichia coli; Hersinia enterocolitica,* and *Salmonella typhimurium.* Although it is nearly certain that these bacteria are already present in the human population in Antarctica, the research requires that pure cultures be used. None of these pure cultures will be released to the Antarctic environment after the completion of the experiments.

Location: McMurdo Station, Antarctica
Dates: October 1991–January, 1992

Charles E. Myers,

Permit Office, Division of Polar Programs.

BILLING CODE 7555–01–M

OFFICE OF MANAGEMENT AND BUDGET

Privacy Act of 1974; Index of Government-wide Systems of Records

AGENCY: Office of Management and Budget (OMB).

ACTION: Notice.

SUMMARY: OMB has oversight responsibility for implementation of the Privacy Act of 1974, 5 USC 552a. OMB is publishing this notice as a finding aid to the current **Federal Register** notices for all government-wide systems of records under the Privacy Act of 1974.

Seven agencies have responsibility for one or more government-wide systems of records under the Privacy Act. These agencies are:

Equal Employment Opportunity Commission
Federal Emergency Management Agency
General Services Administration
Department of Labor
Merit Systems Protection Board
Office of Government Ethics
Office of Personnel Management

Following the name of each agency is the name and phone number of the individual who can best answer questions regarding the system(s) of that agency. Then follows the name of each system, a citation to the most recent full system notice published in the **Federal Register**, and a short description.

FOR FURTHER INFORMATION CONTACT: Maya A. Bernstein, Information Policy Branch, Office of Information and Regulatory Affairs, Office of Management and Budget, 3235 New Executive Office Building, Washington, DC 20503. Telephone: (voice) 202/395–3785 (fax) 202/395–7285.

Government-wide Systems of Records:

Equal Employment Opportunity Commission (EEOC)

Contact: Thomas J. Schlageter (Office of Legal Counsel), 202/663–4670

EEOC/GOVT–1

SYSTEM NAME:

EEOC Records and Appeal Records.
System notice last published at: 56 F.R. 10900, March 14, 1991.

Description:

EEOC/GOVT–1 is a collection of records on applicants for Federal employment and current and former Federal employees who file complaints of discrimination or reprisal, or who file appeals with EEOC from agency decisions, petitions for review of decisions of the Merit System Protection Board, or requests for review of final decisions in negotiated grievance actions.

FEDERAL EMERGENCY MANAGEMENT ASSOCIATION (FEMA)

Contact: Sandra Jackson, 202/646–3840

FEMA/GOVT–1

SYSTEM NAME:

National Defense Executive Reserve System (NDER).
System notice last published at: 55 FR 37191, September 7, 1990.

Description:

FEMA/GOVT–1 includes records on applicants for and incumbents of NDER assignments. The system contains FEMA Form 85–3, NDER Qualifications Statement, which is used to determine membership for units of the NDER in Federal departments and agencies in accordance with Executive Order No. 11179 as amended by Executive Order No. 12148.

GENERAL SERVICES ADMINISTRATION (GSA)

Contact: Helen Maus (Office of the General Counsel), 202/501–1460; Mary Cunningham (Information Collection), 202/501–2691

GSA/GOVT–2

SYSTEM NAME:

Employment Under Commercial Activities Contracts.
System notice last published at: 48 FR 6176, February 10, 1983.

Description:

GSA/GOVT–2 includes records on former Federal employees involuntarily separated from government employment as a result of a commercial activity contract. The system is used to provide government agencies with necessary information on former Federal employees hired by contractors to ensure the proper distributions of severance pay by the government.

GSA/GOVT–3

SYSTEM NAME:

Travel Charge Card Program.
System notice last published at: 48 FR 44656, September 29, 1983.

Description:

This system includes records of current Federal employees who use government assigned charge cards while in travel status. It is used to provide government agencies with (1) necessary information on the commerical travel and transportation payment and expense control system which will provide travelers charge cards for official travel and related travel expenses on a worldwide basis, (2) attendant operational and control support, and (3) management information reports for expense control purposes.

GSA/GOVT–4

SYSTEM NAME:

Contracted Travel Service Program.
System notice last published at: 50 FR 20294, May 15, 1985, (amended 50 FR 28088, July 17, 1985).

Description:

This system includes records on individuals who are current Federal employees on travel and individuals being provided travel by the government. It is used to enable travel agents who are under contract to the Federal government to issue and account for travel provided to individuals.

DEPARTMENT OF LABOR (DOL)

Contact: Miriam Miller (Office of the Solicitor), 202/523–8188

DOL/ESA 13

SYSTEM NAME:

Employment Standards Administration, Office of Workers' Compensation Programs, Federal Employees' Compensation Act File.
System notice last published at: 55 FR 7121, February 28, 1990.

Description:

DOL/ESA–13 records are kept on FECA benefit recipients. These are Federal employees injured in the performance of duty, or beneficiaries of employees killed in the performance of duty. These records provide information and verification about covered employees' work related injuries. Entitlement to medical treatment and vocational rehabilitation are based on these records. Entitlement to and computation of continuation of pay, compensation, survivors' benefits under FECA, and certain other statutes, are also based on these records.

DOL/ETA 14

SYSTEM NAME:

Employment Training Administration (ETA) Job Corpsman Records.
System notice last published at: 55 FR 7137, February 28, 1990.

Description:

The system includes information on ETA Job Corps enrollees and termineés. These records are maintained to ensure that all appropriate documents of the corpsmember's stay in Job Corps (from entrance to placement and/or termination) are retained and are available to those officials who have a legitimate need for the information in performing their duties. These records also serve the interest of the corpsmembers in accordance with 29 U.S.C. 1691 et seq.

MERIT SYSTEMS PROTECTION BOARD (MSPB)

Contact: Michael Hoxie (Office of the Clerk), 202/653–7124

MSPB/GOVT–1

SYSTEM NAME:

Appeal and Case Records.
System notice last published at: 55 FR 17842, April 27, 1990.

Description:

This sytem includes records on two categories of individuals: (a) Current and former Federal employees, applicants for employment, annuitants, and other individuals who have filed appeals with MSPB, or with respect to whom a Federal agency has petitioned MSPB concerning any matter over which the Board has jurisdiction, and (b) current and former employees of State and local governments who have been investigated by the Special Counsel and have had a hearing before MSPB concerning possible violation of the Hatch Act.

The records are used to document and adjudicate appeals and other matters arising under the MSPB original and appellate jurisdiction. They also serve a management information function by providing statistical data for reports, physical file location, and staff productivity.

OFFICE OF GOVERNMENT ETHICS (OGE)

Contact: William (Bill) Gressman, (202/FTS) 523–5757 x1110

OGE/GOVT–1

SYSTEM NAME:

Executive Branch Public Financial Disclosure Reports and Other Ethics Program Records.
System notice last published at: 55 6328, FR February 22, 1990.

Description:

This system includes records on the President, the Vice President, candidates for those offices, Administrative Law Judges, members of uniformed services at pay grade 0–7 or higher, the Postmaster General and Deputy Postmaster General, designated agency ethics officials, appointed civilians to the Executive Office of the President, nominees for positions requiring Senate confirmation, and

VOL 56 ISS 118 JE 19 1991 UMI

many government officials classified at the equivalent of grade level GS–16 or higher, as well as Schedule C appointees. The system includes records on both former and current employees, and may contain records on any employee of the executive branch if required for the administration of the Ethics in Government Act of 1978 and the Ethics Reform Act of 1989.

These records are maintained to meet the requirements of the Ethics in Government Act of 1978 and the Ethics Reform Act of 1989, as amended, regarding the filing of financial status reports, reports concerning certain agreements between the covered individual and any prior private sector employer, ethics agreements, and the preservation of waivers issued to an officer or employee pursuant to section 208 of title 18, U.S.C., and certificates of divestiture issued pursuant to section 502 of the Ethics Reform Act. Such statements and related records are required to assure compliance with these acts and to preserve and promote the integrity of public officials and institutions.

OGE/GOVT–2

SYSTEM NAME:

Confidential Statements of Employment and Financial Interests.

System notice last published at: 55 FR 6330, February 22, 1990.

Description:

This system includes records of former or current employees required by their agency to file such statements. The records are maintained to meet requirements of Executive Order Nos. 12674 (as modified by 12731), 12565, and 11222, agency regulations and section 107 of the Ethics in Government Act of 1978 concerning the filing of employment and financial interest statements. They assist in assuring compliance with standards of conduct for government employees and to determine if a conflict of interest exists between the employment of individuals by the Federal government and their personal employment and financial interests.

OFFICE OF PERSONNEL MANAGEMENT (OPM)

Contact: John Sanet, 202/606–1955

OPM/GOVT–1

SYSTEM NAME:

General Personnel Records.

System notice last published at: 55 FR 3836, February 5, 1990.

Description:

General Personnel Records include current and former Federal employees as defined in 5 USC 2105. This system covers OPM's Central Personnel Data File and related agency personnel management information systems. The Official Personnel Folder (OPF) and other general personnel records files are the official repository of the records, reports of personnel actions, and the documents and papers required in connection with these actions effected during an employee's Federal service. The personnel action reports and other documents, some of which are filed as long-term records in the OPF, give legal force and effect to pesonnel transactions and establish employee rights and benefits under pertinent laws and regulations governing Federal employment.

These files and records provide the basic source of factual data about a person's Federal employment while in the service and after his or her separation. Records in this system have various uses by agency personnel offices.

OPM/GOVT–2

SYSTEM NAME:

Employee Performance File System Records.

System notice last published at: 55 FR 3842, February 5, 1990.

Description:

OPM/GOVT–2 includes records on current or former Federal employees, including appointees to the Senior Executive Service. These records are maintained to ensure that all appropriate records on an employee's performance are retained and are available (1) to agency officials having a need for the information; (2) to employees; (3) to support actions based on the records; (4) for use by the Office of Personnel Management in connection with its personnel management evaluation role in the executive branch; and (5) to identify individuals for personnel research.

OPM/GOVT–3

SYSTEM NAME:

Records of Adverse Actions and Actions Based on Unacceptable Performance.

System notice last published at: 55 FR 3845, February 5, 1990.

Description:

OPM/GOVT–3 includes records on current or former Federal employees, including Senior Executive Service employees, against whom such an action has been proposed or taken in accordance with 5 CFR parts 432, 732, 752, or 754 of OPM's regulations. These records result from the proposal, processing, and documentation of these actions taken either by OPM or agencies against employees in accordance with 5 CFR parts 432, 752, or 754 of OPM's regulations.

OPM/GOVT–4

[Reserved.] Formerly Executive Branch Public Financial Disclosure Reports and Other Ethics Program Records. [Replaced by OGE/GOVT–1]

OPM/GOVT–5

SYSTEM NAME:

Recruiting, Examining, and Placement Records.

System notice last published at: 55 FR 3847, February 5, 1990.

Description:

This system includes two categories of record subjects: (1) Persons who have applied to OPM or agencies for Federal employment, and current and former Federal employees submitting applications for other positions in the Federal service; and (2) applicants for Federal employment believed or found to be unsuitable for employment on medical grounds.

The records are used in considering indivfduals who have applied for positions in the Federal service by making determinations of qualifications (including medical qualifications), for positions applied for, and to rate and rank applicants applying for the same or similar positions. They are also used to refer candidates to Federal agencies for employment consideration, including appointment, transfer, reinstatement, reassignment or promotion. Records derived from OPM-developed or agency-developed assessment center exercises may be used to determine training needs of participants. These records may also be used to locate individuals for personnel research.

OPM/GOVT–6

SYSTEM NAME:

Personnel Research and Test Validation Records.

System notice last published at: 55 FR 3850, February 5, 1990.

Description:

OPM/GOVT–6 includes records on current and former Federal employees, applicants for Federal employment, current and former State and local government employees, and applicants for State and local government employment, selected private sector employees and applicants for sample comparison groups. The records are collected, maintained, and used by OPM or other Federal agencies for the construction, analysis, and validation of written tests, and for research on and evaluation of personnel/organizational management and staffing methods, including workforce effectiveness studies.

OPM/GOVT–7

SYSTEM NAME:

Applicant—Race, Sex, National Origin and Disability Status Records.

System notice last published at: 55 FR 3852, February 5, 1990.

Description:

This database includes records on current and former Federal employees and individuals who have applied for Federal employment. The records are used by OPM and agencies to evaluate personnel/organizational measurement and selection records, implement and evaluate Federal Equal Opportunity Recruitment and affirmative action programs, prepare reports regarding breakdowns by race, sex, and national origin of applicants, and to locate individuals for personnel research.

OPM/GOVT–8

[Reserved.] Formerly Confidential Statement of Employment and Financial Interest. [Replaced by OGE/GOVT–2]

OPM/GOVT–9

SYSTEM NAME:

File on Position Classification Appeals, Job Grading Appeals, and Retained Grade or Pay Appeals.

System notice last published at: 55 FR 3854, February 5, 1990.

Description:

This database includes records on current and former Federal employees who have either: (a) Filed a position classification appeal or a job grading appeal with OPM's Agency Compliance and Evaluation, an OPM regional office, or with their agencies; or (b) filed a retained grade or pay appeal with OPM's Agency Compliance and Evaluation or an OPM regional office. These records are used primarily to document the processing and adjudication of a position classification appeal, job grading appeal, or retained grade or pay appeal. Internally, OPM may use these records to locate individuals for personnel research.

OPM/GOVT–10

SYSTEM NAME:

Employee Medical File System Records.

System notice last published at: 55 FR 3855, February 5, 1990.

Description:

This database includes records on current and former civilian Federal employees. Some records are required to be maintained on a long-term basis. They also provide data to ensure proper medical evaluation, diagnosis, history, treatment, and continuity of care. They provide documentation of hazard exposures, treatment, medically-related employment decisions, and communications among health care providers. They are also used to enable planning of further care, evaluate quality of health care rendered, and to ensure proper operation of an agency's drug testing program.

James B. MacRae, Jr.,

Acting Administrator and Deputy Administrator, Office of Information and Regulatory Affairs.

BILLING CODE 3110–01–M

POSTAL SERVICE

Privacy Act of 1974; System of Records

AGENCY: Postal Service.

ACTION: Advance notice of revisions to an existing system.

SUMMARY: The purpose of this document is to publish, as required by 5 U.S.C. 552a(e)(11), advance notice of modifications to Privacy Act system of records USPS 120.070, Personnel Records—General Personnel Folder (Official Personnel folders and Records Related thereto). This change is necessary due to amendement of the Federal Employees Health Benefits (FEHB) Program under the provisions of Public Law 100–654, which requires the Postal Service to maintain information on certain former spouse and family members who may be eligible for health benefits coverage under the FEHB Program. For USPS 120.070, the Postal Service proposes to expand the category of individuals covered by the system and make editorial corrections and revisions to the system.

EFFECTIVE DATE: This notice is effective on an interim basis upon publication June 19, 1991, in order to correspond with the implementation provisions of Public Law 100–654. However, interested persons are invited to submit written data, views, or arguments concerning the changes in compliance with 5 U.S.C. 552a(e)(11). Comments must be received on or before July 19, 1991.

ADDRESSES: Comments may be mailed to: Records Officer, U.S. Postal Service, 475 L'Enfant Plaza, SW., Washington DC 20260–5010 or delivered to room 8141 at the above address between 8:15 a.m. and 4:45 p.m. Comments received may also be inspected during the above hours in room 8141.

FOR FURTHER INFORMATION CONTACT: Rubenia Carter, Records Office (202) 268–4872.

SUPPLEMENTARY INFORMATION: Under the provisions of Public Law 100–654, the children and former spouse of a current or former employee who lost eligibility for coverage on or after January 1, 1990, may qualify for temporary continuation of coverage under the FEHB Program. As a result, the Postal Service will maintain health benefits information pertaining to the former spouse and children who qualify and apply for health benefits coverage.

As provided by 5 U.S.C. 552a(e)(11), interested persons are invited to submit written data, views or arguments on this proposal. Prior to publication of this proposal, a report describing the proposed changes has been filed with Congress and the Office of Management and Budget for their evaluation. A waiver of the 60-day advance period, pursuant to OMB Circular A–130, has been requested. If the waiver is granted, and unless comments suggest the need for revisions, it is expected that the system changes will become effective as proposed following the expiration of the 30-day comment period.

The most recent description of USPS 120.070 appears at 54 FR 43652, dated October 26, 1989. The description is modified as shown in italics below.

USPS 120.070

SYSTEM NAME:

Personnel Records—General Personnel Folder (Official Personnel Folders and records related thereto), 120.070.

SYSTEM LOCATION:

Personnel offices at all USPS facilities; National Personnel Records Center, St. Louis, MO; Information Services Branch, Headquarters; Postal Data Center, Minneapolis, MN; National Test Administration Center Alexandria, VA; and selected contractor sites.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Present and former USPS employees; and current employees' children or former spouses and former employees' family members or former spouses who qualify and apply for Federal Employees Health Benefits coverage under Public Laws 98–615 or 100–654.

VOL 56 ISS 118 JE 19 1991 UMI

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications, resumes, merit evaluations, promotion/salary change and other personnel actions, health benefit and life insurance elections and other documents pertaining to preemployment, prior Federal employment and current service as prescribed by USPS directives.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 1001, 1005; 42 U.S.C. 2000–16. Executive Orders 11478 and 11590.

PURPOSE:

Used by administrators, *managers, selection review committees,* and individual employee supervisors to perform routine personnel functions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

General routine use statements A, B, C, D, E, F, G, H, *I,* K, L, and M *listed in the Prefatory Statement at the beginning of the Postal Service's published system notices apply to this system. Other routine uses are as follows:*

1. To provide information to a prospective employer of a USPS employee or former USPS employee.

2. To provide statistical reports to Congress, agencies, and the public on characteristics of the USPS work force.

3. To provide data for the compilation of a local seniority list that is used by management to make decisions pertaining to appointment and assignments among craft personnel. The list is posted in local facilities where it may be reviewed by USPS employees.

4. *To* transfer to the OPM upon retirement of an employee *information necessary* for processing retirement benefits.

5. Disclosure of relevant and necessary information pertaining to an employee's participation in health, life insurance and retirement programs may be made to the Office of Personnel Management and private carriers for the provision of related benefits to the participant (also see USPS 050.020).

6. Disclosure of minority designation codes may be made to the Equal Employment Opportunity Commission for the oversight and enforcement of Federal EEO regulations.

7. Disclosure of records of discipline relating to individual employees may be made to State Employment Security Agencies at the initial a determination level of the unemployment compensation claim process.

8. Information pertaining to an employee who is a retired military officer will be furnished to the appropriate service finance center as required under the provisions of the Dual Compensation Act.

9. May be disclosed to a Federal or State agency, providing parent locator services or to other authorized persons as defined by Pub. L. 93–647.

10. Records in this system are subject to review by an independent certified public accountant during an official audit of Postal Service finances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper files, preprinted forms, Official Personnel Folders, magnetic tape and other computer storage devices.

RETRIEVABILITY:

Employee name and location of employment and social security number.

SAFEGUARDS:

Folders are maintained in locked cabinets to which only authorized personnel have access; *automated records are* protected by computer passwords and tape or disc library physical security.

RETENTION AND DISPOSAL

a. Official Personnel Folder (OPF) Records—These records are considered to be permanent and are maintained until employee is separated, and then are sent to the National Personnel Records Center, St. Louis, for storage, or to another Federal agency to which the individual transfers employment.

b. Personnel Work Sheets—Destroy 30 days after a new PS 50 is issued.

c. Temporary Records of Individual Employees—Destroy when 2 years old, upon separation, or upon transfer of employee, whichever is sooner.

d. Service Record Cards—Destroy 3 years after separation or transfer of employee.

SYSTEM MANAGER(S) AND ADDRESS:

APMG, Employee Relations Department, Headquarters, *Washington, DC 20260-4200.*

NOTIFICATION PROCEDURE:

Employees wishing to gain access to their Official Personnel Folders should submit requests to the facility head where employed. Headquarters employees should submit requests to the System Manager. Former Postal Service employees should submit request to any Postal Service facility head giving name, date of birth and social security number. Former Post Office Department employees having no Postal Service employment (prior to July 1971) should submit the request to the Office of Personnel Management (formerly the U.S. Civil Service Commission), *Compliance and Investigations Group, Washington, DC 20415-0001.*

RECORD ACCESS PROCEDURE:

Requests for access should be made in accordance with the Notification Procedure above and the USPS Privacy Act regulations regarding access to records and verification of identity set forth at 39 CFR 266.6.

CONTESTING RECORD PROCEDURES:

See Notification and Record Access procedures above.

RECORD SOURCE CATEGORIES:

Individual employee, personal references, former employers and USPS 050.020 [Finance Records–Payroll System).

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

The USPS has claimed exemptions from certain provisions of the Act for several of its other systems of records as permitted by 5 U.S.C. 552a (j) and (k). See 39 CFR 266.9. To the extent that copies of exempt records from those other systems are incorporated into this system, the exemptions applicable to the original primary system shall continue to apply to the incorporated records.

Stanley F. Mires,

Assistant General Counsel, Legislative Division.

BILLING CODE 7710–12

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–29301; File No. SR–BSE–91–4]

Self-Regulatory Organizations; the Boston Stock Exchange; Order Granting Temporary Accelerated Approval to Proposed Rule Change and Amendments No. 1 and 2 Relating to Price Protection of Limit Orders

I. Introduction

On May 13, 1991, the Boston Stock Exchange ("BSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change to add a new Chapter IIB, Facilitation of GTX Orders, to the Exchange's Rules of the Board of Governors which would require BSE specialists to provide primary market protection for limit orders, designated as executable after the BSE close, based on volume that prints in the primary market's after-hours session.[3] Amendments No. 1 and 2, submitted on May 24 and May 29, 1991, respectively, further explain the proposed rule change.[4] The BSE requests accelerated approval of the proposed rule change.[5]

The proposed rule change was published for comment in Securities Exchange Act Released No. 29289 (June 3, 1991), 56 FR 26701 (June 10, 1991). No comments were received regarding the proposed rule change.

II. Description of the Proposal

The BSE proposal is designed to protect limit orders on the books of BSE specialists by providing primary market protection if an issue trades at the limit price in a primary market's after-hours trading session. The BSE submitted this rule change as a competitive response to the New York Stock Exchange's ("NYSE") Off-Hours Trading ("OHT") facility that was recently approved by the Commission.[6]

The BSE proposes to add a new Chapter IIB, Facilitation of GTX Orders, which would apply to the facilitation of certain orders after the close of the 9:30 a.m. to 4 p.m. trading session. Specifically, the new rules create a new type of order on the BSE—a "GTX" order. The BSE proposal defines a GTX order as an unconditioned "GTC" ("good 'till cancelled") [7] order designated by the entering broker as executable at 5:00 p.m. at the primary market closing price.[8] Under the BSE proposal, pursuant to the BSE Execution Guarantee Rule,[9] If an issue has traded at the limit price in a primary market's after-hours trading session, the BSE specialist would be required to fill GTX orders based on volume that prints in the primary market's after hours trading session.

Section 33.01(c) of the BSE' Execution Guarantee Rule requires a specialist to fill all agency limit orders if the issue is trading on the primary market at the limit price, unless it can be demonstrated that such order would not have been executed if it had been transmitted to the primary market, or the broker and specialist agree to a specific volume-related or other criteria requiring a fill. In effect, the BSE's new rule extends this execution guarantee rule by requiring that, if an issue has traded to the limit price in a primary market's after-hours trading session, the BSE specialist must fill limit orders, designated as executable after the BSE close by the GTX designation, based on volume that prints in the primary market's after-hours session.

Thus, the BSE proposal does not propose to establish a separate after-hours trading session. Instead, it proposes to amend the Exchange's execution guarantee rules to require Exchange specialists to fill certain limit orders (orders which satisfy certain stated criteria) after the close of the regular BSE auction market trading session.

Under the BSE proposal, the BSE's Automated Communications and Order Routing Network ("BEACON"), would scan the limit order books of BSE specialists for limit orders that are priced at the NYSE closing price and have been designated as GTX. The BSE proposal would give customers the option of deciding whether they want their limit orders to be designated as GTX orders and thus eligible for execution after the close of the regular BSE auction trading session.[10] If a limit order meets these criteria (*e.g.,* it has been designated as eligible for execution in an after-hours session and is priced at the NYSE closing price), then it would become eligible for a fill at the NYSE closing price based on volume that prints in the primary market's after-hours session. Under the proposal, customers could cancel GTX orders during the regular the 9:30 a.m. to 4 p.m. trading day and from 4 p.m. to 5 p.m.

The only two situations under which a BSE specialist would not be obligated to fill customer limit orders, designated as GTX, based on volume that prints in the primary market's after-hours session are: (1) If it can be demonstrated that the order would not have been executed if it has been transmitted to the primary market; and (2) if a customer cancels a GTX order. In other words, unless a specialist can demonstrate that, upon receipt of a customer's GTX order, a duplicate order was transmitted by the specialist to the NYSE, and that duplicate order was not executed in NYSE's Crossing Session I, or that a GTX order was cancelled at the initiation of a customer, the specialist would be required to fill all eligible GTX orders up to the amount of the volume that prints at the end of NYSE's Crossing Session I. GTX orders would retain the priority among themselves that exists on the specialist's books and would be entitled to an execution based on that priority. If a limit order that is eligible for execution in an after-hours session does not get executed, it will remain on the limit order book of the BSE specialist and would retain its priority during the next day's regular trading session.

Specialists would manually execute GTX orders once the appropriate volume in a particular security in NYSE's Crossing Session I has been determined. As a practical matter, this will occur at approximately 5 p.m. In addition, the BSE proposes to report GTX executions to the consolidated tape after the NYSE prints its 5 p.m. Crossing Session I transactions. Each individual trade would be reported "regular way,"

---

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1990).

[3] The Commission notes that the BSE proposal is substantially similar to proposals by the Midwest ("MSE"), Pacific ("PSE") and Philadelphia ("Phlx") Stock Exchanges which are also being approved on an accelerated basis by the Commission. See Files No. SR–MSE–91–11; SR–PSE–91–21; SR–Phlx 91–20.

[4] Amendments No. 1 and 2 do not change the substance of the proposed rule change, but instead add new language clarifying the specialists' obligations with respect to GTX orders under the requirements of the new rule.

[5] See Amendment No. 2 to File No. SR–BSE–91–4.

[6] The NYSE's OHT facility extends the NYSE's trading hours beyond the 9:30 a.m. to 4:00 p.m. trading session to establish two trading sessions: Crossing Session I and Crossing Session II. Crossing Session I permits the execution of single-stock single-sided closing-price orders and crosses of single-stock closing-price buy and sell orders. Crossing Session II allows the execution of crosses of multiple-stock aggregate-price buy and sell orders. See Securities Exchange Act Release No. 29237 (May 24, 1991), 56 FR 24053 (May 31, 1991) ("NYSE OHT Release") (approving Files No. SR–NYSE–90–52 and NYSE–90–53). The Commission approved the NYSE's OHT facility (Files No. SR–NYSE–90–52 and NYSE–90–53) on May 20, 1991. The NYSE has indicated to the Commission that it is prepared to begin the operation of its OHT facility on June 13, 1991.

[7] BSE chapter I, section 3 states that a GTC order is an order to buy or sell which remains in effect until it is either executed or cancelled.

[8] The new rules also define two other new order types. A one-sided single stock order ("OS") is defined as a buy or sell order entered after 4 p.m. for execution in after-hours trading session; and a two-sided single stock order ("TS") is defined as a coupled buy and sell order entered after 4 p.m. for execution in an after-hours trading session. At the current time, however, the BSE does not intend to change its trading hours and operations to accommodate OS and TS orders. The BSE has defined these new order types in this rule filing so that, if the Exchange decides at some future time to accommodate such orders, the Exchange Rules will already define them. See letter from Brian L. Riddell, Executive Vice President, Trading Services, BSE, to Howard Kramer, Assistant Director, Division of Market Regulations, SEC, dated May 23, 1991.

[9] See infra.

[10] The BSE states that it will use its existing systems to implement the proposed rule change and execute GTX orders. The BSE represents that it has no systems capacity concerns regarding the execution of GTX orders and that modifications to its systems to permit the execution of those orders were tested successfully prior to this order.

as is the current practice during the 9:30 a.m. to 4 p.m. trading session.[11]

Finally, the BSE seeks exemptive relief from the requirements of Rule 10a–1 under the Act ("short sale rule") for the limited purpose of providing full primary market protection for its GTX limit orders.[12]

III. Discussion and Commission Findings

After careful consideration, the Commission believes that the BSE proposal is reasonably designed to promote just and equitable principles of trade, perfect the mechanism of a free and open national market system, and, in general, further investor protection and the public interest in fair and orderly markets on national securities exchanges, as well as facilitate the linking of qualified markets through appropriate communication systems and the practicability of brokers executing investors' orders in the best market. For these reasons and for the additional reasons set forth below, the Commission finds that approval, for a temporary period ending on May 24, 1993, of the Exchange's proposal rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of sections 6 and 11A of the Act.[13]

In the recent Commission release approving the NYSE's OHT facility, the Commission noted the benefits that would accrue to investors through development of an after-hours trading session. The Commission in that order also stated that the NYSE OHT sessions should enhance competition by providing a service to customers that other exchanges currently are not providing.[14] In that release, the Commission noted that innovation that provides marketplace benefits to attract order flow to one marketplace does not result in unfair competition if the other markets are free to compete in the same manner.[15] In this regard, the Commission noted that, if other U.S. securities marketplaces desire to compete with the NYSE's OHT facility, they could provide a similar service.[16]

Although the BSE proposal does not copy the NYSE's OHT facility, it nonetheless presents a reasonable competitive response. By allowing GTX orders that could be executed on the NYSE to receive a similar fill on the BSE, the Exchange is providing a mechanism for maintaining its own individual marketplace on a competitive level with the primary market. Accordingly, the Commission believes that the BSE proposal should be approved for many of the same reasons that the Commission approved the NYSE OHT facility.[17]

The Commission believes that both the instant BSE proposal and the NYSE's OHT facility, as well as several proposals recently received by the Commission from other U.S. marketplaces, demonstrate the competitiveness of the U.S. securities markets. As a result of these marketplace initiatives, U.S. investors soon will have new opportunities for trading, including the ability to have their orders executed on both the NYSE and the BSE after the close of the regular 9:30 a.m. to 4 p.m. trading session at the closing price established on the primary market. Moreover, the Commission believes that the increased competition that results from permitting BSE specialists to attract GTX orders should enhance the quality of customer order executions.

In addition, the Commission believes that the BSE proposal is consistent with the maintenance of fair and orderly markets and should contribute to the practicability of brokers achieving a best execution for customer orders. The new BSE rules would achieve this by imposing additional obligations on Exchange specialists to provide their customers with primary market price protection. The parameters of the new rule are expressed clearly in the text of the rule and do not leave any discretion to specialists in deciding which orders to fill and what priority to give these orders. The new rule makes clear that if customer limit orders are designated as GTX and are priced at the primary market closing price, then the specialist is obligated to fill those orders up to the volume that prints at the end of NYSE Crossing Session I.[18] The specialist is relieved of this obligation only if he or she can demonstrate that a particular order would not have been executed if it had been transmitted to the primary market. As discussed above, the Commission believes that the only way in which this can be demonstrated is by showing that an order was sent to the primary market and it was not filled or if a customer cancels a GTX order prior to its execution.

In addition, the BSE proposal does not disturb the priority rules currently in force at the Exchange. During the regular trading hours, orders on the specialist's book would maintain the same priority as existed before adoption of this proposal. Among GTX orders that are eligible after 4:00 p.m. for possible execution, priority is maintained as it was during the regular trading day. If a GTX order is not executed, it will remain on the specialist's book and will maintain its priority.

Furthermore, the Commission believes that, although BSE specialists will know which limit orders are designated "GTX" and will manually execute GTX orders, they should not be able to use this information to their own advantage. As discussed above, the BSE proposal constitutes an extension of the BSE's daytime executive guarantee system. It does not create an additional session where specialists can participate. Specialist participation would be limited to filling the contra side of a customer limit order that is eligible, pursuant to the new rule, for a fill. The specialist would have no discretion in choosing which orders to fill and which priority to give orders. Orders would be eligible for a fill based on strict criteria (*e.g.*, orders that are priced at the NYSE closing price and have been designated GTX are eligible to be filled based on volume that prints in the primary market's after-hours session). In addition, orders would be eligible to be filled according to the priority that already exists on the specialists' books. Thus, the Commission is satisfied that, although BSE specialists will have knowledge of which limit orders have been designated GTX, they will not be able to use this knowledge to the detriment of investors because their participation in the execution of GTX orders will be limited. The Commission expects, however, that the BSE will monitor carefully the execution of GTX orders to ensure that BSE specialists are not taking unfair advantage of this information. In this regard, the Commission expects the BSE to report, within 18 months of the date of the approval of this order, on this issue. The Commission may, at that time, wish to revisit this issue.

The Commission notes that the NYSE's OHT facility was approved for a two year temporary period, commencing on May 24, 1991. In approving the NYSE proposal for a temporary period, the Commission noted that the NYSE OHT facility raised several "intermarket" issues, such as: (i) Whether the Intermarket Trading System ("ITS") should be operational during any time period when both the NYSE Crossing Sessions and another ITS market are accepting orders; (ii) whether the NYSE should be required to permit orders entered "GTX" on the books of regional specialists to "migrate" automatically at the close(s) of such regional exchanges to the NYSE Crossing Session I order book; (iii) if so, with what priority, if any; and (iv) who should bear the cost of developing a working mechanism for such transmittal.

In the release approving the NYSE OHT facility, the Commission also noted that, because at least one other exchange had proposed a trading session similar or identical to the NYSE's OHT facility, significant national market system issues would have to be resolved by the NYSE and the competing market, in conjunction with the SEC. Although the BSE proposal does not present an after-hours crossing session like the NYSE's OHT facility, it would establish an after-hours trading system that will compete directly with NYSE Crossing Session I. Accordingly, the Commission believes that a temporary approval period ending on May 24, 1993, is also appropriate for the BSE proposal.[19]

The Commission believes that this time period will provide an opportunity for the Commission and market participants to observe the actual operation of the NYSE's OHT facility and the BSE's after-hours proposal. Based on these observations the Commission and market participants will be in a better position to evaluate whether further steps to link the NYSE's OHT facility with comparable systems operating at the same time are necessary or appropriate to protect investors or promote fair competition and whether any other linkage issues arise. In this regard, 18 months from the date of approval of the instant proposal, the BSE should submit a new filing pursuant to Rule 19b–4 under the Act requesting permanent approval of its proposed rule change, as well as a report describing the BSE's experience with the new rule during that 18-month period. The report should include, but not be limited to, the following information (broken down by month) for the 18-month period:

- Whether customers who have entered GTX orders experienced any problems when they attempted to cancel such orders
- Whether the Exchange has experienced any difficulties in monitoring the activities of specialists with regard to determining their particular obligations to fill GTX orders
- The number, if any, of GTX orders executed after the close of the BSE's regular auction trading session pursuant to the new rule
- The number, if any, of GTX orders that remain unexecuted after the BSE specialist has fulfilled his or her obligations in connection with the new rule
- The number and percentage of GTC orders on the book that were designated "GTX" and thus eligible to be filled
- Whether the BSE marketplace has experienced any increased volatility during the last hour of the 9:30 a.m. to 4 p.m. trading sessions after the initiation of the new rule
- Whether there were greater (wider) quote spreads during the last hour of the 9:30 a.m. to 4 p.m. trading session after the initiation of the new rule
- Whether the Exchange or any specialist has given any special guarantees to execute GTX orders over and above the current requirements of the Execution Guarantee Rule and the requirements of the new rule

In addition, the Commission expects that the BSE, through use of its surveillance procedures, will monitor for, and report to the Commission, any patterns of manipulation or trading abuses or unusual trading activity resulting from the new rule. Finally, the Commission expects the BSE to keep the Commission apprised of any technical problems which may arise regarding the operation of the new rule, such as difficulties in order execution or order cancellation.

Finally, the Commission finds good cause for approving the proposed rule change and Amendments No. 1 and 2 prior to the thirtieth day after the date of publication of notice of filing thereof. The BSE's proposal merely extends the Exchange's execution guarantee procedures to incorporate GTX orders and the possibility of a 5 p.m. execution. It does not substantially alter current BSE procedures, nor does it raise issues not already addressed in the order approving the NYSE's OHT system. Accordingly, the Commission believes it is appropriate to approve the proposed rule change on an accelerated basis so that it can be in effect on the date that the NYSE's OHT facility commences operation. This will permit the BSE to compete with Crossing Session I of the NYSE's OHT facility, which in turn should benefit investors and promote competition among markets.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[20] that the proposed rule change is approved for a temporary period ending on May 24, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[21]

Dated: June 13, 1991.

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing of Index Warrants Based on the Europe-Australia-Far East ("EAFE") Index

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 13, 1991, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE is proposing under Rule 31.5(E) of the Exchange's Rules to list and trade index warrants based on the Morgan Stanley Capital International ("MSCI") Europe-Australia-Far East ("EAFE") Index, which is a capitalization-weighted index representative of the stock market structure of Europe and the Pacific Basin. In accordance with the requirements set forth in Securities Exchange Act Release No. 28556

VOL 56 ISS 118 JE 19 1991 UMI

(October 19, 1990), 55 FR 43233, the CBOE has submitted this filing pursuant to Rule 19b–4 under the Act to obtain Commission approval to list these warrants.

The text of the proposed rule is available at the Office of the Secretary, CBOE, and at the Commission.

II. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and statutory basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

CBOE Rule 31.5(E) sets forth the guidelines applicable to listing index warrants based on established foreign and domestic stock indexes. The Exchange is proposing to list index warrants based on the EAFE Index. EAFE is a broad-based index designed to represent the performance of an unmanaged portfolio of stocks listed for trading on stock markets other than those in North America. As of March 31, 1991, the index consisted of 1,068 companies traded on stock markets in 18 countries in Europe and the Pacific Basin.[1] Unlike other broad-based indexes, the number of stocks included in EAFE is not fixed and may vary to enable the Index to continue to reflect the primary home markets of the constituent countries. Changes in the Index will be announced when made. EAFE is a capitalization-weighted index calculated by MSCI based on the official closing prices for each stock in its primary local or home market. The base value of the index was equal to 100.0 on January 1, 1970. As of March 27, 1991, the current value of the Index was 842.70.

The warrant issues will conform to the listing guidelines under Rule 31.5(E) which provide that (1) the issuer shall have assets in excess of $100,000,000 and otherwise substantially exceed the size and earnings requirements in Rule 31.5(A); (2) the term of the warrants shall be for a period ranging from one to five years from the date of issuance; and (3) the minimum public distribution of such issues shall be 1,000,000 warrants together with a minimum of 400 public holders, and have an aggregate market value of $4,000,000.

EAFE index warrants will be direct obligations of their issuer subject to cash-settlement during their term, and either exercisable throughout their life (*i.e.*, American style) or exercisable only on their expiration date (*i.e.*, European style). Upon exercise, or at the warrant expiration date (if not exercisable prior to such date), the holder of a warrant sturcutred as a "put" would receive payment in U.S. dollars to the extent that the EAFE Index has declined below a pre-stated cash settlement value. Conversely, holders of a warrant structured as a "call" would, upon exercise or at expiration, receive payment in U.S. dollars to the extent that the EAFE Index has increased above the pre-stated cash settlement value. If "out-of-the-money" at the time of expiration, the warrants would expire worthless.

The CBOE has adopted suitability standards applicable to recommendations to customers of index warrants and transactions in customer accounts. Exchange Rule 30.50 Interpretation .02 sets forth suitability standards applicable to recommendations to customers of index warrants and transactions in customer accounts. It applies the options suitability standards in Rule 9.9 to recommendations regarding index warrants; and recommends that index warrants be sold only to options-approved accounts.

In addition, Exchange Rule 30.50 Interpretation .03 requires that the standards of Rule 9.10(a) regarding discretionary orders be applied to index warrants. This Rule requires a Senior Registered Options Principal or a Registered Options Principal to approve and initial a discretionary order in index warrants on the day the order is entered. In addition, the Exchange, prior to the commencement of trading, will distribute a circular to its membership calling attention to specific risks associated with warrants on the EAFE Index.

In the generic approval order for index warrants,[2] the Commission noted that, with respect to foreign index warrants, there should be an adequate mechanism for sharing surveillance information with respect to the index's component stocks. In this regard, the CBOE is undertaking to establish an appropriate means to accomplish such information sharing.

The Exchange believes that the proposed rule change is consistent with the requirements of the Act, and, in particular, section 6(b)(5), as the warrants are designed to prevent fraudulent and manipulative acts and practices and to promote just and equitable principles of trade, and are not designed to permit unfair discrimination between customers, issuers, brokers of dealers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The CBOE believes that the proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or others

No written comments were solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up of 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifty Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by July 10, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: June 11, 1991.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[1] The weighing of the EAFE Index by country is as follows: (1) Australia (2.40%); (2) Austria (0.47%); (3) Belgium (1.18%); (4) Denmark (0.78%); (5) Finland (0.40%); (6) France (5.42%); (7) Germany (5.66%); (8) Hong Kong (1.64%); (9) Italy (2.38%); (10) Japan (50.66%); (11) Netherlands (2.67%); (12) New Zealand (0.18%); (13) Norway (0.44%); (14) Singapore/Malaysia (1.21%); (15) Spain (1.99%); (16) Sweden (1.74%); (17) Switzerland (3.22%); and (18) United Kingdom (17.36%).

[Release No. 34–29236; International Series No. 288; File No. SR–NYSE–91–17]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the New York Stock Exchange, Inc. Relating to the Listing of Warrants Based on the European-Australia-Far East ("EAFE") Index

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 10, 1991, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to approve for listing and trading under section 703.17 (Index Warrants) of the Exchange's Listed Company Manual warrants based on the Europe-Australia-Far East ("EAFE") Index that Morgan Stanley Capital International ("MSCI") [1] owns, calculates and disseminates. the EAFE Index currently consists of 1,068 of the most highly capitalized and actively-traded stocks on stock exchanges located in Australia, New Zealand and 16 other countries throughout Europe and the Far East.

[1] EAFE, MSCI are trademarks and service marks of Morgan Stanley & Co. Incorporated.

The text of the proposed rule is available at the Office of the Secretary, NYSE, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and statutory basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in section (A), (B), and (C) below, or the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Under section 703.17 (Index Warrants) of the NYSE's Listed Company Manual, the Exchange may approve for listing index warrants based on established foreign and domestic indexes. The NYSE is proposing to list index warrants based on the EAFE Index, an internationally-recognized, capitalization-weighted, broad-based index representing the performance of an unmanaged portfolio of stocks listed for trading on stock markets in Europe, New Zealand and the Far East. As of March 31, 1991, the Index consisted of 1,068 stocks traded on stock exchanges located in 18 countries.[2] The Index has been calculated since January, 1970.

MSCI currently disseminates the EAFE Index throughout the United States and other parts of the world by assorted publications and market data vendors. MSCI owns the EAFE Index and is responsible for calculating and maintaining the Index. It monitors corporate developments relating to the Index's component stocks and makes determinations as to additions to and deletions from the EAFE Index. MSCI has arranged to have an independent third party, The Economist, review its recommendations for additions and deletions in order to confirm that those recommendations conform to the stated methodology.

[2] The weighing of the EAFE Index by country is as follows: (1) Australia (2.40%); (2) Austria (0.47%); (3) Belgium (1.18%); (4) Denmark (0.78%); (5) Finland (0.40%); (6) France (5.42%); (7) Germany (5.66%); (8) Hong Kong (1.64%); (9) Italy (2.38%); (10) Japan (50.66%); (11) Netherlands (2.67%); (12) New Zealand (0.18%); (13) Norway (0.44%); (14) Singapore/Malaysia (1.21%); (15) Spain (1.99%); (16) Sweden (1.74%); (17) Switzerland (3. 22%); and (18) United Kingdom (17.36%).

EAFE Index warrant issues will conform to the listing guidelines under section 703.17 (Index Warrants) of the Listed Company Manual, which provides that (1) the issuer shall have assets in excess of $100,000,000 and otherwise substantially exceed the size and earnings requirements in section 102.01 of the Listed Company Manual; (2) the term of the warrants shall be for a period of at least one year from the date of issuance; and (3) the minimum public distribution of such issues shall be 1,000,000 warrants together with a minimum of 400 public holders, and have a minimum eggregate market value of $4,000,000.

EAFE Index warrants will be direct obligations of their issuer subject to cash-settlement during their term, and either exercisable throughout their life (*i.e.*, American style) or exercisable only on their expiration date (*i.e.*, European style). Upon exercise, or at the warrant expiration date (if not exercisable prior to such date), the holder of a warrant structured as a "put" would receive payment in U.S. dollars to the extent that the EAFE Index settlement price has declined below a pre-stated strike price. Conversely, holders of a warrant structured as a "call" would, upon exercise or at expiration, receive payment in U.S. dollars to the extent that the EAFE Index settlement price has increased above the pre-stated strike price. If "out-of-the-money" at the time of expiration, the warrants would expire worthless.

The NYSE has adopted suitability standards applicable to recommendations to customers of index warrants and transactions in customer accounts. Supplementary Material .30 of Rule 405 ("Diligence as to Accounts") applies the options suitability standard in Rule 723 ("Suitability") to recommendations regarding index warrants, and recommends that index warrants be sold only to options-approved accounts. Supplementary Material .10 of Rule 408 ("Discretionary Power in Customers' Accounts") requires a Senior Registered Options Principal or a Registered Options Principal to approve and initial a discretionary order in index warrants on the day the order is entered. In addition, the Exchange, prior to the commencement of trading, will distribute a circular to its membership calling attention to specific risks associated with warrants on the EAFE Index.

In the generic approval order for index warrants,[3] the Commission noted

[3] Securities Exchange Act Release No. 28153 (June 26, 1990), 55 FR 27734.

VOL 56 ISS 118 JE 19 1991 UMI

that, with respect to foreign index warrants, there should be an adequate mechanism for sharing surveillance information with respect to the index's component stocks. In this regard, the NYSE has entered into information sharing agreements with the regulatory authorities of a number of constituent countries and is seeking to enter into such agreements with the regulatory authorities of other constituent countries to provide for the sharing of necessary information between the Exchange and those authorities to fulfill their respective regulatory responsibilities.

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section (b)(5) in particular in that it is designed to prevent fraudulent and manipulative acts and practices and to promote just and equitable principles of trade, and is not designed to permit unfair discrimination between customers, issuers, brokers or dealers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NYSE believes that the proposed rule change will impose no burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by July 10, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: June 11, 1991.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-29292; File No. SR-DTC-91-12]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to the Fee Schedule for DTC Services

June 12, 1991

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 24, 1991, The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR-DTC-91-12) as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Depository Trust Company ("DTC") is filing herewith the following changes in the fee schedule for DTC services:

Service	Fee
SDFS Delivery Orders:	
• Via PTS, MDH or CCF for each delivery item presented Prior PM, AM opening to 6:15 PM.	$1.86 to the deliverer, $2.11 to the deliverer, $1.95 for each item received.
• ID System	$1.86 for each item delivered or received.
• Commercial Paper (CP).	$1.95 for each item delivered or received.
• CP Maturity Presentments.	$1.81 for each item delivered or received.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, DTC included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. DTC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change, which will be effective for services provided after May 31, 1991, is to recover DTC's cost of expanding by $100 million its lines of credit for loans to facilitate SDFS settlement.

Since the proposed rule change relates to the equitable allocation of dues, fees and other charges among Participants, it is consistent with the requirements of section 17A(b)(3)(D) of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

DTC does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change, Received From Members, Participants, or Others

DTC has not sought or received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4 thereunder, because the proposed rule change establishes or changes a due, fee, or other charge imposed by the self-regulatory organization. At any time within 60 days of the filing of such rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of DTC. All submissions should refer to File No. SR-DTC-91-12 and should be submitted by July 10, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91-14519 Filed 6-18-91; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-29296; File No. SR-DTC-91-13]

Self-Regulatory Organizations; the Depository Trust Co.; Notice of a Proposed Rule Change Relating to Expanded Use of the Seg-100 Account.

June 13, 1991.

Pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on May 31, 1991, the Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR-DTC-91-13) as described in Items I, II, and III below, which items have been prepared by DTC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

In 1988, DTC introduced the Segregation Account No. 100 ("Seg-100") to allow participants to deposit foreign-owned shares of certain U.S. communications and maritime issues in their DTC accounts.[2] Until now, Seg-100 has been used exclusively for the segregation of these types of issues.

Under the proposed rule change, participants may use Seg-100 to segregate securities with other specialized ownership restrictions that are imposed by applicable law and that are based on the beneficial owner's residence, domicile, or citizenship.

II. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, DTC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. DTC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

DTC's current Seg-100 procedure allows participants to deposit foreign-owned shares of certain U.S. communications and maritime issues in their DTC accounts. The purpose of the proposed rule change is to enable participants to use Seg-100 to segregate securities with other specialized ownership restrictions that are imposed by applicable law and that are based on the beneficial owner's residence, domicile, or citizenship. For example, under applicable law beneficial owners of certain issues may lose tax benefits if the number of shares beneficially owned by citizens or residents of a particular political or geographical region exceeds a specified percentage of all shares issued and outstanding. At the time each issue with specialized ownership restrictions that are imposed by applicable law and that are based on the beneficial owner's residence, domicile, or citizenship is made eligible, DTC will announce to participants the CUSIP number of the securities and the issuer's description of the type of ownership restriction triggering the requirement that the securities must be segregated via the Seg-100 function.

In all other respects, Seg-100 will continue to operate as it does now. As participants know, DTC will notify the issuer or its agent periodically of the aggregate number of shares of a particular CUSIP number in participants' Seg-100 accounts. The issuer or its agent will then inform DTC if any transfers to participants' Seg-100 accounts caused the applicable restriction on ownership for that CUSIP number to be exceeded. In any such event, as is done currently, DTC will debit the account of the participant that last transferred shares to its Seg-100 account, and the participant will be required to withdraw those shares immediately from its DTC general account. Under these circumstances, DTC's current practice includes acting affirmatively to facilitate the certificate withdrawal, including, where necessary, disclosing to the issuer the identity of the affected participant and the number of shares to be withdrawn.

Seg-100 thus continues to centralize and automate communications between DTC participants and issuers of securities in cases where because of ownership restrictions imposed by applicable law the issuer or its agent must have specialized information about the citizenship, residence, or domicile of beneficial owners of securities registered in the name of DTC's nominee, Cede & Co.

The proposed rule change, therefore, is consistent with the requirements of section 17A of the Act and the rules and regulations thereunder. Because it removes a disincentive to registering certain shares in the name of DTC's nominee, it promotes the immobilization of securities certificates at DTC.

[2] Securities Exchange Act Release No. 25968 (August 10, 1988), 53 FR 30693 (notice of filing and immediate effectiveness of Seg-100). See also Securities Exchange Act Release No. 27346 (October 5, 1989), 54 FR 43010 (notice of filing and immediate effectiveness of proposed rule change clarifying procedures relating to Seg-100).

VOL 56 ISS 118 JE 19 1991 UMI

(B) Self-Regulatory Organization's Statement on Burden on Competition

DTC does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

DTC has not solicited or received written comments on the proposed rule change. In discussions between DTC and representatives and counsel of the issuer and underwriter of the first CUSIP to be eligible for the expanded use of Seg-100, DTC ascertained that the existing Seg-100 function could be adapted to satisfy their needs.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room at the address above.

Copies of such filing will also be available for inspection and copying at the principal office of DTC. All submissions should refer to the File No. SR-DTC-91-13 and should be submitted by July 10, 1991.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-29291; File No. SR-DTC-91-08]

Self-Regulatory Organizations; The Depository Trust Co.; Order Approving a Proposed Rule Change Relating to a New Legal Notice System

June 12, 1991.

I. Introduction

On April 10, 1991, The Depository Trust Company ("DTC") filed a proposed rule change (File No. SR-DTC-91-08) with the Securities and Exchange Commission ("Commission") pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act") [1] Notice of the proposal was published in the **Federal Register** on May 8, 1991, to solicit comments from interested persons.[2] No comments were received. As discussed below, this order approves the proposal.

II. Description of the Proposal

The proposed rule change establishes procedures whereby DTC participants ("Participants") may order certain notices received by DTC that they wish to review. Participants will choose notices from a menu on their Participant Terminal System ("PTS") screen through DTC's Legal Notice System ("LENS").

According to DTC, its current notice distribution system has become an enormous and expensive enterprise requiring duplication and distribution of up to 850,000 copies per day. The expense for all of this is borne by Participants and is paid for out of their general fee. A recent DTC survey revealed that most Participants found that only a fraction of currently distributed notices were of interest to them.

Participants asked DTC to create a system that would reduce the amount of notices they receive. LENS was developed accordingly to allow Participants to prescreen certain notices that are received by DTC and that DTC chooses to make available to Participants via LENS. Notices include legal notices relating to bankruptcies and class actions and asset-backed notices relating to default and performance histories of asset-backed securities. LENS will enable Participants to avoid receiving and, ultimately, to avoid paying for the duplication and distribution of notices that are irrelevant to them.[3]

LENS also will allow, where practical, certain enhancements to the current distribution system. Under the proposal, Participants can: (1) Identify the CUSIP numbers associated with the issues that are the subject of the notices; (2) search for notices by CUSIP numbers; (3) conduct position checks by CUSIP numbers; and (4) access, with automatic order capability, an automated record of notices requested during the prior year. The proposal also will facilitate DTC's distribution of certain lengthy notices (*e.g.*, notices relating to default and performance histories of asset-backed securities) that might otherwise have been too expensive to duplicate and distribute to all DTC Participants.[4] DTC also believes the proposal will facilitate the DTC's effort to establish equitable fees for this service.[5]

Participants interested in obtaining a copy of a particular notice will order it through LENS. DTC will send the ordering Participant the notice by DD box [6] or first class mail early on the third business day following the request. DTC plans to charge Participants a per page fee for copies of notices ordered through LENS.[7]

III. Discussion

The Commission believes that DTC's proposed rule change is consistent with the Act and in particular with Section 17A of the Act. Accordingly, for the reasons discussed below, the Commission is approving the proposal.

---

[1] 15 U.S.C. 78s(b).

[2] Securities Exchange Act Release No. 29133 (April 30, 1991), 56 FR 20691.

[3] As an alternative to the ordering process via PTS, DTC will provide a standard ordering agreement under which Participants may place a one time request to have a copy of each legal and/or asset-backed notice that DTC makes available automatically forwarded to them via their DTC DD box.

[4] Pursuant to the requirements under Commission Rule 17a-22 (17 CFR 240.17a-22), DTC will be required to file with the Commission copies of all LENS notices it issues or makes available to its participants.

[5] A Participant would not be charged any fee for the duplication and distribution of any notices in which the Participant was not interested and did not order. Currently, all Participants contribute to the cost of duplication and distribution out of DTC's general fees.

[6] DD box is DTC's designation for its lock-box system.

[7] In order to fully implement the proposal, DTC will be required to file with the Commission an additional proposed rule change setting forth the fees it intends to assess its Participants for their use of LENS.

The Commission believes that the proposal is consistent with sections 17A(a)(1) (B) and (C) of the Act.[8] Those sections articulate findings that new data processing and communications techniques create the opportunity for more efficient, effective, and safe procedures for clearance and settlement and that inefficient procedures for clearance and settlement impose unnecessary costs on investors and persons facilitating transactions by and acting on behalf of investors. DTC has indicated that LENS efficiently facilitates the communication to Participants of information that is germane to the Participants' clearance and settlement activities. The Commission concurs and believes that LENS will provide added speed and efficiency to the transfer of information between DTC and Participants and should help eliminate much of the waste built into the current system.

IV. Conclusion

For the reasons stated above, the Commission finds that DTC's proposal is consistent with section 17A of the Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[9] that DTC's proposed rule change (SR-DTC-91-08) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34-29297; File No. SR-MSE-91-11]

Self-Regulatory Organizations; the Midwest Stock Exchange; Order Granting Temporary Accelerated Approval to Proposed Rule Change Relating to Price Protection of Limit Orders

I. Introduction

On May 7, 1991, the Midwest Stock Exchange ("MSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] a proposed rule change to amend Article XX, Rule 37 (Guaranteed Execution System) of the Exchange's Rules of the Board of Governors and to add Interpretation and Policy paragraph .02, which would require MSE specialists to provide primary market protection for limit orders, designated as executable after the MSE close, based on volume that prints in the primary market's after-hours session.[3] The MSE requests accelerated approval of the proposed rule change.[4]

The proposed rule change was published for comment in Securities Exchange Act Release No. 29200 (May 16, 1991), 56 FR 23048 (May 24, 1991). No comments were received regarding the proposed rule change.

II. Description of the Proposal

The MSE proposal is designed to protect limit orders on the books of MSE specialists by providing primary market protection if an issue trades at the limit price in a primary market's after-hours trading session. The MSE submitted this rule change as a competitive response to the New York Stock Exchange's ("NYSE") Off-Hours Trading ("OHT") facility that was recently approved by the Commission.[5] In its rule filing, the MSE states that the proposal is designed to compete directly with NYSE "Crossing Session I," which enables orders in individual stocks to be executed at the NYSE closing price.

The MSE proposes to add new language to Rule 37 ("Guaranteed Execution System"). Rule 37.3 currently states that:

3. All agency limit orders in Dual Trading System [6] issues will be filled if one of the following conditions occur: (a) the bid or offering at the limit price has been exhausted in the primary market * * * (b) there has been a price penetration of the limit in the primary market, or (c) the issue is trading at the limit price on the primary market unless it can be demonstrated that such order would not have been executed if it had been transmitted to the primary market or the broker and specialist agree to a specific volume related or other criteria for requiring a fill.

The MSE proposal would amend this subsection to require that all agency limit orders in Dual Trading System issues be filled if the issue is trading at the limit price on the primary market in either the regular trading session or an after-hours trading session, unless it can be demonstrated that such order would not have been executed if it had been transmitted to the primary market or the broker and specialist agree to a specific volume related or other criteria for requiring a fill. New Interpretation and Policy .02 would qualify specialists' obligations under this amended subsection by providing that if the issue has traded at the limit price in a primary market's after-hours trading session the MSE specialist would fill limit orders, designated as executable after the MSE close, based on volume that prints in the primary market's after-hours session.

Thus, the MSE proposal does not propose to establish a separate after-hours trading session to compete with NYSE's Crossing Session I. Instead, it proposes to amend the Guaranteed Execution System to require its specialists to fill certain limit orders (orders which satisfy certain stated criteria) after the close of the regular MSE auction market trading session.

Under the MSE proposal, the MSE's Automated Execution System ("MAX") would scan the limit order books of MSE specialists at 4 p.m. for limit orders that are priced at the NYSE closing price and have been designated as "GTX" ("good 'til cancelled, executable in the after-hours session").[7] The MSE proposal would give customers the option of deciding whether they want their limit orders to be designated as GTX orders and thus eligible for execution after the close of the regular MSE auction trading session.[8] If a limit order meets these

[4] 15 U.S.C. 78s(b)(1)((1988).

[5] 17 CFR 240.19b-4 (1990).

[8] The Commission notes that the MSE proposal is substantially similar to proposals by the Boston ("BSE"), Pacific ("PSE"), and Philadelphia ("Phlx") Stock Exchanges which are also being approved on an accelerated basis by the Commission. *See* Files No. SR-BSE-91-4; SR-PSE-91-21; SR-Phlx-91-28.

[4] *See* File No. SR-MSE-91-11 and letter from Daniel J. Liberti, Associate Counsel, MSE, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated May 23, 1991.

[5] The NYSE's OHT facility extends the NYSE's trading hours beyond the 9:30 a.m. to 4 p.m. trading session to establish two trading sessions: Crossing Session I and Crossing Session II. Crossing Session I permits the execution of single-stock single-sided closing-price orders and crosses of single-stock closing-price buy and sell orders. Crossing Session II allows the execution of crosses of multiple-stock aggregate-price buy and sell orders. *See* Securities Exchange Act Release No. 29237 (May 24, 1991), 56 FR 24853 (May 31, 1991) ("NYSE OHT Release") (approving Files No. SR-NYSE-90-52 and NYSE-90-53). The Commission approved the NYSE's OHT facility (Files No. SR-NYSE-90-52 and NYSE-90-53) on May 20, 1991. The NYSE has indicated to the Commission that it is prepared to begin the operation of its OHT facility on June 13, 1991.

[6] The Dual Trading System of the MSE allows the execution of both round-lot and odd-lot orders in certain issues assigned to specialists on the MSE and listed on either the NYSE or the American Stock Exchange ("Amex"). MSE Guide, Explanatory Notes, at 803 (CCH 1990).

[7] The MSE proposal defines GTX orders as "good 'till cancelled, eligible for primary market protection based on volume that prints in a primary market's after-hours trading session." See letter from Daniel J. Liberti, Associate Counsel, MSE, to Mary R. Revell, Branch Chief, Division of Market Regulation, SEC, dated June 6, 1991.

[8] The MSE states that it will use its existing systems to implement the proposed rule change and

Continued

VOL 56 ISS 118 JE 19 1991 UMI

criteria (e.g., it has been designated as eligible for execution in an after-hours session and is priced at the NYSE closing price), then it would become eligible for a fill at the NYSE closing price based on volume that prints in the primary market's after-hours session. The only two situations under which the MSE specialist would not be obligated to fill customer limit orders, designated as GTX, based on volume that prints in the primary market's after-hours session are: (1) If it can be demonstrated that the order would not have been executed if it had been transmitted to the primary market; and (2) if a customer cancels a GTX order.[9] In other words, unless a specialist can demonstrate that, upon receipt of a customer's GTX order, a duplicate order was transmitted by the specialist to the NYSE, and that duplicate order was not executed in NYSE's Crossing Session I, or that a GTX order was cancelled at the initiation of the customer, the specialist would be required to fill all eligible GTX orders up to the amount of the volume that prints at the end of NYSE's Crossing Session I. GTX orders would retain the priority among themselves that exists on the specialists' books and would be entitled to an execution based on that priority. If a limit order that is eligible for execution in an after-hours session does not get executed, it will remain on the limit order book of the MSE specialist and would retain its priority during the next day's regular trading session.

Specialists would manually execute GTX orders once the appropriate volume in a particular security in NYSE's Crossing Session I has been determined. As a practical matter, this will occur at approximately 5 p.m. (ET). The MSE proposes to report trades as a single print per issue which will show the aggregate size of the executions.

Finally, the MSE seeks exemptive relief from the requirements of Rule 10a-1 under the Act ("short sale rule") for the limited purpose of providing full primary market protection for its GTX limit orders.[10]

execute GTX orders. The MSE represents that it has no systems capacity concerns regarding the execution of GTX orders, and that modifications to its systems to permit the execution of these orders were tested successfully prior to this order.

[9] Under the MSE proposal, a customer can cancel a GTX order during the regular 8:30 a.m. to 3 p.m. (CT) trading session and at any time up until the execution based on the NYSE Crossing Session I print.

[10] *See* letter from Daniel J. Liberti, Associate Counsel, MSE, to Larry Bergmann, Associate Director, Division of Market Regulation, SEC, dated June 3, 1991. The Commission will issue a letter that addresses the Exchange's request for an exemption from Rule 10a-1.

III. Discussion and Commission Findings

After careful consideration, the Commission believes that the MSE proposal is reasonably designed to promote just and equitable principles of trade, perfect the mechanism of a free and open national market system, and, in general, further investor protection and the public interest in fair and orderly markets on national securities exchanges, as well as facilitate the linking of qualified markets through appropriate communication systems and the practicability of brokers executing investors' orders in the best market. For these reasons and for the additional reasons set forth below, the Commission finds that approval, for a temporary period ending on May 24, 1993, of the Exchange's proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of sections 6 and 11A of the Act.[11]

In the recent Commission release approving the NYSE's OHT facility, the Commission noted the benefits that would accrue to investors through development of an after-hours trading session. The Commission in that order also stated that the NYSE OHT sessions should enhance competition by providing a service to customers that other exchanges currently are not providing.[12] In that release, the Commission noted that innovation that provides marketplace benefits to attract order flow to one marketplace does not result in unfair competition if the other markets are free to compete in the same manner.[13] In this regard, the Commission noted that, if other U.S. securities marketplaces desire to compete with the NYSE's OHT facility, they could provide a similar service.[14] Although the MSE proposal does not copy the NYSE's OHT facility, it nonetheless presents a reasonable competitive response. By allowing GTX orders that could be executed on the NYSE to receive a similar fill on the MSE, the Exchange is providing a mechanism for maintaining its own individual marketplace on a competitive level with the primary market. Accordingly, the Commission believes that the MSE proposal should be approved for many of the same reasons that the Commission approved the NYSE OHT facility.[15]

[12] *See* NYSE OHT Release, supra, note 5.

[13] *Id.*

[14] *Id.*

[15] See NYSE OHT Release, supra, note 5.

The Commission believes that both the instant MSE proposal and the NYSE's OHT facility, as well as several proposals recently received by the Commission from other U.S. marketplaces, demonstrate the competitiveness of the U.S. securities markets. As a result of these marketplace initiatives, U.S. investors soon will have new opportunities for trading, including the ability to have their orders executed on both the NYSE and the MSE after the close of the regular 9:30 a.m. to 4 p.m. (ET) trading session at the closing price established on the primary market. Moreover, the Commission believes that the increased competition that results from permitting MSE specialists to attract GTX orders should enhance the quality of customer order executions.

In addition, the Commission believes that the MSE proposal is consistent with the maintenance of fair and orderly markets and should contribute to the practicability of brokers achieving a best execution for customer orders. The new MSE rule would achieve this by imposing additional obligations on Exchange specialists to provide their customers with primary market price protection. The parameters of the new rule are expressed clearly in the text of the rule and do not leave any discretion to specialists in deciding which orders to fill and what priority to give these orders. The new rule makes clear that if customer limit orders are designated as GTX and are prices at the NYSE closing price, then the specialist is obligated to fill those orders up to the volume that prints at the end of NYSE Crossing Session I. The specialist is relieved of this obligation only if he or she can demonstrate that a particular order would not have been executed if it had been transmitted to the primary market. As discussed above, the Commission believes that the only way in which this can be demonstrated is by showing that an order was sent to the primary market and it was not filled or if a customer cancels a GTX order prior to its execution.[16]

In addition, the MSE proposal does not disturb the priority rules currently in force at the Exchange. During the regular trading hours, orders on the specialist's book would maintain the same priority as existed before adoption of this proposal. Among GTX orders that are eligible after 4 p.m. (ET) for possible execution, priority is maintained as it was during the regular trading day. If a GTX order is not executed, it will remain on the specialist's book and will maintain its priority.

[16] Under the MSE proposal, a broker and MSE specialist may agree upon a specific volume related or other criteria for requiring a fill. This means, however, that they may agree to have the specialist fill more than the amount of the NYSE Crossing Session I print, not less than the amount of the NYSE Crossing Session I print. Of course, if no volume prints in NYSE Crossing Session I in a particular stock, then the MSE specialist cannot execute any GTX orders after regular trading hours that day.

Furthermore, the Commission believes that, although MSE specialists will know which limit orders are designated "GTX" and will manually execute GTX orders, they should not be able to use this information to their own advantage. As discussed above, the MSE proposal constitutes an extension of the MSE's daytime execution guarantee system. It does not create an additional session where specialists can participate. Specialist participation would be limited to filling the contra side of a customer limit order that is eligible, pursuant to the new rule, for a fill. The specialist would have no discretion in choosing which orders to fill and which priority to give orders. Orders would be eligible for a fill based on strict criteria (e.g., orders that are priced at the NYSE closing price and have been designated GTX are eligible to be filled based on volume that prints in the primary market's after-hours session). In addition, orders would be eligible to be filled according to the priority that already exists on the specialists' books. Thus, the Commission is satisfied that, although MSE specialists will have knowledge of which limit orders have been designated GTX, they would not be able to use this knowledge to the detriment of investors because their participation in the execution fo GTX orders will be limited. The Commission expects, however, that the MSE will monitor carefully the execution of GTX orders to ensure that MSE specialists are not taking unfair advantage of this information. In this regard, the Commission expects the MSE to report, within 18 months of the date of the approval of this order, on this issue. The Commission may, at that time, wish to revisit this issue.

The Commission notes that the NYSE's OHT facility was approved for a two year temporary period, commencing on May 24, 1991. In approving the NYSE proposal for a temporary period, the Commission noted that the NYSE OHT facility raised several "intermarket" issues, such as: (i) Whether the Intermarket Trading System ("ITS") should be operational during any time period when both the NYSE Crossing Sessions and another ITS market are accepting orders; (ii) whether the NYSE should be required to permit orders entered "GTX" on the books of regional specialists to "migrate" automatically at the close(s) of such regional exchanges to the NYSE Crossing Session I order book; (iii) if so, with what priority, if any; and (iv) who should bear the cost of developing a working mechanism for such transmittal.

In the release approving the NYSE OHT facility, the Commission also noted that, because at least one other exchange had proposed a trading session similar or identical to the NYSE's OHT facility, significant national market system issues would have to be resolved by the NYSE and the competing market, in conjunction with the SEC. Although the MSE proposal does not present an after-hours crossing session like the NYSE's OHT facility, it would establish an after-hours trading system that will compete directly with NYSE Crossing Session I. Accordingly the Commission believes that a temporary approval period ending on May 24, 1993 is also appropriate for the MSE proposal.[17]

The Commission believes that this time period will provide an opportunity for the Commission and market participants to observe the actual operation of the NYSE's OHT facility and the MSE's after-hours proposal. Based on these observations the Commission and market participants will be in a better position to evaluate whether further steps to link the NYSE's OHT facility with comparable systems operating at the same time are necessary or appropriate to protect investors or promote fair competition and whether any other linkage issues arise. In this regard, 18 months from the date of approval of the instant proposal, the MSE should submit a new filing pursuant to Rule 19b-4 under the Act requesting permanent approval of its proposed rule change, as well as a report describing the MSE's experience with the new rule during that 18-month period. The report should include, but not be limited to, the following information (broken down by month) for the 18-month period:

- Whether customers who have entered GTX orders experienced any problems when they attempted to cancel such orders
- Whether the Exchange has experienced any difficulties in monitoring the activities of specialists with regard to determining their particular obligations to fill GTX orders
- The number, if any, of GTX orders executed after the close of the MSE's regular auction trading session pursuant to the new rule
- The number, if any, of GTX orders that remain unexecuted after the MSE specialist has fulfilled his or her obligations in connection with the new rule
- The number and percentage of GTC orders on the book that were designated "GTX" and thus eligible to be filled
- Whether the MSE marketplace has experienced any increased volatility during the last hour of the 8:30 a.m. to 3 p.m. (CT) trading sessions after the initiation of the new rule
- Whether there were greater (wider) quote spreads during the last hour of the 8:30 a.m. to 3 p.m. (CT) trading session after the initiation of the new rule
- Whether the Exchange or any specialist has given any special guarantees to execute GTX orders over and above the current requirements of the Guaranteed Execution System and the requirements of the new rule

In addition, the Commission expects that the MSE, through use of its surveillance procedures, will monitor for, and report to the Commission, any patterns of manipulation or trading abuses or unusual trading activity resulting from the new rule. Finally, the Commission expects the MSE to keep the Commission apprised of any technical problems which may arise regarding the operation of the new rule, such as difficulties in order execution or order cancellation.

Finally, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof. The MSE's proposal merely extends the Exchange's execution guarantee procedures to incorporate GTX orders and the possibility of a 4 p.m. (CT) execution. It does not substantially alter current MSE procedures, nor does it raise issue not already addressed in the order approving the NYSE's OHT system. Accordingly, the Commission believes it is appropriate to approve the proposed rule change on an accelerated basis so that it can be in effect on the date that the NYSE's OHT facility commences operation.

This will permit the MSE to compete with Crossing Session I of the NYSE's OHT facility, which in turn should benefit investors and promote competition among markets.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[18] that the proposed rule change is approved for a temporary period ending on May 24, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[19]

[17] To achieve uniformity, the temporary approval period would run until May 24, 1993, the sunset of the NYSE's OHT facility.

[Release No. 34-29296; File No. SR-MSRB-90-2]

Self-Regulatory Organization; Proposed Rule Change; Municipal Securities Rulemaking Board

The Self-Regulatory Organizations; Order Approving Proposed Rule Change of Municipal Securities Rulemaking Board Relating to the Proposed Operation of the Official Statement and Advance Refunding Document—Paper Submission System (OS/ARD) of the Municipal Securities Information Library System.

I. Introduction

The Municipal Securities Rulemaking Board ("MSRB" or "Board") submitted to the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change [1] on June 22, 1990, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [2] and Rule 19b-4 [3] thereunder. The proposed rule change would permit the Board to establish and operate a central electronic facility, the Municipal Securities Information Library ("MSIL"), through which information collected pursuant to MSRB Rule G-36 [4] would be made available electronically to market participants and information vendors.[5]

Notice of the filing of the proposal was published in Securities Exchange Act Release No. 28197 (July 12, 1990), 55 FR 29436. The Commission received 145 comment letters in response to this notice. Of those comment letters, 113 express support for the MSIL proposal, 28 are in opposition and four oppose the proposal as drafted but provide specific comments for its improvement. The Commission has determined, for the reasons discussed below, to approve the proposal.

II. Background

The creation of a central repository for municipal securities has been under consideration for several years by various sectors of the municipal industry. The Government Finance Officers Association ("GFOA") has supported the concept of a central repository since 1979,[6] and the National Association of State Auditors, Comptrollers and Treasurers ("NASACT") created a task force in 1989 to explore the feasibility of a centralized repository.[7]

Over the last five years, the Board has held many discussions on the need for a central source of official, descriptive information on municipal securities. One area on which the Board focused was the increasing complexity of municipal securities issues,[8] resulting in investor confusion and pricing inefficiencies. After extensive consideration of these and other problems, the Board concluded that the difficulties could be addressed only by ensuring enhanced access for all market participants to official information about municipal securities issues.

At the same time, the Commission was evaluating the adequacy of information dissemination in the municipal securities market. This effort resulted in the Commission's adoption in June of 1989 of Rule 15c2-12 under the Act.[9] Rule 15c2-12 was designed to establish standards for the procurement and dissemination of disclosure documents by underwriters as a means of enhancing the accuracy and timeliness of disclosure to investors in municipal securities. Among other things, the Rule requires underwriters to provide, for a specified period of time, copies of final OSs to any potential customer upon request.

After the Commission's adoption of the rule, the Board continued to consider a facility for the collection and dissemination of OSs and advance refunding documents ("ARDs").[10] The Board appointed a Repository Committee to oversee the development of the project. The Board also contracted with the MITRE Corporation to provide technical advice on the planning and implementation of the facility. The Board, the Repository Committee, the Board's staff and MITRE representatives discussed the repository idea with numerous parties, including investors, issuers, rating agencies, dealers, analysts, private information providers, industry and trade groups, and several parties who had expressed interest in becoming involved in the information dissemination process.

On June 1, 1990, the Commission approved MSRB Rule G-36.[11] The rule requires underwriters to provide OSs to the Board within time frames keyed to the production and delivery requirements of Rule 15c2-12 and applies to all issues, with certain exceptions for issues with limited placements, short-term issues and issues with short-term characteristics. The Board will accept OSs not subject to the rule, if voluntarily provided by underwriters. The Rule also requires underwriters to file with the Board Form G-36, which identifies the issue and its CUSIP number [12] and certain other information.

III. Description of the Proposal

The Board proposed to establish and operate MSIL initially to store and disseminate OSs collected pursuant to Rule G-36. The Board's stated purpose is to provide market participants and information vendors with better access to more descriptive information on municipal securities and their issuers. After extensive consultations with its technical advisor, the MITRE Corporation, the Board decided to use digital imaging technology, which allows the MSRB to accept paper copies, in any format, capture digitized electronic images of the documents and reproduce exact copies of the original.

The Board noted both practical considerations (comparatively inexpensive, long-term storage) and legal constraints (the Board is prohibited from dictating the form or content of issuer documents) [13] in describing its choice. Two initial outputs will be produced: single printed copies of OSs and ARDs and a magnetic tape containing all documents imaged in one day. Within three business days of receipt of new issue documents, the system will have completed its processing and will make the documents and an index available in both tape and paper form. Documents received by the Board will continue to be available at its public access facility ("PAF") on the day they are received.[14] The Board will also provide an interim list of documents processed each day by 9:00 a.m. the following business day.

Electronic storage involves storing images or characters on electronic devices controlled by computers. The digital imaging process converts the image of each page of a paper document into digitized code. The page images are stored in this form on computer readable media such as optical disks. With the assistance of a computer, the images of the pages then can be retrieved and printed with a very high quality of reproduction, similar to that achieved by top-quality photocopying machines. The process allows for electronic storage of documents, while preserving the graphic characteristics of each page (styles and sizes of type, page structure, etc.). The digital imaging process is now used by many companies and government agencies for efficient storage, access and reproduction of paper documents.[15]

The Board anticipates that users of the MSIL system will be value-added vendors, municipal securities professionals and individual investors. Several private information vendors currently provide a variety of information services to the market, including sales of OSs as well as summary information. The Board repeatedly has asserted that it will not summarize documents or sell document summaries, as is now done by private sources.[16]

A. Computer Index

One of the MSIL specifications established by the MSRB is that the system include a computer-based index of the system's contents. The MSRB will require the system contractor to develop an MSIL system index to track all documents received by the Board efficiently and access them quickly. In addition, because a number of documents may relate to the same issue (*e.g.*, an OS, ARD and continuing disclosure information ("CDI")),[17] the computer index also must record relationships between documents. The basic concept is that of an electronic "file folder"—all documents pertaining to an issue will be related through the index. This will facilitate the identification of documents that relate to specific issues.

B. Data and System Integrity [18]

The Board established quality standards that are intended to ensure that every document page is imaged and that the printed version is as legible as the original. The system contractor will apply exception procedures to pages of documents containing poorly printed text, foldouts, the use of color, and grey or halftone art work. In general, the imaging technology employed will store any information contained on a page with the same degree of accuracy as a photocopying machine. The system contractor will develop procedures in its quality assurance plan to be followed to ensure that these standards are met. MSIL also will retain paper copies of inputted documents for one year, then discard them.

The Board will require the system contractor to assure the reliability of the system, including a redundancy of critical hardware components, protection with a power line filter, an uninterruptible power supply and the development, implementation of a maintenance plan for all hardware components that will assure maximum availability.[19] The Board believes that the MSIL system will be reasonably designed to handle the estimated flow of documents through the system.

With respect to security, the MSRB will require the system contractor to have a written security plan that addresses physical, technical, personnel and administrative security.[20] The administrative security program will include, among other things, employee passwords that change at least once every six months, storing copies of critical data off-site and random unannounced security audits by a designated security officer. The personnel security program will include, among other things, the development, implementation, maintenance and enforcement of staff user access privileges. The physical security program will include, among other things, a dedicated locked room for the magnetic and optical storage devices. The technical security program will include, among other things, audit programs, logging access to all system activities and network protection from intrusion or hackers. In addition, off-site storage of backup media, as well as a catastrophic failure plan, will be instituted. The goal of the plan will be to relocate and make the MSIL system operational within 24 hours of a catastrophic failure.[21] The Board believes that the MSIL system will be reasonably designed to prevent external and internal physical attacks on the system.

C. Costs and Pricing

Since 1976, the Board has required underwriters to pay a fee to the Board based on the par amount of municipal securities underwritten. This fee has ranged from $.01 to $.05 during this period. The Board last raised the fee from $.01 to $.02 in October, 1989. The fee increase was based on the Board's declining fund balance and expected expenses to plan the MSIL system.

The Board expects to fund MSIL's operation through a combination of user fees and Board funds. The Board stated that, in planning the MSIL system, it believed that the average annual cost of contracting with a service provider for this facility would be $.01 or less per $1,000 par value of the bond based on current bond volume. The MITRE

[10] ARDs include information regarding a change in the credit of the security brought about by an advance refunding.
[11] See Securities Exchange Act Release No. 28091 (May 31, 1990), 55 FR 23333.
[12] The Committee on Uniform Securities Identification Procedures ("CUSIP") number is an identification number assigned to each issue, usually printed on the face of each individual certificate of the issue. The numbers are intended to help facilitate the identification and clearance of municipal securities.
[13] See discussion of the Board's authority below.
[14] See letter from Diane G. Klinka, General Counsel, MSRB, to Elizabeth MacGregor, Attorney, Market Regulation Division, SEC, dated March 15, 1991.
[15] For example, copies of individual credit card sales receipts often are imaged and reprinted for inclusion with the monthly bill.
[16] The Board designed the facility to accommodate foreseeable changes in information dissemination technology and municipal securities disclosure practices without requiring the initial "imaging" system to be abandoned or redesigned. As an example, the technology chosen will allow amendments to OSs or ARDs to be accommodated in the system. In addition, some issuers have expressed an interest in providing documents to the facility that later could be incorporated by reference in an OS or other document submitted to the facility. The MSIL system will be designed to accommodate "modular submissions," in which separately submitted documents are combined into one document for dissemination. This should allow a quick evolution to accommodate issuers wishing to take these approaches. The Board intends that the MSIL system will have the flexibility to develop various services in which documents may be made available in formats different from the daily computer tape or paper copies.
[17] The voluntary collection of CDI is the subject of a separate filing. See SR-MSRB-90-4.
[18] The Board is required to report to the Commission on the integrity of the MSIL system before the system is permitted to operate. Specifically, the system should be tested for capacity to confirm that it can accept the volume that the MSRB expects to receive. The MSRB should submit to the Commission a representation that the system has been so tested.
[19] Additional information is provided in section C.11.1.12 of the Request for Proposal ("RFP").
[20] Moreover, when the MSIL system becomes operational, this plan should be made available to the Commission staff.
[21] Further information is available to Sections C.11.4, C.11.5, and C.11.8 of the RFP and Amendment No. 1 to the RFP.

VOL 56 ISS 118 JE 19 1991 UMI

Corporation provided estimates to the Board that ranged between $700,000 and $1 million, depending on the volume of documents that were processed. The Board believes that the current public access facility should cost approximately $200,000–$250,000 per year.

The Board plans to use its general revenues for the collecting, indexing and storing costs of MSIL system documents. The Board stated in its filing that, upon the Commission's approval of the MSIL system, the Board believes another $.01 fee increase (bringing the total fee to $.03) will be necessary to cover MSIL system expenses. The Board does not foresee additional fee increases based on MSIL system expenses. The costs of providing paper copies and the daily tape will be paid for by user fees. The Board believes that any further enhancements should be self-supporting.

Based on the information currently available to the Board, the Board anticipates charging approximately $15.00 for a paper copy of an OS or an ARD. The daily tape will be provided on an annual subscription basis of approximately $12,000. Postage or delivery fees also will be added to the tape or document price. Based on an average of 25 documents per daily tape, this will result in a per document cost of less than $2.00 per OS or ARD. The Board believes that subscribers will include users interested in maintaining their own comprehensive libraries for private use and vendors who wish to resell the documents through their own distribution channels or summarize, abstract or extract the documents and sell the information in a more compact form. The Board stated in its filing that it will review the MSIL system prices annually to ensure that the MSIL system dissemination costs are paid for from user fees. The Board does not expect to make a profit from the MSIL system.

D. Standards for System Contractor

The Board has stated that it will ensure that the MSIL system makes the information available to all parties on an equal basis. Information acquired from the Board also may be used, resold or disseminated by any person without restriction and without payment of additional fees.[33]

Any organization hired by the Board to operate the MSIL system will be subject to detailed oversight by the Board, both to ensure that information is provided to all parties on an equal basis and to ensure that operations proceed in a cost-effective manner. The Board will not permit the organization to use this access for its own benefit in the market. To ensure this, the Board's contract with the organization will prohibit the operator from brokering or dealing in municipal securities or engaging in municipal securities information services not covered by the contract that create the appearance of a conflict of interest with the purposes of the MSIL system. All MSIL system revenues collected by the system contractor will go directly to the Board to defray operating expenses. The system contractor will receive its MSIL system income solely from the Board.

[33] This is similar to the requirement in Section 35A of the Securities Exchange Act, which applies to the retransmission of EDGAR information. See 15 U.S.C. 78kk.

IV. Summary of Comments

The Commission received a total of 145 comment letters on the proposed rule changes. Of those comment letters, 113 express support for the MSIL proposal, 28 are in opposition and four oppose the proposal as drafted but provide specific comments for its improvement.[34] In addition, the MSRB responded to the comments by letter.[35] A separate summary of comments was prepared and is available in the public file. The specific issues addressed by commentators will be discussed in the appropriate sections of this order.

V. Discussion

The Commission has determined to approve the Board's proposed rule change because it believes that the proposal is consistent with the Act, and in particular, section 15B(b)(2)(C), which authorizes the Board to adopt rules designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing and processing information with respect to transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and, in general, to protect investors and the public interest.[36] Most of the favorable comments, as discussed below, cited a need for greater information dissemination in the municipal securities market. Moreover, the Commission believes that the MSIL system will provide a vastly superior mechanism for disseminating this information than the PAF or other paper-based systems could. The Commission agrees that there exists a lack of adequate information regarding municipal issuers and the terms of municipal securities in the market, and that increased availability of offering statements and other disclosure items already voluntarily prepared by municipal issuers would increase efficiency and fairness in the marketplace and provide needed protection to investors from sales practice fraud and manipulation. The Commission believes that MSIL will make municipal securities information more readily available, resulting in increased market efficiency and investor protection.

[34] The Commission received comments from 20 broker-dealers; four issuer associations (See GFOA Letter and letters to Jonathan G. Katz, Secretary, SEC, from John T. McEvoy, Executive Director, National Council of State Housing Agencies, dated September 24, 1990 ("NCSHA Letter"); D. Kathryn Fern, President, National Council of Health Facilities Finance Authorities, dated September 24, 1990 ("NCHFFA Letter"); Mary Ellen Withrow, President, NASACT, dated September 24, 1990 ("September NASACT Letter"); and Edward Renfrow, President NASACT, dated January 17, 1991 ("January NASACT Letter")); 22 issuers; four municipal securities information vendors, all of whom are potential competitors of the Board; 13 arbitrators; 24 investors; seven trustees; three bond lawyers; 11 municipal securities analysts; the Public Securities Association (See letter from William W. Moore, Chairman, Municipal Securities Division, Public Securities Association, to Jonathan G. Katz, dated September 20, 1990 ("PSA Letter")); the National Association of Bond Lawyers (See letter from Stanley Keller, Chairman and Paul S. Maco, Director, National Association of Bond Lawyers, to Jonathan G. Katz, dated October 10, 1990 ("NABL Letter")); the American Bankers Association (See letter from Sarah A. Miller, Senior Government Relations Counsel, American Bankers Association Corporate Trust Committee, to Jonathan G. Katz, dated August 8, 1990 ("ABA Letter")); the Southern Municipal Finance Society (See letter from Robert W. Doty, Chairman, Southern Municipal Finance Society, to Jonathan G. Katz, dated September 20, 1990 ("SMFS Letter")); Doty Research and Development Company (See letter from Robert W. Doty, President, Doty Research and Development Company, to the Honorable Richard C. Breeden, Chairman, SEC, dated September 20, 1990 ("Doty Letter")); the National Federation of Municipal Analysts (See letter from the National Federation of Municipal Analysts Board of Governors Executive Committee, to Jonathan G. Katz, dated August 15, 1990 ("NFMA Letter")); the North American Securities Administrators Association (See letter from Sherwood N. Cook, Chairman, North American Securities Administrators Association Municipal Securities Committee, to Jonathan G. Katz, dated September 7, 1990 ("NASAA Letter")); the National Association of Securities Dealers (See letter from Frank J. Wilson, Executive Vice President and General Counsel, National Association of Securities Dealers, to Jonathan G. Katz, dated December 24, 1990 ("NASD Letter")); and one member of Congress (See letter from the Honorable John D. Dingell, Chairman, Committee on Energy and Commerce, U.S. House of Representatives, to the Honorable Richard C. Breeden, dated August 17, 1990 ("Dingell Letter")).

The Board received five comment letters apparently in response to the SEC's Notice. In addition, the Board received 16 comment letters in response to its Request for Comments on the proposal. The Board described those comments and responded to them in its submission to the Commission, which was described in the notice of the proposed rule change published by the Commission. See Securities Exchange Act Release No. 28197 (July 12, 1990), 55 FR 29436.

[35] See letter from Diane G. Klinke, General Counsel, MSRB, to Kathryn V. Natale, Assistant Director, Division of Market Regulation, SEC, dated October 11, 1990.

[36] The Commission conditions approval of the proposed rule change upon the representation by the MSRB that the Board will not offer any value-added dissemination services in connection with the MSIL system prior to filing a proposed rule change with the Commission for review under Rule 19b-4. In addition, before the system becomes operational, the Board must: (1) Report to the Commission on the integrity of the MSIL system; (2) file the annual subscription fee for the daily tape, the price for individual copies of OSs and any underwriter fee increase with the Commission for review under Rule 19b-4; and (3) file any substantive changes to the system with the Commission for review under Rule 19b-4. Finally, before the system becomes operational, the system contractor's written security plan should be made available to the Commission.

The MSRB will be required to report periodically prior to initiation of the service on any material developments. It must also provide a report on the operation of the system one year following intiation. The operational report should discuss in detail demand for the system, including a list of subscribers to the daily tape and a tally of requests

Continued

A. The Need for Enhanced Information and Benefits of MSIL

1. *Comments.* In general, the commentators, representing a diverse range of participants in the municipal securities market, agree that accurate, complete and timely disclosure is key to the efficient operation of the municipal securities market. Many commentators stated that they believe, however, that there is a lack of available and accessible information in the municipal market.[26] Many commentators complained that official statements are often difficult, and sometimes impossible, to obtain, and that the lack of availability and access to accurate information results in unfair and inefficient pricing.[27] One commentator defined the market's inability to provide efficient access to available information as a "chronic problem," and noted that, because the secondary market for municipal securities does not enjoy a reputation for great liquidity, investors demand an additonal increment of yield to compensate them, which increases borrowing costs.[28] Another commentator stated that the "more knowledge investors have about what they're buying, the lower the 'risk premium' they'll require."[29] This commentator therefore believes that "the broadest dissemination possible is the wisest course * * * [and] wholeheartedly supports and encourages the MSRB's initiatives."[30] Two issuer associations supporting the proposal believe that the MSIL system would benefit the market significantly by providing a centralized source for information on municipal securities issues.[31]

"One clear advantage of the MSRB repository is the assurance that there will be an archive for the documents it collects."[32] Another commentator noted that, in addition to permanence, a Board-sponsored respository would be "ultimately more accessible to the public than one sponsored by any private vendor where profitability is a primary motive."[33] This commentator believes that "[t]he best reason supporting the role of the MSRB as the library's sponsor is that the scope of the project can be expanded."[34] Another commentator believes that the MSIL system "would greatly enhance the marketability of . . . [municipal] securities by making appropriate credit risk information more accessible * * *."[35] Another commentator stated that the benefits of the Board's proposed repository "are substantial," and that "market disclosure may reduce the cost of * * * bond issuance by increasing purchaser confidence * * *."[36]

Furthermore, several commentators contended that not all dealers (or other market participants) have equal access to municipal securities information and that there is a "bona fide need" among dealers for better information.[37] One commentator stated that certain market participants currently have substantial information advantages and that a broadened information base will minimize this problem.[38] In addition, one commentator noted that "[i]t is also imperative that the facility providing the information be a neutral one that is available on equal terms to all users * * *."[39] Many commentators believe that by offering one central, public source for information, the MSIL system will increase and ensure access to complete and accurate information in a fair and non-discriminatory manner, and will result in fairer prices in both the primary and secondary markets.[40]

In a letter to SEC Chairman Breeden, Chairman Dingell of the Energy and Commerce Committee of the U.S. House of Representatives stated that his Committee is conducting a review of the adequacy of municipal securities industry disclosure and other practices to evaluate the need to address such

for individual copies of OSs. The report should state funds expended in operating the system for the first year, discuss any problems the MSRB has encountered in operating the system and any suggestions from users or potential users for improvements. The report should indicate the extent to which private information vendors have been able to interface with the system and detail suggestions by private vendors to improve the system. The report should discuss any system enhancements the MSRB has proposed or expects to propose.

VOL 56 ISS 118 JE 19 1991 UMI

issues this year. Chairman Dingell stated that "investors in municipal securities, particularly in the wake of WPPSS, deserve better protections than they have had heretofore." [41]

The American Bankers Association Corporate Trust Committee ("ABA") stated that the MSIL system is of "vital concern" to its membership, and that the MSIL system would "go a long way toward satisfying the information requirements of the marketplace." [42] The National Association of Securities Dealers ("NASD") stated that "there currently exists a critical need for improved access to information about municipal securities issues, and [the NASD] feel[s] that the MSIL will address this need, providing a centralized facility available on an equitable basis to both individual users and information vendors." [43]

A significant minority of commentators questioned whether MSIL serves a need in the municipal securities market. A number of issuers submitted virtually identical letters in which they stated that the MSIL and CDI systems "are overreactions to perceived problems and they should not be approved in their present form." [44] These same commentators believe that the Board's proposals "seek to fill an information gap that does not exist . . . [and there] is no crisis in the municipal market that warrants making untimely decisions." [45] Although the GFOA acknowledged that disclosure problems have been identified concerning information in the secondary market, it does not believe that "there is any evidence of crisis in the market that requires action immediately." [46]

Furthermore, these commentators stated that whatever the benefits to the market in terms of enhanced information disclosure, they would come at too high a cost. A number of commentators believe that the technology the MSRB has adopted for the proposed MSIL has not been shown to be necessary.[47] Several commentators believe that the Board has failed to do a detailed cost/benefit analysis, with a detailed consideration of alternatives to MSIL.[48] For example, the National Association of Bond Lawyers ("NABL") suggested that it may be preferable to build a linkage among the nationally recognized municipal securities information repositories ("NRMSIRs"). The NABL believes it is appropriate to require the NRMSIRs to share, at cost, OSs and to open the Board's OS files to them.[49]

Many issuers also expressed concern that the cost of the MSIL system will be financed by an assessment on underwriters that will be passed through to issuers and stated that, should MSIL be implemented, the direct beneficiaries of the system should pay for it.[50] In addition, two commentators claimed that the ability of users to support the facility has not been demonstrated [51] and questioned how the system will be financed if it is not self-supporting.[52]

2. *Commission Analysis.* The Commission concurs with the conclusion of numerous commentators that there currently are significant inadequacies in the availability of municipal securities disclosure. Currently, there are over $636 billion of outstanding municipal securities issues issued by more than 50,000 state and local government units.[53] Months or years after an offering of municipal securities, investors and even dealers may have difficulty in accessing information regarding either the terms of a municipal security or the municipal issuer. As a result, the Commission is aware of instances in which there has been substantial confusion in the market over items as critical as the call provisions for an issue of municipal securities.[54] Similarly, the lack of availability of offering statements or other disclosure items significantly decreases the ability of an investor to protect herself from misrepresentations or other fraudulent activities by municipal securities dealers' registered representatives. Finally, the Commission concurs with the conclusions of a number of commentators that the lack of an efficient and timely means to access disclosure regarding municipal securities may competitively disadvantage dealers who did not participate in the initial underwriting syndicate or otherwise do not have established relationships with the particular municipal issuer in question.

Moreover, the Commission believes that current market conditions underline the importance of efforts to enhance the availability of disclosure information. For example, regional economic pressures in many areas of the country have limited the availability of income and sales tax revenues and have contributed to a decline of the value of residential and commercial properties built with municipal financing. In such an environment, availability of disclosure statements becomes especially important to investors and potential investors in these securities. The MSIL system could be an important mechanism to enhance the timeliness and availability of disclosure information in the market.

With respect to technology, the Commission also believes that the Board made a responsible choice that will result in relatively small costs.[55] The MSIL system could have adopted, among other things, paper, microform or electronic storage. The Board concluded that paper-based storage would be unacceptable because: (1) Reproduction of paper documents requires handling that eventually would destroy the documents; (2) documents would have to be printed in a manner to assure that they would not physically age for the life of the bonds; (3) paper would not encourage or facilitate the development of information dissemination services by private vendors; and (4) paper requires a great deal of storage space. Likewise, the Board concluded that microform-based storage is unacceptable because: (1) It does not encourage or facilitate information dissemination by private vendors; (2) it is inflexible to adjust to changes in technology of document storage and dissemination and to changes in disclosure practices; and (3) original document quality problems can prevent generation of a good copy. Electronic storage involves storing images or characters on electronic devices controlled by computers. Electronic storage is highly flexible and can greatly improve the accessibility of information. Of the choices, electronic storage is clearly the most desirable. The Commission has received no indication that a lower cost system could have provided the necessary functionality for the system.

Several commentators expressed concern that the additional fees to finance the MSIL system will be inappropriately passed through to issuers rather than to the users of the system. The Commission has no basis to conclude that underwriters will, or even could, recover the costs of the system by increasing the underwriting spread charged issuers, or that to the extent these costs are itemized, the underwriting spread will not be equally reduced. Indeed, it appears at least as likely in terms of overall compensation that the underwriters will either recover those costs from their sales to customers or simply be forced, based on competitive forces, to absorb those costs. Even if underwriters are able to pass on the costs of MSIL to issuers without lowering their spread, that pass-through would be no different than costs incurred as a result of any other rule or regulation imposed by the SEC or the MSRB. In the final analysis, therefore, the fees assessed are consistent with the Act if the benefits of MSIL outweigh the costs to municipal securities dealers, issuers or customers. For the reasons stated above, the Commission believes that all market participants would benefit from the MSIL system. Moreover, the result of more efficient provision of disclosure information should be lower interest cost for resulting increased efficiency, fairness and public confidence in the municipal securities market.

As described above, some commentators expressed concern that the system would be funded through MSRB general revenues rather than through user fees.[56] The Board stated in its proposal that it plans to use general revenues for collecting, indexing and storing MSIL system documents. The costs of paper copies and the daily tape would be paid for through user fees. The Commission notes that several commentators, even those opposed to an electronic system, have asked for an improved index to permit better access to the information accumulated by the MSRB. Part of the funds expended by the MSRB will cover this aspect of the MSIL system. Finally, the Board will incur many of the expenses associated with the MSIL system (*e.g.*, costs of document collection, storage and information indexing) solely as a result of operating the PAF.[57] Therefore, the Commission concludes that the projected costs of developing and operating the MSIL system are reasonable and justified and will not unduly burden any sector of the municipal securities market.

B. Competition With Private Vendors

1. *Comments.* A number of commentators believe that the MSIL system will reduce the costs of entry into the information vendor business. They believe that this will benefit the municipal securities marketplace by encouraging competition among vendors, which should result in improved information products and the development of new products and services.[58] One commentator asserted that some information from private vendors is inaccurate [59] or is withheld from certain subscribers.[60] Several commentators suggested that the Board will offer the longevity necessary to provide an archival service so that changing economic conditions will not affect the level of service provided by the MSIL system.[61]

A number of other commentators believe, however, that it is inappropriate for a quasi-governmental entity to compete in the collection, storage and dissemination of information.[62] Despite the Board's assertion that MSIL will in fact be pro-competitive because it will provide a ready source of OSs to other information vendors who wish to enter this market, several commentators believe that, in fact, the Board will be a direct competitor to them, with the ability to sell subsidized copies of OSs to their customers at the same price at which the Board would sell OSs to the vendors.[63]

2. *Commission Analysis.* Having concluded that MSIL will have a substantial beneficial impact on the market, the Commission must assess its effect on competition. Section 15B(b)(2)(C) of the Act requires that, before approving Board rules, the Commission find that the proposed rules do not "impose any burden on competition not necessary or appropriate in furtherance of the purposes of this title." [64] The

[55] For example, on a $50 million issue, the increase in underwriter fees attributable to MSIL would be approximately $300.

In addition, it could be argued that MSIL will reduce the cost to the market of the creation of redundant data bases by investment banks, institutional investors and others who collect information on the municipal securities market for their own use.

[56] It is important to point out that the Board is required to file any new or modified fees to the Commission for review under section 19(b)(1) of the Act. This is also true of any system changes to MSIL the Board might wish to implement in the future.

[57] It should be noted that even those commentators critical of MSIL generally were supportive of the PAF. See, *e.g.*, GFOA Letter and letters to Jonathan G. Katz, Secretary, SEC, from J. Kevin Kenny, President and Chief Executive Officer, J.J. Kenny Co., Inc., dated September 24, 1990 ("Kenny Letter"); and Joseph V. VOL 56 ISS 118 JE 19 1991 UMI

Commission has examined closely the potential anti-competitive effect of the Board's proposal and has determined that the proposed rule change does not impose a burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[65]

The Commission believes that the MSIL system will foster competition in the dissemination of municipal securities information by reducing the cost of entry into the market.[66] Vendors will no longer need to invest in the infrastructure and facilities necessary to collect and store official disclosure documents. Moreover, new entrants will not be confronted with the unwillingness of some underwriters or issuers to supply copies to entities other than the already established NRMSIRs. Thus, all vendors will have equal access to these public documents and will be able to develop whatever information products they believe will be marketable.

Some of the commentators appear to be operating on the basic misassumption that the Commission's action today will require that information be channelled exclusively through the MSIL system. Despite the claims of certain commentators, the Board will not have a monopoly on the information contained in MSIL. The incentives created by Rule 15c2-12 to provide OSs to a NRMSIR should continue to provide a ready source of OSs for vendors.[67] This is borne out by the Board's experience with the PAF to date. From the time the PAF began operation on June 1, 1990, until May 21, 1991, 402 visits were made to the facility, and three major value-added vendors (who operate the three existing NRMSIRs) accounted for all but 25 of the visits. This would appear to indicate that while the PAF provides vendors with an opportunity to acquire missing OSs, on the whole, those vendors have been successful in obtaining OSs voluntarily. Therefore, it would appear that, despite the Board's collection efforts, the vendors' long-established relationships with underwriters and issuers remain in place. MSIL should, therefore, be a source of documents to new entrants to the market without adversely affecting the ability of the existing vendors to acquire those statements directly.

As discussed above, several commentators, particularly vendors, believe that by operating the MSIL system, the MSRB will compete unfairly with established private sector information vendors. In analyzing these contentions it is important to focus on the functions MSIL will, and will not, provide. As part of its agreement with its MSIL system contractor, the MSIL system will provide individual paper copies of system documents, upon request. While certain vendors also currently provide this paper copy service, the Board will be charging an amount higher than current NRMSIRs charge.[68] The Commission, therefore, does not believe that the MSIL system will usurp the opportunity of the current NRMSIRs to market paper documents, but rather will serve as an assurance to the market that a comprehensive collection always will be available. It also will promote the activities of NRMSIRs by assuring that the NRMSIRs can obtain paper copies to complete their collection.[69]

In addition, the daily tape provided by the MSRB will contain every document entered into the system on a specific day. It will not be organized to individual user needs. The imaging technology requires more computer data storage capability for a complete collection of documents than is normally possessed by most end-users. It is unlikely that end users would prefer a daily tape of imaged documents in no particular order to privately offered alternatives that would be designed for end user needs, indexed for maximum efficiency and capable of being used on in-house equipment.

In short, the MSIL system is intended to foster "value-added" information products. Vendors will be able to resell whole documents and/or information from those documents (*e.g.*, extracts, summaries) in any format the vendor chooses (*e.g.*, paper, CD Rom, optical disks). The daily tape can be translated into character-coded form to allow for computerized text searches of documents. The Board believes that demand for new products will occur as market participants seek to ensure that they have full access to the information found in the MSIL system database and will be shaped by availability of documents in electronic format. Thus, rather than monopolizing the field, MSIL will simply provide raw data which will increase the ability of vendors to compete in the provision of value-added services.[70]

---

[65] Several commentators also believe that operating the MSIL system could subject the Board to antitrust liability. One stated that the "sale of whole documents apart from any secondary value-added service, constitutes a well-established market served by . . . private vendors." GFOA Letter. See also SMFS Letter and Doty Letter, stating that the MSIL system "will discourage competition in, and will likely constitute a monopoly over, the dissemination of whole documents." Because exemptions from the antitrust laws are available to self-regulatory organizations ("SROs") "Only if necessary to make the . . . Act work, and even then only to the minimum extent necessary," these commentators argued that the broad proposal by the MSRB may not be protected under the exemptive provisions of the Act. See Kenny Letter, citing Silver v. New York Stock Exchange, 373 U.S. 341, 357 (1963).]

The Commission is unpersuaded by this argument. The Commission believes that MSIL falls within the scope and purposes on the Act. (See Section C below.) As such, the MSIB's actions are subject to the antitrust exemption for self-regulatory organizations. See U.S. v. Nat'l Ass'n of Sec. Dealers, 422 U.S. 694, 733 (1975) and Gordon v. New York Stock Exchange, 422 U.S. 659, 691 (1975). Moreover, for the reasons discussed above, the Commission does not believe that the MSRB's entrance into the whole document market will have a significant adverse impact on any private vendors' provision of these services.

[66] This position is supported by comment letters the Commission received from two information vendors, Interactive Data and Disclosure Incorporated, who expressed support for the Board's proposal. *See* Goldspiel Letter and letter from John Poignand, Vice President, Interactive Data, to Jonathan G. Katz, Secretary, SEC, dated August 2, 1990.

[67] Rule 15c2-12 requires underwriters subject to the rule to send any potential customer, upon request, a copy of the final OS, from the time it becomes available until the earlier of: (1) Ninety days from the end of the underwriting period; or (2) the time when the OS is available to any person from a NRMSIR, but in no case less than 25 days following the end of the underwriting period. 15 CFR 240.15c2-12.

[68] One vendor argued that the Board's proposed fee for an annual subscription to a daily tape containing all OSs received each day, which the Board estimates at approximately $2 per OS, is far less, and thus unfair competition with, the current vendor fee of $20 for OSs. Kenny Letter. The Commission believes that this comparison is inapt. The sale of single documents and complete daily tapes are two entirely different types of services. The daily tape is geared toward professional users with a need for a complete collection of OSs. The cost appropriately reflects the economy of scale of duplication of a complete tape rather than the provision of a single document. The vendors' charge for individual copies of OSs hardly can be seen to be aimed at the same need.

[69] One commentator stated that pursuant to Office of Management and Budget ("OMB") Circular No. A-130, the MSRB should have examined whether information needs could have been met by the private sector. CFOA Letter. However, the MSRB is not subject to OMB Circular A-130. The circular applies to federal government agencies and the term "agency" is defined as any "executive department, military department, government corporation, government controlled corporation, or other establishment in the executive branch of the government, or any independent regulatory agency." While the MSRB may be described as exercising "quasi-governmental power," it is not an agency but rather a "self-regulatory organization"; a term that is defined in Section 3(a)(26) of the Act. Thus, OMB Circular A-130 is inapplicable.

[70] One vendor expressed concern that the NRMSIRs will become dependent on the MSIL for information, because "[a]lthough some issuers may still send OSs to Kenny and other NRMSIRs, each issuer need only mail an OS to one of the NRMSIRs * * *." Kenny Letter. The Board, however, has indicated that it does not intend to apply to the Commission for NRMSIR status. Accordingly, underwriters who deliver OSs to the Board will not be assured that they have met their OS delivery requirements under SEC Rule 15c2-12. Furthermore, because these vendors offer value-added products

C. Authority.

1. General

a. *Comments.* A number of commentators questioned whether the Board has the authority to create the MSIL system.[71] These commentators argued that the act contains statutory restrictions on the MSRB and that the legislative history evidences Congress's intent to create a narrow role for MSRB.

One commentator contends that by creating an electronic library, the MSRB is engaging in operational activities that are beyond its limited function and responsibility to prescribe rules for the municipal securities industry.[72] Furthermore, the language of Section 15B of the Act, which requires that the rules of the Board be designed "to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating * * * transactions in municipal securities and, in general, to protect investors and the public interest"[73] cannot be read as a specific grant of authority to the MSRB to engage in activities that do not themselves constitute rulemaking.[74] Under this analysis, if Congress had intended the MSRB to have the authority create the MSIL system, it would have provided so explicityly in Section 15B.[75] Furthermore, since Section 15B prohibits the MSRB from promulgating rules that burden competition and requires the Board to enact rules that foster cooperation and coordination, MSIL is beyond the scope of the statute, because it would compete with and possibly drive out of business established vendors.[76]

b. *Commission Analysis.* The Commission believes that the Board's plans to create the MSIL are designed to further the purposes of the Act by accomplishing the important objective, which has long been of concern to the Commission, of encouraging greater dissemination of information regarding the terms of municipal securities and the financial position of municipal issuers. In creating the MSRB Congress was explicit that the MSRB "would have primary authority with respect to the activities of municipal securities dealers and transactions in municipal securities."[77] Indeed, Congress emphasized the breadth of this wide grant to authority when it stated that it "did not believe it would be desirable to restrict the Board's authority by a specific enumeration of subject matters."[78] Rather, Congress emphasized "that the Board has ample authority to deal with the problems of the municipal securities industry."[79] Thus Congress stated "[t]he scope of the Board's authority and responsibility would be defined in terms of purposes rather than subject matters."[80]

The Act provides the Board authority to adopt rules that, "as a minimum," effectuate certain purposes; among them,

> to prevent fraud and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and, in general, to protect investors and the public interest.[81]

Enhanced information regarding municipal securities terms and municipal issuers will result in greater efficiency and fairness in the market and will protect investors and the public interest. MSIL will provide a central source for issuer documents for dealers, which will help them comply with MSRB fair practice rules in their transactions with customers and thus should prevent fraudulent and manipulative acts and practices and should enhance investor protection. In addition, readily available information should enhance the pricing efficiency of the markets. Finally, MSIL will also promote just and equitable principles of trade and foster cooperation and coordination with persons engaged in transactions in municipal securities by providing broker-dealers with an easier means to check call provisions and other terms of municipal securities issuances before making recommendations to customers and engaging in transactions. The Commission thus believes that the proposed rule change represents a proper exercise of the Board's statutory authority, pursuant to section 15B(b)(2)(C) of the Act.

Commentators argued that Section 15B of the Act limits the MSRB's function to the adoption of rules for the municipal securities market, and that the creation of MSIL is beyond that statutory authority. These commentators placed great emphasis on language in the legislative history that states that "the sole function and responsibility of the Board would be to prescribe rules for the municipal securities industry and

---

derived from the OSs they collect that the market, including underwriters, support, the Commission believes that underwriters should recognize they will continue to benefit by providing OSs to both the MSRB and all three NRMSIRs, rather than only the MSRB. Thus, the Commission believes that the MSIL system should not create a disincentive for underwriters to send OSs to NRMSIRs.

One commentator suggested as an alternative to MSIL that: (1) all NRMSIRs be required to share copies of OSs with each other, upon request, at cost; and (2) access be provided to the MSRB's files accumulated under Rule G-36 for any OS not filed with a NRMSIR. NABL Letter. Another commentator suggested that the Commission consider extending SEC Rule 15c2-12 to a greater array of issues. AB-BB Letter. One commentator believes that the Commission should adopt a mechanism to encourage issuers to disseminate their current reports directly to investors. Doty Letter. This commentator also suggested that the federal securities laws be amended to modify the so-called "Tower Amendment" (Section 15B(d)(1) of the Act) and that the Board be recognized as a federal governmental agency, treated as such for federal budgetary purposes and granted an improved system of enforcement. *Id.*

While the Commission believes that at least some of these proposals merit consideration, the Commission believes that these proposals would be better considered at another time; for example, after MSIL has been in operation and the effects on the market and vendors are clearer.

[71] Kenny, September NASACT, Mazur, NABL, Doty and SMFS Letters, letter from Frieda K. Wallison, Jones, Day, Reavis & Pogue, to the Honorable Richard Breeden, Chairman, SEC, dated October 31, 1990; and letter from Lynn Hampton, C.P.A., Chief Financial Officer, Metropolitan Washington Airport Authority, to Margaret H. McFarland, Deputy Secretary, SEC, dated August 2, 1990.

[73] Section 15B(b)(2)(C) of the Act.

[74] September NASACT Letter.

[75] AB-BB Letter.

[76] *Id.*

In discussing the Board's authority, one commentator noted that Section 11A of the Act provides for Commission regulation of self-regulatory organizations in their information provision activities but contains an exemption for municipal securities. The commentator argues that this is evidence that the MSRB has no authority to engage in the business of collecting and disseminating issuer documents. Doty Letter. Another commentator stated that if "Congress intended for the MSRB to operate or regulate a 'securities information provider' it could easily have provided for it in the 1975 amendments [to the Act]." Kenny Letter.

The argument regarding Section 11A does not withstand scrutiny for two reasons. First, the Commission believes that this provision defines the Commission's authority, not the SROs'. Second, the Commission believes that the commentators' reference to Section 11A is inapposite because the purpose of that section is to enhance the availability of quotation and transaction information, not official public disclosure documents. While the goals of Section 11A may buttress the SROs' authority to operate facilities for the collection processing and dissemination of market data, the SROs must, and in fact do, find their authority for such operations in Section 15A in the case of the NASD and Section 6 in the case of the exchanges.

[81] Section 15B(b)(2)(C) of the Act.

VOL 56 ISS 118 JE 19 1991 UMI

with respect to transactions in municipal securities * * *."[83] In addition, commentators pointed to language in the legislative history that states that the MSRB is to be a "limited self-regulatory organization" with authority to "formulate rules regulating the activities of municipal securities dealers."[84]

The Commission believes that, by divorcing these passages from the context of the concerns that they were intended to address, the commentators misconstrue the intent of this language. The creation of the MSRB was characterized by great concern on the part of municipal issuers of federal interference in matters that traditionally had been left to those issuers.[85] As a result, Congress was careful to strike a delicate balance between providing the Board authority to carry out the important investor protection objectives of the Act and the concerns over comity among various levels of government.[86] The language referred to above clarifies that the Board was not to have authority over issuers. It should not be read to limit the Board's authority to propose and adopt rules, including those that would implement a facility, if those rules effectuate the purposes of the Act and do not violate the express prohibitions in the Act.[86]

Another reason for the limiting language described above was to address concerns that the municipal securities industry, composed of diverse entities, already was subject to regulation by an array of regulatory bodies, including the NASD, the SEC and banking regulatory agencies. Rather than require the MSRB to examine and discipline municipal securities dealers, existing entities were required to do so.[87] Again, the Commission believes that the language in the legislative history relied upon by these commentators, when read in context, is not as broad as those commentators would have the Commission believe and does not limit the MSRB's authority to implement MSIL.

With respect to those commentators arguing that the MSIL system is inconsistent with the Section 15B prohibition of rules that burden competition, the Commission emphasizes that the Act prohibits only rules that "impose any burden on competition not necessary or appropriate in furtherance of the purposes of [the federal securities laws]".[88] As discussed above,[89] the Commission concludes that the competitive impact of the MSIL system will be small, and in any event, outweighed by the benefits of the system.

The Commission also disagrees with the argument put forward by some commentators that had Congress intended the MSRB to operate a system such as MSIL, it would have granted express authority to do so. While it is fair to read specific grants of authority to indicate clear Congressional intent that the Board achieve certain objectives,[90] it does not follow that the lack of other specific grants of authority indicate that Congress did not intend the MSRB to perform other functions not necessary or appropriate to further the goals set forth in Section 15B. In fact, the Senate Report indicates that the MSRB was being granted "broad rulemaking authority over all municipal securities dealers and [the legislation would] require it to promulgate rules to effect the purposes of this legislation and the Exchange Act."[91] Furthermore, the express language of the statute provides that Board rules should be designed, "as a minimum," to achieve the purposes discussed above.[92] The limitations on activities such as inspection and enforcement were intended to avoid over-regulation of municipal securities dealers already subject to the regulation of the banking agencies and the NASD.[93] The MSRB was not limited in its rulemaking authority as an SRO, and further, it was granted the authority to collect the information that is proposed to be disseminated through the electronic library.

The Commission believes that an SRO's authority to adopt rules is broad enough to include the authority to build systems such as the National Association of Securities Dealers Automated Quotation system ("NASDAQ") and the proposed MSIL when the systems effectuate the purposes of the rules. There is no particular provision in Section 15A, which is the source of authority for registered securities associations (*i.e.*, the NASD), that explicitly grants authority to the NASD to run a system such as NASDAQ; rather, it is implicit in Section 15A. Congress, in the legislative history accompanying the Securities Act Amendments of 1975, explicitly acknowledged the NASD's authority to adopt rules "for collecting and publishing quotations" without in any way questioning the NASD's authority to develop and implement the NASDAQ system.[94] Similar to the NASD under Section 15A, the MSRB is explicitly authorized under Section 15B to design rules to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in regulating, clearing and processing information with respect to transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and to protect investors and the public interest.[95] The proposed rules to implement MSII are designed simply to accomplish these goals by the electronic storage and dissemination of the information the MSRB is otherwise authorized to collect and disseminate under section 15B.[96]

---

[83] September NASACT Letter, citing S. Rep. No. 75, 94th Cong., 1st Sess. 114.

[84] *Id.* at 46.

[85] S. Rep. No. 75, 94th Cong., 1st Sess. 44, reprinted in 1975 U.S. Code Cong. & Ad. News 221, 222.

[86] *Id.* at 44, 45, reprinted in 1975 U.S. Code Cong. & Ad. News 222, 223.

[86] The Commission believes that the authority to promulgate rules includes the authority to create a facility. Rule 19b–4 provides that a stated policy, practice or interpretation of an SRO shall be deemed to be a proposed rule change unless certain limitations apply. The Commission has defined, in Rule 19b–4, "policy, practice or interpretation" to include "any material aspect of the operation of the facilities of the self-regulatory organization." Rule 19b–4(b). Rule 19b–4 is a longstanding Commission interpretation that pre-dates the instant rule filing. The legislative history to section 19 of the Act indicates that rule filings should be "in accordance with such rules as the Commission may prescribe." S. Rep. No. 75, 88th Cong., 1st Sess. 120, reprinted in 1975 U.S. Code Cong. & Ad. News 308. Courts ordinarily defer to an agency's interpretation of its statute and regulations when they are consistent with the intent of Congress and supported by substantial evidence. Oregon Dept. of Human Resources v. Dept. of Health and Human Services, 727 F.2d 1411, 1413 (9th Cir. 1983).

[87] S. Rep. No. 75, 94th Cong., 1st Sess. 46, reprinted in 1975 U.S. Code Cong. & Ad. News 234.

[88] Section 15B(b)(2)(C) of the Act.

[89] See section B. above.

[90] For example, section 15B(b)(2)(D) explicitly grants the MSRB the authority to adopt rules governing the arbitration of disputes over transactions in municipal securities.

[92] Section 15B(b)(2) of the Act.

[93] *Id* at 46, reprinted in 1975 U.S. Code Cong. & Ad. News 224.

[94] *Id* at 27, reprinted in 1975 U.S. Code Cong. & Ad. News 205.

[95] In addition, the NASD finds authority to operate NASDAQ under Section 15A, which grants the NASD the authority to adopt rules governing the form and content of quotations. See section 15A(b)(11).

[96] One commentator argued that "[W]hen the [NASD] wanted authority to conduct business enterprises, it was given explicit authority in its corporate charter to do so" [citation omitted]. Doty Letter. The MSRB, however, is a general purpose corporation organization under the Virginia Nonstock Corporation Act. The Articles of Incorporation of the MSRB authorize it to "discharge its mandate under the Securities Exchange Act, * * * to propose and adopt rules to effect the purposes of the Act with respect to

Continued

As the Commission stated in its release approving Rule G–36, section 15B(b)(2)(C) is a broad grant of authority to the Board. The proposed rule change to implement MSIL is intended to provide an efficient means of storing and disseminating the information that the MSRB is authorized to collect, and thus, for the reasons discussed above, is designed to prevent fraud and manipulation, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing and processing information with respect to transactions in municipal securities and to remove impediments to and perfect the mechanism of a free and open market in municipal securities. Making information available through MSIL is a natural result of being able to collect the information. In this light the Commission concludes that MSIL is reasonably designed to further the purposes of section 15B(b)(2)(C) of the Act.[97]

2. Standardization of Form and Content of Issuer Documents

a. *Comments.* Several commentators expressed concern that by operating MSIL, the MSRB may be in a position to set standards for the form and content of issuer documents.[98] Three commentators cited the voluntary efforts by industry organizations such as the GFOA, the National Federation of Municipal Analysts, the National Council of State Housing Agencies and the American Bankers Association Corporate Trustee Committee to achieve uniformity in reporting.[99] They urged that standardized formats be adopted only after full and open discussion by all interested parties takes place,[100] observing that no single uniform format will suffice, as requirements vary by sector.[101] Furthermore, while acknowledging that the MSRB has publicly stated that it has no authority to dictate the form or content of issuer documents, a number of commentators noted concerns that the MSRB may, in the future, attempt to establish standards for format and content.[102] Several of these commentators requested that the Commission state in its order that the MSRB has no authority in this area.[103]

b. *Commission Analysis.* Section 15B(d)(2) of this Act, the so-called "Tower Amendment," prohibits the Board from requiring municipal issuers, directly or indirectly, through a municipal securities broker or municipal securities dealer or otherwise, to furnish to the MSRB any application, report, document or information with respect to such issuer. The Commission believes that this statutory limitation prevents the MSRB from setting form and content standards for issuer documents notwithstanding its position as the operator of the electronic repository.[104] The Board has repeatedly acknowledged this limitation on its authority.[105]

The MSRB has indicated that it chose the scanning technology so that the MSIL system could accept documents in any format and store them exactly as provided. The Commission believes that this technology permits adequate flexibility and that the system in no way forces standardized formats on issuers. Furthermore, the Commission's decision is conditioned on the MSRB's representation that it will not attempt to dictate the content of disclosure.

D. Other Issues

1. Timeliness

a. *Comments.* One vendor believes that the customers of the OS/ARD system would encounter "an information bottleneck in terms of at least a three day delay in receiving documents."[106] Another vendor believes that the Board's PAF "already provides a level of service that is clearly superior to the MSIL's best."[107]

b. *Commission Analysis.* The Board has indicated that in many cases, documents will be available prior to the three-day deadline. In addition, all documents submitted to the MSRB, together with an index of those documents, will be available in the PAF on the day they are received. The Board has further committed that if a user wishes to determine if the board had received a document prior to its being listed on the index, the Board would allow such individual to review and photocopy the documents received by the Board and not yet entered into the computer index at the PAF.[108]

The Commission is satisfied that users of the MSIL system will not be significantly disadvantaged by the delay for scanning the documents. The Commission believes that the MSRB has made suitable arrangements for those users needing documents more quickly. Moreover, as discussed above, Rule 15c2–12 will continue to provide

---

transactions in municipal securities effected by brokers, dealers and municipal securities dealers and otherwise to engage in any lawful activities permitted under the Virginia Nonstock Corporation Act to the extent those activities are not inconsistent with the Act." Articles of Incorporation of the MSRB, ¶ 2. In the absence of express restrictions, a corporation has discretionary authority to enter into contracts and transactions that may be deemed reasonably incidental to its business purpose. Fletcher Cyc. Corp. § 2486 (Perm. Ed. 1986). The Commission believes that because the MSRB is authorized to collect and disseminate the information, MSIL is "fairly incident" to that authority, because it increases the speed and accuracy of collection and dissemination.

[97] A number of commentators stated that the Board's composition favors the dealer community, and that any entity establishing a system such as MSIL should have a more balanced membership. Mazur and NABL Letters. Two commentators suggested that the Commission create an advisory committee composed of representatives of every segment of the market to provide a forum to discuss disclosure issues, conduct research on selected topics, and make recommendations to the SEC. GFOA and January NASACT Letter. Another commentator believes that, should the SEC approve MSIL, the Commission should create an oversight committee, composed of representatives of all sectors with direct authority over supervision of the MSIL system. NABL Letter.

The Commission believes that it would be inappropriate to delay the implementation of MSIL pending the creation and recommendations of an advisory or oversight committee. All issues related to the creation of the library have been fully aired, as evidenced by 145 thoughtful and thorough comment letters. In addition, the MSRB has formed a MSIL system advisory committee already, representative of all sectors of the municipal industry, that has and will continue to advise the MSRB in the creation and operation of the MSIL. In addition, NASACT sponsored a group, in which Commission staff participated as observers, that was charged with examining the feasibility and advisability of developing a repository for municipal securities disclosure information. Thus, the Commission does not believe that there is much to be gained from establishing yet another group to examine these issues. With respect to an oversight committee with authority over the MSIL, the Commission already has oversight authority over the MSRB and the Commission believes it is not only unnecessary but also would be contrary to its statutory responsibility to cede this authority to any other entity.

Regarding the composition of the MSRB, the Commission disagrees with the view that it favors the dealer community. The balance of the Board was determined by Congress during the creation of the MSRB. The MSRB, composed of fifteen members, must have five individuals not associated with any broker, dealer or municipal securities dealer. Section 15B(b) (1) of the Act. While the majority of the MSRB Board is associated with municipal securities dealers, this composition appears appropriate in light of the continuing restrictions on the MSRB from imposing direct or indirect requirements on issuers. The Commission believes that the Board's composition has not prejudiced its rulemaking process, and for the reasons described herein, concludes that the Board has fairly considered the effect of the proposal upon all sectors of the market.

incentives to underwriters to provide copies of documents directly to vendors who are also NRMSIRs.

2. Improvements to the PAF or the NRMSIRs

a. *Comments.* Several commentators suggested that the MSRB can improve disclosure by making improvements to its PAF.[109] Suggestions included creating an index of the documents MSIL receives in its central repository; disseminating that index and preparing a cross-reference to CUSIP numbers for securities listed in the index; [110] filling requests for documents by electronic facsimile transmission, courier delivery, and regular mail service; modeling the PAF after news bureaus in government agencies; using microfiche; [111] improving the copying machines; [112] and relocating the PAF to New York City.[113]

b. *Commission Analysis.* With respect to indexing, the MSIL system will have a more sophisticated index of documents than that of the PAF. Regarding the remaining comments, the Commission believes that the commentators have raised concerns that merit consideration. If the demand exists, the MSRB should consider adding these services. The Commission believes, however, that the dissemination methods proposed are certainly adequate for the start-up period.[114]

VI. Conclusion

The Commission finds that the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Board and, in particular, section 15B(b)(2)(C), which authorizes the Board to adopt rules designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in municipal securities and, in general, to protect investors and the public interest. In addition, the proposed rule change is consistent with the objectives of Rule 15c2–12, which requires underwriters to provide, for a specified period of time, copies of final OSs to any potential customer upon request.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change described above be, and hereby is, approved.

By the Commission.
Dated: June 13, 1991.

[Release No. 34-29296; File No. SR-MSRB-90-3]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Order Approving Proposed Rule Change Relating to the Delivery of Advance Refunding Documents, Recordkeeping and Form G-36

I. Introduction

The Municipal Securities Rulemaking Board ("MSRB" or "Board") submitted to the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change [1] on June 22, 1990, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [2] and Rule 19b-4 [3] thereunder. The proposed rule change would amend Rule G-36 to require underwriters to deliver advance refunding documents to the MSRB.[4]

Notice of the filing of the proposal was published in Securities Exchange Act Release No. 28196 (July 12, 1990), 55 FR 29687. The Commission received 63 comment letters in response to this notice. Of those comment letters, 40 express support for the proposal, 22 are in opposition and one comment in neutral. The Commission has determined, for the reasons discussed below, to approve the proposal.

II. Background

The Board has long been concerned about the adequacy of disclosure in light of the increasing complexity of municipal bonds. For example, in 1987 the Board wrote to the Commission about its concern over confusion in the market concerning issuers' authority to exercise optional redemption features of escrowed to maturity municipal securities.[5] Inadequate disclosure of call provisions had resulted in several incidents in which municipal issuers attempted to call bonds that had been traded in the secondary markets as escrowed to maturity. Because these bonds had been sold to investors in the secondary market on the basis of the yields to a fixed maturity, the exercise of early call provisions in the outstanding bonds would have altered significantly the actual yield received by investors. Although the issuers ultimately dropped their attempts to call the bonds, the Board believed that significant issues had been raised concerning the adequacy of disclosure. In response, the Division of Market Regulation noted in a letter to the MSRB that, before a security is sold as "escrowed to maturity" or "pre-refunded to a call," the dealer "should have conducted a reasonable investigation to satisfy itself that the issue, including the official statement and escrow trust agreement, support such characteristization." [6]

As a result of these events, the Board determined that refunding documents should be added to Rule G-36 for inclusion in its public access facility ("PAF") and the planned MSIL system because of the importance of such information to the purchase and sale of the refunded issue.

In August 1989, the Board requested comment on draft Rule G-36 which, among other things, would have required underwriters to deliver to the Board certain refunding documents. The August 1989 version of Rule G-36 defined refunding documents as those documents that "set forth the terms and conditions under which an issue of municipal securities is advance refunded, including the refunding escrow trust agreement, or its equivalent, and the notice of defeasance." The draft rule required the underwriter to deliver such documents within one business day of receipt from the issuer or its agent but no later than eight business days after the date of the final agreement to purchase, offer or sell the municipal securities.

Prior to adopting a delivery requirement for refunding documents, the Board decided to solicit further comment on a revised definition of refunding documents and the timing of delivery of these documents. In November 1989, the Board proposed revised draft amendments to Rule G-36, which would define refunding documents to include the refunding escrow trust agreement, notice of defeasance, and trust indenture for the refunded issue (or their equivalents).[7]

III. Description

The proposed rule change would require underwriters of refunding issues to send two copies of the refunding escrow trust agreement, or its equivalent, if prepared by or on behalf of the issuer, and, if the escrow agreement is prepared, two copies of completed Form G-36 (ARD) to the Board within five business days of the closing of the issue.[8] For issues not subject to Rule 15c2-12,[9] the requirement to send advance refunding documents only applies if an OS is prepared for the refunding issue. In addition, within 60 days of the effective date of the proposed rule change, underwriters must provide two copies of advance refunding documents and Forms G-36 (ARD) for refunding issues underwritten since January 1, 1990. This "look-back" provision is identical to that currently included in Rule G-36 regarding sending OSs to the Board.

Finally, the proposed rule change revises Form G-36 and provides for two forms—Form G-36(OS) to be sent with OSs and Form G-36(ARD) to be sent with advance refunding documents. Technical amendments to Rule G-8 also have been proposed to correspond with the two new forms.

IV. Summary of Comments

The Commission received a total of 63 comment letters on the proposed rule changes. Of those comment letters, 40 express support for the proposal, 22 are in opposition and one comment is neutral.[10] With a few exceptions, the commentators expressed only general support or opposition for the rule filing in the context of commenting jointly on this filing and the two MSIL filings.[11]

As a general matter, municipal securities analysts commenting supported the filing. They argued that maintenance of advance refunding documents by the Board "is needed today because equal access to all market participants to such information often is lacking, and this results in problems in pricing municipal securities." [12] Dealers also provided support for the proposal. One dealer described a situation in which a particular security that had been traded with the understanding that it was escrowed to maturity, was in fact not escrowed as believed. As a result, the securities were misvalued by numerous parties. Subsequently, the bonds were pre-refunded to an early call date, resulting in a perceived drop in the value of the securities of several points. The dealer maintained that the misunderstanding continued for more than a year after the pre-refunding, stating that "[t]he example . . . demonstrates that there is a bona fide need among the dealer community for better information on the securities being traded in the market every day." [13]

The Commission also received 36 generally supportive comments,[14] which

[112] *Id.* and NCSHA Letter.

[113] GFOA and Kenny Letters.

[114] Several commentators also recommended centralizing or linking the NRMSIRs towards the goal of improving their services. See e.g., NABL and GFOA Letters. The Commission agrees that a linkage among the NRMSIRs would be a favorable development. Such a linkage could help the NRMSIRs provide better service, without having to rely on MSIL if they chose not to.

[1] File No. SR-MSRB-90-3.

[2] 15 U.S.C. 78s.

[3] 17 CFR 240.19b-4.

[4] The proposed rule change was filed simultaneously with two other rule changes: File No. SR-MSRB-90-2, Securities Exchange Act Release No. 28107 (July 12, 1990), 55 FR 29438, which would permit the Board to establish and operate a central electronic facility, the Municipal Securities Information Library ("MSIL") system, through which information collected pursuant to Rule G-36 would be made available electronically to market participants and information vendors; and File No. SR-MSRB-90-4, Securities Exchange Act Release No. 28199 (July 12, 1990), 55 FR 29691, which would permit the Board to establish a central facility, the Continuing Disclosure Information/Electronic Submission ("CDI/ES") System, to accept voluntary submission of continuing disclosure information electronically. See Securities Exchange Act Release No. 29296 (June 13, 1991), approving File No. SR-MSRB-90-2.

[5] See letter from H. Keith Brunnemer, Jr., Chairman, MSRB, to the Honorable David S. Ruder, Chairman, SEC, dated September 16, 1987.

[6] Letter from Richard Ketchum, Director, Division of Market Regulation, SEC, to H. Keith Brunnemer, Jr., Chairman, MSRB, dated June 24, 1988. The letter also notes that "an issuer that wishes to reserve its contractual right to exercise optional redemption provisions in the prior bonds should clearly and conspicuously disclose its intention in the defeasance notices and official statement for the refunding bonds."

[7] In its notice, the Board requested comment on whether additional information should be required (*e.g.*, the accountant's report on the adequacy of the escrow account and the official statement for the refunded issue). In addition, the Board asked for comment on whether it should consider requiring trust indentures for all issues, not just refunded issues, to be sent to the Board.

[8] The requirement that two copies of the advance refunding documents be provided was included because of the Board's PAF. The Board is concerned that excessive handling of the documents in the PAF would affect adversely their quality and thus impair the Board's ability to store electronically the documents in the planned MSIL system. Thus, one copy will be provided in the PAF and one will be used in the MSIL system.

[9] Rule 15c2-12 encourages the procurement and dissemination of disclosure documents by underwriters as a means of enhancing the accuracy and timeliness of disclosure to investors in municipal securities. The Rule requires underwriters to provide, for a specified period of time, copies of final official statements ("OS") to any potential customer upon request.

[10] The Commission received comments from six broker-dealers; three issuer associations [See letters to Jonathan G. Katz, Secretary, SEC, from D. Kathryn Fern, President, National Council of Health Facilities Finance Authorities, dated September 24, 1990 ("NCHFFA Letter"); and Jeffrey L. Esser, Executive Director, Government Finance Officers Association, dated September 24, 1990 ("GFOA Letter"); and letter from Edward Renfrow, President, National Association of State Auditors, Comptrollers and Treasurers, to the Honorable Richard C. Breeden, Chairman, SEC, dated January 17, 1991 ("NASACT Letter")]; 15 issuers; two municipal securities information vendors, both of whom are potential competitors of the Board; four arbitrators; seven investors; three trustees; seven municipal securities analysts; the Public Securities Association (See letter from William W. Moore, Chairman, Municipal Securities Division, Public Securities Association, to Jonathan G. Katz, dated September 20, 1990 ("PSA Letter")); the Southern Municipal Finance Society (See letter from Robert W. Doty, Chairman, Southern Municipal Finance Society, to Jonathan G. Katz, dated September 20, 1990 ("SMFS Letter")); Doty Research and Development Company (*See* letter from Robert W. Doty, President, Doty Research and Development Company, to the Honorable Richard C. Breeden, Chairman, SEC, dated September 20, 1990 ("Doty Letter")); the North American Securities Administrators Association (See letter from Sherwood N. Cook, Chairman, North American Securities Administrators Association Municipal Securities Committee, to Jonathan G. Katz, dated September 7, 1990 ("NASAA Letter")); and one member of Congress (See letter from the Honorable John D. Dingell, Chairman, Committee on Energy and Commerce, U.S. House of Representatives, to the Honorable Richard C. Breeden, dated August 17, 1990 ("Dingell Letter")).

In addition, the Board received five comment letters in response to its Request for Comments on the proposal. The Board described those comments and responded to them in its submission to the Commission, which was described in the notice of the proposed rule change published by the Commission. See Securities Exchange Act Release No. 28196 (July 12, 1990) 55 FR 29687.

[11] The general comments are summarized in the separate summary of comments available in the public file and analyzed in Securities Exchange Act Release No. 29296.

Continued

VOL 56 ISS 118 JE 19 1991 UMI

provided no detailed discussion of the issue.

The issuer community provided the bulk of the adverse reaction to the filing. On the whole, issuers appeared to be concerned about encroachment on their role in the disclosure process. One issuer argued that "although the guidelines established in this proposal are directed at dealers and underwriters, the issuer should be considered. The state and local governments should be adequately represented in any policy decisions regarding the content or timing of municipal securities documentation to be delivered to the dealers and underwriters." [16] Another issuer maintained that "[i]t is the responsibility of bond counsel and the issuer to determine the status of the bonds to be refunded. The filing of documents that are not used in the marketing of municipal bonds should not be the responsibility of the underwriter, but should be held by the issuer and bond counsel." [16]

The Commission also received 17 critical comments [17] and one neutral comment [18] which provided no detailed discussion of the issue.[19]

V. Discussion

The Commission believes the Board's proposal is consistent with the Act, and in particular, section 15B(b)(2)(C), which authorizes the Board to adopt rules designed to prevent fraudulent and manipulative acts and practices, to foster cooperation and coordination with persons engaged in regulating transactions in municipal securities and, in general, to protect investors and the public interest. The Commission believes that it will make municipal securities information more readily available, resulting in increased market efficiency and investor protection.[20]

The supportive commentators cited a lack of information about advance refundings in the municipal securities markets. The Commission agrees that such information is essential to the market and that currently access to such documents is limited. Including advance refunding documents in the MSIL system will significantly increase the scope of information concerning refunded securities made available to the general public and market participants. In addition, the proposed rule change would allow dealers to comply with the Commission's statement that, prior to the sale of municipal securities as escrowed to maturity or pre-refunded to a call, a dealer should conduct a reasonable investigation to satisfy itself that the documents relating to the prior bond issue and the refunding bond issue, including the official statement and escrow trust agreement, support such characterization. The amendment to Rule G–36 would permit the collection and storage of these critical documents to the benefit of the municipal securities market.

With respect to the argument that the issuer and bond counsel, rather than the underwriter, should be responsible for the dissemination of documents associated with refundings, the Commission emphasizes that section 15B(d)(2) of the Act permits the MSRB to require that OSs or other documents that are available from sources other than the issuer, such as the underwriter, be provided to investors. This is, in fact, the basis for Rule G–36.[21]

VI. Conclusion

The Commission finds that the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Board and, in particular, section 15B(b)(2)(C), which authorizes the Board to adopt rules designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in municipal securities and, in general, to protect investors and the public interest. In addition, the proposed rule change is consistent with the objectives of Rule 15c2–12, which requires underwriters to provide, for a specified period of time, copies of final OSs to any potential customer upon request.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change described above be, and hereby is, approved.

Dated: June 13, 1991.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91–14605 Filed 6–18–91; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–29290; File No. SR–MSRB–91–02]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by the Municipal Securities Rulemaking Board; Relating to the Activities of Financial Advisors

On March 14, 1991, the Municipal Securities Rulemaking Board ("Board") filed with Securities and Exchange Commission ("Commission") a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] amending the Board's rule G–23 on activities of financial advisors. The proposed rule change requires disclosure by an underwriter to the issuer of any corporate affiliation with the issuer's non-dealer financial advisor and places recordkeeping requirements on dealers subject to this provision. The Commission published notice of the proposed rule change on April 5, 1991.[2] No comments were received on the proposal.

Rule G–23 establishes disclosure and other requirements for dealers that act as financial advisors to issuers of municipal securities.[3] The rule is designed principally to minimize the *prima facie* conflict of interest that exists when a municipal securities dealer acts as financial advisor and underwriter with respect to the same issue. Specifically, it requires a finanical advisor to alert the issuer to the potential conflict of interest that might lead the dealer to act on its own best interest as underwriter rather than the issuer's best interest.

The Board has been asked whether Rule G–23 applies in two situations: (1) When a non-dealer bank acts as financial advisor and a broker/dealer affiliate of the bank wishes to underwrite the issue; and (2) when a non-dealer subsidiary of a dealer bank acts as a financial advisor and the dealer bank wishes to underwrite the issue. Since the bank and the non-dealer affiliate are not dealers in these instances, they are not subject to the requirements of the Rules. The Board has stated, however, that disclosure by the dealer to the issuer of its affiliation with the financial advisor would be advisable under these circumstances.

With this proposal, the Board has determined to codify this recommendation into the requirements of Rule G–23. The Board believes that the issuer should be aware of any corporate affiliation between the financial advisor and the dealer, even if the financial advisor is not a dealer. The Board, however, does not believe that it is necessary for the underwriter to comply with all the disclosure requirements of Rule G–23 in this instance. In addition, the proposed rule change places recordkeeping requirements on dealers subject to this provision.

The Commission finds that the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Board and, in particular, section 15B(b)(2)(c), which authorizes the Board to adopt rules designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in municipal securites and, in general, to protect investors and the public interest.

It is therefore ordered, pursuant to section 19(b)(2) of the Act that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Dated: June 11, 1991.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91–14520 Filed 6–18–91; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–29304; File No. SR–NASD–91–25]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Interim Ban on Autoquoting in the NASDAQ System

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 31, 1991, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing a six month extension to the interim ban on autoquoting currently in place in the NASDAQ system.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Association is proposing to extend for six months its interim ban on automated update of quotations by market makers in the NASDAQ system. In effect this policy, approved by the Commission for one year ending June 15, 1991,[1] prohibits systems known as "autoquote" systems from effecting automated quote updates or tracking of inside quotations in the NASDAQ system, with two exceptions. Automated updating of quotations is permitted when the update is in response to an execution in the security (such as execution of an order that partially fills a market maker's quotation size) or when it requires a physical entry (such as a manual entry to the market maker's internal system which then automatically forwards the update to the NASDAQ system). This interim ban was necessary in order to study the impact on the NASDAQ system of certain autoquote systems that track changes to the inside quotation in NASDAQ and automatically react by generating another quote to keep the market maker's quote away from the best market.

The NASD completed a study of the impact of autoquoting on the NASDAQ system and submitted a copy to the Commission on March 15 1991.[2] The study revealed that all members surveyed indicated strong objections to any kind of capability that would allow NASDAQ market makers to automatically track the NASDAQ inside quotation or another market maker's quotation. In the members' view, allowing automatic tracking could create a "fair-weather" market making environment that would not contribute to the depth or liquidity for trading the security.

The NASD believes, however, that automation in the securities markets should be encouraged, and is therefore proposing to extend the interim moratorium on autoquoting for six months in order to study further the question of eventually allowing autoquoting in certain additional prescribed circumstances. For example, several members believed that an

[17] SMFS, NASACT and Doty Letters, letters to Jonathan G. Katz, Secretary, SEC, from Lynn Hampton, C.P.A., Chief Financial Officer, Metropolitan Washington Airports Authority, dated September 24, 1990; William J. Cochran, Director of Finance, City of Hartford, Connecticut, dated September 19, 1990; Ronald A. Morris, Budget and Accounting Manager, New Castle County, Delaware, dated September 20, 1990; Paul E. Haney, Director of Finance, Monroe County, New York, dated September 18, 1990; Arthur D. Heilman, Director, Bureau of Revenue, Cash Flow and Debt, Commonwealth of Pennsylvania, dated September 24, 1990; Arther R. Lynch, Director of Finance, Glendale, Arizona, dated September 21, 1990; M.E. Poole, Director, Loudoun County, Virginia, dated September 27, 1990; Eugene VanOverbeke, City Clerk, City of Eagan, Minnesota, dated September 20, 1990; James D. Forte, Director of Finance, City of Plano, Texas, dated September 27, 1990; Lucille Maurer, Treasurer, State of Maryland, dated October 1, 1990; George Greanias, Controller, City of Houston, Texas, dated September 24, 1990; Ruth M. Levine, Director of Finance, City of Milford, Connecticut, dated September 18, 1990; and Richard G. Hilde, Treasurer, City of Long Beach, California, dated September 24, 1990.

[18] Letter from Charles O. Trotter, Vice President and Senior Trust Officer, Central Bank of the South, to Jonathan G. Katz, Secretary, SEC, dated August 7, 1990.

[19] Finally, J.J. Kenny Co., Inc. does not object to the proposed amendments to Rules G–36 and G–8, so long as the documents are to be collected by and maintained in the MSRB's PAF. Letter from J. Kevin Kenny, *et al.*, J.J. Kenny Co., Inc., to Jonathan G. Katz, Secretary, SEC, dated September 24, 1990.

[20] The issues raised by commentators to this proposal were also raised in the two related filings, SR–MSRB–90–2 (MSIL) and SR–MSRB–90–4 (CDI/ES System) and are discussed in the Commission's order issued today on SR–MSRB–90–2. See Securities Exchange Act Release No. 28298.

[21] See Securities Exchange Act Release No. 28061 (May 31, 1990), 55 FR 23333.

[1] 15 U.S.C. 78s(b)(1).

[2] See Securities Exchange Act Release No. 29051 (April 5, 1991), 56 FR 15118.

[3] Rule G–23 does not apply when, in the course of acting as an underwriter, a municipal securities dealer renders financial advice to an issuer, including advice with respect to the structure, timing, terms and other similar matters concerning a new issue of municipal securities.

[1] See Securities Exchange Act Release No. 28338 (August 13, 1990), 55 FR 34636 (August 23, 1990), approving a one-year ban on autoquoting proposed in SR–NASD–90–8.

[2] The NASD requested confidential treatment for the results of the study because of the proprietary nature of the information regarding the NASDAQ system contained in the study.

VOL 56 ISS 118 JE 19 1991 UMI

autoquoting capability that would keep a market maker's quotation at the inside NASDAQ quote, thus reducing the need for manual quote updates and ensuring depth and liquidity in the securities traded should be permitted as soon as the system is capable of processing the additional traffic. Another suggestion was to allow an autoquoting function that would permit a market maker to update quotations of a predefined group of related securities with a single quotation update, similar to what options market makers accomplish with autoquoting for selected options series. The extension of the ban on autoquote for an additional six months will provide the opportunity for additional consideration of autoquote functions that will facilitate member trading at the best market and for study of the technology required to process the additional traffic generated.

The NASD believes the proposed rule change is consistent with section 15A(b)(6) of the Act.[8] Section 15A(b)(6) requires that the rules of a national securities association be designed to "foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market."

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The NASD has requested that the Commission find good cause, pursuant to section 19(b)(2) of the Act, for approving the proposed rule change prior to the thirtieth day after publication in the **Federal Register**, and in any event, on or before June 15, 1991, the date on which the current approval for the ban on autoquoting expires. The NASD believes that extending the ban on autoquoting for six months to conduct further review of the feasibility of permitting types of autoquoting and of the capacity constraints on the NASDAQ system benefits members and the public by assuring that the NASDAQ system is capable of processing additional quotation traffic. In light of these factors, the NASD has requested that the Commission approve the rule change on an accelerated basis on or before June 15, 1991.

Although the Commission does not favor limitations on the use of technological advances in the securities markets, the approach sought by the NASD herein is reasonable. A six month extension of the ban on the use of autoquote functions will enable the NASD to determine which functions would benefit NASDAQ. The six month extension also will allow the NASD to investigate ways to enhance the NASDAQ system to handle the additional volume of computer messages that would be generated by autoquote functions. Accordingly, the Commission believes that the ban on autoquoting should not be terminated while these efforts are ongoing.

The Commission finds that, for the reasons stated herein, the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, with section 15A(b)(6) of the Act. Further, the Commission finds good cause for approving the proposed rule change prior to the 30th day after the publication of notice of filing thereof. The current ban on the use of autoquote functions expires on June 15, 1991. The Commission believes that accelerated approval will avoid an unnecessary and potentially problematic interruption in the ban. Both the NASD membership and the public will benefit if there is no interruption in the ban at this time.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any other person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by July 11, 1991.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change, SR–NASD–91–25 be, and hereby is, approved for a six-month period expiring December 15, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Dated: June 13, 1991.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91–14609 Filed 6–18–91; 8:45 am]

BILLING CODE 8010–01–M

[8] 15 U.S.C. section 78o–3 (1982).

[Release No. 34–29305; File No. SR–PSE–91–21]

Self-Regulatory Organizations; Filing and Order Granting Partial Temporary Accelerated Approval of Proposed Rule Change by the Pacific Stock Exchange, Inc., Relating to Price Protection of Limit Orders

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on June 5, 1991, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PSE proposes to amend several rules of the Exchange's Rules of the Board of Governors in order to allow the Exchange to provide primary market protection to orders that have been entered with the PSE but are designated to receive the execution price that will be established in the primary market's after-hours session. The PSE also proposes to extend the PSE's auction market trading session to 1:50 p.m. (P.t.) and to allow the entry of a new type of order, one-sided ("OS") closing price orders. The PSE has requested accelerated approval of the proposed

rule change.[1] This order grants temporary approval to a portion of the filing.[2]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The self-regulatory organization has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.

The PSE proposes the instant rule change as a competitive response to the New York Stock Exchange's ("NYSE") Off-Hours Trading ("OHT") facility that was recently approved by the Commission.[3]

The NYSE's OHT facility permits the NYSE to conduct an after-hours closing-price trading session known as Crossing Session I ("CSI"). The NYSE's OHT facility also creates a new order type, known as a "GTX" order ("good 'til cancelled, executable through crossing session"), which will be eligible for execution in Crossing Session I of the OHT facility. The GTX order is specifically designed to participate in CSI and will "migrate" from the regular day trading session into CSI if the GTX order is priced at or better than the 4 p.m., e.t., NYSE closing price. The NYSE's OHT facility also permits the entry of single-sided closing-price orders in CSI by NYSE members.

The PSE proposes to amend its rules so that it can offer primary market protection to designated orders.[4] The PSE proposes to establish a separate designator, "GTX" ("good 'til cancelled, eligible for execution in the post-1 p.m. (P.t.) auction market trading session and closing price protection sessions") for those limit orders that customers want to have filled based on executions in the primary market's after-hours session. As described more fully below, GTX orders will migrate to the PSE's current post-1 p.m. extended hours trading session and, if eligible, may be executed as ordinary good till cancelled orders during this session or in the closing price protection session. If not filled, the orders will remain on the PSE specialists' limit order books and will retain their priority.

The PSE extended hours trading session will consist of two separate sessions. The PSE proposes to extend its current auction market by 20 minutes to 1:50 p.m. (P.t.). At 1:50 p.m. the auction market will cease and the PSE will establish a new session between 1:50 to 2 p.m. (P.t.) which will serve as an order protection environment against NYSE Crossing Session I.

In the auction market between 1 and 1:50 p.m. (P.t.), the PSE will respond to the NYSE filing by providing that the following orders will be eligible for execution:

- "GTX" orders that are priced equal to or better than the NYSE closing price.
- One-sided orders if they can be executed at the NYSE closing price or better.
- Regular market and limit orders entered during this time period or that have been authorized by a SCOREX [5] user as eligible for this time period.

(Note: Execution reports will be sent to firms as executions occur.)

In the new session that will be created between 1:50 p.m. and 2 p.m. (P.t.), the following orders will be provided professional protection vis-a-vis NYSE Crossing Session I:

- Unexecuted "GTX" orders priced at the NYSE closing price or better
- Unexecuted one-sided orders entered during the auction market period
- One-sided orders entered after 1:50 p.m.

(Note: Execution reports will be sent following the NYSE Crossing Session I print.)

In addition to establishing this new session between 1:50 and 2 p.m., the PSE will be adjusting the parameters of its SCOREX system. This will involve extending the SCOREX operation hours to 2 p.m.

SCOREX will be structured so that up to 1 p.m., SCOREX will accept limit orders containing a "GTX" designation, but SCOREX will not accept the "GTX" designation for any market, stop, stop limit, or odd-lot order.

Between 1 and 1:50 p.m., SCOREX will accept the following:

One-sided orders

- Regular market and limit orders (Day and GTC)
- "CXLs" for "GTX" and one-sided orders
- "CFOs" and "CXLs" for SCOREX limit orders that have been authorized as eligible by a SCOREX user [6]

During this period (1 and 1:50 p.m.), SCOREX will act as an order routing mechanism. There will be no automatic executions based upon PSE quotations.

From 1:50 to 2 p.m., SCOREX will accept one-sided orders and cancellations for "GTX" and one-sided orders.

This proposal will mean that SCOREX will be operable for an additional hour (from the current 1 p.m. to the proposed 2 p.m.), but the PSE represents that this will have no impact on existing SCOREX capabilities and trade proceeding capabilities.[7]

Under the PSE proposal, the specialist will know which orders have been designated as GTX orders.

In addition to these changes, the PSE also requests that the Commission extend the same exemptive relief that it has granted to the NYSE in connection with the operation of the NYSE's OHT facility for the requirements of Rule 11Aa3–1 (Trade Reporting), Rule 10a–1 (Short Sales),[8] and section 31 (Transaction Fees) to the PSE.

---

[1] See File No. SR–PSE–91–21 and letter from David P. Semak, Vice President, Regulation, PSE, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated June 11, 1991.

[2] See letter from David P. Semak, Vice President, Regulation, PSE, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated June 11, 1991.

[3] The NYSE's OHT facility extends the NYSE's trading hours beyond the 9:30 a.m. to 4:00 p.m. trading session to establish two trading sessions: Crossing Session I and Crossing Session II. Crossing Session I permits the execution of single-stock single-sided closing-price orders and crosses of single-stock closing-price buy and sell orders. Crossing Session II allows the execution of crosses of multiple-stock aggregate-price buy and sell orders. See Securities Exchange Act Release No. 29237 (May 24, 1991), 56 FR 24053 (May 31, 1991) ("NYSE OHT Release") (approving Files No. SR–NYSE–89–42 and NYSE–90–53). The Commission approved the NYSE's OHT facility (Files No. SR–NYSE–90–52 and NYSE–90–53) on May 20, 1991. The NYSE has indicated to the Commission that it is prepared to begin the operation of its OHT facility on June 13, 1991.

[4] The Commission notes that this aspect of the PSE proposal is substantially similar to proposals by the Boston ("BSE"), Philadelphia ("Phlx"), and Midwest ("MSE") Stock Exchanges which are also being approved on an accelerated basis by the Commission today. See Files No. SR–BSE–91–4; SR–Phlx–91–26; SR–MSE–91–11.

[5] SCOREX is the PSE's automated order routing and execution system.

[6] "CXLs" and "CFOs" are cancellation orders.

[7] The PSE states that it will use its existing systems to implement the proposed rule change and execute GTX orders. The PSE represents that it has no systems capacity concerns regarding the execution of GTX orders, and that modifications to its systems to permit the execution of those orders were tested successfully prior to this order.

[8] The Commission will issue a letter that addresses the Exchange's request for an exemption from Rule 10a–1.

VOL 56 ISS 118 JE 19 1991 UMI

The proposed rule change is consistent with section 6(b) (5) of the Act in that it is designed to promote just and equitable principles of trade, to facilitate transactions in securities, to foster a free and open market and, in general, to protect investors and the public interest by encouraging the competitive market place.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments were neither solicited nor received.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements will respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the PSE. All submissions should refer to File No. SR-PSE-91-21 and should be submitted by July 10, 1991.

IV. Commission's Findings and Order Granting Accelerated Approval of the Proposed Rule Change

After careful consideration, the Commission has determined to approve the portion of the PSE proposal that would require PSE specialists to provide primary market protection for certain designated GTX orders. Specifically, this order approves only that part of the filling which allows good til cancelled orders on the limit order books of PSE specialists to be designated as GTX orders, and therefore eligible for migration to the PSE's 1 to 1:30 p.m. (P.t.) auction market trading session and to the PSE's new closing price protection session for possible execution at the NYSE closing price. This order does not approve that portion of the filing which proposes to extend the PSE's auction market session until 1:50 p.m. (P.t.), nor does it approve that portion of the filing which allows OS orders to be accepted after 1:00 p.m. (P.t.). These latter portions of the proposed rule change will be addressed by the Commission at a future date.

The Commission believes that the portions of the PSE proposal regarding GTX orders are reasonably designed to promote just and equitable principles of trade, perfect the mechanism of a free and open national market system, and, in general, further investor protection and the public interest in fair and orderly markets on national securities exchanges, as well as facilitate the linking or qualified markets through appropriate communication systems and the practicability of brokers executing investors' orders in the best market. For these reasons and for the additional reasons set forth below, the Commission finds that approval, for a temporary period ending on May 24, 1993, of that portion of the Exchange's proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of sections 6 and 11A of the Act.[9]

In the recent Commission release approving the NYSE's OHT facility, the Commission noted the benefits that would accrue to investors through development of an after-hours trading session. The Commission in that order also stated that the NYSE OHT sessions should enhance competition by providing a service to customers that other exchanges currently are not providing.[10] In that release, the Commission noted that innovation that provides marketplace benefits to attract order flow to one marketplace does not result in unfair competition if the other markets are free to compete in the same manner.[11] In this regard, the Commission noted that, if other U.S. securities marketplaces desire to compete with the NYSE's OHT facility, they could provide a similar service.[12] Although the PSE proposal does not copy the NYSE's OHT facility, it nonetheless presents a reasonable competitive response. By allowing GTX orders that could be executed on the NYSE to receive a similar fill on the PSE, the Exchange is providing a mechanism for maintaining its own individual marketplace on a competitive level with the primary market. Accordingly, the Commission believes that the PSE proposal should be approved for many of the same reasons that the Commission approved the NYSE OHT facility.[13]

The Commission believes that both the instant PSE proposal and the NYSE's OHT facility, as well as several proposals recently received by the Commission from other U.S. marketplaces, demonstrate the competitiveness of the U.S. securities markets. As a result of these marketplace initiatives, U.S. investors soon will have new opportunities for trading, including the ability to have their orders executed on both the NYSE and the PSE after the close of the regular 9:30 a.m. to 4 p.m. trading session at the closing price established on the primary market. Moreover, the Commission believes that the increased competition that results from permitting PSE specialists to attract GTX orders should enhance the quality of customer order executions.

The Commission believes that allowing GTX orders to migrate to the PSE's post-1:00 p.m. (P.t.) extended hours trading session and, if eligible, to be executed in either the 1 to 1:30 p.m. (P.t.) auction market session or the closing price protection session is consistent with the Act. First, allowing GTX orders to participate as market and limit orders in the PSE's extended auction market session will improve the execution opportunities for GTX orders. Instead of having to wait for NYSE Crossing Session I to finish, these orders may have the opportunity for an earlier execution. In addition, the Commission believes that, because any GTX orders executed during the PSE's post-1:00 p.m. (P.t.) extended hours trading session will occur at a preset price (the NYSE closing price or better), the potential for abuse of these orders by market participants during this session is small. Accordingly, this part of the PSE proposal is consistent with the maintenance of fair and orderly markets and should contribute to the practicability of brokers achieving a best execution for customer orders. The Commission also believes that allowing GTX orders to migrate to a 2 p.m. price protection system is consistent with the maintenance of fair and orderly markets and should contribute to the practicability of brokers achieving a

[9] 15 U.S.C. 78f and 78k-1 (1988).

[12] *Id.*

[13] See NYSE OHT Release, *supra*, note 3.

best execution for customer orders. The new PSE rule would achieve this by imposing additional obligations on Exchange specialists to provide their customers with primary market price protection. The parameters of the new rule are expressed clearly in the text of the rule and do not leave any discretion to specialists in deciding which orders to fill and what priority to give these orders. The new rule makes clear that if customer limit orders are designated as GTX and are priced at the NYSE closing price, then the specialist is obligated to fill those orders up to the volume that prints at the end of NYSE Crossing Session I.[14] The specialist is relieved of this obligation only if he or she can demonstrate that a particular order would not have been executed if it had been transmitted to the primary market. As discussed above, the Commission believes that the only way in which this can be demonstrated is by showing that an order was sent to the primary market and it was not filled or if a customer cancels a GTX order prior to its execution.

In addition, the PSE proposal does not disturb the priority rules currently in force at the Exchange. During the regular trading hours, orders on the specialist's book would maintain the same priority as existed before adoption of this proposal. Among GTX orders that are eligible after 1 p.m. (P.t.) for possible execution, priority is maintained as it was during the regular trading day. If a GTX order is not executed, it will remain on the specialist's book and will maintain its priority.

Furthermore, the Commission believes that, although PSE specialists will know which limit orders are designated "GTX" and will manually execute GTX orders, they should not be able to use this information to their own advantage. During the 1 to 1:30 session, these orders will operate as limit orders in the same manner as they would operate during the regular trading session. To the extent they migrate to the closing price protection session, specialists' participation is strictly circumscribed. Specialist participation would be limited to filling the contra side of a customer limit order that is eligible, pursuant to the new rule, for a fill. The specialist would have no discretion in choosing which orders to fill and which priority to give orders. Orders would be eligible for a fill based on a strict criteria (e.g., orders that are priced at the NYSE closing price and have been designated GTX are eligible to be filled based on volume that prints in the primary market's after-hours session). In addition, orders would be eligible to be filled according to the priority that already exists on the specialists' books. Thus, the Commission is satisfied that, although PSE specialists will have knowledge of which limit orders have been designated GTX, they would not be able to use this knowledge to the detriment of investors because their participation in the execution of GTX orders will be limited. The Commission expects, however, that the PSE will monitor carefully the execution of GTX orders to ensure that PSE specialists are not taking unfair advantage of this information. In this regard, the Commission expects the PSE to report, within 18 months of the date of the approval of this order, on this issue. The Commission may, at that time, wish to revisit this issue.

The Commission notes that the NYSE's OHT facility was approved by a two year temporary period, commencing on May 24, 1991. In approving the NYSE proposal for a temporary period, the Commission noted that the NYSE OHT facility raised several "intermarket" issues, such as: (i) Whether the Intermarket Trading System ("ITS") should be operational during any time period when both the NYSE Crossing Sessions and another ITS market are accepting orders; (ii) whether the NYSE should be required to permit orders entered "GTX" on the books of regional specialists to "migrate" automatically at the close(s) of such regional exchanges to the NYSE Crossing Session I order book; (iii) if so, with what priority, if any; and (iv) who should bear the cost of developing a working mechanism for such transmittal.

In the release approving the NYSE OHT facility, the Commission also noted that, because at least one other exchange had proposed a trading session similar or identical to the NYSE's OHT facility, significant national market system issues would have to be resolved by the NYSE and the competing market, in conjunction with the SEC. Although the PSE proposal does not present an after-hours crossing session like the NYSE's OHT facility, it would establish an after-hours trading system that will compete directly with NYSE Crossing Session I. Accordingly, the Commission believes that a temporary approval period ending on May 24, 1993 is also appropriate for the PSE proposal.[15]

The Commission believes that this time period will provide an opportunity for the Commission and market participants to observe the actual operation of the NYSE's OHT facility and the PSE's after-hours proposal. Based on these observations the Commission and market participants will be in a better position to evaluate whether further steps to link the NYSE's OHT facility with comparable systems operating at the same time are necessary or appropriate to protect investors or promote fair competition and whether any other linkage issues arise. In this regard, 18 months from the date of approval of the instant proposal, the PSE should submit a new filing pursuant to Rule 19b-4 under the Act requesting permanent approval of its proposed rule change, as well as a report describing the PSE's experience with the new rule during that 18-month period. The report should include, but not be limited to, the following information (broken down by month) for the 18-month period:

- Whether customers who have entered GTX orders experienced any problems when they attempted to cancel such orders
- Whether the Exchange has experienced any difficulties in monitoring the activities of specialists with regard to determining their particular obligations to fill GTX orders
- The number, if any, of GTX orders executed after the close of the PSE's regular auction trading session pursuant to the new rule
- The number, if any, of GTX orders that remain unexecuted after the 1:00 to 1:30 p.m. (PT) trading session and after 2:00 p.m. (PT)
- The number and percentage of GTC orders on the book that were designated "GTX" and thus eligible to be filled
- Whether the PSE marketplace has experienced any increased volatility during the last hour of the 6:30 a.m. to 1:00 p.m. (PT) trading sessions after the initiation of the new rule
- Whether there were greater (wider) quote spreads during the last hour of the 6:30 a.m. to 1:00 p.m. (PT) trading session after the initiation of the new rule
- Whether the Exchange or any specialist has given any special guarantees to execute GTX orders over

[14] Under the PSE proposal, a broker and PSE specialist may agree upon a specific volume related or other criteria for requiring a fill. This means, however, that they may agree to have the specialist fill more than the amount of the NYSE Crossing Session I print, not less than the amount of the NYSE Crossing Session I print. Of course, if no volume prints in NYSE Crossing Session I in a particular stock, then the PSE specialist cannot execute any GTX orders after regular trading hours that day.

[15] To achieve uniformity, the temporary approval period would run until May 24, 1993, the sunset of the NYSE's OHT facility.

and above the requirements of the new rule

In addition, the Commission expects that the PSE, through use of its surveillance procedures, will monitor for, and report to the Commission, any patterns of manipulation or trading abuses or unusual trading activity resulting from the new rule. Finally, the Commission expects the PSE to keep the Commission apprised of any technical problems which may arise regarding the operation of the new rule, such as difficulties in order execution or order cancellation.

Finally, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof. The PSE's proposal merely extends the Exchange's execution guarantee procedures to incorporate GTX orders and the possibility of a 2 p.m. (p.t.) execution. It does not substantially alter current PSE procedures, nor does it raise issues not already addressed in the order approving the NYSE's OHT system. Moreover, to the extent that GTX orders can participate in the 1 to 1:30 p.m. trading session, this would permit these orders to receive a possible fill without having to wait for the 2 p.m. trade, and at a price at or better than the NYSE closing price. Accordingly, the Commission believes it is appropriate to approve the proposed rule change on an accelerated basis so that it can be in effect on the date that the NYSE's OHT facility commences operation. This will permit the PSE to compete with Crossing Session I of the NYSE's OHT facility, which in turn should benefit investors and promote competition among markets.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[16] that the portion of the proposed rule change that would require PSE specialists to provide primary market protection for certain designated GTX orders is approved for a temporary period ending on May 24, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[17]

Dated: June 13, 1991.

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34-28300; File No. SR-PHLX-91-28]

Self-Regulatory Organizations; Filing and Order Granting Temporary Accelerated Approval of Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating to Price Protection of Limit Orders

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on June 11, 1991, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Phlx proposes to adopt new Rule 232 to require Phlx specialists to provide primary market protection for limit orders, entered during the Phlx's regular 9:30 a.m. to 4:00 p.m. trading session, that are designated as executable after the Phlx close ("GTX orders").[1] The execution of these orders will be based on volume that prints in the primary market's after-hours trading session.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The self-regulatory organization has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

On May 10, 1991, the Phlx submitted File No. SR-Phlx-91-25 to the Commission regarding a proposal substantially similar to Files No. SR-NYSE-90-52 and SR-NYSE-90-53, which proposed the New York Stock Exchange's ("NYSE") Off-Hours Trading ("OHT") facility.[2] The Phlx's filing stated specifically that SR-PHLX-91-25 was solely in competitive response to the NYSE's proposals. The Phlx filing requested that, if the Commission approves the NYSE's proposals, the Commission should approve SR-PHLX-91-25 simultaneously. On May 20, 1991, the Commission approved the NYSE's OHT facility (Files No. SR-NYSE-90-25 and SR-NYSE-90-53). Because the Phlx's filing is still in the public comment period,[3] the Phlx hereby files the instant rule change proposing to adopt new Rule 232 as a competitive response to the NYSE and to clarify in the near term how the Phlx will handle its customers' GTX orders.

New Rule 232 will provide a guarantee to Phlx GTX orders [4] similar to the guarantees proposed by the MSE and BSE filings.[5] In short, the Phlx will authorize member firms on behalf of customers to designate limit orders as GTX orders. GTX orders will be executed as ordinary good til cancelled orders during regular Phlx trading hours. If they are not executed during regular trading hours and are priced at the closing NYSE price, Phlx GTX orders will be eligible for an execution after the Phlx close based on volume executed in the NYSE's after-hours trading session. Such Phlx GTX orders will be executed on a priority and precedence basis depending upon their order of entry during regular trading hours. Unexecuted GTX orders will retain their priority on the specialists' limit order book. No GTX orders can be entered on the Phlx after the close, but the Phlx will permit GTX orders to be cancelled until the NYSE reports its after-hours trading session volume to the consolidated tape. The Phlx is seeking relief from Rule 10a-1 under the Act ("short sale rule") for any GTX order executed by the specialist pursuant to Rule 232's execution guarantee.[6]

Once the NYSE's after-hours volume is published, the Phlx specialist will execute GTX orders constituting, at a minimum, the same number of shares executed by NYSE in Crossing Session I.[7] A Phlx specialist may not be required to execute the same number of shares that were executed during NYSE's Crossing Session I only if the Phlx specialist can demonstrate that his or her customer's GTX order would not have received an execution if it had been originally routed to the NYSE. This can be demonstrated if, for instance, the Phlx specialist routes a comparable GTX order to the NYSE immediately after receiving a similar order for placement on the Phlx specialist's book. If the former order is not executed in the NYSE's after-hours trading session, a presumption can be asserted that the Phlx customer order also would not have been entitled to an execution on the NYSE.[8]

Should the Phlx specialist not engage in a hedge strategy of this nature, he or she would be expected to undertake the risk of executing a Phlx GTX order based strictly on what volume prints on the NYSE and whether the PHLX GTX order is within the group of Phlx GTX orders that are entitled to priority in relationship to the Phlx specialists' commitment to match for share the number of shares executed on the primary exchange.

Under the Phlx proposal, GTX orders executed after the close of the regular 9:30 a.m. to 4:00 p.m. trading session will be reported as one print per stock to the consolidated tape shortly after 5:00 p.m. (ET).

The proposed rule change is consistent with section 6(b)(5) of the Act in that it is designed to promote just and equitable principles of trade.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were neither solicited nor received.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Phlx. All submissions should refer to File No. SR-Phlx-91-28 and should be submitted by July 11, 1991.

IV. Commission's Findings and Order Granting Accelerated Approval of the Proposed Rule Change

After careful consideration, the Commission believes that the Phlx proposal is reasonably designed to promote just and equitable principles of trade, perfect the mechanism of a free and open national market system, and, in general, further investor protection and the public interest in fair and orderly markets on national securities exchanges, as well as facilitate the linking of qualified markets through appropriate communication systems and the practicability of brokers executing investors' orders in the best market. For these reasons and for the additional reasons set forth below, the Commission finds that approval, for a temporary period ending on May 24, 1993, of the Exchange's proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular with the requirements of section 6 and 11A of the Act.[9]

In the recent Commission release approving the NYSE's OHT facility, the Commission noted the benefits that would accrue to investors through development of an after-hours trading session. The Commission in that order also stated that the NYSE OHT sessions should enhance competition by providing a service to customers that other exchanges currently are not providing.[10] In that release, the Commission noted that innovation that provides marketplace benefits to attract order flow to one marketplace does not result in unfair competition if the other markets are free to compete in the same manner.[11] In this regard, the Commission noted that, if other U.S. securities marketplaces desire to compete with the NYSE's OHT facility, they could provide a similar service.[12] Although the Phlx proposal does not copy the NYSE's OHT facility, it nonetheless presents a reasonable competitive response. By allowing GTX orders that could be executed on the NYSE to receive a similar fill on the Phlx, the Exchange is providing a mechanism for maintaining its own individual marketplace on a competitive level with the primary market. Accordingly, the Commission believes that the Phlx proposal should be approved for many of the same reasons that the Commission approved the NYSE OHT facility.[13]

The Commissioon believes that both the instant Phlx proposal and the NYSE's OHT facility, as well as several propoals recently received by the Commission from other U.S. marketplaces, demonstrate the competitiveness of the U.S. securities markets. As a result of these marketplace initiatives, U.S. investors soon will have new opportunities for trading, including the ability to have their orders executed on both the NYSE and the Phlx after the close of the regular 9:30 a.m. to 4 p.m. trading session at the closing price established

[1] The Commission notes that the Phlx proposal is substantially similar to proposals by the Boston ("BSE"), Pacific ("PSE"), and Midwest ("MSE") Stock Exchanges which are also being approved on an accelerated basis by the Commission. See Files No. SR-BSE-91-4; SR-PSE-91-21; SR-MSE-91-11.

[2] The NYSE's OHT facility extends the NYSE's trading hours beyond the 9:30 a.m. to 4 p.m. trading session to establish two trading sessions: Crossing Session I and Crossing Session II. Crossing Session I permits the execution of single-stock single-sided closing-price orders and crosses of single-stock closing-price buy and sell orders. Crossing Session II allows the execution of crosses of multiple-stock aggregate-price buy and sell orders. See Securities Exchange Act Release No. 28237 (May 24, 1991), 56 FR 24663 (May 31, 1991) ("NYSE OHT Release") (approving Files No. SR-NYSE-90-52 and NYSE-90-53). The Commission approved the NYSE's OHT facility (Files No. SR-NYSE-90-52 and NYSE-90-53) on May 20, 1991. The NYSE has indicated to the Commission that it is prepared to begin the operation of its OHT facility on June 13, 1991.

[3] That filing (SR-Phlx-91-25) differed from the NYSE's OHT facility in that the Phlx specialist would be able to discern which orders in his or her book were GTX or regular good until cancelled, whereas, in NYSE's Crossing Session I, that differentiation would not be revealed to the specialist.

[4] The new rule defines a GTX order as an order that is "good til cancelled, eligible for the primary market protection based on volume that prints on the NYSE after-hours trading session."

[5] See supra note 1.

[6] The Commission will issue a letter that addresses the Exchange's request for an exemption from Rule 10a-1.

[7] The Phlx states that it will use its existing systems to implement the proposed rule change and execute GTX orders. The Phlx represents that it has no systems capacity concerns regarding the execution of GTX orders, and that modifications to its systems to permit the execution of those orders were tested successfully prior to this order.

[8] The new Phlx rule also allows a broker and a Phlx specialist to agree upon a specific volume related or other criteria for requiring a fill. This means, however, that they may agree to have the specialist fill more than the amount of the NYSE Crossing Session I print, not less than the amount of the NYSE Crossing Session I print. Of course, if no volume prints in NYSE Crossing Session I in a particular stock, then the Phlx specialist cannot execute any GTX orders after regular trading hours that day.

on the primary market. Moreover, the Commission believes that the increased competition that results from permitting Phlx specialists to attract GTX orders should enhance the quality of customer order executions.

In addition, the Commission believes that the Phlx proposal is consistent with the maintenance of fair and orderly markets and should contribute to the practicability of brokers achieving a best execution for customer orders. The new Phlx rule would achieve this by imposing additional obligations on Exchange specialists to provide their customers with primary market price protection. The parameters of the new rule are expressed clearly in the text of the rule and do not leave any discretion to specialists in deciding which orders to fill and what priority to give these orders. The new rule makes clear that if customer limit orders are designated as GTX and are priced at the NYSE closing price, then the specialist is obligated to fill those orders up to the volume that prints at the end of NYSE Crossing Session I. The specialist is relieved of this obligation only if he or she can demonstrate that a particular order would not have been executed if it had been transmitted to the primary market.As discussed above, the Commission believes that the only way in which this can be demonstrated is by showing that an order was sent to the primary market and it was not filled or if a customer cancels a GTX order prior to its execution.

In addition, the Phlx proposal does not disturb the priority rules currently in force at the Exchange. During the regular trading hours, orders on the specialist's book would maintain the same priority as existed before adoption of this proposal. Among GTX orders that are eligible after 4 p.m. for possible execution, priority is maintained as it was during the regular trading day. If a GTX order is not executed, it will remain on the specialist's book and will maintain its priority.

Furthermore, the Commission believes that, although Phlx specialists will know which limit orders are designated "GTX" and will manually execute GTX orders, they should not be able to use this information to their own advantage. As discussed above, the Phlx proposal consists of an execution guarantee system. It does not create an additional session where specialists can participate. Specialists participation would be limited to filling the contra side of a customer limit order that is eligible, pursuant to the new rule, for a fill. The specialist would have no discretion in choosing which orders to fill and which priority to give orders. Orders would be eligible for a fill based on strict criteria (e.g., orders that are priced at the NYSE closing price and have been designated GTX are eligible to be filled based on volume that prints in the primary market's after-hours session). In addition, orders would be eligible to be filled according to the priority that already exists on the specialists' books. Thus, the Commissioin is satisfied that, although Phlx specialists will have knowledge of which limit orders have been designated GTX, they would not be able to use this knowledge to the detriment of investors because their participation in the execution of GTX orders will be limited. the Commission expects, however, that the Phlx will monitor carefully the execution of GTX orders to ensure that Phlx specialists are not taking unfair advantage of this information. In this regard, the Commission expects the Phlx to report, within 18 months of the date of the approval of this order, on this issue. The Commission may, at that time, wish to revisit this issue.

The Commission notes that the NYSE's OHT facility was approved for a two year temporary period, commencing on May 24, 1991. In approving the NYSE proposal for a temporary period, the Commission noted that the NYSE OHT facility raised several "intermarket" issues, such as: (i) Whether the Intermarket Trading System ("ITS") should be operational during any time period when both the NYSE Crossing Sessions and another ITS market are accepting orders; (ii) whether the NYSE should be required to permit orders entered "GTX" on the books of regional specialists to "migrate" automatically at the close(s) of such regional exchanges to the NYSE Crossing Session I order book; (iii) if so, with what priority, if any; and (iv) who should bear the cost of developing a working mechanism for such transmittal.

In the release approving the NYSE OHT facility, the Commission also noted that, because at least one other exchange had proposed a trading session similar or identical to the NYSE's OHT facility, significant national market system issues would have to be resolved by the NYSE and the competing market, in conjunction with the SEC. Although the Phlx proposal does not present an after-hours crossing session like the NYSE's OHT facility, it would establish an after-hours trading system that will compete directly with NYSE Crossing Session I. Accordingly, the Commission believes that a temporary approval period ending on May 24, 1993 is also appropriate for the Phlx proposal.[14]

The Commission believes that this time period will provide an opportunity for the Commission and market participants to observe the actual operation of the NYSE's OHT facility and the Phlx's after-hours proposal. Based on these observations the Commission and market participants will be in a better position to evaluate whether further steps to link the NYSE's OHT facility with comparable systems operating at the same time are necessary or appropriate to protect investors to promote fair competition and whether any other linkage issues arise. In this regard, 18 months from the date of approval of the instant proposal, the Phlx should submit a new filing pursuant to Rule 19b–4 under the Act requesting permanent approval of its proposed rule change, as well as a report describing the Phlx's experience with the new rule during that 18-month period. The report should include, that not be limited to, the following information (broken down by month) for the 18-month period:

- Whether customers who have entered GTX orders experienced any problems when they attempted to cancel such orders
- Whether the Exchange has experienced any difficulties in monitoring the activities of specialists with regard to determining their particular obligations to fill GTX orders
- The number, if any, of GTX orders executed after the close of the Phlx's regular auction trading session pursuant to the new rule
- The number, if any, of GTX orders that remain unexecuted after the Phlx specialist has fulfilled his or her obligations in connection with the new rule
- The number and percentage of GTC orders on the book that were designated "GTX" and thus eligible to be filled
- Whether the Phlx marketplace has experienced any increased volatility during the last hour of the 9:30 a.m. to 4 p.m. trading sessions after the initiation of the new rule
- Whether there were greater (wider) quote spreads during the last hour of the 9:30 a.m. to 4 p.m. trading session after the initiation of the new rule
- Whether the Exchange or any specialists has given any special guarantees to execute GTX orders over and above the requirements of the new rule

[14] To achieve uniformity, the temporary approval period would run until May 24, 1993, the sunset of the NYSE's OHT facility.

In addition, the Commission expects that the Phlx, through use of its surveillance procedures, will monitor for, and report to the Commission, any patterns of manipulation of trading abuses or unusual trading activity resulting from the new rule. Finally, the Commission expects the Phlx to keep the Commission apprised of any technical problems which may arise regarding the operation of the new rule, such as difficulties in order execution or order cancellation.

Finally, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof. The Phlx's proposal merely extending the Exchange's execution guarantee procedures to incorporate GTX orders and the possibility of a 4 p.m. execution. It does not substantially alter current Phlx procedures, nor does it raise issues not already addressed in the order approving the NYSE's OHT system. Accordingly, the Commission believes it is appropriate to approve the proposed rule change on an accelerated basis so that it can be in effect on the date that the NYSE's OHT facility commences operation. This will permit the Phlx to compete the Crossing Session I of the NYSE's OHT facility, which in turn should benefit investors and promote competition among markets.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[15] that the proposed rule change is approved for a temporary period ending on May 24, 1993.

For the Commission, by the Division of Market Regulation, Pursuant to delegated authority.[16]

Dated: June 13, 1991.

Putnam Capital Fund; Notice of Application

June 11, 1991.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Putnam Capital Fund.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on January 16, 1991 and amendments were filed on May 13, 1991 and May 28, 1991.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on July 8, 1991 and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicant, One Post Office Square, Boston, MA 02109.

FOR FURTHER INFORMATION CONTACT: Felice R. Foundos, Staff Attorney, (202) 272–2190, or Jeremy N. Rubenstein, Branch Chief, (202) 272–300 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representatives

1. On April 24, 1967, applicant's predecessor, Putnam Duofund, filed a registration statement pursuant to the Securities Act of 1933, which became effective on June 29, 1967. Putnam Duofund operated as a closed-end investment company until January 3, 1983, when it converted to an open-end investment company and changed its name to Putnam Capital Fund, Inc. Applicant, organized as a Massachusetts business trust, became the successor to Putnam Capital Fund, Inc. on April 27, 1984.

2. On June 3, 1988, applicant's board of trustees approved a plan of reorganization. On June 30, 1988, applicant filed proxy materials relating to the proposed reorganization with the Commission. Applicant's shareholders approved the reorganization at a special meeting held on September 8, 1988.

3. The plan of reorganization provided for the transfer of applicant's assets to Depositors Investment Trust ("DIT") in exchange for shares of OTC Emerging Growth Fund ("OTC"), a series of DIT. On September 12, 1988, applicant exchanged 1,728,432 of its shares valued at $5.31 per share for 370,378 OTC shares valued at $24.78 per share. The exchange occurred at relative net asset value.

4. Pursuant to the merger, applicant's shareholders received OTC shares equal in value to their *pro rata* share of the assets of applicant.

5. The total expenditures incurred in connection with the merger was $85,525. The expenses were allocated as follows: $32,525 to applicant, $35,000 to OTC, and $18,000 to applicant's investment adviser.[1]

6. Applicant has filed an instrument of termination with the Secretary of State of the Commonwealth of Massachusetts and has been terminated.

7. As of the date of the application, applicant had no assets, debts, liabilities, or securityholders. Applicant is not a party to any litigation or administrative proceeding.

8. Applicant is not now engaged, and does not propose to engage, in any business activity other than that needed to wind-up its affairs.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management company organized as a Massachusetts business trust. On November 8, 1983, applicant registered under the 1940 Act and filed a registration statement pursuant to the Securities Act of 1933. The registration statement became effective on December 21, 1983.

2. On April 12, 1990, after applicant's board of trustees had approved a plan of reorganization, applicant filed proxy materials relating to the proposed reorganization with the Commission. Applicant's shareholders approved the reorganization at a special meeting held on July 12, 1990.

3. The plan of reorganization provided for the transfer of applicant's assets to Putnam Corporate Cash Trust—Diversified Strategies Portfolio ("DSP") in exchange for shares of DSP. On July 16, 1990, applicant exchanged 2,306,594 of its shares valued at $32.52 per share for 1,965,451 DSP shares valued at $38.15 per share. The exchange occurred at relative net asset value. Upon completion of the reorganization, DSP changed its name to Putnam Corporate Cash Trust.

4. Pursuant to the merger, applicant's shareholders received DSP shares equal in value to their *pro rata* share of the assets of applicant.

5. Applicant and DSP shared equally the expenses, totalling $80,000, that were incurred in connection with the merger.[1]

6. Applicant has filed an instrument of termination with the Secretary of State of the Commonwealth of Massachusetts and has been terminated.

7. As of the date of the application, applicant had no assets, debts, liabilities or securityholders. Applicant is not a party to any litigation or administrative proceeding.

8. Applicant is not now engaged, and does not propose to engage, in any business activity other than that needed to windup its affairs.

For the Commission, by the Division of Investment Management, under delegated authority.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 429 N. Pennsylvania Street, Indianapolis, IN 46204.

FOR FURTHER INFORMATION CONTACT: Felice R. Foundos, Staff Attorney, (202) 272–2190, or Jeremy N. Rubenstein, Branch Chief, (202) 272–3023 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management company that was organized as a corporation under the laws of the State of Indiana. On October 3, 1977, applicant, previously named Unified Accumulation Fund, Inc., filed a notification of registration and registration statement pursuant to section 8 of the 1940 Act. On that date, applicant also field a registration statement pursuant to the Securities Act of 1933, which was declared effective on November 11, 1977.

2. At a meeting held on July 27, 1990, applicant's board of directors adopted a plan of reorganization. On October 16, 1990, applicant filed proxy materials with the Commission relating to the proposed reorganization. Applicant's shareholders approved the reorganization at a special meeting held on October 31, 1990.

3. The plan of reorganization permitted applicant to merge with Unified Funds, an Indiana business trust (the "Trust"). Other Unified managed investment companies also merged into the Trust, each of which will operate as a separate series of the Trust.

4. As of October 31, 1990, applicant had two portfolio series called the General Series and the Indiana Series. Pursuant to the merger, the shareholders of both series received shares in the Trust's Indiana Municipal Bond Fund series equal in value to their shares in applicant.

5. Pursuant to applicant's plan of reorganization, applicant distributed 519,105 shares with a net asset value of $9.43 per share to the General Series' shareholders and 1,148,534 shares with a net asset value of $8.79 per share to the Indiana Series. The shares were valued and distributed on October 31, 1990.

6. After the reorganization, Unified Funds liquidated some of the portfolio securities previously held in the General Series and reinvested the proceeds by November 1, 1990. No commissions were paid in connection with the sale of such securities.

7. The total expenditures incurred in connection with the merger were $28,000. This amount will be paid by applicant under its new existence as the Trust's Indiana Municipal Bond Fund series over a period of five years.

8. Applicant has filed a certificate of dissolution with the Secretary of State of Indiana.

9. As of the date of the application, applicant had no debts or liabilities, and was not a party to any litigation or administrative proceeding.

10. Applicant is neither engaged in nor proposes to engage in any business activities other than those necessary for the winding up of its affairs.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91-14517 Filed 6-18-91; 8:45 am]

BILLING CODE 8010-01-M

[1] By letter dated June 10, 1991, Counsel for applicant stated that these expenses were accrued for and reflected in applicant's and DSP's net asset value prior to the actual merger to ensure an equitable distribution of these expenses between the shareholders of applicant and DSP.

DEPARTMENT OF TRANSPORTATION

Aviation Proceedings; Agreements Filed During the Week Ended June 7, 1991

The following Agreements were filed with the Department of Transportation under the provisions of 49 U.S.C. 412 and 414. Answers may be filed within 21 days of date of filing.

Docket Number: 47565.
Date filed: June 3, 1991.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 492 (TC3 Normal Fares between USSR and China).
Proposed Effective Date: July 2, 1991.
Docket Number: 47567.
Date filed: June 5, 1991.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 485 (Tariffs from Kenya in U.S. Dollars—PAXJ; Mail Vote 486 (Tariffs from Kenya in U.S. Dollars—Cargo).
Proposed Effective Date: May 15, 1991.
Docket Number: 47568.
Date filed: June 5, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC2 Reso/C0333 Dated May 21, 1991, TC2 Expedited Reso 003bb (R–1); TC2 Reso/C0334 dated May 21, 1991, TC2 Expedited Reso (R–2 to R–7); TC2 Reso/C0335 dated May 21, 1991, TC2 Expedited Resos (R–8 to R–10).
Proposed Effective Date: July 1 & August 1, 1991.
Docket Number: 47569.
Date filed: June 5, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC12 Reso/C0687 dated May 1, 1991, North Atlantic (USA/US Territories—Africa R–1 to R–4, TC12 Rates 0466 dated May 22, 1991—Rates Tables.
Proposed Effective Date: October 1, 1991.
Docket Number: 47570.
Date filed: June 7, 1991.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 495 (Currency Amendments).
Proposed Effective Date: July 1, 1991.
Docket Number: 47577.
Date filed: June 7, 1991.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 496 (Brazilian currency); R–1—Reso 021e
Proposed Effective Date: July 1, 1991.

BILLING CODE 4910-62-M

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended June 7, 1991

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 47563.
Date filed: June 3, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: July 1, 1991.
Description: Application of Servicios Aereos Litoral, S.A. DE C.V., pursuant to section 402 of the Act and subpart Q of the Regulations, requests a foreign air carrier permit to provide scheduled transportation between the United States and Mexico.
Docket Number: 47571.
Date filed: June 5, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: July 3, 1991.
Description: Application of Air Micronesia, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations applies for an amendment to its certificate of public convenience and necessity for route 170 so as to be authorized to engage in foreign air transportation of persons, property, and mail between the coterminal points Guam and Saipan, Northern Mariana Islands, on the one hand, and coterminal point or points in Korea and Taiwan, on the other.
Docket Number: 47572.
Date filed: June 6, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: July 5, 1991.
Description: Application of Amerijet International, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations, requests a new or amended certificate of public convenience and necessity authorizing it to provide scheduled foreign air transportation of property and mail between Miami, Florida and St. Lucia, West Indies.
Docket Number: 47574.
Date filed: June 6, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: July 5, 1991.
Description: Application of Zuliana De Aviacion C.A., pursuant to section 402 of the Act and subpart Q of the Regulations, for a foreign air carrier permit authorizing the carriage of persons, property and mail on a scheduled basis between Venezuela via the Netherlands West Indies and Jamaica to Miami and Houston. Zuliana also requests that it be granted authority to operate charters subject to the Department's Rules and Regulations.
Docket Number: 46756.
Date filed: June 7, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: July 5, 1991.
Description: Application of Lokes Aviation, pursuant to section 401(h) of

VOL 56 ISS 118 JE 19 1991 UMI

the Act and subpart Q of the Regulations, requests transfer of its certificate to Loken Aviation, Inc., and files all necessary continuing fitness data to support this transfer and activate its 401 authority in accordance with Order 90-21-1.

BILLING CODE 4910-62-M

Federal Aviation Administration

Approval of Noise Compatibility Program for San Diego International Airport-Lindbergh Field, San Diego, CA

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the San Diego Unified Port District under the provisions of title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96-52 (1980). On January 30, 1989 the FAA determined that the noise exposure maps submitted by San Diego Unified Port District under part 150 were in compliance with applicable requirements. On June 5, 1991 the Assistant Administrator for Airports approved the San Diego International Airport-Lindbergh Field noise compatibility program. Nineteen of the twenty-four recommendations of the program were approved. Five noise abatements measures were disapproved.

EFFECTIVE DATE: The effective date of the FAA's approval of the San Diego International Airport-Lindbergh Field noise compatibility program is June 5, 1991.

FOR FURTHER INFORMATION CONTACT: David B. Kessler, Airport Planner, Planning Section, AWP-611.2 telephone 213/297-1534, Mailing Address: P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009-2007, Telephone 213/297-1250. Street Address: 15000 Aviation Boulevard, Hawthorne, California 90261. Documents reflecting this FAA action may be reviewed at this same location .

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for San Diego International Airport-Lindbergh Field, effective June 5, 1991.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel. Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measured according to the standards expressed in part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Assistant Administrator for Airports prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR part 150, § 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, State, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Airports Division Office in Hawthorne, California.

The San Diego Unified Port District submitted to the FAA on November 7, 1986 and December 11, 1987 the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from September 1985 through September 1989. The San Diego International Airport-Lindbergh Field noise exposure maps were determined by FAA to be in compliance with applicable requirements on January 30, 1989. Notice of this determination was published in the Federal Register on March 30, 1989.

The San Diego International Airport-Lindbergh Field study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 1990. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on December 5, 1990 and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained twenty-four proposed actions for noise mitigation both on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR part 150 have been satisfied. The overall program, therefore, was approved by the Assistant Administrator for Airports effective June 5, 1991.

Outright approval was granted for nineteen of the specific program elements. Five elements were disapproved. The approved elements included expansion of nighttime restrictions, existing nighttime restrictions, prohibitions of nighttime engine tests or engine runups, pilot program of sound attenuation of one public public school, urge city of San Diego to prohibit incompatible land uses, encourage the city to review land use policies, study and upgrade the noise monitoring system, develop a data base on general aviation and commuter, maintain noise advisory committee, maintain noise information center, and its public records, continue to employ a noise information officer, regular meeting with commercial airline representatives, issue "best efforts on noise letter", continue to provide noise and aircraft operations related information, expand the quarterly reports, cooperate with city or county of San Diego public recognition program to airport users, cooperate with studies concerning air carrier service for the San Diego Region and program revisions.

These determinations are set forth in detail in a Record of Approval endorsed by the Assistant Administrator for Airports on June 5, 1991. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the San Diego Unified Port District.

Herman C. Bliss,

Manager, Airports Division, Western-Pacific Region.

BILLING CODE 4910-13-M

Radio Technical Commission for Aeronautics (RTCA) Executive Committee; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C., appendix I), notice is hereby given for the meeting of the Executive Committee to be held July 12, 1991, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW., suite 500, Washington, DC 20005, commencing at 9:30 a.m.

The agenda for this meeting is as follows: (1) Chairman's remarks and introductions; (2) approval of the May 24, 1991, Executive Committee Meeting Minutes; (3) Executive Director's report; (4) RTCA Special Committee activities report for May-June 1991; (5) Fiscal and Management subcommittee report; (6) Facilities Working Group report; (7) consideration of proposals to establish new special committees; (8) consideration of approval of special committee reports; (a) Special Committee 159 report: "Minimum Operational Performance Standards for Airborne Supplemental Navigation Equipment Using Global Positioning System (GPS)"; (b) Special Committee 142 report: Proposed DO-181A, "Minimum Operational Performance Standards for Air Traffic Control Radar Beach System/Mode Select (ATCRBS/Mode S) Airborne Equipment," incorporating changes no. 1, no. 2, and no. 3.; (9) other business; (10) date and place of next meeting.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., suite 500, Washington, DC 20005; (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on June 12, 1991.

Clyde Miller,

Designated Officer.

BILLING CODE 4910-13-M

Research and Special Programs Administration

International Standards on the Transport of Dangerous Goods; Public Meeting

AGENCY: Research and Special Programs Administration (RSPA), Department of Transportation.

ACTION: Notice of public meeting.

SUMMARY: This notice is to advise interested persons that RSPA will conduct a public meeting to report the results of the fourth session of the United Nations' Sub-Committee of Experts on the Transport of Dangerous Goods.

DATES: July 18, 1991 at 9:30 a.m.

ADDRESSES: Room 4234, Nassif Building, 400 Seventh Street SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Frits Wybenga, International Standards Coordinator, Office of Hazardous Materials Transportation, Department of Transportation, Washington, DC 20590; (202) 366-0656.

SUPPLEMENTARY INFORMATION: This meeting will be held to describe the outcome of the fourth session of the Sub-Committee of Experts on the Transport of Dangerous Goods to be held July 1 to 12, 1991, in Geneva and to discuss the U.S. delegation's plans for participating in the Sub-Committee's fifth session to be held December 2 to 13, 1991. Topics to be covered include packaging and classification issues relating to explosives; performance packaging test requirements for non-bulk packagings; classification of specific dangerous goods; and other proposed amendments to the United Nations Recommendations on the Transport of Dangerous Goods.

The public is invited to attend without prior notification.

Documents

Copies of documents submitted to the fourth session of the UN Sub-Committee meeting and, when available, a copy of the report of the Sub-Committee may be obtained from RSPA for a nominal fee. A listing of these documents is available on the Hazardous Materials Information Exchange (HMIX), RSPA's computer bulletin board. Documents may be ordered by filling out an on-line request form on the HMIX or by contacting RSPA's Dockets Unit (202-366-4453). For more information on the use of the HMIX system, contact the HMIX information center; 1-800-FLANFOR (782-6367); in Illinois, 1-800-367-6582; Monday through Friday, 8:30 a.m. to 5 p.m. Central time.

After the meeting, a summary of the public meeting will also be available from the Hazardous Materials Advisory Council (HMAC), suite 250, 1110 Vermont Ave., NW., Washington, DC 20005; telephone number (202) 728-1460.

Issued in Washington, DC, on June 13, 1991.

Alan I. Roberts,

Associate Administrator for Hazardous Materials Safety.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Dated: June 13, 1991.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department

VOL 56 ISS 118 JE 19 1991 UMI

Clearance Officer, Department of the Treasury, room 3171, Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545–0173.
Form Number: 4563.
Type of Review: Extension.
Title: Exclusion of Income for Bona Fide Residents of American Samoa.
Description: Used by bona fide residents of American Samoa whose income is from sources within American Samoa, Guam, and the Northern Mariana Islands to the extent specified in Internal Revenue Code section 931. This information is used by the Service to determine if an individual is eligible to exclude possession source income.
Respondents: Individuals or households.
Estimated Number of Respondents: 100.
Estimated Burden Hours Per Response/Recordkeeping:
Recordkeeping, 33 minutes
Learning about the law or the form, 5 minutes
Preparing the form, 25 minutes
Copying, assembling, and sending the form to IRS, 17 minutes
Frequency of Response: Annually.
Estimated Total Recordkeeping/Reporting Burden: 135 hours.
OMB Number: 1545–0238.
Form Number: W–2G.
Type of Review: Extension.
Title: Certain Gambling Winnings.
Description: Internal Revenue Code section 6041 requires payers of certain gambling winnings to report them to the IRS. If applicable, section 3402(q) and section 3406 require tax withholding on these winnings. We use the information to ensure taxpayer income reporting compliance.
Respondents: Businesses or other-profit, Small businesses or organizations.
Estimated Number of Respondents: 3,283.
Estimated Burden Hours Per Response: 19 minutes.
Frequency of Response: On occasion.
Estimated Total Reporting Burden: 449, 223 hours.
OMB Number: 1545–1065.
Form Number: 9003.
Type of Review: Extension.
Title: Additional Questions to be Completed by All Applicants for Permanent Residence in the United States.
Description: Form to be used by the State Department and the Immigration and Naturalization Service to gather certain additional information on "green card" applicants for the IRS as required by section 6039E(b) of the Tax Reform Act. The answers will be transcribed into a data base for IRS computer processing.
Respondents: Individuals or households.
Estimated Number of Respondents: 650,000.
Estimated Burden Hours Per Response: 5 minutes.
Frequency of Response: When applying for green card.
Estimated Total Reporting Burden: 54,166 hours.
Clearance Officer: Garrick Shear (202) 535–4297, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

BILLING CODE 4810–35–M

Customs Service

New Importer Identification Numbering System

AGENCY: U.S. Customs Service, Department of the Treasury.
ACTION: Notice of New Importer Identification Numbering System.

EFFECTIVE DATE: July 1, 1991.
FOR FURTHER INFORMATION CONTACT: Entry Operations Branch, (202) 566–5307.
SUPPLEMENTARY INFORMATION: The Customs Service has undertaken a project to modernize the importer name, address and identification number file contained in our Automated Commercial System. A major objective of this project is to provide standardized data and uniformity of input into this file. A part of this project is the establishment of a new Customs assigned importer identification numbering system.

The Customs Service will implement a new Customs assigned importer identification numbering system on July 1, 1991. The new Customs assigned number will be automatically generated via the Automated Commercial System within Customs after an individual or business has made application for such a number on a Customs Form 5106.

In general, the new Customs assigned number will only be available to individuals and businesses which do not possess a valid Internal Revenue Service employer identification number or a Social Security number.

Pursuant to § 24.5, Customs Regulations (19 CFR 24.5), an importer is required by Customs to be identified by a specific number. There are three types of numbers currently used by the Customs Service for this purpose. They are either an Internal Revenue Service employer identification number, a Social Security number, or a Customs assigned number. Section 24.5 states:

> If an Internal Revenue Service employer identification number, a Social Security number, or both, are obtained after an importer number has been assigned by Customs, a new Customs Form 5106 shall not be filed unless requested by Customs.

Pursuant to 19 CFR 24.5(c), this public notice is to serve as the request by Customs to furnish either an Internal Revenue Service employer identification number or Social Security number for importers who have received a Customs assigned number. The position of the Customs Service is that each person who enters into a Customs transaction using an existing Customs assigned number shall update that identification number by furnishing the importer's Social Security number or Internal Revenue Service employer identification number within 30 days of receipt of such a number. The information should be furnished on a Customs Form 5106.

Each person who engages in a Customs transaction using a Customs assigned identification number issued prior to the new numbering system must update that identification number by furnishing a Social Security number or employer identification number if available. If a Social Security number or employer identification number is not available, application for a new Customs assigned number must be made on a Customs Form 5106.

Importers that need to obtain a new Customs assigned number (those that do not have an Internal Revenue Service employer identification number or Social Security number) are expected to obtain a new Customs assigned number and request that the old numbers be deactivated.

The format of the new Customs assigned number is YYDDPPNNNNN where YY is the calendar year of input, DDPP is the district and port code, and NNNNN is a sequentially system assigned number.

Because the importer identification number cannot be changed on a Customs bond using a rider, importers who have filed Customs bonds using a Customs assigned identification number must replace their existing bond, on their anniversary date, with a new bond and bond application using an Internal Revenue Service employer identification number or a Social Security number, or the importer must obtain a new Customs assigned number.

Customs expects a 1-year transition phase to accommodate all importers. During this period, Customs will allow for dual processing of old and new Customs assigned numbers.

A false statement contained on a Form 5106 may subject the filer to prosecution under the provisions of 18 U.S.C. 1001 or sanctions or penalties under other applicable laws or regulations.

This Notice supersedes the Federal Register Notice dated January 9, 1990, volume 55, number 6.

Dated: June 14, 1991.

Samuel H. Banks,
Assistant Commissioner, Office of Commercial Operations.

BILLING CODE 4820–02–M

Internal Revenue Service

Establishment of Internal Revenue Service Information Reporting Program Advisory Committee

AGENCY: Internal Revenue Service, Treasury.

ACTION: Announcement.

SUMMARY: The Internal Revenue Service has established an Information Reporting Program (IRP) Advisory Committee. The primary purpose of this Advisory Committee is to provide an organized public forum for discussion of relevant information reporting issues between the officials of the Internal Revenue Service and representatives of the payer community. The Committee will offer constructive observations about the Internal Revenue Service's current or proposed policies, programs, and procedures in this area and, when necessary, suggest ways to improve the Information Reporting Program operation.

SUPPLEMENTARY INFORMATION: The Committee will report to the Director, Information Reporting Program, who is the executive responsible for information reporting and is charged with its system-wide planning and improvement. The Advisory Committee will be instrumental in providing advice to enhance the Information Reporting Program and achieve forms simplification and fairness to taxpayers. Increasing citizen participation in the planning and improvement of the tax system will help achieve the goal of enhancing voluntary compliance. Committee members are not paid for their time or services; but, consistent with Federal regulations, they will be reimbursed for their travel and lodging expenses to attend a two-day meeting twice each year.

The Internal Revenue Service is interested in representation from different areas of the payer community (e.g., banking, real estate, life insurance, securities, etc.). Anyone wishing to be considered for participation on the Advisory Committee should so advise the Internal Revenue Service. Please complete the following questionnaire and forward to Ms Susan Hinton, Staff

VOL

Chief, Information Reporting Program Planning Staff, at the address below.

ADDRESSES: Internal Revenue Service, 1111 Constitution Avenue, NW., EX:I:P, room 2011, Washington, DC 20224.

DATES: Completed questionnaires should be received by July 19, 1991. If you have already submitted an application, you do not need to reapply in response to this announcement. An acknowledgment letter will be sent upon receipt of your application.

FOR FURTHER INFORMATION CONTACT: Kate LaBuda at (202) 566-6542 (not a toll-free number).

Dated: June 3, 1991.

Susan Hinton,

Staff Chief, Planning and Management Staff, Information Reporting Program.

Interest Questionnaire—Information Reporting Program Advisory Committee

This questionnaire must be completed by anyone interested in becoming a member of the Information Reporting Program Advisory Committee. The form should be returned to Ms. Susan Hinton, Staff Chief, Information Reporting Program Planning Staff, Internal Revenue Service, 1111 Constitution Avenue, NW., EX:I:P room 2011, Washington, DC 20224, and must be received in that office by July 19, 1991. Applications received after this date will not be considered. If you have already applied, you do not need to reapply in response to this announcement. All applications received will be acknowledged. Questions should be directed to Kate LaBuda at (202) 566-6542.

1. Name:
2. Title:
3. Company or Organization Name:
4. Business Address:
5. Home Address:
6. Business Phone:
7. Home Phone:
8. Social Security Number (This is Reqired for a Tax Check):
9. Prior IRS employment (if applicable, please state position/s and title/s):
10. Professional credentials (e.g., Ph.D., CPA, Enrolled Agent, Attorney, Accountant, Tax Practitioner, Professor, etc.)
11. Which one professional credential most accurately describes your current professional activity?
12. How many years of experience do you have?

_____ Tax related (general)
_____ Information Reporting.

13. What most closely describes your *primary area(s)* of tax administration expertise? (Select no more than three.)

_____ Individual taxpayers
_____ Corporate taxpayers
_____ Small business taxpayers
_____ Minority taxpayers
_____ Employee plans
_____ General tax practice
_____ Information systems
_____ Rulings & Regulations
_____ International taxpayers
_____ Taxpayer service/assistance
_____ Compliance activities
_____ Exempt organizations
_____ Quality management
_____ Other (please describe below)

14. With which of the following information reporting groups does your business or organization most closely identify? (Select no more than three.)

_____ Banking
_____ Data processing
_____ Real estate
_____ Securities
_____ Large corporations
_____ Retirement groups
_____ Utilities
_____ Other (please describe below)
_____ Savings & Loans/Credit Unions
_____ Mortgage companies
_____ Life insurance
_____ Stock broker/Finan. planner
_____ State governments
_____ Trust companies
_____ Federal government agencies.

15. Summarize your background and identify organizations to which you belong and any leadership positions you have held. Please limit job and organization entries to five each (total of 10).

16. We would like you to propose two topic ideas that you would feel appropriate for discussion by the new Information Reporting Program Advisory Committee.

A. Suggested Topic:
Description (no more than two sentences):

B. Suggested Topic:

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee; Public Comments on U.S. Negotiations With the Republic of Poland in the Context of the Renegotiation of Poland's Terms of Accession to the General Agreement on Tariffs and Trade (GATT)

ACTION: Notice of request for comments.

SUMMARY: Notice is hereby given that the Trade Policy Staff Committee (TPSC) is requesting written comments on Poland's announced intention to renegotiate its Protocol of accession to the GATT and establish a GATT schedule of tariff concessions, and on the negotiations that are part of this process. Comments received will be considered by the Executive Branch in developing U.S. positions and objectives in the bilateral and multilateral negotiations that will take place in response to Poland's request.

DATES: Public comments are due by 12 noon, Friday, July 12, 1991.

ADDRESSES: Office of the U.S. Trade Representative, 600 17th Street, NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Cecilia Leahy Klein, Director for GATT Affairs (202-395-3063), or Gordana Earp, Deputy Assistant USTR for East-West Trade Policy (202-395-3074), Office of the U.S. Trade Representative, 600 17th Street, NW., Washington, DC 20506.

SUPPLEMENTARY INFORMATION:

1. Written Comments

The Chairman of the TPSC invites written public comments on issues to be addressed in the course of examination by the Contracting Parties (CPs) to the GATT of the request by Poland for renegotiation of the terms of its Protocol of accession to the GATT. In addition, public advice is sought concerning tariff concessions that might be requested as part of the negotiations. The TPSC is particularly interested in assessments of the impact on U.S. trade of recent Polish economic and trade reforms, on specific issues that should be addressed in developing new terms of Polish participation in the GATT, and on recent experiences of U.S. firms in trading with Poland.

Persons wishing to submit comments should provide a written statement, in twenty copies, by noon, Friday, July 12, 1991, to Carolyn Frank, TPSC Secretary, Office of the U.S. Trade Representative, room 414, 600 17th Street, NW., Washington, DC 20506. Non-confidential information received will be available for public inspection by appointment, in the USTR Reading Room, 600 17th Street, NW., room 101, Washington, DC, Monday through Friday, 10 a.m. to 12 noon and 1 p.m. to 4 p.m. For an appointment call Brenda Webb on 202-395-6186. Business confidential information will be subject to the requirements of 19 CFR 2003.6. Any business confidential material must be clearly marked as such on the cover page (or letter) and succeeding pages, and must be accompanied by a non-confidential summary thereof.

2. Background

On January 15, 1990, the Republic of Poland informed the GATT CPs of its desire to renegotiate the accession Protocol established on June 13, 1967, and to establish a tariff-based schedule of concessions to replace the original non-tariff provisions of Schedule LXV. Special Protocol terms were established for Poland in 1967 to protect GATT CPs from the unbalanced trade effects of non-market economic regimes. These special provisions included a selective safeguard clause, annual reviews of Poland's trade progress with GATT CPs, and provisions for the withdrawal of concessions if Poland's trade practices damaged the industries or trade of other CPs. In addition, and in lieu of tariff commitments that were meaningless under the economic and trade regime existing at the time of Poland's accession, Poland established a GATT schedule that bound Poland to fixed yearly increases in imports from GATT CPs. In the mid-1970s, Poland abandoned this import commitment. The GATT CPs declined to release Poland from its obligation, however, and Poland ceased consulting with GATT CPs concerning its conformity to the provisions of its Protocol and schedule. The safeguard mechanism, designed to permit the application of selective import restrictions by CPs against Polish exports proved cumbersome, and was seldom used. Poland's inability to meet its Protocol and schedule obligations, however, allowed other CPs, including the United States, to withdraw or withhold GATT benefits from Poland without violating their own GATT obligations.

Based on its conviction that recent reforms in its economic and trade regime have substantially eliminated the non-market, centrally planned economic system that made such special, non-market terms of GATT accession necessary, Poland now seeks to establish new terms of GATT participation that are like those traditionally negotiated with other CPs. A Working Party to examine this request, composed of interested GATT CPs was established in February 1990, and Poland circulated a description of its foreign trade regime in September 1990. The Working Party will examine Poland's current foreign trade regime, assess its consistency with GATT obligations, and submit recommendations to the GATT Council that may include a draft Protocol containing new terms of GATT participation for Poland.

As part of the renegotiation process, Poland will also initiate negotiations with interested GATT members to formulate a schedule of tariff concessions that may become part of its new Protocol, attached to the text of the General Agreement. Such concessions normally consist of tariff reductions and/or commitments not to increase tariffs above certain levels. Poland established its current applied tariff regime in 1988, but the rates applied were subsequently altered based on the rapidly changing needs of the Polish economy. Sudden internal economic and price reform, the sharp decline in commerce among the former members of the Council of Mutual Economic Assistance (CMEA) as Eastern and Central Europe converted fully to hard currency trade, and increased competition from imports as quantitative restrictions were eliminated created pressures first to suspend many existing tariffs, then to raise some of them. It is expected that Poland will soon establish a new applied tariff regime, which may be shaped by Poland's tariff negotiations with the GATT.

Poland is also engaged in negotiations with the European Communities (EC) to establish a broad agreement covering economic, cultural, political, and trade relations. Part of this agreement would be a free trade arrangement which would eliminate most tarriffs on trade between Poland and the EC over perhaps a ten year period, with Polish access to the EC market to be improved in advance of similar Polish liberalization. U.S. exports to Poland would continue to be subject to import tariffs and other border restrictions after such measures against EC exports had been eliminated.

If Poland establishes new terms of GATT participation closer to traditional Protocol provisions, Poland will be expected to conduct its trade policies in accordance with the rules set out in the General Agreement, and the terms of its Protocol. Basic GATT obligations include full transparency in trade regulation, national treatment for imported goods, non-discrimination among trading partners, the elimination of quantitative restrictions in trade and a reliance on tariffs, and observance of GATT rules on dumping, subsidies, customs procedures, and state trading. Poland's economic and trade regime must also be capable of responding to GATT provisions in a manner that grants other CPs reciprocal market access and fair trade standards in the conduct of GATT trade relations.

Authority: 15 CFR 2002.2.

Daniel F. Leahy,

Acting Chairman, Trade Policy Staff Committee.

Sunshine Act Meetings

Federal Register
Vol. 56, No. 118
Wednesday, June 19, 1991

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL ENERGY REGULATORY COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: June, 11, 1991, 56 FR 26849.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: June 12, 1991, 10:00 a.m.

CHANGE IN THE MEETING: The following Docket Number has been added to Item CAG-15 on the Agenda scheduled for June 12, 1991:

Item No., Docket No., and Company

CAG-15—Docket No. RP91-111-000, North Penn Gas Company

Lois D. Cashell,

Secretary.

[FR Doc. 91-14672 Filed 6-14-91; 4:45 am]

BILLING CODE 6717-01-M

FEDERAL HOUSING FINANCE BOARD

TIME AND DATE: 9:00 a.m. Tuesday, June 25, 1991.

PLACE: The Park Hyatt, 24th and M Streets, NW., Washington, DC 20037.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: The Board will consider the following:

1. 1992 Budget
2. Strategic Plan
3. Compensation Policy for Bank Presidents

The above matters are exempt under one or more of sections 552(c)(2), (9)(A) and (9)(B) of title 5 of the United States Code. 5 U.S.C. 552b(c)(2), (9)(A) and (9)(B).

CONTACT PERSON FOR MORE INFORMATION: Elaine Baker, Executive Secretary to the Board, (202) 408-2837.

J. Stephen Britt,

Executive Director.

[FR Doc. 91-14663 Filed 6-14-91; 4:55 pm]

BILLING CODE 6725-01-M

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 11:00 a.m. Monday, June 24, 1991.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: June 14, 1991.

William W. Wiles,

Secretary to the Board.

[FR Doc. 91-14685 Filed 6-14-91; 4:55 pm]

BILLING CODE 6210-01-M

FOREIGN CLAIMS SETTLEMENT COMMISSION

F.C.S.C. Meeting Notice No. 3-91

Notice of Meetings

Announcement in Regard to Commission Meetings and Hearings

The Foreign Claims Settlement Commission, pursuant to its regulations (45 CFR Part 504), and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice in regard to the scheduling of open meetings and oral hearings for the transaction of Commission business and other matters specified, as follows:

Date and Time	Subject Matter
Thurs, June 27, 1991 at 10:00 a.m.	Consideration of Proposed Decisions on claims against Iran. Hearings on the Record on objections to Proposed Decisions issued on claims against the Government of the Islamic Republic of Iran: IR-0123—Leslie F. Noell, Jr. IR-1866-Elga Skinders.
Thurs, June 27, 1991 at 2:00 p.m.*.	Oral Hearings on objection to Proposed Decision issued on claim for prisoner of war compensation under the War Claims Act of 1948: SPN-1868—Michael Joseph Bosiljevac, Dec'd.

* The hearing site will be: 601 D Street, NW., Room 10418 (Classroom B), 10th Floor, Patrick Henry Bldg., Washington, DC.

Subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

All meetings are held at the Foreign Claims Settlement Commission, 601 D Street, NW., Washington, DC. Requests for information, or advance notices of intention to observe a meeting, may be directed to: Administrative Officer, Foreign Claims Settlement Commission, 601 D Street, NW., Room 10000, Washington, DC 20579. Telephone: (202) 208-7727.

Dated at Washington, D.C. on June 17, 1991.

Judith H. Lock,

Administrative Officer.

BILLING CODE 7533-01-M

UNITED STATES POSTAL SERVICE BOARD OF GOVERNORS

Notice of a Meeting

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 C.F.R. Section 7.5) and the Government in the Sunshine Act (5 U.S.C. Section 552b), hereby gives notice that it intends to hold a meeting at 1:00 p.m. on Monday, July 1, 1991, and at 8:30 a.m. on Tuesday, July 2, 1991, in

Washington, D.C. The July 1 meeting, at which the Board will consider the Postal Rate Commission's May 24, 1991, Opinion and Further Recommended Decision in Docket No R90-1, is closed to the public. (See 56 FR 26457, June 7, 1991)

The July 2 meeting is open to the public and will be held in the Benjamin Franklin Room on the 11th floor of U.S. Postal Service Headquarters, 475 L'Enfant Plaza, S.W. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 268-4800.

Agenda

Monday Session

July 1—1:00 p.m. (Closed)

1. Consideration of the Postal Rate Commission's Opinion and Further Recommended Decision in Docket No. R90-1.

Tuesday Session

July 2—8:30 a.m. (Open)

1. Minutes of the Previous Meeting, June 3-4, 1991.
2. Remarks of the Postmaster General. (Anthony M. Frank)
3. Status Report on the Strategic Plan. (Frank R. Power, Assistant Postmaster General, Planning Department)
4. Status Report on the Integrated Logistics Support System (ILSS). (William J. Dowling, Assistant Postmaster General, Engineering and Technical Support Department, and Jean J. Provost, Director, Office of Procurement and Supply Systems)
5. Briefing on the Expedited Mail Service Project. (Robert E. Michelson, General Manager, Expedited Mail Services Division)
6. Status Report on Olympic Sponsorship. (Deborah K. Bowker, Assistant Postmaster General, Communications Department)
7. Capital Investment. (William J. Dowling, Assistant Postmaster General, Engineering and Technical Support Department)
   a. Flats Sorting Machine—Flat Mail Bar Code Sorter Modification.
8. Tentative Agenda for August 5-6, 1991, meeting in Washington, D.C.

David F. Harris,

Secretary.

Corrections

Federal Register
Vol. 56, No. 118
Wednesday, June 19, 1991

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 651

[Docket No. 90927-1123]

Northeast Multispecies Fishery

Correction

In proposed rule document 91-12638 beginning on page 24169, in the issue of Wednesday, May 29, 1991 make the following correction:

On the same page, in the third column, in the first paragraph, in the fourth line, after "then to" insert the following, "42°11.0'N. Latitude, 70°04.0'W. Longitude; then back to".

BILLING CODE 1505-01-D

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP91-1957-000, et al.]

El Paso Natural Gas Co. et al.; Natural Gas Certificate Filings

Correction

In notice document 91-12084 beginning on page 23562, in the issue of Wednesday, May 22, 1991, make the following corrections:

1. On page 23565, in the third column, the first Docket No. for entry number 11 should read "CP91-1958-000".

2. On page 23566, in the first column, the Docket No. for entry number 12 should read "CI87-910-003".

BILLING CODE 1505-01-D

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 62

RIN 3067-AB68

National Flood Insurance Program; Assistance to Private Sector Property Insurers

Correction

In proposed rule document 91-11642 beginning on page 22670 in the issue of Thursday, May 16, 1991, make the following corrections:

§ Appendix B to Part 62 [Corrected]

1. On page 22674, in the first column, in paragraph a., in the fifth line "62.23" should read "62.63".

2. On the same page, in the same paragraph, in the sixth line "62.63" should read "63.23".

BILLING CODE 1505-01-D

Federal Railroad Administration

49 CFR Part 240

Qualifications for Locomotive Engineers; Final Rule

VOL 56 ISS 118 JE 19 1991 UMI

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 240

[FRA Docket No. RSOR-9, Notice 5]

RIN 2130-AA51

Qualifications for Locomotive Engineers

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Final rule.

SUMMARY: FRA is establishing minimum qualifications for locomotive engineers. The rule requires railroads to have a formal process for evaluating prospective operators of locomotives and determining that they are competent before permitting them to operate a locomotive or train. The procedures would require that railroads (1) make a series of four determinations about a person's competency; (2) devise and adhere to an FRA-approved training program for locomotive engineers; and (3) employ standard methods for identifying qualified locomotive engineers and monitoring their performance. FRA is adopting this regulation to minimize the potentially grave risks posed when unqualified people operate trains.

DATES: *Effective Date:* The rule is effective on September 17, 1991.

OTHER DATES: (1) Compliance with the requirements for initially identifying supervisors of locomotive engineers and "grandfathered" certified engineers is authorized on and after the effective date and is mandatory for supervisors and locomotive engineers after October 31, 1991. Submission of programs adopted by individual railroads is mandatory by November 15, 1991 for Class I railroads; May 1, 1992 for Class II railroads; and November 1, 1992 for Class III railroads. Compliance with the requirements for the issuance of identification documents to all certified engineers is authorized on and after August 1, 1991 and is mandatory after December 31, 1991.

(2) Any petition for reconsideration of any portion of the rule must be submitted no later than 60 days after publication in the **Federal Register.**

(3) In a separate notice to be published shortly, FRA will announce the dates for conferences to be held in several cities for the purpose of acquainting the railroads, employees, and other interested parties with the requirements of the rule.

(4) Compliance with the record keeping and reporting requirements of this rule is authorized on or after the rule's effective date. See the Paperwork Reduction Act discussion below for additional information concerning mandatory compliance dates.

ADDRESSES: Any petition for reconsideration should be submitted to the Docket Clerk, Office of Chief Counsel, FRA, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Richard M. McCord, Regional Director for Safety, FRA, Chicago, Illinois (Telephone: 312-353-6203); or Lawrence I. Wagner, Trial Attorney, Office of Chief Counsel, FRA, 400 Seventh Street, SW., Washington, DC 20590 (Telephone: 202-366-0628); or Edward R. English, Director, Office of Safety Enforcement, Office of Safety, FRA, 400 Seventh Street, SW., Washington, DC 20590 (Telephone: 202-366-9252).

SUPPLEMENTARY INFORMATION: Prior to 1970, FRA lacked the legal authority to issue regulations concerning the qualifications of locomotive engineers. However, the Federal Railroad Safety Act of 1970 ("FRSA") (45 U.S.C. 421, 431 *et seq.*) granted FRA regulatory authority over "all areas of railroad safety" and signalled that authority to include employee "qualifications * * * specifically related to safety." At that time, FRA's accident data indicated that its first priority should be track and equipment safety. Since then the mix of accident causes has gradually shifted. Accidents resulting from failure in human performance, although declining in absolute numbers along with all rail accidents, have increased as a percentage of all accidents and become the dominant cause of serious accidents.

Prior to 1988, FRA's analysis of accident data had not indicated that the agency's regulatory priorities should include adoption of locomotive engineer qualification standards. Even if FRA's analysis had so indicated, until very recently, FRA lacked the necessary tools to effectively regulate in this area. However, with passage of the Rail Safety Improvement Act of 1988 ("RSIA") (Pub. L. 100-342, 102 Stat. 624), FRA acquired enforcement authority over individual railroad employees. That authority was a practical necessity for the establishment of an effective locomotive engineer licensing or certification program.

Section 4 of the RSIA, adopted in the wake of the Amtrak/Conrail accident at Chase, Maryland, directed that FRA adopt appropriate regulations concerning the qualifications of locomotive engineers. Congress thus determined the existence of a safety need for such requirements and required that certain subject areas be addressed within those regulations. Section 4(a) of the RSIA provides in pertinent part as follows:

> (l)(1) The Secretary shall, within 12 months after the date of the enactment of this subsection, issue such rules, regulations, orders, and standards as may be necessary to establish a program requiring the licensing or certification of any operator of a locomotive, including any locomotive engineer, after the expiration of 12 months following the establishment of such program.
>
> (2) The program established by the Secretary under paragraph (1)—
>
> (A) shall be implemented through review and approval of each railroad's operator qualification standards;
>
> (B) shall provide minimum training requirements;
>
> (C) shall require comprehensive knowledge of applicable railroad operating practices and operating rules;
>
> (D) shall, except as provided in paragraph (4), require the consideration, to the extent information is available, of the motor vehicle driving record of each individual seeking licensing or certification under such program, including—
>
> (i) any denial of a motor vehicle operator's license by a State for cause within the previous 5 years;
>
> (ii) any cancellation, revocation, or suspension of a motor vehicle operator's license by a State for cause within the previous 5 years; and
>
> (iii) any conviction within the previous 5 years of an offense described under section 205(a)(3) (A) or (B) of the National Driver Register Act of 1982, and may, based on such driving record require disqualification of an individual or the granting of a license or certification conditioned on such terms as the Secretary may prescribe; and
>
> (E) shall require any individual seeking a license or certification under this subsection to—
>
> (i) request the chief driver licensing official of each State in which such individual has within the previous 5 years held a motor vehicle operator's license to provide information to his or her employer or prospective employer, or to the Secretary, as the Secretary may determine, with respect to such individual's driving record; and
>
> (ii) make the request provided for in section 206(b)(5) of the National Driver Register Act of 1982 for information to be transmitted to his or her employer, prospective employer, or the Secretary, as the Secretary may determine. * * *

The remaining provisions of section 4 establish detailed constraints on the use of motor vehicle operator licensing data and make changes to the National Driver Register Act of 1982 to afford individuals access to motor vehicle operator licensing information.

Thus, Congress did not require that FRA assume direct responsibility for the daily implementation of qualification requirements, providing instead that the program could be based on either licensing or certification and that it "shall be implemented through review and approval of each railroad's operator qualification standards."

This final rule establishes requirements for (1) testing visual and aural acuity; (2) assessing training and knowledge and performance skills; and (3) evaluating past conduct. To minimize governmental intervention, FRA is adopting a certification process rather than a traditional government licensing system.

This final rule is not issued within the statutory deadline. Since enactment of the RSIA, FRA has conducted the ambitious regulatory program contemplated by that statute. The scope of that effort and the magnitude of the task involved in devising an appropriate qualification system for locomotive engineers made it impossible to meet the deadline. The number and the complexity of the issues in this proceeding required substantial time for both the NPRM and the final rule.

FRA's NPRM was published in the **Federal Register** on December 11, 1989 (54 FR 50890). Response to the NPRM from all segments of the railroad industry and the general public was extensive, generating in excess of 220 written comments and more than 1,000 pages of transcript reflecting testimony heard during very full days of public hearings. Virtually all commenters expressed negative views about one or more aspects of the proposal, and a number of commenters suggested that FRA withdraw this NPRM and then publish a significantly revised proposal. The nature and tone of many comments suggest significant misunderstanding of the proposal.

GENERAL SUMMARY OF THE COMMENTS

1. Issues of Terminology and Approach

Reaction to the NPRM

FRA's decision to employ the more expansive but unfamiliar term "locomotive operator" was misunderstood by nearly all commenters. FRA explained that use of the term "locomotive operator" was intended to communicate the application of the proposed rule to individuals identified by a wide range of job titles in the industry. However, some commenters perceived the term as denigrating the more traditional "locomotive engineer." In addition, many individual commenters believed that this rulemaking imposes undeserved "punishment" that is being imposed on all locomotive engineers for the aberrant behavior of a single person who caused the tragic accident at Chase, Maryland. Many commenters objected to the proposal as coming hard on the heels of other recently imposed burdens, such as random drug testing that may detect off-duty substance abuse and individual liability for civil penalties or disqualification (including a prohibition against tampering with locomotive safety devices).

FRA's decision to adopt a certification rather than a governmental licensing scheme generated additional confusion. Many commenters viewed FRA "certification" as unnecessary given existing railroad practices and as undue interference with management prerogative and with matters that rail management and labor have addressed in collective bargaining agreements. Commenters argued that FRA had a burden of proving that the existing system for qualifying engineers, which includes use of labor management agreements and long standing dispute resolution mechanisms, was deficient before FRA should disturb it. Many commenters did not perceive the difference between federally mandated qualifications standards and voluntary, collectively bargained arrangements which are subject to the Railway Labor Act ("RLA") (45 U.S.C. 151 *et seq.*).

In a traditional licensing scheme, a governmental agency is responsible for testing knowledge and performance skills; issuing licensing documents; revoking or suspending licenses; and processing reviews and appeals. Other issues, such as obtaining or retaining employment, seniority rights, or rates of pay, are not comprehended by the agency's licensing responsibility although the agency's decisions can have a direct impact on those job-related issues.

Apparently because FRA proposed a certification system rather than a traditional governmental licensing scheme, several commenters made inappropriate suggestions, for example, that FRA plan to bargain for testing conditions on individual railroads. One commenter, the Association of American Railroads (AAR), argued that no legal theory would support a conclusion that decisions by railroads to grant or withhold this "certificate" could ultimately become FRA's responsibility. Other commenters believed that FRA should not address topics already addressed in collective bargaining agreements and that FRA should have no regulatory provisions relating to "due process" considerations given the dispute resolution mechanisms of the RLA.

FRA's Response

FRA is electing to use the term "locomotive engineer," in which many commenters expressed pride, as urged by many commenters. Since there is some risk of confusion, FRA has included regulatory language to minimize that risk.

FRA also has decided to retain the "certification" option provided by the statute and not resort to a more traditional licensing scheme. FRA is opting for certification in large measure because it permits all parties to continue to rely on the promptness and efficiency of existing programmatic structures. These structures, which have evolved over many years on the individual railroads, have familiar procedures and are administered by experienced and knowledgeable personnel. Licensing, on the other hand, would generate a need to duplicate or replace, to some degree, the existing private sector system with a governmental system that might or might not operate with the same degree of promptness or economic efficiency. Creation of a governmental licensing system would also entail significant new agency costs that arguably would have to be shouldered by railroads under the user fees established by the Omnibus Budget Reconciliation Act of 1990 (sec. 10501, Pub. L. 101-508, 104 Stat. 1388). Perhaps because of such cost implications, few commenters urged that FRA substitute licensing for certification.

In a traditional governmental licensing scheme, such as those devised for the aviation and maritime industries, the licensing agency (a) sets criteria for eligibility; (b) evaluates candidates; (c) issues the necessary documents; (d) provides a system for assessing licensee performance; and (e) provides a mechanism for resolving disputes arising from decisions to deny or rescind licenses. The certification approach of this rule differs by making a railroad responsible for some of these functions. FRA is setting eligibility criteria but leaving it to railroads to evaluate candidates by those standards, affording railroads considerable latitude. Their discretion will extend to the design and administration of test and examination procedures. Railroads will be responsible for daily administration of the program, including issuance and retention of licenses. However, railroads will have limited authority to deny or revoke a person's certificate, and FRA will have responsibility for resolution of disputes arising from decisions to deny or rescind certificates.

FRA will exercise limited control in the daily administration of each railroad's program. Although the rule affords railroads considerable

VOL
56
ISS
118
JE
19
1991
UMI

discretion, FRA bears responsibility for the manner in which railroads exercise that discretion, since the performance of the railroads under this rule will determine whether its safety purposes are fulfilled. Until now, railroads and their employees could negotiate the terms of employment related to operation of a locomotive. This final rule signals a major change in the status quo. Determinations of qualifications must be accomplished under this rule, and the contractual consequences, if any, of those determinations must be sorted out separately. FRA's role will be to assure that the former are performed in compliance with the rule and to take appropriate remedial action if it detects noncompliance; however, it has no role with respect to the latter. (For example, FRA cannot order a railroad to alter its seniority rosters to accommodate a finding that a railroad wrongfully denied certification.)

This institutional arrangement is similar to those in other transportation modes where governmental bodies grant licenses to drive commercial trucks, fly commercial aircraft, or command commercial vessels. Those governmental actions are then givens that must be accommodated by employment contracts.

2. Appropriateness of the Approach

Reaction to the NPRM

Many commenters argued that FRA's proposal was unduly intrusive into the routine management of railroads and carried staggering cost implications. A common theme found in many of the comments was that FRA had failed to demonstrate a need for many aspects of the proposal. For example, many commenters argued that FRA failed to demonstrate a need to regulate the initial training of engineers, noting that FRA failed to cite accidents clearly attributable to specific weaknesses in existing training practices. Where commenters conceded the need to address a particular issue, they often viewed FRA's choice of remedy as unwise, *e.g.*, an overly simplified response to a complex situation, unwarranted constraint to future innovation, or unduly expensive.

FRA's Response

Questions about the need for, and kind of, Federal regulation are appropriate. Railroads have made unprecedented improvements in the safety of their operations in recent years. For example, since 1979 overall accident rates have declined 62.8 percent; track and equipment-related accidents have declined 75.2 percent; and on-duty fatalities for rail employees have declined 43.8 percent. No other mode of transportation approached this record of improvement during these years. Additional safety regulations will have economic consequences, and railroads are legitimately concerned about effects that additional costs can have on the industry's ability to compete for a share of the transportation market.

FRA understands these concerns; however, FRA's discretion in this proceeding is circumscribed by the Congressional determination that additional regulations are needed. As a result, this proceeding has deviated from FRA's usual regulatory practice. Normally, FRA commences with an analysis of accident data that defines a particular safety problem. FRA then reviews the options for solving that problem, and only when it is convinced that Federal rules are needed does FRA contemplate and devise a carefully focused regulatory solution. In devising that solution, FRA attempts to find the regulatory response that will produce an optimal ratio of benefits from the rule to costs associated with compliance. In this proceeding, however, FRA is constrained by the dictates of the RSIA: FRA must (i) approve the qualifications standards set by railroads for engineers; (ii) prescribe minimum training requirements; (iii) require comprehensive knowledge of relevant operating procedures; and (iv) provide for consideration of motor vehicle driving records. As required, FRA's proposal addressed these issues, but did not go beyond them.

FRA's consideration of these issues has benefited greatly from the comments made directly during this proceeding. FRA's overall design for the final rule and its particular provisions have been modified accordingly. In drafting this final rule, FRA has sought to simplify the proposal, avoid constraints to innovation, and promote a positive cost/benefit ratio.

3. Need for a Revised Structure

Reaction to the NPRM

Many commenters suggested that FRA issue a significantly revised proposal, expressing concern about the difficulty of responding to such a complicated proposal to which they objected in one or more ways.

FRA's Response

After reviewing all the comments, FRA has concluded that the NPRM identified all relevant substantive issues and the alternatives available for addressing them; therefore, FRA can in this final rule effectively address the legitimate problems and weaknesses found in the proposal, including those identified by the commenters. None of the comments challenge FRA's safety goals, raises previously unidentified problems, or provides previously unidentified and feasible alternative regulatory approaches to establishing qualification standards. Although it can be argued that a new NPRM could be of some benefit, FRA does not believe that further delay is warranted.

Design of the Final Rule

1. The Concept

A premise of FRA's proposed rule was that every engineer would be trained, tested, and evaluated using the same criteria, with some exceptions for operators of smaller trains at lower speeds. These criteria were distilled from FRA reviews of existing individual railroad programs for setting qualification standards. Rather than make a case-by-case evaluation and approval of individual railroad qualification systems, FRA proposed a general review and approval process. FRA's proposed rule design resembled the motor vehicle licensing scheme employed by state governments for issuance of commercial truck driver licenses.

In contrast to the proposed rule, the final rule takes a more individual approach that tracks the statutory language, *i.e.*, each railroad will formulate an individual program for setting qualifications standards and submit that program to FRA for approval. In formulating its program, each railroad will address specified subject areas while conforming to FRA-established criteria. Each engineer will then be evaluated in terms of meeting the qualification criteria thus established for each subject area.

2. The Regulatory Structure

FRA has reorganized the final rule to reflect this shift, resulting in five subparts rather than the ten found in the proposal. Three of the five subparts contain the major substantive provisions of the rule. One of these subparts provides the elements and the criteria for formulating an individual program concerning each of the subject areas. Another subpart provides for the process of implementing both the overall regulatory program and each of the individual railroad programs subsequent to their approval by FRA. A third subpart provides for the ongoing administration of the railroad programs.

3. Components of a Railroad's Program

FRA is requiring that each railroad adopt its own program for determining the qualifications of its engineers. That program must address the following subjects: (1) Selection of designated supervisors of locomotive engineers; (2) selection of the classes of service for engineers; (3) evaluation of the safety conduct of engineers; (4) evaluation of engineer hearing and visual acuity; (5) education of engineers; (6) testing of engineers; (7) operational monitoring of engineers; and (8) procedural aspects of the operation of the certification program. Each railroad will submit its program to FRA for approval. After approval, the railroad will evaluate every person the railroad wants to authorize to operate a locomotive and determine whether each person meets the qualification requirements to be a locomotive engineer on that railroad. If the railroad determines that the person meets the qualifications for a locomotive engineer, the railroad will certify that person as qualified and issue a certificate documenting that determination.

4. Reasons for Changing the Concept

FRA's proposed rule focused on the common denominators that exist for all railroads and all locomotive engineers. It proposed a qualification system that organized the certification process around the similarities that exist among railroads. FRA proposed gradations in the system only where there appeared to be a major difference that would form a logical basis for distinguishing between the qualifications needed to operate trains of given size and operational complexity. However, commenters repeatedly stressed the individuality of railroads and suggested a better approach to be to sanction individualized solutions on each railroad. Finding these views persuasive, FRA has reoriented its approach in the final rule to permit each railroad to retain its existing program, while bringing it into conformity with a federally established norm. This approach will allow individual programs to differ somewhat as appropriate, yet still result in consistent qualification standards for all railroads.

FRA discusses below the comments received in response to the NPRM, organized in the structure of the final rule. A brief synopsis of the relevant portion of the proposal precedes the discussion.

Requirements of the Final Rule

1. Designated Supervisors of Locomotive Engineers

FRA proposed that railroads be required to use a particular type of person, a designated supervisor of locomotive engineers, to make decisions about the performance skills of locomotive engineers. In FRA's judgment, it is difficult for anyone to evaluate those skills without having had substantial experience as a locomotive engineer; accordingly, FRA proposed that these designated supervisors have a minimum of three years of such experience. Commenters criticized this proposal on three grounds: (1) It failed to give sufficient recognition to the fact that simulator technology could play a very useful role in evaluating performance skills under the proper circumstances; (2) it constrained and might even prevent small railroads from using consultants to perform this function; and (3) it posed an unnecessary hardship for large railroads that had been restructuring their work forces.

In response, FRA has deleted the requirement of three years experience, requiring, instead, that railroads have a specific procedure for evaluating those it is considering designating as a supervisor of locomotive engineers. At a minimum, the procedure shall provide a mechanism by which the candidate for designation will demonstrate to the railroad that he or she has the requisite knowledge to perform this function and adequate supervisory experience both to evaluate a locomotive engineer's skills and, where necessary, to prescribe appropriate remedial actions to correct detected deficiencies. Railroads will have the freedom to use existing procedures, such as selecting experienced senior locomotive engineers with supervisory experience, and the power to create trainee programs that substitute training for experience. Since the procedure can be applied to consultants, small railroads lacking the resources to have a designated supervisor as part of its permanent staff can more easily comply with this regulation.

2. Classes of Service

FRA proposed to divide locomotive engineers into five categories corresponding to gradations of proficiency at handling trains of varying degrees of difficulty, addressing such factors as the number, nature, and placement of cars, the speed of the train, and the effect of terrain on train operation.

Commenters criticized the various category thresholds proposed by FRA. In general, commenters suggested changes that reflected the particular operations on their individual railroads, often urging a reduction in the level of training needed for particular classes of service.

In response, FRA is establishing three classes of service in the final rule: Student engineers, locomotive servicing engineers, and train service engineers. Railroads can use one or all of these classes of service. A railroad that does not have much occasion to move locomotives that are not hauling cars may not want to have locomotive servicing engineers as a class of service on that railroad. Likewise, a railroad that will not have occasion to educate student engineers may not have that class of service.

3. Safety Conduct of Engineers

FRA proposed a system for reviewing the prior safety record of persons seeking certification as a qualified locomotive engineer. Under that proposal, a railroad would have been required to review information concerning both the safety conduct of that person as a railroad employee and as a driver of motor vehicles. Specified types of poor safety conduct while driving a motor vehicle and while operating a locomotive were identified and assigned point values. To be eligible for certification, a person's total accumulated points from incidents in all contexts could not exceed a stated numerical value. Virtually every commenter objected to this scheme, maintaining that consideration of railroad employee conduct in this context is redundant, since railroads already consider it.

Commenters argued that FRA should avoid the motor vehicle issue altogether, asserting the irrelevance of motor vehicle driving data to the qualifications of locomotive engineers. However, Congress found otherwise, requiring in section 4 of the RSIA that consideration of such information be made part of this rule. The statute thus rendered moot further debate of this issue.

(a) Availability of Data

(1) *Motor Vehicle Operation.* Even those commenters who recognized the statutory mandate criticized FRA's proposal, some arguing that FRA had gone too far and others saying not far enough. Some commenters invoked the legal concepts of *ex post facto* laws and double jeopardy, while others decried the lack of a provision for remedial efforts such as attendance at driver

VOL
56
ISS
118
JE
19
1991
UMI

education programs. Others noted that some individuals who use public transportation have no motor vehicle driving record, while still others objected to the weighting of various events under the proposed point system and expressed fear that inequitable enforcement of motor vehicle laws could result in loss of employment.

Many commenters suggested that FRA conduct a study to gain some better insight into the relationship between motor vehicle record data and railroad train operation data before taking final regulatory action. During the public hearings and in written comments, a number of railroads and representatives of several labor organizations indicated they would be willing to assist in the conduct of such a study. Such willingness was predicated on the study being conducted in a scientifically valid manner that respected the privacy of individuals who would provide access to the records being studied.

FRA agrees and has decided to defer most aspects of its proposed eligibility criteria predicated on motor vehicle driver data until completion of such a study, which FRA anticipates can be completed within one year. After completion, FRA will then determine the appropriate course of action.

This decision does not, however, apply to the aspect of FRA's proposal concerning motor vehicle data involving alcohol and drug incidents. Most commenters acknowledged that driving under the influence of alcohol or drugs could be relevant to a person's qualification to be an engineer. Consequently, FRA has retained the portion of the proposed rule that requires evaluation of motor vehicle incidents involving alcohol or drugs. As discussed below, FRA's requirements concerning this data have been modified from those initially proposed.

(2) *Train operation.* FRA has been acquiring data on the causes of train accidents for many years. Railroads have been required since 1975 to report rail equipment accidents and incidents that exceed a dollar threshold set forth in its regulations (49 CFR part 225). Except for revisions to this threshold, FRA's accident reporting requirements have remained essentially the same for many years.

As part of those reporting requirements, railroads must use one of the cause codes listed in the "FRA Guide for Preparing Accident/Incident Reports" to indicate what the railroad has determined to be the cause of each reportable accident. An extensive list of cause codes is provided to segregate accident data into relevant analytic groupings. FRA looked at twenty of those cause codes that reflect poor safety performance by a locomotive engineer. FRA identified 6,990 train accidents during the period 1977–1987 that were reported as attributable in whole or in part to one of those cause codes. Those cause codes indicate instances in which a locomotive engineer failed to properly use the train's brake systems, failed to control train speed, failed to obey signal indications, entered track without authority, or failed to operate the train safely in a variety of other ways.

Among the more notable of these accidents were the following: The train handling derailment at Thayer, Iowa on October 17, 1985; the overspeed derailments at Sanataria Springs, New York on March 22, 1985, Crooks, Oregon on November 25, 1985, and Pittsburgh, Pennsylvania on April 11, 1987; the collisions resulting from failures to obey signal indications at Palmer Lake, Colorado on May 27, 1983, Montello, Nevada on June 22, 1985, Lockair, Georgia on November 6, 1985, Bunnell, Florida on April 11, 1987, and Nugget, Wyoming on November 8, 1987; the unauthorized track occupancy collision at Broomfield, Colorado on August 2, 1985; the improper train operation collisions at Eldon, Texas on November 19, 1983, and Marquette, Iowa on February 2, 1985; and of course the multiple failures at Chase, Maryland.

Given the events that preceded the enactment of the RSIA, the kind of accident data just summarized, and FRA's basic safety mission, FRA must address the safety conduct of those seeking certification as a locomotive engineer.

As noted in the NPRM, detailed analysis of the data concerning those nearly 7,000 accidents is difficult, since FRA lacks specific information for each one. Thus, although the cause codes are helpful, the locomotive engineers' actions could have a wide variety of explanations.

FRA has acted to reduce this problem in the future by revising its procedures for investigating train accidents and by amending its accident reporting rules to provide railroad employees, including locomotive engineers, with a mechanism for supplementing the information being furnished FRA (55 FR 37818). Since December 1, 1990, when a railroad characterizes an accident as having been caused in whole or in part by the act, omission, or physical condition of an engineer, the railroad must notify the engineer of that fact and of his or her right to submit a statement to FRA to supplement the railroad's report. A copy of that statement must also go to the railroad and, if the railroad receives such a statement, the railroad must correct any deficiencies in its report to FRA.

(b) Conclusions Based on the Data

FRA believes that the poor safety performance by locomotive engineers reflected in the accidents data it studied stemmed from either some lack of or failure to employ knowledge, skill, or ability.

The provisions in this final rule concerning the training and testing of locomotive engineers respond to the first problem. By requiring that engineers be trained and that they demonstrate their knowledge, skill, and ability, this rule should reduce the number of accidents attributable to this deficiency. FRA's intent is to prevent recurrence of such accidents as the head-on collision at Randles, Missouri in 1982, the derailment at Missouri Valley, Iowa in 1980, the derailment at Crestview, Florida in 1979, and the head-on collision at Lake Point, Utah in 1977.

Failures to apply acquired knowledge, skill, or ability in a specific situation arise from distortions in engineer judgment, generally induced by abuse of alcohol or drugs, stress and fatigue, or lack of routine vigilance.

(1) *Alcohol and drug abuse.* In 1985 FRA issued its rule on the control of alcohol and drug use by rail workers (49 CFR Part 219), which prohibits possession and/or use of alcohol and controlled substances when assigned to perform service covered by the Hours of Service Act. In addition, the rule prohibits reporting for, going on, or remaining on duty while under the influence of or impaired by alcohol or a controlled substance. In response to the RSIA, FRA has included provisions in this final rule requiring consideration of instances of operation of a motor vehicle while under the influence of or impaired by alcohol or a controlled substance.

(2) *Stress and fatigue.* For several reasons, FRA is not addressing accidents that arguably arise from stress and fatigue. First, the hours that railroad employees may be on duty are controlled by the Hours of Service Act (45 U.S.C. 61–64b), which does not give FRA authority to prescribe through regulation the appropriate tour of duty limitations or rest intervals for locomotive engineers. In 1990, the Department submitted proposed legislation that would have given FRA regulatory authority over this area.

Even if FRA had such authority, it now lacks sufficient information to appropriately regulate the hours of duty of locomotive engineers. Accordingly, FRA is conducting research to gain more understanding of sleep deficiency problems for rail workers. Building on efforts of other modal administrations, FRA is designing methods for scientifically testing the degradation in locomotive engineer performance and vigilance due to fatigue. Once effective tests are devised, they will permit FRA to use locomotive simulators to effectively measure skill performance degradation under varying levels of fatigue.

FRA is also studying the issue of how the work schedules of locomotive engineers are determined. Since there is very little documentation on this subject, this study seeks to determine how locomotive engineers are currently being scheduled for work, why there is so much unpredictability in those schedules, how various aspects of current practices contribute to stress and fatigue, and what options exist to improve matters. After such studies have been completed, FRA will consider whether to address this issue in an amendment to this rule.

(3) *Lack of routine vigilance.* Although some accidents can be attributed to fatigue and improper use of controlled substances, others are caused by a lack of routine vigilance by locomotive engineers. By requiring that engineers be periodically monitored and provided remedial training when appropriate, this rule should help reduce such accidents. FRA rejects commenter suggestions that this rule be silent on the issue of poor safety conduct by locomotive engineers.

(c) The Final Rule's Provisions on Safety Conduct

This final rule requires that each railroad adopt procedures for reviewing and evaluating the safety record of each candidate to determine whether he or she is eligible to be a certified locomotive engineer. The procedures shall include evaluation of information concerning the person's prior safety conduct as a railroad employee and the person's prior safety conduct as an operator of a motor vehicle. To the extent that the candidate controls access to the information that will form the basis of the evaluation, FRA is imposing a duty on the candidate to furnish that information or access to that information to the railroad.

FRA is modifying its proposal significantly. As previously noted, one change involves deferring a decision concerning the use of non-alcohol and drug related motor vehicle licensing information. FRA has also made changes to respond to commenter concern that FRA's proposal could be implemented in a manner that would not be in harmony with FRA's existing rules for controlling substance abuse by railroad workers. In view of several factors, including the decision to defer implementation of some aspects of the motor vehicle operator data pending completion of a study and the need for better integration of its alcohol and drug rules, FRA has decided not to employ the specific point system proposed in the NPRM.

The risk posed by misuse of alcohol and drugs appears in two distinct forms: (1) Substance abuse disorders that are illnesses; and (2) specific instances of inappropriate conduct, such as prohibited use or possession of alcohol or drugs on the job or operation of motor vehicles under their influence, that may suggest a proclivity for reckless conduct in the future. For any given period of time, one form of risk may exist without the other as to any individual. For instance, an employee may use marijuana on the job without having a chemical dependency; or a person who is in an incipient stage of cocaine dependency may manage to resist using the drug while on the job and function normally for a time, until the disordering effects of the drug lead to an unsafe practice. Both forms of risk must be addressed; and, with respect to specific instances of conduct, it may be pertinent whether the conduct occurred within the regulated occupational context.

(1) *Substance abuse disorders.* Whenever a safety-sensitive employee acquires a substance abuse disorder, the risk increases significantly that the physical or psychological dependence, and loss of control often associated with such disorders, will lead the person to appear on the job significantly impaired. Impairment may result from the acute, chronic, or withdrawal effects of the drug (including, for this purpose, alcohol). See, *e.g.*, 53 FR 16640, 16641–16644 (May 10, 1988). Though many who are in the process of developing a chemical dependency will resist use of drugs in the work environment in order to avoid detection and protect their source of income, in the later stages of the disorder this will often prove impossible. Even if drugs are not actually ingested on the job, their effects may be substantial.

Having a substance abuse disorder is not "conduct" properly punishable under any scheme of regulation. A substance abuse disorder may be acquired without violating any law (*e.g.*, alcoholism) and even as a result of misguided medical treatment. However, this status does render the individual unsuitable for safety-sensitive responsibilities during the period the disorder is active (*i.e.*, while drug intake continues and until post-cessation symptoms have been treated). This is a principle that is already embodied in a variety of Federal regulations analogous to this final rule. See, *e.g.*, 49 CFR 391.41 (motor carrier drivers); 14 CFR 67.13 (pilots).

FRA has previously required successful treatment of substance abuse disorders prior to return to service, where chemical tests indicate violation of alcohol or drug use prohibitions and in certain other circumstances. 49 CFR 219.104(d), 219.405. In providing for certification of engineers pursuant to the mandate of the statute, FRA bears a special responsibility to ensure, to the extent practical through regulatory action, that these individuals are free of active substance abuse disorders. The final rule therefore treats an active substance abuse disorder as a condition rendering the person ineligible to hold a certificate. Following successful completion of primary treatment, the individual is entitled to conditional certification. Where the individual self-refers without prompting under the voluntary referral provision of the FRA alcohol/drug regulations (49 CFR 219.403), confidentiality is maintained and there is no effect on certification status provided the engineer follows through with the recommended course of treatment.

(2) *Motor vehicle data.* Information concerning the non-occupational conduct of the candidate for certification, such as that required to be provided with respect to motor vehicle driving history, has possible significance both with respect to the presence of a substance abuse disorder and with respect to a habit or unpredictable pattern of reckless or irresponsible behavior that may carry over into railroad duties. As explained above, FRA has determined that the weight such information should be given as "unsafe conduct" will be the subject of further study.

However, information such as convictions for drunk or drugged driving also raises the question whether the individual has an active substance abuse disorder. This question may be rather urgent, as in the case of an employee who has been convicted twice in the recent past in incidents involving extremely high blood alcohol concentrations. At the other extreme, the information may be consistent with a single incident almost three years prior involving a somewhat lower level of alcohol. The important point is that the information should be considered, along with the railroad service record (attendance, job-related problems, medical problems, etc.), in the context of

VOL 56 ISS 118 JE 19 1991 UMI

a clinical evaluation of the employee by an appropriate professional.

Accordingly, the rule provides that any conviction for a specified alcohol/drug offense that occurs during the 36-month period prior to certification will result in an evaluation by an "EAP Counselor" to determine whether the person has an active substance abuse disorder. In this setting, the motor vehicle information is merely a factor to be considered and does not, by itself, dictate any outcome.

(3) *Role of the EAP counselor.* The "EAP Counselor" is a concept derived from the FRA alcohol/drug rule (49 CFR part 219) and refers to an appropriate professional who will be responsible for conducting the evaluation and (in words suggested by a commenter) "managing an appropriate treatment plan." As a practical matter, most large railroad systems will likely employ their salaried or contract employee assistance program (EAP) counselors to perform this function. These individuals have extensive experience in evaluating employee substance abuse problems, referring those individuals for appropriate treatment, and monitoring progress after return to service. Their extensive clinical experience and knowledge of the railroad occupational environment make employee assistance counselors a major asset that must be utilized for substance abuse case management. However, any qualified person, such as a physician with knowledge and experience in the field of substance abuse disorders (*e.g.*, a Medical Review Officer), a certified alcohol/drug counselor working in the community, a psychologist with experience in treating substance abuse disorders, etc., could perform the "EAP Counselor" function with respect to evaluation of the substance abuse disorder. It is intended that the EAP Counselor be able to draw upon the usual sources of assistance for this purpose from the health care and mental health communities. Similarly, a qualified person who is reasonably familiar with the particular railroad occupational environment should be capable of managing aftercare.

Certain commenters in this proceeding suggested that FRA should require certification of EAP counselors for this purpose. FRA recognizes that occupational substance abuse professionals providing services to the railroads are drawn from a wide range of backgrounds and differ in education, experience, and formal credentials. FRA believes that it should be the railroad's responsibility to identify and employ (or contract with) appropriately qualified persons to perform this function, taking into consideration any applicable state requirements. This may mean that the person designated as EAP counselor will need to draw upon diagnoses from other professionals in making a final evaluation; or, with respect to a particular case or category of cases, the function itself may need to be transferred to an appropriate professional with specialized knowledge concerning the particular disorder.

FRA does not believe it is the role of a safety regulatory agency to govern provision of these services through a specialized credentialing system. Given the increasing reliance on contract services in the railroad industry and the number of regional and short line railroads that must obtain these services from local contract sources, it does not appear practical to insist on creation of a new substance abuse specialty within the several health care and mental health fields that provide these services. However, FRA is contributing to the augmentation of employee assistance personnel skills in the railroad industry by sponsoring the development of a flexible curriculum model for EAP personnel serving the railroad industry. This effort, which will be founded on a counselor curriculum developed by the National Institute on Drug Abuse, is intended to supplement the extensive educational and training opportunities available from other sources and to provide a bench mark that railroads can employ in providing supplemental and continuing training for salaried personnel and contract personnel who handle railroad employee referrals.

(d) Misuse of Alcohol and Controlled Substances as Conduct

Quite apart from the presence or absence of an active substance abuse disorder, it is critical both to the success of substance abuse prevention and treatment and to the safety of railroad operations that safety-critical personnel be held accountable for the prohibited use of alcohol and controlled substances.

Section 219.101 of current FRA regulations prohibits engineers and other Hours of Service employees from going or remaining on duty while using, possessing, or being under the influence of or impaired by alcohol or a controlled substance or while having a blood alcohol concentration of .04% or more. Section 219.102 prohibits the same individuals from using a controlled substance without specific medical authorization, whether on or off duty. FRA has previously left to the railroads the responsibility for assessing discipline based on violations of these regulations, subject to minimum standards for evaluation, testing and return to service (§ 219.104(d)). This flexibility has generally permitted employers to fashion appropriate responses within the overall employment context, including labor agreements and cooperative programs that seek to involve employees in substance abuse prevention (*e.g.*, Operation Red Block, Operation Stop). However, this flexibility has also led to a wide range of employer responses to individual cases and carries the risk of permitting individual arbitrators to impose a wide range of sanctions. Further, it may be possible for a person dismissed from one railroad to go to work in a similar position with a second railroad. Accordingly, with the onset of Federally-mandated certification of locomotive engineers, it will be important to establish standards for revocation of certificates—without prejudice to the ability of railroad management to impose more severe discipline.

It is useful to re-emphasize for purposes of this discussion that the revocation periods provided in the final rules are minimum periods for revocation of the locomotive engineer certificate. However, holding a certificate does not create an entitlement to employment as an engineer—it merely establishes eligibility to perform certain duties insofar as the Federal regulations are concerned. An employee may be eligible under the regulations, but unqualified under a more stringent company policy. If the employee is unqualified under company policy and the company therefore elects not to consider an application for certification or recertification under the Federal rule (*i.e.*, since any certificate action would have no practical meaning), then it will be critical for the company to clearly state that company policy is the basis of its action.

This final rule includes specific standards for revocation periods that are intended to ensure adequate minimum sanctions without disrupting other countermeasures currently in place. In general, first-time violators of § 219.102 (prohibited use of controlled substances) would be handled in the same manner required in the FRA alcohol/drug regulations. Subsequent violations would require specific revocation periods. First-time violators of § 219.101 (on-duty use, possession, impairment, BAC .04% or more) would be subject to revocation for 9 months, the same period employed in the alcohol/drug rule for refusal of an FRA mandated chemical test. Those standards are discussed more fully in the section-by-section analysis below.

(5) *Unsafe operation of trains.* Commenters objected to the proposal to hold engineers accountable for unsafe operation of trains, arguing that such a rule would be redundant given the railroads' existing disciplinary system or that, if promulgated, such authority should only rarely be exercised. Several of the Class I railroads argued that FRA has a duty under section 202 of the FRSA to prove that the existing private system for responding to unsafe train operation behavior is flawed before FRA has the legal authority to intervene. They also argued that, even if FRA has the authority, as a matter of policy it should not intervene given the likely complication and confusion that would result. Some commenters expressed concern that the proposal made inadequate allowance for remedial actions and prescribed unduly harsh consequences for unsafe behavior.

A premise of the comments was that the existing system effectively responds to unsafe operation of trains. As noted in the NPRM, FRA has found little evidence supporting or negating that proposition. As FRA's routine investigatory efforts, anecdotal information, commenter responses, and industry literature indicate, administration of the current system is not uniform, *i.e.*, industry handling of alcohol and drug incidents leads to a wide range of responses to similar cases.

FRA recognizes that devising a comprehensive means of responding to operational misconduct by locomotive engineers would require extensive additional study. However, as indicated in the NPRM, FRA data show that noncompliance with five types of railroad operating rules generated a significant portion (more than 5,000) of the 6,990 train accidents described above. The five types of rules are those: (1) Requiring adherence to signal indications; (2) limiting train speed; (3) prescribing operation of the train and engine brake system so as to safely control train operation; (4) prohibiting occupying a track without authority; and (5) prohibiting the unauthorized nullification of locomotive-mounted safety devices.

Given their accident-causing potential, FRA has selected these five kinds of misconduct as requiring attention under this certification program. As noted earlier, FRA's proposed point system was criticized by commenters as faulty. FRA agrees and has amended that approach in this final rule.

FRA's response to unsafe operational conduct by locomotive engineers rests on several policy considerations. First is the need to incorporate sanctions to deter future unsafe conduct. At the same time, we need to account for the fact that unsafe conduct may represent a rare lapse of judgment or may demonstrate a need for supplemental training. As pointed out by commenters, FRA's rule also needs to avoid conflict with its existing rules controlling alcohol and drug use by locomotive engineers. Finally, FRA's rule must recognize the railroads' primary role in detecting the evidence of unsafe conduct, assessing its adequacy, and pursuing appropriate action.

Under the revised approach adopted in this final rule, a railroad's finding that an engineer has failed to comply with one of the five types of safety rules will have two consequences: (1) Revocation of the engineer's certificate for 30 days; and (2) initiation of a probationary period of three to five years during which the engineer will suffer increasingly severe sanctions in the event of additional rules violations. If a second event occurs within three years, the period of mandatory revocation will increase to one year. If a third event occurs within five years, the revocation period increases to five years. After three years with no additional rules violations, a second incident would not result in the one-year revocation. However, that second incident would start a new three-year period within which a second incident would generate a one-year revocation. Moreover, both events would be relevant if a third incident occurs within five years of the first.

FRA has also revised its proposal to mandate responses to alcohol and drug incidents of on-duty possession, use, and impairment. These responses are integrated into the unsafe conduct provisions just described and are fully consistent with FRA's current rules concerning the control of alcohol and drug use by railroad workers.

The revocation periods in this rule have been set so as not to cause unduly harsh punishment in the routine administration of this rule. FRA recognizes that punishment may not always be an appropriate response to the types of conduct addressed in this rule. Particularly flagrant noncompliance, especially that which produces severe consequences, may warrant very serious sanction. Of course, where violations of Federal rules have occurred, FRA may assess civil penalties or disqualify employees from safety-sensitive service. These issues are discussed more extensively in the section-by-section analysis below.

4. Evaluation of Engineer Hearing and Visual Acuity

FRA proposed hearing and visual acuity testing based on standards similar to those found in other transportation modes, published FRA research, and recommended industry guidelines.

Commenters raised four objections to FRA's proposal. As with other aspects of the NPRM, some commenters argued for no action on this subject because of existing practices on a given railroad or group of railroads. Others suggested different acuity standards. Still others urged discretion to permit individualized assessments of acuity. Finally, some commenters wanted greater freedom in selecting ways to accomplish FRA's stated goals. Discussion of this last issue is deferred to the section-by-section analysis below.

FRA has rejected the suggestion that this rule remain silent on the question of physical capacity. As explained in the NPRM, this regulation needs to address a person's physical capacity to serve as an engineer. The absence of reliable scientific data supporting commenter-suggested substitute acuity thresholds means we have no basis for altering those proposed. However, several commenters did provide evidence that supports affording railroads more discretion.

FRA's proposed rule contemplated that there would be few instances of failure to meet the criteria and that in those few cases most candidates could otherwise demonstrate an ability to safely perform as a locomotive engineer. Thus, FRA believed the agency could directly resolve the matter through its own waiver process. Commenters indicate that more than a few instances exist. For example, several commenters cited a number of individuals with only one functioning eye who have learned to adjust for the resulting loss of depth perception and can safely operate locomotives. Commenters from the medical community agreed with FRA's basic theory that individualized evaluations were needed in instances where a person's acuity levels were below the stated minimum, but urged that FRA afford railroads discretion to make those medical judgments. After review of the comments, FRA has decided to afford railroads such discretion in this final rule. Medical discretion will allow railroads to respond appropriately when they encounter individuals who fail to meet the FRA-prescribed acuity levels, but

VOL
56
ISS
118
JE
19
1991
UMI

demonstrate that they can compensate to a sufficient degree for their diminished acuity level.

If in the professional judgment of the railroad's medical officer a person not meeting FRA standards can safely perform the tasks of a locomotive engineer on that railroad, the railroad is authorized to certify that person as a locomotive engineer. The medical officer can, if necessary, impose conditions on the service that person is permitted to perform. Although not raised by commenters, FRA's revised approach to this issue is consistent with the spirit of the recently enacted Americans with Disabilities Act (Pub. L. No. 101–336, 104 Stat. 329 (1990)).

FRA received a number of comments about a perceived unfairness of the proposed rule concerning its contemplated requirement for hearing acuity. Several commenters asserted that there has been serious degradation in the hearing acuity of engineers resulting from exposure to high noise levels in locomotives cabs. FRA is portrayed in these comments as having failed to correct this situation and thus as being responsible to some degree for creating potentially disqualifying hearing impairment of people seeking to be certified. This generated a demand that FRA defer action on hearing acuity until it acts to lower the noise levels found in locomotive cabs.

However, FRA does have noise standards for locomotive cabs (see 49 CFR 229.121). The permissible noise exposure levels are consistent with those formulated by the Occupational Safety and Health Administration (OSHA) and have been in effect for more than ten years. The issue of hearing degradation attributable to cab noise levels was extensively discussed and resolved in the regulatory proceedings that led to the adoption of those standards. To date no party has provided a valid basis for suggesting that FRA should alter those noise exposure thresholds. Thus, FRA does not agree that it should defer action until it lowers exposure levels. Moreover, as pointed out in the proposed rule, there is a need to ensure that engineers have the appropriate level of hearing so that they can safely operate trains. Those who want more information on this topic are referred to FRA's final rule published on March 31, 1980 (45 FR 21092).

Commenter concern over these issues has led FRA to conclude that the agency should sponsor a technical conference on the acuity standards being adopted in this rule. Notice of that conference will be provided in the **Federal Register**.

5. Education of Locomotive Engineers

FRA proposed to regulate both the initial training of persons new to locomotive operation and the continuing education of experienced engineers. FRA proposed detailed rules for initial training and more limited, but no less controversial, rules for continuing education.

A number of commenters objected to the detailed requirements for railroads' initial training programs in the proposal. Small railroads were concerned about the apparent cost of compliance. Comments on the proposed continuing education requirement were critical of the provisions relating to maintaining familiarity with the physical characteristics of the territory. Some commenters saw FRA as unduly restrictive by requiring actual train operation over the territory. Others saw the number of trips specified as too few or too many depending on the physical configuration of the territory. These provisions were generally viewed as too costly.

In response to the comments, FRA has changed the proposed rule to allow railroads greater discretion to design their own course of study for the initial training of locomotive engineers, specifying only the general subject matter to be covered. The final rule will thus accommodate those railroads already developing new programs, *e.g.*, using computer-based training techniques or advanced train control systems that will change the knowledge and skill required of engineers. Smaller railroads will also be afforded the latitude to tailor their programs to meet their more limited needs.

Similar changes providing significant discretion have been made with respect to continuing education of engineers. To assure engineer familiarity with a territory, railroads will have the freedom to select the interval at which familiarization must be provided and the authority to use a variety of methods (*e.g.*, hi-rail trips, simulators, and films of the right of way) to keep their engineers conversant with the physical characteristics of the territory they can be called to operate over.

In reviewing the railroads' individual programs, FRA will consider the degree to which each deviates from the norms established by this final rule. Where a program deviates materially, FRA will focus on the rationale for the alternative approach and evaluate the degree to which that approach is likely to produce locomotive engineers with the knowledge, skill, and ability to safely operate trains.

6. Knowledge and Skill Testing of Locomotive Engineers

FRA proposed requiring periodic knowledge and skill performance testing of locomotive engineers. The proposal prescribed the subject matter to be covered, the manner of administering the test, and the consequences of failure.

Some commenters viewed these requirements as redundant, given existing railroad operating rules examinations. Commenters objecting to FRA's limitations on the manner for administering the knowledge test took exception to the number of questions criteria, to the passing score requirements, and to taking written tests without reference materials available. Commenters objecting to FRA's skill performance test were concerned about the consequences of failure.

The concern about redundancy appears to rest on an assumption that the FRA knowledge tests would add yet another tier of examinations to existing periodic rules testing. However, FRA does not anticipate a new tier of tests; instead, FRA expects that railroads will modify their existing periodic rules examinations to include the subject matter specified by FRA to the extent those subjects are not covered by existing tests.

Other commenter criticisms are well taken. FRA agrees that there is no particular value in employing a 150-question test rather than a test with 300 or 100 questions. Similarly, no compelling rationale supports setting 85 percent as the passing grade. There is, however, substantial value in requiring that written objective testing be conducted and that tests be conducted without immediate access to reference materials. Engineers must have effective reading skills to comprehend the myriad written instructions they are given to ensure the safe operation of trains. Tests must be conducted fairly and be reviewable. These are objectives most likely to be achieved through the use of written examinations. Prohibiting immediate access to reference materials assists railroads in determining whether candidates are familiar with the rules and comprehend them. In most situations an engineer will not have time to consult a rule book before taking action to safely control his or her train. However, FRA agrees that a railroad test intended to evaluate an engineer's ability to use reference materials requires access and the rule has been modified to accommodate such testing.

Response to FRA's proposed consequences for test failures generally focused on existing contractual arrangements concerning railroad operating rules examinations. FRA proposed that a person who failed a periodic test would be retested at specified intervals and precluded from operating a locomotive until he or she was successful.

Commenters objected to FRA's disrupting contractual agreements that permit those who fail tests to continue operating trains pending retest and interfering with provisions that specify the number of and intervals between retests. Others urged FRA to supersede those contractual arrangements to avoid the potential for reinstituting the presence of "firemen" on locomotives or to assure public safety by precluding less than fully knowledgeable or fully skilled engineers from operating locomotives.

In part, the concerns of these commenters reflect the government rule/private contract debate discussed earlier. FRA proposed periodic examinations to assure that an engineer maintains the requisite levels of knowledge and skill. If a railroad elects to conduct a separate examination on railroad-specific issues with contractual implications, railroads could create the "fireman flowback" problem they fear. To clarify the intent of this provision, FRA has added an explanatory section to this final rule. Discussion of this new provision is provided in the section-by-section analysis below.

FRA accepts commenter arguments that the rule should focus on FRA's bottom-line objective, *i.e.*, whether a locomotive engineer has the requisite knowledge and performance skills. Accordingly, FRA has eliminated its proposed provisions concerning the number of and interval between retests and other consequences of test failure. Only the prohibition against operating a locomotive prior to success on the test has been retained in the final rule.

7. Monitoring Certified Engineers While Operating Trains

FRA proposed that railroads monitor the routine operations of locomotive engineers to assure that they demonstrate appropriate operating skills and compliance with safety rules. FRA's proposal called for annual unannounced rules compliance tests and in-cab observations of performance.

Few commenters objected to this proposal. Those objecting to unannounced testing argued that such testing (*i.e.*, "efficiency testing") already exists, can breed distrust, will be applied unfairly, and should not apply to railroad managers who only operate trains on rare occasions. Those objecting to in-cab observations wanted FRA to reduce the duration, frequency, and restrictive methods proposed. In general, these commenters wanted discretion to prescribe the duration of the observation period, the interval between observations, and the use of electronic monitoring.

FRA investigatory efforts and accident data have indicated serious deficiencies in current railroad operating rules testing. In the context of safety assessments, FRA has repeatedly advised railroads about the poor quality of their existing "efficiency testing" programs, and the agency's routine monitoring of railroad testing suggests that the minimal failure rates often reported by railroads are misleading. A quality program that ensures the competence of engineers should inspire confidence in rail employees and dispel any lack of trust. The suggestion that FRA should employ a lower standard for one group of locomotive engineers, those who hold managerial positions, is unwarranted. Those who infrequently operate locomotives clearly need such testing. Assuring that testing is conducted for all operators of locomotives according to established criteria should reduce any perception of unfairness.

In response to comments, FRA has amended its proposal for in-cab observations, including elimination of the proposed prescriptions for the duration of monitoring. Designed to permit evaluation of engineer response to an appropriate range of situations, FRA's proposal would have compelled railroads to allocate substantial resources to this task. FRA believes that railroads should be given more discretion on this point. FRA also believes that commenter suggestions that electronic monitoring be permitted have merit. Train monitoring devices ("event recorders" or "black boxes") and advanced train control systems now under development can provide electronically much of the monitoring FRA believes necessary. Moreover, these devices can define the nature and timing of critical events. There is also some risk that FRA's proposed requirements on this issue could be viewed as a disincentive to the use or future installation of such devices. FRA has decided, therefore, to allow the use of such devices in the final rule. These changes obviate the need to adopt commenter suggestions for a longer interval between observations.

Although not directly raised by commenters, FRA's proposal concerning operational monitoring failed to address the question of whether it was permissible to use simulators in satisfying this monitoring requirement. Recognizing the value of simulators of the type FRA is otherwise sanctioning for the purposes of this rule, FRA has modified the final rule to permit the use of simulators for operational monitoring.

8. Implementing Each Railroad's Program

FRA's proposal addressed in some detail the process of converting from the current industry practice to the certification system prescribed by this rule. The NPRM also contained proposed procedures that would be employed in the routine administration of the certification system.

(a) The Conversion Process

The conversion process was discussed primarily in terms of the "grandfathering" of existing engineers, since it envisioned an initial recognition of the qualifications of those currently authorized by railroads to operate locomotives. Under FRA's proposal, railroads would be free to select and identify those individuals it deemed eligible for certification on the basis of their prior experience as engineers. Those persons would be certified without evaluating their eligibility based on prior conduct or testing of their knowledge, skill, or acuity levels. That initial certification would remain in effect for three years, during which the railroads would conduct "formal" evaluations that fully comply with the requirements of this rule.

Commenters raised four objections to FRA's proposed conversion process. Some commenters wondered why FRA did not immediately test all engineers prior to initial certification, given the volume of accidents attributed to poor performance as engineers. Other commenters, particularly individuals who would be affected by this rule, felt that FRA should not require any testing of those who have already proved themselves. Still others argued that requiring older engineers to pass the same kinds of tests that are given to new engineers who have the benefit of long, sophisticated training programs is unfair. A number of commenters urged FRA to use a five-year transition period.

Most commenter objections appeared to stem from an interest in maintaining the status quo. At present, once a railroad qualifies an employee to be an engineer, the railroad does not review that decision unless the railroad takes exception to poor performance by the engineer. While some railroads aggressively monitor the knowledge and skill of their engineers on a periodic basis, most wait until they see a problem before considering whether to

VOL 56 ISS 118 JE 19 1991 UMI

re-evaluate an engineer's qualifications. FRA proposed and is requiring all railroads to conduct periodic reassessments because that is the more effective way to prevent accidents.

FRA has not accepted commenter suggestions for no phase-in period for certification of experienced engineers. As noted in the NPRM, the rail industry has compiled an enviable safety record that does not warrant such an extraordinary step.

As to the nature of the tests and capacity of engineers to pass them, FRA believes that the testing proposed is similar to that currently used by many railroads on their operating rules. FRA proposed and is requiring that railroads expand the subjects covered by these "book of rules" examinations to include additional topics required by this final rule, such as train handling and Federal rules concerning the operation of trains. Although railroads already require their engineers to know this additional information and to comply with Federal rules, some commenters expressed concern that engineers will fail these tests in significant numbers—apparently as a result of poor test-taking skills. Such fears can be allayed by administering preliminary examinations, a procedure that can give candidates insight into their command of the subject matter and their test-taking skills. Pretesting could be presented by rail labor organizations, railroads, or outside educational services, as could any needed refresher training.

The final concern expressed by commenters was the duration of the conversion period. Many commenters suggested a five-year period, and a number wanted to delay the start of formal evaluations for those five years. Virtually no rationale was provided in support of these suggestions. However, several reasons appeared in commenter discussion of other issues: (1) Small railroads may require more time than large railroads; (2) delay would limit consideration of prior events for certification purposes; and (3) a five-year recertification cycle suggests a similar period for conversion.

FRA is electing to retain the three-year phase-in-period; however, FRA is staggering the beginning dates to give smaller railroads more time to complete conversion. Commenter concern about the certification import of prior events has been resolved through deletion of the proposed point system and the changes made concerning motor vehicle driving data and train operation data.

(b) FRA Approval of Railroad Programs

FRA has amended the process for implementing the certification program. As a first step, all railroads will identify their designated supervisors of locomotive engineers and then their existing locomotive engineers whom they intend to "grandfather".

All railroads are to complete conversion to the certification program by December 31, 1991. After that date, all who operate locomotives must be certified engineers as required by this rule, either as new engineers certified under approved programs or as grandfathered engineers.

For Class I railroads, commuter railroads, and Amtrak, January 1, 1992 will mark the start of the three-year period for evaluating the qualifications of existing certified engineers. After that date, Class I railroads must certify engineers in accordance with FRA-approved programs.

Those programs will be submitted to FRA no later than November 15, 1991, giving FRA thirty days to make an initial evaluation. FRA will respond in writing only to those railroads whose program submissions are deficient. Since railroads generally have an analogous process in place for making qualification determinations, FRA expects that its initial review and approval should be easier and can be accomplished fairly quickly.

FRA will subsequently conduct a more detailed, extended assessment of the programs, which will include such tasks as evaluating the questions on a railroad's written knowledge examination. Delaying implementation of railroad programs until completion of such a detailed review is not warranted, given the safety record of train operations during the past ten years.

If FRA finds deficiencies during these detailed reviews, FRA will address them with the railroads. Based on past responsiveness, FRA expects this to be an effective way to proceed. FRA, of course, retains the authority to rescind its approval if identified deficiencies are not cured.

A similar pattern will be followed with Class II and Class III railroads. For Class II railroads, June 1, 1992 will mark the start of the three-year period for evaluating the qualifications of their existing certified engineers. After that date, Class II railroads must certify engineers in accordance with their FRA-approved programs. Those programs will be submitted to FRA no later than May 1, 1992. For Class III railroads the relevant dates are November 1, 1992 for submission of programs and December 1, 1992 for implementation of approved programs. Since FRA is phasing in the formal certification decisions for Class II and Class III railroads, FRA is allowing these railroads an extended period in which to certify engineers on the basis of their existing practices. That extension terminates on the same dates such railroads are required to implement their FRA-approved programs.

(c) Administration of the Program

FRA proposed that, once the program was established, railroads would routinely conduct evaluations of each engineer's qualifications by examining information relevant to eligibility and by administering tests concerning knowledge, skill, and acuity levels. Such evaluations would be mandatory for all initial certifications of new locomotive engineers and for periodic evaluations of previously certified locomotive engineers. The proposal addressed issues of the certification candidate's rights to due process in the conduct of evaluations; the documentation needed for formal evaluations, including the certificate to be issued to accredited locomotive engineers; the degree of reliance that one railroad might place on evaluations performed by another railroad; and the mechanism for resolving disputes about denial, suspension, or revocation of certification.

Commenters responded to a few of these issues. Several wanted intervals of five years instead of three years for recertification and suggested that railroads be given more time to perform the testing at recertification. Other commenters, usually individuals, wanted greater access to records containing adverse information before railroads could rely on such information. A few commenters desired clarification of FRA's views on how the inter-railroad reliance provisions would function. A few commenters were concerned about administrative details such as the need for better identification of certificate holders and for a method of obtaining replacement certificates. Finally, a number of commenters voiced concerns about the proposed dispute resolution mechanisms.

As noted above, FRA is not adopting a five-year recertification interval. However, comments suggesting the railroads be given more time to conduct the required acuity, knowledge, and skill testing have merit. These suggestions would not seriously impinge on FRA's objective of assuring that such testing be contemporaneous with the qualification decision. Accordingly, FRA is modifying the rule to accommodate these suggestions; details can be found in the discussion of § 240.217 in the section-by-section analysis below.

Due process concerns about the accuracy of information considered by railroads were addressed in the proposed rule only in the context of motor vehicle data. FRA agrees that it should provide similar protection to train operation conduct records and has modified the proposal accordingly. FRA response to commenter desires for clarification concerning the reliance by one railroad on decisions reached by another railroad are also found in the section-by-section analysis, particularly the discussion of §§ 240.225 through 240.229.

FRA response to commenter concern with administrative detail can be found in the section-by-section analysis. With only minor exceptions discussed there, FRA is adopting the proposed administrative provisions.

Commenters expressed concerns about the proposed dispute resolution mechanisms for railroad decisions regarding periodic certification and unsafe conduct.

Commenters did not object to the mechanism FRA proposed for initially resolving questions of whether a person was or was not entitled to obtain or retain certification; they were instead concerned about the appeals process. In response, FRA reviewed its entire approach to the issue and has made several changes in the final rule that are discussed in the section-by-section analysis below.

Under the proposed rule, FRA took responsibility for dispute resolution, and we continue to believe that the propriety of a railroad's decision to deny a person certification—to the extent that denial is based on a railroad's application of the minimum qualification standards of FRA's rule—is FRA's responsibility. The final rule provides the mechanism necessary to carry out that responsibility.

The comments reflected concern about the relationship between FRA decisions on appeal under this rule and extra-regulatory matters. Such FRA decisions will not necessarily be relevant to the person's employment status or any rights or obligations arising from that employment relationship. A railroad and its employees can agree that such decisions are or are not relevant to those issues. Resolution of contractual disputes is entrusted to the dispute resolution mechanisms under the Railway Labor Act.

Given the clarity of this demarcation, FRA does not believe the conflicting decisions feared by some commenters, one from FRA and another from a Railway Labor Act decisionmaker, will occur.

(d) Reliance on Decisions by Other Railroads

FRA's proposal to allow one railroad to rely heavily on the qualification decisions of another railroad prompted a few comments seeking clarification. FRA has made several changes in this regard to reflect changes in the design of the final rule.

The rule addresses reliance in three contexts: (1) Where a locomotive engineer operating in this country has been qualified under foreign law; (2) where a locomotive engineer seeks to work for a different railroad; and (3) where a locomotive engineer is to operate on trackage under the operational control of another railroad.

For the purpose of this rule, FRA proposed to accept qualification decisions made under the regulations issued by Transport Canada, and this final rule retains that provision.

Where a certified locomotive engineer seeks certification by a second railroad, FRA proposed a minimal check of the person's background. Under the final rule, however, the second railroad must first evaluate the engineer's knowledge, skill, and ability and assure that the engineer is familiar with the territory. Only the safety performance and acuity testing aspects of the prior certification will not require reevaluation.

Most locomotive engineers will operate trains only on the tracks of the railroad that issued them their certification as a qualified engineer. However, the reliance issue also involves those situations in which an engineer has occasion to operate over trackage controlled by a foreign railroad, *e.g.*, near large metropolitan areas where the trains of several railroads operate over a single set of tracks.

In such settings, one railroad has responsibility for the control of trains operating over the joint trackage. Since that railroad selects and administers the operating rules for the trackage, it must determine whether a locomotive engineer is qualified to operate in that environment.

FRA has adopted its proposal to permit the controlling railroad to rely on the qualification decisions made by other railroads. However, FRA has modified the relevant provisions to handle situations in which joint operations are an exception. Joint operations can occur unexpectedly; for example, adverse weather conditions result in trains of one railroad being rerouted over the lines of another. In these circumstances, commenters noted, it would be difficult to comply with the reliance provisions of FRA's proposed rule. Commenters raised similar questions with respect to such situations as military trains operated by members of the armed forces, steam excursions requiring special expertise, and track inspection, rail flaw detection, and rail grinding trains that have distinctive operating characteristics. FRA agrees that its proposed rule did not sufficiently accommodate this problem and has modified the final rule accordingly.

(e) Other Details

FRA's proposed rule concerning administration of the certification process by railroads did not cover such details as how to handle replacement of lost or damaged certificates, how to accommodate the need on some railroads to assign certain ministerial functions to people other than those initially envisioned by FRA, the functioning of the process for revoking a certification during its normal duration, and the dispute resolution process involving FRA.

Although commenters did not focus much of their attention on these aspects of the proposed rule, FRA is acting to correct several minor problems it has identified. These are discussed in the section-by-section analysis.

(f) Future Issues

A significant number of commenters argued that FRA's proposal was deficient because it did not address issues of stress and fatigue associated with the work of locomotive engineers. In the view of many of these commenters, safety lapses by engineers were more directly related to these problems than any other.

As noted in the earlier discussion concerning locomotive engineer conduct, FRA did not address these issues in this proposal for several reasons. After the ongoing studies and Congressional decision making have been completed, it may be appropriate for FRA to directly respond to these commenter concerns with subsequent regulatory proposals.

SECTION-BY-SECTION ANALYSIS

This rule contains five subparts that correspond to the organizational structure of the certification process. This new organization is different from and more compact than that employed in the NPRM.

Subpart A

This subpart contains the general provisions of the rule, as did subpart A in the NPRM, but it has been significantly rewritten to, for example, include new sections concerning

VOL 56 ISS 118 JE 19 1991 UMI

information collection and the relationship of this rule to other laws.

Section 240.01

Section 240.01 has been revised and expanded to more fully explain the purpose and scope of this rule. The purpose of the rule is to prescribe the minimum standards for qualification, training, and monitoring of virtually any person who operates a locomotive. Although such persons are called "locomotive engineers" under this regulation, the rule will affect a wide variety of personnel, including those holding such job titles as hostler, machinist, utility person, trainmaster, or transportation specialist. Since FRA uses the term "locomotive engineer" throughout the text of the rule and a person reading only the regulatory text could be confused or misled by prior industry practice or nomenclature, FRA has added a new clarifying paragraph (c).

Section 240.03

Section 240.03 contains the same applicability section that FRA proposed. FRA has not accepted the suggestions of a variety of commenters that FRA exclude from this rule operations that are conducted primarily inside an installation, such as steel plants or mining and logging areas. These commenters wanted the authority to operate trains on the general railroad system without the responsibility for meeting the minimum safety criteria of this regulation, arguing they made only limited use of the general system. Although operations within an installation may not require a high degree of sophistication, whenever a locomotive is operating on the general system, minimum standards must apply. The safety risks posed by operations on the general system demand that qualified engineers be at the controls of a locomotive.

Section 240.05

Section 240.05 addresses several legal issues. Paragraphs (a) and (b) note that FRA's rule will preempt existing State law covering the same subject matter, with an exception for State criminal law. The remaining paragraphs address the relationship of this rule to preexisting legal relationships.

Section 240.07

Section 240.07 contains the definitions in proposed 240.05. A few changes have been made in response to commenter suggestions or as a result of the new structure of the rule. For example, FRA has deleted the definition of what constitutes a "designated supervisor of locomotive engineers," deleted the definition of "class instructor," and revised the definition of "locomotive" to mirror that in part 229. FRA also has revised its definition of "simulators" to reflect a more precise grouping of available equipment. That revised definition continues to reflect FRA's belief that, for the purposes of this rule, simulators must be truly analogous to the operation of a real train, not a mere piece of video software.

FRA has not adopted three major changes advocated by commenters. Several suggested that FRA alter the definition of "locomotive." The commenters were concerned that FRA had excluded only hi-rail and specialized maintenance equipment from the scope of the definition and urged exclusion of other equipment. FRA has elected to stay with a narrow set of exclusions. If the equipment in question is deemed a locomotive for the purposes of compliance with part 229, the rule requires that a railroad have a certified engineer at the controls. To illustrate the kinds of issues raised by the comments, FRA intends that engines coupled to rail grinding equipment, self-propelled track inspection equipment, or rail flaw detection cars as well as track mobiles be operated by qualified locomotive engineers. This equipment is operated in the same manner and with the same safety implications as any train. The exclusion covers only equipment designed to maintain the track structure and not normally capable of being operated like a train, such as self-propelled tampers and mobile cranes.

In a similar vein, commenters suggested that FRA narrow the definition of the functions to be covered by this rule by, for example, lengthening the distances that can be operated and expanding the types of movement that can occur without having a certified engineer at the controls. FRA has not accepted this suggestion since it intends to exclude only those incidental movements of locomotives to accomplish inspection and maintenance functions and those operations within a locomotive servicing area with limits marked in accordance with part 218. Adopting the suggested changes, which envisioned movements of nearly a half mile and routine switching functions for certain freight cars, would be contrary to FRA's basic safety premise that all who operate a locomotive on the general system should be qualified, unless there is some other way to provide an equivalent degree of safety. At least one commenter provided a description of a unique factual setting that may indeed present a different way to provide an equivalent degree of protection when conducting operational tests of locomotives. That fact pattern presents the type of issue more appropriately addressed in terms of a waiver of compliance rather than creation of a regulatory provision to accommodate unique facts. Another commenter inferred from the proposal that a railroad could comply with the letter of the rule by moving only 100 feet, then stopping, and then moving another 100 feet with an uncertified person at the controls as long as necessary to reach the destination. As with other rules, blatant efforts to circumvent the intent of the regulation will be treated as noncompliance and responded to appropriately by FRA when detected.

Commenters suggested that FRA employ a new definition for "EAP counselor." FRA has decided to retain the originally proposed definition that mirrors the definition in its rules concerning control of alcohol and drug use by railroad workers (part 219). The reasons advanced by commenters for altering FRA's proposed definition were considered and rejected in the context of amending the alcohol and drug rules.

FRA has also added definitions of "drug" and "substance abuse disorder," also found in part 219 to ensure that the two regulations are consistent. "Drug" is defined as any substance (other than alcohol) that has known mind- or function-altering effects on a human subject, specifically including any psychoactive substance and including, but not limited to, controlled substances. The term is intended to refer to substances that have a significant potential for abuse and/or dependence. Normal ingestion of caffeine in beverages and use of nicotine from tobacco products, even though involving some degree of habituation or dependence, are not intended to be included within the definition.

Similarly, "substance abuse disorder" is defined as a psychological or physical dependence on alcohol or a drug or another identifiable and treatable mental or physical disorder involving the abuse of alcohol or drugs as a primary manifestation. This is essentially the same language employed to govern disposition of employees referred to an employee assistance program under the "co-worker report" (bypass) provision of the alcohol/drug regulations. It describes the condition of chemical dependency, as determined by an appropriate professional. Reference is made to other disorders involving abuse of alcohol and other drugs to avoid disputes concerning diagnoses of "underlying" problems. The point is, very simply, that a person making uncontrolled use of alcohol or drugs is not a suitable candidate for the highly sensitive duties entrusted to a locomotive engineer. Since chemical dependency typically has the aspect of poly-drug abuse, and in essentially all cases bears the potential for abuse of more than one substance, the appropriate long-term therapy is abstinence from alcohol and all other drugs.

The definition explains that the disorder is considered "active" within the meaning of the rule if the person is not currently abstaining from use of alcohol and drugs (except under medical supervision consistent with FRA's alcohol/drug regulations) or has not participated in treatment as required.

FRA is aware that many individuals abuse alcohol and drugs, with consequent ill-effects on their health and potential implications for fitness, without fitting within common definitions of chemical dependency. However, degrees of abuse are difficult to define; and significant disagreements prevail with regard to appropriate therapeutic responses. Accordingly, FRA has not required withholding of certification for patterns of abuse that fall short of chemical dependency. At the same time, FRA does not intend to convey that the concept of chemical dependency need meet the most rigid test used in any particular segment of the health care or mental health communities. For instance, much of the medical community was slow to recognize the dependence potential of cocaine, while other clinicians were properly recognizing and beginning to treat very serious cocaine addiction cases encountered in their practices. The critical point here with respect to safety is that engineers not be in the grip of uncontrolled abuse patterns that, if addressed through treatment and permanent abstinence, could be put behind them.

Finally, FRA has altered the definition of "knowingly." FRA is not changing the proposed standard of care to which parties will be held under certain portions of this rule, but has concluded that the new definition is more clear. The definition found in the rule is modeled on one formulated in recently enacted legislation that addresses a similar issue (see section 12 of Pub. L. 101 615, 104 Stat. 3244).

Sections 240.09 and 240.11

Sections 240.09 and 240.11, essentially renumbered versions of sections found in the NPRM, relate to waivers and the consequences of noncompliance.

Section 240.11 contains the penalty provisions of the rule. FRA has already provided extensive guidance on how it intends to use its enforcement power in this context (53 FR 52918). In addition to FRA's general policy statement concerning exercise of its enforcement authorities (49 CFR part 209, app. A; 53 FR 52918), readers may want to review FRA's comments on the discharge of its responsibilities under the regulations establishing disqualification procedures (54 FR 42894), prohibiting alcohol and drug use by rail workers (50 FR 31508, 31567), and those prohibiting tampering with locomotive-mounted safety devices (54 FR 5485). This section also addresses the potential for criminal sanctions for knowing and willful falsification of records required by this rule, as authorized by section 209(e) of the Federal Railroad Safety Act of 1970. Final decisions to bring charges under this provision would rest with the Department of Justice.

Section 240.13

Section 240.13 is new and is designed to aid those who have an interest in the information collection or record keeping requirements of this rule.

Subpart B

This subpart contains the basic elements of the railroad certification program required by this rule. It has no precise counterpart in the NPRM because it contains the elements that were spread out over five different subparts in the proposal.

Section 240.101

This section requires that each railroad have a written program composed of eight elements, each of which comports with specific provisions relating to that element.

Section 240.103

This section requires each railroad to submit its program and a summary outline to FRA for approval in accordance with the following schedule: Class I railroads, Amtrak, and the commuter railroads by November 15, 1991; Class II railroads by May 1, 1992; and Class III railroads or others not classified elsewhere by November 1, 1992. The format and contents of the submission are discussed at length in appendix B. This section also requires that each railroad indicate how it intends to acquire future engineers. If the railroad wants the power to train a previously uncertified person to become an engineer, the railroad must explain its training regimen for such trainees, including provisions for relying on another railroad or other some outside training organization to provide the actual training. The rule provides only thirty days for FRA review and approval of railroad programs, which will limit the depth of the review that FRA can accomplish. FRA is proceeding in this manner because most railroads have existing programs intended to accomplish a similar goal that can be easily modified; the quality of such programs is generally good; and the problems that may be encountered will not involve basic design flaws and generally will not surface until FRA has had time to observe the actual administration of the program. In screening all submissions FRA should be able to quickly detect any substantial deficiencies. Given the quality of existing programs, FRA sees little value in delaying implementation of the programs for time-consuming agency review. FRA may, of course, disapprove any program during the review cycle or at a later date. FRA will explain any deficiencies in writing. This section provides for timely railroad response to an FRA disapproval action. In addition to its limited initial review of a railroad's program, FRA intends to conduct a more thorough evaluation at a later date to assure that all aspects of the program are properly analyzed.

Section 240.105

In the NPRM, FRA proposed that individuals responsible for evaluating the skills of engineer candidates have a specified level of experience as an engineer and hold supervisory authority within the railroad. FRA's proposal was designed to ensure that these individuals have the requisite knowledge, skill, and judgment to be effective decision makers. However, some commenters objected that experience was not a legitimate substitute for good judgment; that the specified level of three years' experience was unacceptably long base on current industry practices; and that the approach prevented small railroads from continuing to employ part-time evaluators with no direct supervisory duties.

In response to these comments, FRA has amended the proposal to give to railroads the discretion to select the individuals who will evaluate their engineer candidates. Section 240.105, which replaces the proposed definition of "designated supervisors," implements that decision. Each railroad must now have a procedure for determining the qualifications of individuals to serve as designated supervisors of locomotive engineers. The section contains a performance standard for measuring a

VOL 56 ISS 118 JE 19 1991 UMI

person's capabilities and, in conjunction with § 240.203, gives FRA the power to respond to abuse of this discretion. Each railroad must have at least one designated supervisor of locomotive engineers, although many railroads would want to have more. FRA has deleted its proposed requirement that the designated supervisor be an employee of the railroad. Thus, a railroad that does not have a reason to have such a designated supervisor available on a full-time basis can obtain the services of a designated supervisor on a part-time or contract basis.

To assure that designated supervisors have the necessary knowledge and skills, paragraph (b)(4) requires that all designated supervisors be certified under this rule. This paragraph should be read in conjunction with § 240.211, which does not permit self-certification under this rule.

This section does not fully respond to commenter suggestions that FRA devise a way of more objectively determining the qualifications of designated supervisors. FRA is unable, at this time, to provide an effective objective testing scheme for such designated supervisors. FRA may consider improved methods for evaluating designated supervisors in the future.

Section 240.107

This section contains the simplified scheme for classifying those authorized to operate locomotives. Section 240.13 of the NPRM proposed five classifications; section 240.107 of this rule establishes three: Train service, locomotive servicing, and student engineer. The gradations of train service that were integral to a standardized training and testing scheme have been eliminated in light of FRA's decision to allow individual railroad programs for training and testing engineers.

This simplified classification scheme will indirectly respond to numerous suggestions by commenters on ways to alter the threshold levels proffered in the NPRM. This simplification does have implications for the "portability" of certificates when an engineer wants to move from one railroad to another. This issue is discussed further in connection with the analysis of § 240.225.

Section 240.109

This section defines the processes required for evaluating a candidate's qualifications. It contains elements of the NPRM that can be found in proposed §§ 240.51 and 240.57. Few commenters focused on these mechanics.

A railroad's procedures must include an evaluation process that effectively examines relevant prior conduct and may reflect the railroad's current approaches. Since motor vehicle data will go directly to the railroad, FRA requires in paragraphs (f) and (g) of this section that the certification candidate be given an opportunity to review those records that contain adverse information. This review will avoid the potential for accidental reliance on records that were somehow erroneously associated with a candidate. It will also allow the candidate to explain or offer any mitigating information the railroad should consider before making an eligibility decision. Since an opportunity for review and comment is not needed in all instances, FRA is only imposing the duty to afford that opportunity to a candidate whose record contains sufficient adverse data to support a determination of ineligibility. This section does not contain detailed procedures for informing the candidate, specific limits on the time for review or submission of rebuttal information, or a variety of other possible controls for implementing the intent of this section. Instead, FRA has required that these be reasonable and be described in the program description submitted for FRA's approval in accordance with § 240.109 and appendix B.

The requirements of this section are equally applicable to the issues presented when a railroad is confronting data concerning prior railroad service. The provisions of these paragraphs are similar to proposed § 240.55.

As originally proposed, FRA has limited railroads to considering only certain types of incidents involving safety-related action or inaction by a person seeking certification or recertification as a train or locomotive servicing engineer. These involve failure to comply with rules designed to prevent accidents. FRA has deleted the NPRM's provisions focusing on individuals who were seeking certification as a student engineer. Commenters have convinced FRA that the proposed provisions, which would have permitted railroads to consider an additional group of incidents concerning student certification candidates who may have provided prior service as a member of a train crew, are not necessary at this time.

This section also responds to commenter concern about the degree to which railroads would be permitted to base their certification decisions on conduct that occurred prior to adoption of this rule. Several commenters offered the view that, by permitting a railroad to rely on incidents of misconduct that occurred before locomotive engineers had any basis of suspecting that such action could render them ineligible for certification, the regulation would constitute an *ex post facto* application of the rule. Other commenters, while not articulating any legal theory to support their views, urged that all locomotive engineers be permitted to start with a clean slate for certification purposes as a matter of basic fairness.

Permitting railroads to impose additional, retroactive consequences for incidents that occurred prior to adoption of this rule would not mean that this regulation has a prohibited *ex post facto* effect. Such retroactive effect, although not absolutely precluded by the Administrative Procedure Act (5 U.S.C. 553), is discouraged under existing law (see *Bowen* v. *Georgetown University Hospital*, 109 S. Ct. 468 (1988)). Moreover, FRA agrees that fairness precludes the use of events that occurred prior to the effective date of this rule, and this section so provides.

This section also permits railroads and candidates to create arrangements whereby the railroad can directly obtain motor vehicle data or prior railroad service data. This last provision responds directly to the concerns of many individual commenters who felt aggrieved that they were being required to personally participate in a procedure that could ultimately render them ineligible.

Section 240.111

This section essentially contains the requirements proposed in § 240.52 of the NPRM. The major difference is that FRA has responded to commenter suggestions that FRA expand the responsibility of the certification candidate for soliciting motor vehicle data. In instances where a railroad's initial check of motor vehicle records revealed the existence of additional information in the control of a state licensing agency, FRA had proposed that the railroad seek the secondary information. Commenters pointed out that railroad access could be as easily stymied when seeking the secondary data as it could under the circumstances that had prompted FRA to make the certification candidate initially responsible for seeking motor vehicle data. Therefore, § 240.111 charges the candidates with responsibility for requesting the information. Finally, § 240.111 has been revised to require timely provision of the information to the railroad.

Section 240.113

This section contains requirements analogous to those just described for seeking motor vehicle records when a railroad needs information concerning prior railroad service. As noted earlier, most commenters wanted FRA to delete any consideration of prior conduct and thus to eliminate this section from the final rule. The few commenters who discussed evaluation of prior conduct data urged that FRA establish a similar duty to provide information because of difficulties railroads have experienced on this score. In response, FRA has established that duty in this section. The section requires timely provision of the information to the railroad.

Section 240.115

This section imposes a duty on railroads to make proper determinations concerning an individual's eligibility to become a certified engineer based on the person's motor vehicle driving record. It draws on §§ 240.53, 240.57, and 240.59 of the NPRM. Similar to proposed § 240.53, this section sets limits on railroads in considering motor vehicle driving data.

As noted earlier, until completion of a study of the possible correlation between safe train operation and motor vehicle conduct, this rule will only permit consideration of data involving incidents of alcohol- or drug-related motor vehicle driving operation. Thus, this section does not address any motor vehicle record data that involves events such as excessive speed, racing on the highway, or reckless driving.

This section identifies the types of events that can be considered and allows both convictions and state actions that revoke, cancel, suspend, or deny licensing to be considered. Actual operation of a vehicle while impaired or under the influence of alcohol or drugs, as well as refusal to undergo testing to determine whether the person is impaired or under the influence, will be considered by the railroad. Paragraph (a) requires that a railroad review the available information concerning the candidate's motor vehicle driving record.

Paragraph (b) requires evaluation of motor vehicle driving records to determine if specified alcohol/drug-related conduct has occurred. If an incident is identified, this information is provided to the EAP Counselor, along with railroad service record data (rules compliance, attendance, other job-related incidents), and the engineer is referred for evaluation. The engineer is required to furnish any other pertinent records concerning counseling or treatment for confidential review by the EAP Counselor. The purpose of this referral and review is to determine whether the person currently has an active substance abuse disorder.

If the person is found not to have an active substance abuse disorder, the data will not be considered further with respect to the certification (and the EAP Counselor retains as confidential the data provided by the employee concerning any prior treatment). However, if the EAP Counselor determines that the person has in the past had an active substance abuse disorder, the EAP Counselor may recommend that certification be conditioned on any needed aftercare. It is intended that this decision be made based on the EAP Counselor's clinical evaluation. For example, an employee treated three years before who could demonstrate sobriety over that period might in an appropriate case receive unconditional certification. By contrast, an employee with a history of substance abuse episodes, including a relapse after treatment a few months before, might receive conditional certification.

As provided in § 240.119, a person with an active substance abuse disorder could not be currently certified. However, that employee would be permitted to utilize the voluntary referral policy of the alcohol/drug rule (§ 219.403) if the employee had not previously taken advantage of the policy. This provision is in contrast to handling under § 240.119, where violation of § 219.101 or § 219.102 leads to adverse certificate action and access to the EAP is a matter of management policy. In those cases (except co-worker reports, which are treated differently), management will have detected violative behavior; and the voluntary referral rule by its own terms will not apply. In the context of motor vehicle driving data, however, referral to the EAP Counselor is necessary for the purpose of evaluation; and cooperation by the employee may be critical to documenting the extent and nature of the substance abuse disorder—*i.e.*, the motor vehicle record will seldom be dispositive in the sense of providing a wholly satisfying foundation for a professional evaluation. Both for the purpose of preserving the experience and training represented by the current employee (an important factor in safety) and for the purpose of encouraging development of all the pertinent clinical indications, it is desirable for the person being evaluated to know that help, if needed, will be available. The same considerations do not apply with equal force to a person who is not a current employee, and the employer would have no obligation to make available the services of the EAP in that case.

The section also prohibits use of data so old as to be irrelevant to present condition or future behavior. With the exception of some information involving substance abuse and unsafe operating safety practices, the rule limits railroads to considering events that occurred within the previous 30 months. FRA originally proposed a five-year period, but has learned that a number of states do not maintain records for that length of time. The final rule's three-year period matches the minimum record retention practices of all state driver licensing agencies and the retention interval for most data found in the NDR.

Section 240.117

This section requires that railroads have a program for examining incidents in which certified locomotive engineers may have failed to comply with railroad safety rules or procedures intended to ensure the safe operation of trains. To comply with this requirement and the related provisions of section 240.307, the railroad's program must afford each locomotive engineer the opportunity to participate in the fact-finding process. Except in relatively rare instances, it will be the railroads themselves that will, before action required by this rule will be taken, detect the evidence of possibly unsafe conduct, make the decision on whether there is sufficient evidence to proceed with formal responsive action, and convince a railroad's hearing officer that the operating rule was violated.

The section makes clear that the railroad's responsibilities for responding to infractions by locomotive engineers are not limited to periodic recertification, providing that any pertinent incident can prompt review of certification status.

Paragraph (e) identifies the five kinds of rule infractions covered by this regulation: failure to comply with railroad rules (1) requiring adherence to a signal indication; (2) limiting the operating speed of the train; (3) prescribing operation of the train and engine brake system so as to safely control train operation; (4) prohibiting occupying a track without authority; or (5) prohibiting the unauthorized nullification of locomotive-mounted safety devices. Railroads should, of course, respond to other forms of unsafe train operation conduct as appropriate.

Paragraph (g) provides that once a railroad has determined that an engineer has failed to comply with its mandatory safety rule concerning one of these five types of incidents, two consequences will occur. First, the railroad will be required to revoke the engineer's certificate for 30 days. Second, that finding will initiate a period during

VOL 56 ISS 118 JE 19 1991 UMI

which the engineer will suffer an increasingly more severe response if additional incidents occur in the next 36 to 60 months. If a second event occurs within 36 months of the first event, the period of mandatory revocation will increase to one year. If a third event occurs within 60 months, the revocation period increases to five years. If the locomotive engineer does not engage in unsafe conduct for three years, a second incident will not serve as an aggravating factor warranting imposition of the one-year revocation. However, that second incident will start a new 36-month period during which a second incident can generate a one-year revocation. Moreover, both events will be relevant if a third incident occurs within 60 months. This paragraph also integrates certain aspects of alcohol and drug related data stemming from detected incidents of on-duty possession, use, and impairment. If both this section and § 240.119 apply to a given incident, the longer mandatory period of revocation will control.

Paragraph (g) also addresses instances when the locomotive engineer is found to have violated the pertinent provisions of the railroad's rules twice within a three-year period. Although the railroad must revoke certification and/or deny recertification for at least one year, a railroad can reinstate a person after a minimum period of six months. Prior to reinstatement the engineer must be evaluated by a designated supervisor and the designated supervisor must conclude that the remedial action was effective. If the designated supervisor does not so conclude, the engineer must await passage of the full year interval. A railroad that concludes that the engineer needs supplemental training, prior to early reinstatement, must determine that the engineer has successfully completed that training before it can authorize reinstatement.

If the locomotive engineer is found to have violated the pertinent rules three times in any consecutive 60-month interval the engineer shall be ineligible for certification for five years. No railroad can reinstate a person until after expiration of that 60-month period.

Section 240.119

This section addresses two separate dimensions of the alcohol/drug problem in relation to engineers—(1) active substance abuse disorders and (2) specific alcohol/drug regulatory violations.

Paragraph (a) requires railroads to address both dimensions of this issue in their programs. Paragraph (b) provides that a person with an active substance abuse disorder shall not be currently certified as a locomotive engineer. This means that appropriate action should be taken with respect to a certificate (whether denial or suspension) whenever the existence of an active substance abuse disorder comes to the official attention of the railroad, with the exception discussed below. This section and § 240.115 address certain situations in which inquiry must be made into the possibility that the individual has an active substance abuse disorder if the individual is to obtain or retain a certificate. The fact that specific instances are cited does not exclude the general duty of the railroad to take reasonable and proportional action in other appropriate cases. Declining job performance, extreme mood swings, irregular attendance and other indicators may, to the extent not immediately explicable, indicate the need for an EAP evaluation. These issues are addressed in the FRA Field Manual for Control of Alcohol and Drug Use in Railroad Operations, the revised edition of which will be available in the next few months.

Paragraph (c) deals with conduct constituting a violation of § 219.101 or § 219.102 of the alcohol/drug regulations. Section 219.101 prohibits any employee from going or remaining on duty in covered service while using, possessing, or being under the influence of or impaired by alcohol or a controlled substance or with a blood alcohol concentration of .04% or more. This is conduct that specifically and directly threatens safety in a way that is wholly unacceptable, regardless of its genesis and regardless of whether it has occurred previously. It is roughly analogous to a violation of the railroad's own Rule G, for which the traditional sanction was dismissal (albeit with possibility of reinstatement following a first offense). In its more extreme forms, such conduct is punishable as a felony under the criminal laws of the United States (18 U.S.C. 341 *et seq.*) and a number of states.

Section 219.102 prohibits use of a controlled substance by a covered employee, at any time, on or off duty, except under the exception for approved medical use. Abuse of marijuana, cocaine, amphetamines, and other controlled substances poses unacceptable risks to safety. However, where on-the-job use, possession, or impairment is not established, as is most often the case where urinalysis is the means of detection (*e.g.*, through a random drug test which can detect drugs remaining in the system for some period after actual use), this violation is marginally less serious than a § 219.101 violation.

Under the alcohol/drug regulations, whenever a violation of § 219.101 or § 219.102 is established based on authorized or mandated chemical testing, the employee must be removed from service and may not return until after an EAP evaluation, any needed treatment, or a negative return-to-duty test, and is subject to follow-up testing (§ 219.104). This structure suggests an absolute minimum for action when a locomotive engineer is determined to have violated one of these prohibitions. Considering the need both for general and specific deterrence with respect to future unsafe conduct, additional action should be premised on the severity of the violation and whether the same individual has prior violations.

One key consideration in evaluating this conduct and appropriate responses is the duration of retrospective review. The final rule uses the same nominal period set forth in the statute for consideration of alcohol/drug related motor vehicle conduct—5 years (60 months). This is also the same period used by FRA as a maximum period for follow-up of those who commit violations (§ 219.104(d)) and has been employed in some railroad "bypass agreements" as the retrospective period to determine if the employee has a prior alcohol/drug rule violation or prior treatment. Further, it is employed in this rule as the maximum period of ineligibility for certification following repeated alcohol/drug violations.

Use of a 5-year cycle reflects anecdotal experience in the railroad industry indicating that conduct committed as much as 5 years before may tend to predict future alcohol or drug abuse behavior (and recognizes the reality that most individual violations are probably not detected). On the other side of the coin, it reflects a certain confidence in the resilience of human nature—*i.e.*, a reasonable expectation that the person who remains in compliance for that period of time will not again be found in violation.

The full reach of the 5-year period will not be realized initially. Since § 219.101 did not become effective until February 10, 1986 and § 219.102 was effective on October 2, 1989, even if FRA has not elected to employ the retrospective limitations discussed earlier, conduct prior to those dates could not properly be measured against those standards with respect to certification. Of course, railroads retain the flexibility to consider prior conduct (including conduct more than 5 years prior) in determining whom they will hire and assign as locomotive engineers.

Note that conduct violative of the FRA proscriptions against alcohol and drugs need not occur while the person is serving in the capacity of a locomotive engineer in order to be considered. For instance, an employee who violated § 219.101 while working as a conductor and then sought engineer certification six months later (under the provision described below) would not be currently eligible for certification.

The railroad's responsibility is not limited to periodic recertification. The rule provides that any conduct in violation of § 219.101 or § 219.102 shall prompt a review of certification status.

The rule requires a determination of ineligibility for a period of 9 months for an initial violation of § 219.101. This parallels the 9-month disqualification for refusal to cooperate in post-accident or random testing and also matches most estimates of discipline actually assessed, on average, in the railroad industry. FRA does not believe that a locomotive engineer should be able to seek the shelter of a collective bargaining agreement or more lenient company policy in the case of a clear on-the-job violation, insofar as Federal eligibility to serve as a locomotive engineer is concerned. Specifying a period of ineligibility will serve the interest of deterrence while giving further encouragement to co-workers to deal with the problem before it is detected by management.

In order to preserve and enhance the leverage available to co-workers, the 9-month period is waived only in the case of a qualifying co-worker report (§ 219.405). FRA believes that this distinction in treatment is warranted as a strong inducement to participation by other employees in enforcement of the regulations. Although few actual co-worker reports may be generated, the intended result will be served if an atmosphere of intolerance for drug abusing behavior is reinforced in the workplace and violators know that they will be turned in if they come on the job impaired.

In the case of a second violation of § 219.101, the engineer will be ineligible for a period of 5 years. Given railroad employment practices and commitment to alcohol/drug compliance, it is likely, of course, that any individual so situated would also be permanently dismissed from employment. However, it is important that the employing railroad also follow through and revoke the certificate under this rule so that the engineer does not go to work for another railroad within the 5-year period using the certificate issued by the first railroad as the basis for certification. We note that these sanctions are reasonably consistent with the Commercial Motor Vehicle Safety Act, title XII, Public Law No. 99-570, 100 Stat. 3207-170, which requires the Federal Highway Administration to disqualify a commercial motor vehicle driver for one year in the case of driving a commercial motor vehicle under the influence (defined as a blood alcohol concentration of .04% or greater) and for life in the case of a second offense.

Under this rule, one violation of § 219.102 within the 5-year window would require only temporary suspension and the minimum response described in paragraph (d) (referral for evaluation, treatment as necessary, negative return-to-duty test, and appropriate follow-up). FRA has considered whether a more stern approach should be required, but does not wish to undercut the therapeutic approach to drug abuse employed by many railroads. This approach permits first-time positive drug tests to be handled in a non-punitive manner that concentrates on remediation of any underlying substance abuse problem and avoids the adversarial process associated with investigations, grievances and arbitrations under the Railway Labor Act and collective bargaining agreements. This approach is most often coupled to commitments from labor organizations to lead peer prevention efforts such as Operation Red Block and Operation Stop. While time may yet prove this approach to be excessively lenient, FRA is not persuaded that experience has impeached the seasoned judgment of railroad medical officers, EAP personnel, operating officers, and employees who have committed their companies to this approach.

A second violation of § 219.102 would subject the employee to a mandatory 2-year period of ineligibility. A third violation within 5 years would lead to a 5-year period of ineligibility.

The rule also addresses violations of §§ 219.101 and 219.102 in combination. A person violating § 219.101 after a prior § 219.102 violation would be ineligible for 3 years; and the same would be true for the reverse sequence. A person violating either section thereafter (cumulative 3rd violation) would be ineligible for 5 years from the most recent violation.

Refusals and failures to participate in chemical tests are treated as if the test were positive. A post-accident blood analysis for alcohol and controlled substances, for instance, in the worst case could establish use on the job, violation of the .04% alcohol prohibition, or—with other evidence—impairment. Such a refusal would be "scored" as if a § 219.101 violation. The same would be true for refusal to take a breath alcohol test. Refusal of a drug urinalysis, which in most cases could only be used to establish a § 219.102 violation, would be treated as if it were a violation of that section.

The refusal or failure to participate in testing as required under part 219 would be treated as provided in the rule even though the testable event did not involve a mandatory 9-month disqualification under part 219. Under part 219 a "refusal" triggers a mandatory disqualification only in the case of post-accident and random tests. The term "failure to participate" is used here to denote other instances of noncooperation involving a federally mandated or authorized test (*e.g.*, reasonable cause, follow-up) where FRA regulations do not specify the responsive action.

The specific periods of ineligibility obviously represent decisions about which "reasonable minds may differ." However, they have antecedents in other fields of regulation and reflect FRA's best judgment of what would be both fair to locomotive engineers and reasonably effective from the point of view of deterrence. It is important that practice among the railroads with respect to certification be as uniform as possible, regardless of more stringent disciplinary action that may (and likely would) be taken in the case of some of the cases posited. Further, it is a legitimate objective to avoid excessive FRA involvement in reviewing requests for exceptions for alleged hardship, particularly since railroad disciplinary policy can normally be expected to address most cases at the other extreme of the range of culpability.

Paragraph (d) prescribes the conditions under which employees may be certified or recertified after a determination that the certification should not be granted, or should be suspended or revoked, due to a violation of § 219.101 or § 219.102 of the alcohol/drug regulations. These conditions closely parallel the return-to-duty provisions of the alcohol/drug rule, but are more stringent in the following respects:

- Return-to-duty testing shall be for both alcohol and controlled substances, regardless of the nature of the original violation.
- Follow-up tests must include at least 6 alcohol tests and 6 drug tests during the first 12 months following return to service and may include tests for both alcohol and controlled substances throughout the period.

VOL 56 ISS 118 JE 19 1991 UMI

Alcohol tests may be on either blood or breath samples using methods described in the alcohol/drug regulation. Alcohol tests must be conducted while the employee is in "duty status" in the sense that the employee is available for duty and is subject to the commingled service provisions of the Hours of Service Act. The regulation does not require compensation of the employee for the time spent in this testing, which is a condition precedent to retention of the certificate; but the issue of compensation is ultimately resolved by reference to the collective bargaining agreement or other terms and conditions of employment under the Railway Labor Act.

Paragraph (e) ensures that an engineer, like any other covered employee, may self-refer for treatment under the alcohol/drug rule (§ 219.403) before being detected in violation of alcohol/drug prohibitions and is entitled to confidential handling of that referral and subsequent treatment. This means that the railroad will not normally receive notice of any substance abuse disorder identified by the EAP Counselor. However, the paragraph also provides that the railroad policy must (rather than may) provide that confidentiality is waived if the engineer fails to participate successfully in treatment as directed by the EAP Counselor, to the extent that the railroad must receive notice that the employee has an active substance abuse disorder so that appropriate certificate action can be taken. The effect of this provision is that the certification status of an engineer who seeks help and cooperates in treatment will not be affected, unless the engineer fails to follow through.

Section 240.121

This section contains requirements for visual and hearing acuity testing that a railroad must incorporate in its program. FRA's proposal for visual and hearing acuity were proposed as § 240.43 of the NPRM.

As FRA pointed out when it issued the proposal, any person who operates a locomotive must have sufficient vision and hearing acuity if there is to be a reasonable expectation that trains will be operated safely by that person. Since many railroads do not have standards for either visual or hearing acuity or any program to periodically monitor these aspects of an engineer's health, FRA proposed to require both periodic examinations and minimum acuity thresholds.

This section contains FRA's revised criteria for a railroad's program concerning acuity standards. Since none of the commenters provided scientific evidence or documented research findings that provide a sound basis for setting acuity thresholds for locomotive engineers different from those used in other transportation modes, FRA has retained the acuity values proposed in the NPRM in paragraphs (c) and (d).

FRA has modified this section, by the inclusion of the wording in paragraphs (c) and (d), to afford railroads some discretion in applying these criteria. Commenters have persuaded FRA that some individuals, although not meeting these threshold acuity levels, may be able to compensate in other ways that will permit them to function at an appropriate safety level despite their physical limitations. FRA, therefore, has revised this section by the inclusion of paragraph (e) to permit a railroad to have procedures whereby doctors can evaluate such individuals and make discrete determinations about each person's ability to compensate for his or her physical limitations. If the railroad's doctor concludes that an individual has compensated for his or her limitations and can safely operate a locomotive on that railroad, the railroad can certify that person under this regulation once it possesses the doctor's professional medical opinion to that effect.

FRA has also revised the wording of paragraph (d) of this section. One aspect of the revision deletes the authorization to have hearing acuity tests performed without the use of audiometers. As pointed out by several commenters, audiometers are generally available throughout this country. Thus, there should not be any problem, or at most a minimal problem in isolated cases, for engineers to obtain access to these devices for testing purposes. Since there is no scientifically reliable basis on which to determine hearing acuity absent the use of this device, FRA is requiring that they be used. The other aspect of the revision involves the reference to the calibration standards which must be adhered to when determining that an audiometer is functioning properly. As one commenter noted, FRA could simplify compliance with its rule by requiring use of the same calibration standard that OSHA employs for other workers. FRA agrees and has used the same calibration standard mandated by OSHA.

Section 240.123

This section contains FRA's revised approach to the education of locomotive engineers. It melds ideas contained in §§ 240.61 through 240.67 of the NPRM and converts them to design and performance criteria. It also contains the concepts of section 240.19 of the NPRM that dealt with the need for maintaining familiarity with physical characteristics.

This section contains the requirement that each railroad provide for the continuing education of its engineers. At a minimum, that continuing education effort must address the need to keep engineers conversant with the personal safety directives of the railroad, the operating rules and practices of the railroad with which the engineer must comply, the rules for inspecting and testing the mechanical condition of rolling equipment with which the engineer must comply, and the methods of safe train handling, including familiarity with physical characteristics. As noted earlier, this section does not require that a railroad conduct its training at FRA-determined intervals or for specified durations as was proposed. This section affords each railroad the latitude to design its own program so long as that design addresses each of the required elements.

In designing its program, railroads must ensure that their engineers are kept advised of changes. These changes can include a wide range of subjects such as new or amended guidance provided in documents such as new "general orders" or "special instructions," amendments to its "book of rules," changes that occur in the physical characteristics of the territory with which the engineer is required to be familiar, and the introduction of new technology. The railroad must also provide for programs to ensure that each engineer stays familiar with existing rules and procedures that were initially learned years ago, as well as with the physical characteristics of the territory learned at some point in the past but unused for a significant period. Since the railroads' training programs must be described and submitted to FRA for approval, the exercise of the discretion being afforded railroads by this section will be monitored by FRA.

This section also contains requirements for the initial training of persons not previously trained as engineers. It identifies the subject matter to be covered and contains minimum constraints on the manner in which the training is to be conducted.

Section 240.125

This section, derived from § 240.73 of the NPRM, requires that railroads provide for the periodic testing of engineers. That testing must effectively examine and measure an engineer's knowledge of five subject areas: the personal safety directives of the railroad, the operating rules and practices of the railroad, the rules for inspecting and testing the mechanical condition of rolling equipment, the methods of safe train handling including familiarity with physical characteristics, and compliance with Federal safety laws.

Again, railroads have discretion to design the tests that will be employed; for most railroads that will entail some modification of their existing "book of rules" examination to include new subject areas. This section does not specify things like the number of questions to be asked or the passing score to be obtained. It does retain the proposed requirement that the test not be conducted with open reference books unless use of such materials is part of a test objective. This section also requires that the test be in writing. FRA was not unmindful of commenter concern over the test taking skills of some individuals or of the possibility that some persons may have literacy problems when FRA decided to require a written test. However, FRA believes that minimum reading and comprehension skills are needed to assure safe train operations by a locomotive engineer. Some commenters asserted that there may be existing engineers who lack such basic skills. Those individuals, perhaps assisted by their railroad and co-workers, will have ample opportunity to achieve the requisite degree of literacy before being required to pass such a test for recertification purposes. This section affords each railroad latitude in designing its own testing effort so long as that design addresses each of these elements. Since the testing effort selected by the railroad must be submitted to FRA for approval, the exercise of the discretion being afforded railroads by this section will be monitored by FRA.

Section 240.127

This section, originally found in § 240.63 of the NPRM, requires that railroads provide for the periodic testing of an engineer's applied knowledge and performance skills. At a minimum, that testing effort must effectively examine and measure an engineer's knowledge and skill when operating a train or a locomotive. The test can be conducted when the engineer is operating either an actual train or a simulator. Whether real or simulated, the train must be representative of the type of train the engineer could reasonably expect to encounter in normal operations and must be operated over the type of terrain the engineer can reasonably be expected to encounter. The test must cover the engineer's applied knowledge of the operating rules and practices of the railroad with which the engineer must comply, the rules for inspecting and testing the mechanical condition of rolling equipment with which the engineer must comply, the methods of safe train handling including familiarity with physical characteristics, and compliance with Federal safety laws.

Unlike the proposed rule, this section does not specify the duration of the operation of the test train that must be witnessed. Deletion of that requirement responds to repeated commenter assertions that the proposal was unduly restrictive in requiring a lengthy period of test observation. This section does not authorize the use of anything less than a Type 1 or Type 2 simulator, since other simulators do not provide a sufficient replication of the real world environment to provide the degree of assurance needed concerning an individual's applied knowledge and skills. Again, a railroad's submitted plan regarding duration of the observation period for testing purposes is subject to FRA approval.

Section 240.129

This section derived from § 240.93 of the NPRM, requires that each railroad provide for the annual observation and compliance testing of its engineers' applied knowledge and performance skills. At a minimum, that compliance testing effort must effectively examine engineer response when operating a train or a locomotive and confronted with an unforeseen situation that requires affirmative reaction to less favorable conditions than those that existed prior to initiation of the test. The test can be conducted when the engineer is operating either an actual train or a simulator, but it must be done without prior warning to the engineer being tested.

The test required under this section is intended to improve routine compliance with major operating rules such as those that require engineers to operate prepared to stop within one-half the person's range of vision, or to approach a signal at reduced speed prepared to stop or make a diverging movement. Very few comments were received about this aspect of the monitoring proposal. Among those comments, two that have been rejected by FRA merit mention. One commenter urged that FRA not require tests because of a belief that covert testing breeds distrust and another commenter urged that this requirement not be applicable to those who only occasionally operate trains. FRA's routine field observations, experiences during system assessments, and some of the accident data clearly show the need for covert testing, since in its absence major safety rules intended to prevent collisions and derailments are often violated. FRA would expect that rail employees, whose safety is at issue, would understand this program as inuring to their benefit. The need for testing compliance with operating rules does not disappear because a person only occasionally operates a locomotive. There may in fact be a heightened value in assuring that those who do not routinely operate locomotives have their knowledge and skill periodically tested. One commenter did raise a valid concern that must be addressed by railroads during their design and implementation efforts: The failure of some railroads to properly control the placement of loads and empties when making up a train's consist. Unorthodox placement of loaded and empty freight cars does have the potential for generating severe train handling problems when engineers are required to respond to a compliance test conducted in territory that already presents an engineer with difficult train handling situations.

This section also requires an annual observation of each certified engineer by a supervisor of locomotive engineers, not as part of a test, but to provide for observation performance in routine operations, rather than merely in test environments. FRA has revised the portion of the section that pertains to such operational monitoring in light of the comments received. Railroads will be free to select the duration of the monitoring effort devoted to each individual engineer. Railroads also will have the option of using some or all of the following techniques: on-board observations, simulator observations, and evaluation of train operation event recorder data. As with prior provisions, this section affords each railroad latitude in designing its own monitoring effort, so long as that design addresses each of these elements. Since the testing and monitoring effort selected by the railroad must submitted to FRA for approval, the exercise of the discretion being afforded railroads by this section will be monitored by FRA.

This section has been revised to clearly indicate the duties of a railroad responsible for conducting joint operations under this section. FRA will permit but not require a railroad responsible for conducting joint operations, which involve certified engineers from other railroads operating over its territory, to annually observe and perform compliance tests of all such engineers under § 240.229.

VOL 56 ISS 118 JE 19 1991 UMI

Subpart C

Reflecting FRA's effort to simplify this rule, this subpart sets out the steps for implementing the railroads' certification programs. This subpart has no counterpart in the NPRM because its provisions appeared throughout the proposal.

Section 240.201

This section contains the timetable for implementation of the rule; its provisions are drawn primarily from §§ 240.1, 240.3, and 240.61 of the proposed rule.

This section requires that railroads identify supervisors of locomotive engineers and qualified engineers by November 1, 1991. All engineers must be issued certificates documenting their status by the end of 1991. Beginning in January 1992, no person may operate a locomotive without having an engineer's certificate in his or her possession.

Class I railroads, Amtrak, and commuter railroads may designate additional locomotive engineers without formal qualification findings until the end of 1991. Beginning in January 1992, those railroads must make the series of formal determinations required under this rule before issuing additional certificates. Similar provisions apply to Class II and Class III railroads effective May 31, 1992 and November 30, 1992, respectively. Any railroad that comes into existence before the date for mandatory compliance with formal procedures applicable to similar railroads may employ the grandfathering approach of this section. A railroad that commences operation after the pertinent date for mandatory compliance by similar railroads must comply with the formal determination procedures of this rule. This section also contains a requirement that railroads make formal determinations concerning those they have grandfathered within 36 months of the date for compliance by their class of railroad.

Section 240.203

This section, derived from §§ 240.21, 240.41, 240.71 and 240.81 of the proposal, imposes a duty on railroads to make proper decisions in designating locomotive engineers.

Paragraph (a) requires that a railroad evaluate candidates in accordance with its approved program and determine that those it designates as locomotive engineers, including students, meet the criteria of this rule. The paragraph is organized to assure that railroads make the basic decisions about all engineers to preclude ineligible persons or those with unacceptably poor acuity levels from gaining access to the controls of a locomotive.

Paragraph (b) permits railroads that are conducting the initial training of persons as engineers to upgrade those students to the status of train or locomotive servicing engineer. It also authorizes such advancement without revisiting questions of the person's eligibility and acuity, provided the upgrading occurs within the time limits specified.

Section 240.205

This section, derived from §§ 240.21, 240.51, and 240.55 of the proposal, imposes a duty on railroads to employ proper procedures and make appropriate decisions in selecting persons to be locomotive engineers.

Paragraph (a) requires that a railroad evaluate candidates in accordance with its approved program and determine that those it designates as locomotive engineers, including students, meet the criteria of this rule. Paragraph (b) requires that the railroad have appropriate documentation to assure that railroads have the basic data to support their decisions about all engineers including decisions to preclude ineligible persons from being authorized access to the controls of a locomotive.

Section 240.207

This section, derived from §§ 240.41 and 240.45 of the proposed rule requires that a railroad have either a medical examiner's certificate documenting that the candidate has been tested and found to meet the acuity thresholds or a written opinion from the railroad's medical examiner that the candidate has adequate acuity to perform safely as an engineer. In response to commenter suggestions, the section permits the actual administration of the acuity test to be done by a wider variety of personnel than was contemplated by the NPRM. Allowing broader participation in the conduct of the test while maintaining responsibility for proper conduct of the test, at higher levels, should assist in lowering the cost of conducting such tests. FRA has also changed the reference to the calibration standard to be consistent with the OSHA calibration requirements (29 CFR part 1910) that apply when railroads are testing the hearing acuity of other railroad workers.

If the acuity testing reveals that a person needs corrective lenses or a hearing aid to function as an engineer, that fact must be noted on the actual certificate issued to the engineer and imposes a duty on the engineer to use the needed device while operating a locomotive. The wording of this section has also been revised to accommodate situations in which improvements occur that obviate the need for corrective devices.

A number of commenters questioned who would have responsibility for absorbing the costs associated with obtaining the necessary tests. This section does not address that issue since it is not a safety matter but may be an appropriate subject for discussion among the affected parties.

Section 240.209

This section, drawn from §§ 240.73 and 240.79 of the proposed rule, requires that a railroad employ the FRA-approved testing procedures in concluding that a person has sufficient knowledge concerning the railroad's rules and practices for the safe operation of trains. It also contains a requirement to document that testing and a prohibition against permitting a person who has failed a test to operate as a train or locomotive servicing engineer until successful completion of a reexamination.

This section differs from the proposed rule in that it tracks the performance approach to test and examination designs contained in § 240.125 and it omits all references to the conduct of reexaminations. FRA has concluded in both instances that commenter suggestions for altering the proposal were valid. FRA is sensitive to the fact that precluding those who fail such tests from operating a locomotive until successful passage of a reexamination will place a premium on proper preparation for such tests. But allowing those who have failed to demonstrate the knowledge needed to operate a locomotive, as was urged by a number of commenters, is simply not acceptable from a safety perspective.

Section 240.211

This section, drawn from §§ 240.83 and 240.89 of the proposed rule, requires that a railroad employ the skill testing procedures approved by FRA in concluding that a person has the ability to safely operate locomotives and trains. The same analysis provided for § 240.209 applies to this section with one change. Paragraph (d) prohibits a designated supervisor of locomotive engineers from sitting in judgment of his or her own skills. Railroads that have only a single designated supervisor of locomotive engineers will have to make arrangements with other parties to facilitate skill performance evaluation of its designated supervisor.

Section 240.213

This section, drawn from § 240.61 of the proposed rule, imposes a duty on railroads to make determinations concerning a student's overall knowledge, applied knowledge, and skill in the safe operation of trains before certifying that person as a train or locomotive servicing engineer.

The section has been written to better accommodate the potential for a wide variety of providers who may train students to be engineers. It requires that a railroad relying on skill training off its own lines examine the candidate's familiarity with the physical characteristics of the certifying railroad's trackage.

Section 240.215

This section, derived from §§ 240.103 and 240.107 of the NPRM, contains the record keeping responsibilities of railroads for those persons it has certified as locomotive engineers. FRA has revised this section to specify the records that must be kept by the railroad. FRA has provided this detailed recitation to eliminate any possible misunderstandings that might arise from the use of the phrase, "the information relied on," that was in the proposed rule. This section consolidates record keeping duties that were scattered throughout the NPRM.

Section 240.217

This section, drawn from §§ 240.45, 240.77, and 240.87 of the NPRM, contains the various time constraints that FRA has established to preclude railroads from relying on stale information when evaluating a candidate for certification or recertification. All of the time constraints in this section have been lengthened in response to commenter requests.

Section 240.219

This section, drawn from §§ 240.57, 240.59, 240.107, and 240.113 of the NPRM, establishes the procedures to be followed when a railroad decides to deny a person certification or recertification.

This section has no equivalent in the proposed rule. Although several sections of the NPRM provided for notice to candidates that the railroad possessed adverse information and required that candidates be given an opportunity to review and respond to that information, these provisions were not consistent and did not reach all the kinds of adverse data that a railroad might possess. Several commenters expressed concern about this situation. Thus, FRA has decided to clearly provide for an opportunity for review in all instances. Since some provisions of this final rule contain a similar but discrete opportunity for review, FRA does not intend to impose a second opportunity under this section. Moreover, the proposed rule impliedly required a railroad to communicate to the candidate, and document in writing, the basis for any decision to deny. This section clearly obligates a railroad to perform that function within a reasonable time after it makes its decision to deny.

Section 240.221

This section, proposed § 240.105, requires that each railroad maintain a list of its designated supervisors of locomotive engineers and certified locomotive engineers. This section has been revised slightly to resolve three different concerns about its content. First, FRA has specifically provided for the periodic updating of the list so that it retains its usefulness. Second, FRA has responded to commenter concern over where such information must be kept available by establishing an optional special approval process for railroads that conduct far flung operations but want to maintain data at a central location. Finally, FRA has included a provision addressing the duty of a railroad that controls operations over joint operations territory and certifies engineers for the limited purpose of operating over such territory under § 240.229 to comply with this section.

Section 240.223

This section, which appeared as proposed § 240.101, contains the requirements for the certificate that must be carried by each locomotive engineer. FRA has revised this section slightly to provide for better identification of the person to whom it has been issued by adding a duty to include the person's employee identification number if one is used by the railroad or the person's social security number if no unique identification code is used by the railroad. It also requires that identification data be included to provide assurance that the bearer of the card is the person to whom it was issued. The identification data can be either a physical description (height, weight, eye color and hair color) or a photograph. This change responds to commenter suggestions that FRA require that a photograph of the engineer be part of the certificate. While railroads are not foreclosed from using photographs, FRA is not convinced that their use should be mandated. The revised section also requires that the certificate include the date of the engineer's most recent operational monitoring test.

Although it has been suggested, FRA has not imposed specific duties on a railroad to institute security and audit procedures to preclude unauthorized acquisition and use of blank certificate forms. FRA is confident that railroads, on their own initiative, will take effective steps to properly monitor and control access to these documents.

Section 240.225

This section, derived from proposed § 240.25, contains the requirements that apply when a previously certified engineer is about to begin service for a different railroad. It has been revised to reflect the renumbering of various provisions occasioned by reorganization of this part. It also has been changed, in response to a commenter suggestion, to preclude a railroad from upgrading the class of service an engineer may perform on the second railroad without tests to determine the engineer's ability to handle the demands of the upgraded classification. It also imposes a duty on the second railroad to determine that the transferring engineer has the necessary knowledge concerning the new railroad's operating rules and practices and that the engineer has the necessary skills, including familiarity with physical characteristics of the second railroad. The need for this detailed independent assessment by the second railroad stems from the decision to eliminate the more stratified classification system for types of locomotive engineers contained in the NPRM.

Section 240.227

This section contains the requirements for a railroad that wants to rely on the system of locomotive engineer qualification established by the Canadian Government. It is virtually unchanged from the provisions of proposed § 240.27 of the NPRM, except to show Transport Canada as the Canadian agency with responsibility for rail safety.

Section 240.229

This section, proposed § 240.23, contains requirements for railroads responsible for conducting joint operations with another railroad. Several commenters suggested that FRA clarify this section to account for unusual situations in which a train from another railroad or another entity needs to operate on its lines, *i.e.*, a steam train operated on an excursion trip, a short-term detour routing caused by adverse

VOL 56 ISS 118 JE 19 1991 UMI

weather conditions, or other *ad hoc* joint operations. FRA agrees that the proposal focused on longer term operations and did not adequately address these unusual situations. FRA, therefore, has revised this section to permit railroads to conduct joint operations by providing a qualified person to accompany a "foreign" train over its lines. In this way, the railroad with responsibility for conducting the joint operations will have a simple and prompt response capability when confronted with the types of situations posed by the commenters. Since the person providing guidance on how to negotiate the joint operations territory will have to offer guidance on or provide for proper train handling procedures while traversing the territory, FRA has included criteria for what will constitute a qualified person in such situations.

This section also has been revised to clearly permit a controlling railroad, certifying a person for the limited purpose of operating over joint operations territory, to fulfill its duty to issue that person a certificate by endorsing the preexisting certificate issued by the other railroad as provided for in paragraph (c) of § 240.223.

Subpart D

This subpart reflects FRA's effort to simplify this rule. It provides for the routine administration of the railroad certification programs. This subpart has no counterpart in the NPRM, but contains the provisions of proposed subpart I and elements found in other subparts in the proposal.

Section 240.301

This section has no counterpart in the proposed rule. Although FRA proposed a fairly comprehensive approach to the issuance and reissuance of certificates and their possible revocation or suspension, FRA's proposal did not contain a clear requirement that railroads have a system for the replacement of lost or damaged certificates. Several commenters were concerned that, in the absence of such a requirement, they could encounter problems replacing certificates. In response, FRA has decided to require that railroads have a system that allows the replacement of certificates when necessary. Commenters urging adoption of such an approach suggested that engineers should not have to bear any expenses in connection with obtaining replacements. This provision does not attempt to resolve the question of who will bear the cost of operating such a replacement system, since that is not a safety matter and is an appropriate subject for discussion among the affected parties.

Section 240.303

This section, which appeared as proposed § 240.93, contains the requirements for conducting the operational monitoring and compliance testing of certified engineers. It imposes a duty on railroads to adhere to their approved monitoring program and to conduct their unannounced compliance test program in a particular manner. Few comments were received on this proposal and FRA has revised this section only to reflect the greater latitude given railroads to design the implementation of its program (see the earlier discussion of § 240.129) for routine periodic operational monitoring of each engineer. Since FRA will allow railroads to select the best way to conduct annual monitoring from among several options, in lieu of the proposed requirement for an extended on-board observation, FRA has not accepted commenter suggestions that these observation be conducted at 18-month intervals. This options approach was discussed above in connection with the discussion of § 240.129.

Section 240.305

This section, which appeared as § 240.93 of the NPRM, proscribes certain types of conduct once the initial phase of the certification program is implemented. As noted in the preamble discussion of the proposed rule, FRA has identified three types of events not covered by current Federal safety rules that FRA believes should be regulated here: Operating a locomotive or train at excessive speed; failing to stop at signals requiring a stop; and entering a segment of track without proper authority. FRA received very few comments on this proposal. Those rare comments from individual engineers objected to the idea that FRA would now have enforcement powers similar to those of railroad companies; other comments urged adoption of the section so as to provide a basis for disqualification proceedings under part 209.

FRA is adopting the section but with two changes. First, this section will not become effective before railroads have completed their initial selection of locomotive engineers and had an opportunity to issue the certificates required by this rule. Second, FRA has revised this section to make the prohibitions against the three types of conduct mentioned above clearly applicable to both railroads and individual engineers. Although the wording of this section does not reflect that railroad companies and individuals are held to different standards, the fact is that FRA can only take civil penalty action against individuals who willfully violate the provisions of this section.

In devising the wording of this section and in administering the new authority contained in this section, FRA will approach the question of whether particular facts warrant the initiation of civil penalty action or some other remedial response in accordance with FRA's statement of enforcement policy in appendix A to part 209. FRA will also be guided by the following principles in interpreting the operational constraint provisions of this section. FRA will consider whether train speed is excessive by looking at the limits for train speed established by the timetable, train order, or similar mandatory directive. Where FRA observes, or has evidence supporting a finding that, a train's speed exceeding the maximum by one half the authorized speed but less than a 10-mile-per-hour overspeed, FRA will acknowledge the calibration limitations of locomotive speed indicators. In determining whether a train has been operated past a signal that requires a complete stop in contravention of a railroad rule requiring a stop, FRA will be guided by railroad interpretations of the application of that rule to particular factual settings. In this context the term "signal" encompasses the same wide range of devices currently employed by the industry and is not limited to automatic roadway signals regulated by FRA in parts 233, 235, and 236 of its regulations. Similarly, FRA will be guided by the individual railroad's operating rules and practices, including railroad interpretations of these rules and practices when evaluating whether a train entered a segment of track without proper authority.

Section 240.307

This section, which appeared as § 240.95 of the NPRM, requires that a railroad proceed in a specified manner when it acquires information indicating that a certified engineer no longer meets these qualification standards.

The rare comments received on this matter focused on the topic of loss of eligibility due to poor safety conduct and generally urged FRA either to ignore the topic or invoke the FRA disqualification procedures. As previously explained it is not appropriate for FRA to ignore issues such as loss of eligibility or simply rely on its disqualification procedures. Since an engineer can cease to meet these qualification standards in a variety of

ways, FRA is retaining, but revising, these provisions. Paragraph (a) now provides that a railroad shall suspend the certificate of an engineer about whom it has acquired convincing information indicating he or she no longer meets the qualification criteria of this rule.

Paragraph (b) requires that before suspending a certificate, or contemporaneous with the suspension, the railroad shall give the engineer written notice of the reason for the pending revocation action and provide an opportunity for a hearing. The duration of the suspension is limited since the engineer can demand that the hearing be held within 10 calendar days of the suspension. If the person is ill, injured, or unavailable for sufficient cause, the hearing can be delayed. At the hearing, the railroad hearing officer shall determine on the record, if such a conclusion is reached by the hearing officer, the basis for the hearing officer's finding that the engineer no longer meets the qualifications established by this regulation. Based on such a conclusion the railroad shall revoke the locomotive engineer's certificate.

Since there is reason to believe that the parties to a hearing required under this section may wish to consolidate that hearing with disciplinary or other proceedings arising from the same facts, FRA has provided for such consolidation in paragraph (c). FRA also has sanctioned, in paragraph (d), parties' adhering to different procedural arrangements, such as those concerning disciplinary matters that were arrived at through collective bargaining in lieu of adhering to the procedural constraints specified in subparagraphs (b)(1) and (b)(2).

Paragraphs (e) and (f) address the issue of what response is required when a person has been certified by more than one railroad. Such dual certification typically occurs so that an engineer can operate in joint operations territory, but may also occur when an engineer holds dual employment. Under such circumstances, when information is acquired causing belief that the person may no longer meet the requirements of this part, the duty to hold a hearing under this section need be satisfied by only one of the railroads. If the railroad holding the hearing concludes that the person's certificate must be revoked, other railroads will be bound by that determination. Railroads will receive notification of such revocation because the locomotive engineer is obligated to advise all affected railroads of such adverse action under the provisions of § 240.305(d). Paragraphs (e) and (f) do not dictate which railroad should hold the hearing.

Section 240.309

This section, derived from §§ 240.51, 240.55, 240.57, and 240.59 of the NPRM, establishes internal review and analysis procedures to be followed by Class I and Class II railroads. As discussed earlier, most commenters objected to FRA's proposal to identify particular types of unsafe performance, assign each type a point value, and then predicate loss of eligibility on the accumulation of a certain number of points. The commenters strongly urged FRA to allow railroads to employ their existing, non-regulatory system of imposing punishment for failures to comply with safety directives, rather than adopt a rigid point system. That approach is rejected because it would be inappropriate to resolve issues at the heart of a Federal safety rule through a collective bargaining mechanism.

As discussed earlier, FRA is requiring railroads to have their own individual systems for examining and evaluating incidents of noncompliance with its rules and procedures for the safe operation of trains. FRA has formulated the information collection requirements of this section to ensure that railroads collect data on engineer safety behavior and feed that information back into its operational monitoring efforts, thereby enhancing safety. As acknowledged by commenters, railroads lack a current system for routinely monitoring and evaluating the effectiveness of their existing discipline system. Although some types of disciplinary data may be monitored for limited purposes, such as the conduct of labor relations activities, the broad spectrum of such data is not routinely integrated and applied to the evaluation of the effectiveness of railroad safety programs. Several commenters endorsed this type of information gathering as an interim response.

This section requires that, beginning on January 1, 1992, large and medium sized railroads have an internal auditing plan to keep track of 10 distinct kinds of events that involve poor safety conduct by locomotive engineers. For each event, the railroad will have to indicate what response it took to that situation. The railroad will evaluate this information, together with data showing the results of annual operational testing and the causation of FRA reportable train accidents, to determine what additional or different efforts, if any, are needed to improve the safety performance of that railroad's certified locomotive engineers.

FRA is not requiring that a railroad furnish this data or its analysis of the data to FRA. Instead, FRA requires that the railroad be prepared to submit such information when requested.

Subpart E

FRA proposed to establish a simplified set of procedures to permit quick resolution of any disputes concerning a railroad's decision to deny certification or recertification or to revoke certification. Except for comments suggesting that FRA defer to the existing dispute resolution mechanisms of the Railway Labor Act, in lieu of creating a separate set of dispute resolution procedures, FRA received only one substantive comment on its proposal concerning this issue. That commenter urged that FRA use the identical procedures for this process that FRA has adopted for instituting FRA-initiated disqualification proceedings. FRA believes the commenter fails to recognize the significant differences that exist in the two distinct settings. These differences make it inappropriate for FRA to burden the engineer, the railroad, or the agency to the same degree in both situations. In the context of disputes about qualifications under this rule, FRA will be reviewing a detailed record of events rather than conducting a fact finding effort of its own.

Section 240.401

This section, § 240.111 in the proposed rule, has been adopted with only minor editorial changes.

Section 240.403

This section was identified as § 240.113 in the proposed rule. Paragraphs (c) and (d) have been reworded to indicate that failure to adhere to the time limit of 180 days for seeking FRA review will result in dismissal of the review petitions as untimely. In addition, some minor editorial changes have been made to this section.

Section 240.405

This section, § 240.115 of the proposed rule, has been adopted without change.

Section 240.407

This section, § 240.117 of the proposed rule, has been adopted without substantive change.

Section 240.409

This section, § 240.119 of the proposed rule, has been adopted without substantive change.

VOL 56 ISS 118 JE 19 1991 UMI

Section 240.411

This section, § 240.120 of the proposed rule, has been adopted without change.

Appendix A

FRA noted in the NPRM that Appendix A of the final rule would contain a schedule of civil penalties similar to that FRA has issued for all of its regulations. Although such an appendix is a statement of policy, FRA solicited public comments expressing views on how FRA should handle this matter. Despite the extensive number of comments filed, no party commented on this appendix. Appendix A specifies the civil penalty FRA will ordinarily assess for the violation of a particular provision of this rule and reserves FRA's right to assess a penalty up to the statutory maximum where circumstances warrant. The process by which FRA will seek to impose such penalties is described in part 209.

Appendix B

FRA is providing both the organizational requirements and a narrative description of the submission required under §§ 240.101 and 240.103. FRA is not requiring that railroad submissions be made on a Federally mandated form. Instead, FRA is prescribing only minimal constraints on the organization and manner of presenting information. FRA requires that the submission be divided into six sections. FRA requires that each section deal with a different subject matter and that the railroad identify the appropriate person to be contacted in the event FRA needs to discuss some aspect of the railroad's program which relates to that section.

Although FRA is not prescribing in detail the form of the submission, FRA will make available, during the meetings held to discuss compliance with this rule, sample formats for such submissions. To assist those who must generate these submissions, FRA has provided a narrative description of the kinds of topics that should be covered in a railroad's submission. This narrative description is intended to aid railroads in preparing their submissions and should not be read as modifying or replacing any of the specific requirements of the relevant regulatory section(s) to which it relates.

Appendix C

In this appendix FRA is providing a narrative discussion of the procedures that a person seeking certification or recertification will have to follow to furnish a railroad with information concerning his or her motor vehicle driving record. The appendix has been modified to reflect the changes made to § 240.113, which places full responsibility on the individual to seek data.

Appendix D

This appendix contains the list of participating state motor vehicle licensing agencies that can directly furnish data on both NDR information and the state's own internal recorded information. As noted in the proposed rule, there are multiple advantages when a certification candidate can discharge both aspects of his or her responsibilities under § 240.113 by contacting such agencies. Thus, FRA has made this the preferred practice under this rule.

Appendix E

FRA has included an appendix that contains recommended practices for conducting skill performance tests. FRA has provided in this appendix an outline of the types of concerns that should be addressed during the administration of a skill performance test and guidance on how a form could be devised to assist in promoting uniformity in the application of this test.

Regulatory Impact

E.O. 12291 and DOT Regulatory Policies an Procedures

This rule has been evaluated in accordance with existing regulatory policies and is considered to be non-major under Executive Order 12291. However, it is considered to be significant under the DOT policies and procedures (44 FR 11034; February 26, 1979) because it initiates a substantial regulatory program.

Consequently, FRA has prepared and placed in the rulemaking docket a regulatory evaluation addressing the economc impact of this rule. It may be inspected and copied at room 8201, 400 Seventh Street, SW., Washington, DC. Copies may be obtained by submitting a written request to the FRA Docket Clerk at the same address.

The economic evaluation identifies total estimated potential benefits, from avoidance of accidents and incidents, of $334 million and total estimated costs of $50 million over a twenty-year period that can be associated with adoption of this proposal. Both benefits and costs are stated at a discounted present value (10% discount factor) for a program life of 20 years using constant 1988 dollars. The 20 year estimated program life appears reasonable given the relatively long tenure of locomotive engineers, the useful life of any equipment used for this rule's purposes, and the recurring costs assumed over the life of the program.

There are two points that bear mention concerning FRA's economic evaluation. In determining the quantifiable benefits from the proposed rule, FRA selected accidents that occurred during the period 1977 through 1987 that were caused by human factors that appear to reflect poor locomotive operator performance. Although human factor accidents have seen a dramatic reduction in actual numbers, they have not been decreasing at the same rate as accidents attributed to other causes. Of the 18,140 human-factor caused accidents reported during the period, FRA identified a total of 6,990 train accidents that resulted in 61 fatalities, 1,482 personal injuries, and $325 million in property damage that can be ascribed to poor locomotive operator performance. Those accidents included 214 resulting from improper use of the automatic brake, 62 due to improper use of dynamic brake, and an additional 171 due to improper use of the independent brake valve. These appear to stem from poor performance curable through improved training. Also within that total are some 1,649 accidents attributed to excessive speed and 3,375 caused by excessive in-train force levels that may not be as directly related to training.

The difficulty that FRA encountered in analysis of the data involves the absence of specific information that indisputably identifies inadequate training as a causal factor. This resulted in FRA's encountering difficulty in reliably estimating a specific effectiveness level for accident avoidance that could be employed in estimating the benefits associated with adoption of this rule. The difficulty in estimating any specific effectiveness level is caused by an inability to document with specificity the correlation between testing, training, and actual safety performance. In essence, accident investigation data in the railroad industry at times reflect a conclusion that locomotive operators did not take effective action. The investigations generally do not isolate whether that stemmed from inadequate training, a failure to recall a vital piece of information learned long ago, or lack of proper execution due to simple inattentiveness. Although data limitations do not make it possible for FRA to reliably estimate a specific level of effectiveness for this rule, it would only require about a 14 percent realization of the potential benefits to make this proposed rule economically justified. FRA believes that such a level of realization is achievable.

Regulatory Flexibility Act

FRA certifies that this rule will not have a significant economic impact on a substantial number of small entities. These rules will apply to railroads and individuals seeking to operate locomotives for railroads. Although a substantial number of small railroads will be subject to this regulation, the economic impact of this rule will not be significant for several reasons. Small railroads historically have not elected to train their own engineers and thus generally will not incur the training costs associated with this rule. Thus, the only costs that a small railroad normally will incur are those associated with routine administration of the certification program. Since small railroads individually and in the aggregate employ only a few locomotive engineers, FRA concludes that this economic impact will not be significant. As noted, FRA estimates that roughly 34,000 locomotive engineers are currently in service. Each of these individuals could be expected to incur some nominal expenses under this rule. Every three years, each engineer may be required to pay a fee of less than $10 for furnishing motor vehicle driver's license data. This fee reflects the costs associated with getting a document notarized and paying state motor vehicle agency documentation charges.

The proposed rule will have no direct impact on small units of government, businesses, or other organizations. State rail agencies will be free to participate in the administration of this program but are not required to do so. State motor vehicle driver's licensing agencies can anticipate on a nationwide basis that they will annually receive 10,000 additional requests for motor vehicle driver's licensing data. Since such state agencies costs are reimbursed through fees paid by the person making the data request, this rule would not have a direct adverse economic impact on these agencies.

Paperwork Reduction Act

There are collection of information requirements contained in this rule and, in accordance with the Paperwork Reduction Act of 1980, the record keeping and reporting requirements contained in this rule have been submitted to the Office of Management and Budget for approval. The information collection requirements of this rule will become effective when they are approved by OMB. FRA has endeavored to keep the burden associated with these rules as simple and as minimal as possible for such a program. For some entities that already have similar programs in place, the burden created will be minimal. For others, the burden could be extensive.

There are significant variables in the time required to comply with these requirements. Thus a total overall estimate of the reporting burden is not easily arrived at and could be seriously misleading. FRA, therefore, has elected to identify each of the sections that contain information collection requirements and indicate the time estimated to fulfill each requirement. All of these estimates include time for reviewing instructions, searching existing data sources, gathering or maintaining the needed data, and reviewing the information.

Section	Brief description	Estimated average time
240.9	Request for Waiver	1 hour each.
240.101 & 240.103 & 240.107 & 240.109 & 240.119 & 240.121 & 240.123 & 240.125 & 240.127 & 240.129 & 240.303 & Appendix B.	Certification Program —preparation if perform student training. —preparation if do not perform student training. —submission to FRA.	200 hours each railroad. 40 hours each railroad. 1 hour each railroad.
240.111 &	Request for State License Data.	15 minutes per person.
Appendix C	Request for NDR data.	30 minutes per person.
240.111 &	Notice of Absence of License.	15 minutes per person.
Appendix D	Additional data-follow-up request.	30 minutes per person.
240.111	Request for Railroad Data.	15 minutes per person.
	Response to Data Request.	30 minutes per person.
240.115	Review of Eligibility Data.	30 minutes per person.
240.201 &	List of—Designated Supervisors updating.	15 minutes per railroad.
240.221	—Certified Engineers updating.	15 minutes per railroad.
240.201 & 240.207 & 240.223 & 240.229 & 240.301.	Locomotive Engineers Certificates.	5 minutes per person.
240.205	Data to EAP Counselor.	5 minutes per person.
240.207	Medical Certificate	30 minutes per person.
240.209 &	Written Test	2 hours per person.
240.211 &	Performance Test	2 hours per person.
240.213	Annual Operational Monitor Test.	1 hour per person.
	Annual Operational Observation.	2 hours per person.
	—Examination Grading.	15 minutes per person.
240.215	Record Keeping for each Engineer.	1 hour per person.
240.219	Certification Denial Notice.	1 hour per person.
	Response to Notice	1 hour per person.
240.221	Request Electronic listing.	30 minutes per railroad.
240.227	Canadian Certification Data.	15 minutes per person.
240.305	—Engineer's Notice of Non-Qualification.	15 minutes per person.
	—Engineer's Notice of loss of qualification.	1 hour per person.
240.307	Notice to Engineer of Disqualification.	1 hour per person.
240.309	Railroad Annual Review & Analysis.	80 hours per railroad.
240.401 & 240.403.	Engineer Appeals to FRA if lose certification.	30 minutes per person.
240.405	Railroad Response to Appeal.	15 minutes per person.
240.407	Request for Hearing	30 minutes per person.
240.411	Appeals	30 minutes per person.
Appendix C	Notice to Engineer about State with Driver Record.	15 minutes per person.
	Response to Follow-up request for Data.	15 minutes per person.

Although FRA solicited comments on the accuracy of the FRA estimates, the practical utility of the information, and alternative methods for obtaining this information that might be less burdensome, FRA did not receive many comments on this aspect of its proposal. As stated earlier, FRA received virtually no comments on the alternative procedures for obtaining information concerning a certification candidate's driving record, specifically in accessing the National Driver Register. The comments that addressed the issue of information collection were limited to suggestions that FRA employ a longer interval for certification (*e.g.*, five years instead of three years). The five-year interval is an alternative FRA found to be undesirable for the reasons previously given. The costs estimated to be associated with the information collection requirements are contained in the regulatory evaluation.

Environmental Impact

FRA has evaluated this regulation in accordance with its procedures for ensuring full consideration of the environmental impacts of FRA actions as required by the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), other environmental statutes, Executive Orders, and related directives. This regulation meets the

VOL 56 ISS 118 JE 19 1991 UMI

criteria that establish this as a non-major action for environmental purposes.

Federalism Implications

This rule will not have a substantial effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Thus in accordance with Executive Order 12612, preparation of a Federalism Assessment is not warranted.

List of Subjects in 49 CFR Part 240

Railroad safety, railroad operating procedures.

The Rule

Therefore, in consideration of the foregoing, FRA amends chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

1. By adding a new part 240 to read as follows:

Part 240—Qualification and Certification of Locomotive Engineers

Subpart A—General

Sec.
240.1 Purpose and Scope
240.3 Applicability
240.5 Construction
240.7 Definitions
240.9 Waivers
240.11 Consequences for Noncompliance
240.13 Information Collection Requirements

Subpart B—Component Elements of the Certification Process

Sec.
240.101 Certification Program Required
240.103 Approval of Design of Individual Railroad Programs by FRA
240.105 Criteria for Selection of Designated Supervisors of Locomotive Engineers
240.107 Criteria for Designation of Classes of Service
240.109 General Criteria for Eligibility Based on Prior Safety Conduct
240.111 Individual's Duty to Furnish Data on Prior Safety Conduct as Motor Vehicle Operator
240.113 Individual's Duty to Furnish Data on Prior Safety Conduct as an Employee of a Different Railroad
240.115 Criteria for Consideration of Prior Safety Conduct as a Motor Vehicle Operator
240.117 Criteria for Consideration of Operating Rules Compliance Data
240.119 Criteria for Consideration of Data on Substance Abuse Disorders and Alcohol/Drug Rules Compliance
240.121 Criteria for Vision And Hearing Acuity Data
240.123 Criteria for Initial and Continuing Education
240.125 Criteria for Testing Knowledge
240.127 Criteria for Examining Skill Performance
240.129 Criteria for Monitoring Operational Performance of Certified Engineers

Subpart C—Implementation of the Certification Process

Sec.
240.201 Schedule for Implementation
240.203 Determinations Required as a Prerequisite to Certification
240.205 Procedures for Determining Eligibility Based on Prior Safety Conduct
240.207 Procedures for Making the Determination on Vision and Hearing Acuity
240.209 Procedures for Making the Determination on Knowledge
240.211 Procedures for Making the Determination on Performance Skills
240.213 Procedures for Making the Determination on Completion of Training Program
240.215 Retaining Information Supporting Determinations
240.217 Time Limitations for Making Determinations
240.219 Denial of Certification
240.221 Identification of Qualified Persons
240.223 Criteria for the Certificate
240.225 Reliance on Qualification Determinations Made by Other Railroads
240.227 Reliance on Qualification Requirements of other Countries
240.229 Requirements for Joint Operations Territory

Subpart D—Administration of the Certification Programs

Sec.
240.301 Replacement of Certificates
240.303 Operational Monitoring Requirements
240.305 Prohibited Conduct by Certified Engineers
240.307 Revocation of Certification
240.309 Railroad Oversight Responsibilities

Subpart E—Dispute Resolution Procedures

Sec.
240.401 Review Board Established
240.403 Petition Requirements
240.405 Processing Qualification Review Petitions
240.407 Request for a Hearing
240.409 Hearings
240.411 Appeals

Appendix A to Part 240—Schedule of Civil Penalties
Appendix B to Part 240—Procedures for Submission and Approval of Locomotive Engineer Qualification Programs
Appendix C to Part 240—Procedures for Obtaining and Evaluating Motor Vehicle Driving Record Data
Appendix D to Part 240—Identification of State Agencies that Perform National Driver Register Checks
Appendix E to Part 240—Recommended Procedures for Conducting Skill Performance Tests

Authority: 45 U.S.C. 431 and 438, as amended; Pub. L. 100-342; and 49 CFR 1.49(m).

Subpart A—General

§ 240.1 Purpose and scope.

(a) The purpose of this part is to ensure that only qualified persons operate a locomotive or train.

(b) This part prescribes minimum Federal safety requirements for the eligibility, training, testing, certification, and monitoring of all locomotive engineers. This part does not restrict a railroad from implementing additional or more stringent requirements for its locomotive engineers that are not inconsistent with this part.

(c) The qualifications for locomotive engineers prescribed in this part are pertinent to any person who operates a locomotive, unless that person is specifically excluded by a provision of this part, regardless of the fact that a person may have a job classification title other than that of locomotive engineer.

§ 240.3 Applicability.

(a) This part applies to all railroads that operate locomotives on standard gage track that is part of the general railroad system of transportation.

(b) This part does not apply to:

(1) rapid transit operations in an urban area that are not connected with the general system of transportation; and

(2) a railroad that operates only on track inside an installation which is not part of the general railroad system of transportation.

§ 240.5 Construction.

(a) Under section 205 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 434), issuance of these regulations preempts any State law, rule, regulation, order, or standard covering the same subject matter.

(b) FRA does not intend by issuance of these regulations to preempt any provisions of State criminal law that impose sanctions for reckless conduct that leads to actual loss of life, injury, or damage to property, whether such provisions apply specifically to railroad employees or generally to the public at large.

(c) FRA does not intend, by use of the term "locomotive engineer" in this Part, to preempt or otherwise alter the terms, conditions, or interpretation of existing collective bargaining agreements that employ other job classification titles when identifying persons authorized by a railroad to operate a locomotive.

(d) FRA does not intend by issuance of these regulations to preempt or otherwise alter the authority of a railroad to initiate disciplinary sanctions against its employees, including managers and supervisors, in the normal and customary manner, including those contained in its collective bargaining agreements.

(e) Nothing in this part shall be construed to create an eligibility or entitlement to employment in other service for the railroad as a result of denial, suspension, or revocation of certification under this part.

§ 240.7 Definitions.

As used in this part—

Alcohol means ethyl alcohol (ethanol) and includes use or possession of any beverage, mixture, or preparation containing ethyl alcohol.

Controlled Substance has the meaning assigned by 21 U.S.C. 802 and includes all substances listed on Schedules I through V as they may be revised from time to time (21 CFR parts 1301-1316).

Current Employee is any employee with at least one year of experience in transportation service on a railroad.

Designated Supervisor of Locomotive Engineers is a person designated as such by a railroad in accordance with the provisions of § 240.105 of this part.

Drug means any substance (other than alcohol) that has known mind or function-altering effects on a human subject, specifically including any psychoactive substance and including, but not limited to, controlled substances.

EAP Counselor means a person qualified by experience, education, or training to counsel people affected by substance abuse problems and to evaluate their progress in recovering from or controlling such problems. An EAP Counselor can be a qualified full-time salaried employee of a railroad, a qualified practitioner who contracts with the railroad on a fee-for-service or other basis, or a qualified physician designated by the railroad to perform functions in connection with alcohol or substance abuse evaluation or counseling. As used in this rule, the EAP Counselor owes a duty to the railroad to make an honest and fully informed evaluation of the condition and progress of an employee.

FRA Representative means the Associate Administrator for Safety, FRA, and the Associate Administrator's delegate, including any safety inspector employed by the Federal Railroad Administration and any qualified state railroad safety inspector acting under Part 212 of this Chapter.

Instructor Engineer means a person who

(1) Is a qualified locomotive engineer under this part,

(2) Has been selected by the railroad to teach others proper train handling procedures, and

(3) Has demonstrated an adequate knowledge of the subjects under instruction.

Joint Operations means rail operations conducted by more than one railroad on the same track regardless of whether such operations are the result of—

(1) Contractual arrangement between the railroads,

(2) Order of a governmental agency or a court of law, or

(3) Any other legally binding directive.

Knowingly means having actual knowledge of the facts giving rise to the violation or that a reasonable person acting in the circumstances, exercising due care, would have had such knowledge.

Locomotive means a piece of on-track equipment, other than hi-rail or specialized maintenance equipment

(1) With one or more propelling motors designed for moving other equipment;

(2) With one or more propelling motors designed to carry freight or passenger traffic or both; or

(3) Without propelling motors but with one or more control stands.

Locomotive engineer means any person who moves a locomotive or group of locomotives regardless of whether they are coupled to other rolling equipment except:

(1) A person who moves a locomotive or group of locomotives within the confines of a locomotive repair or servicing area as defined in 49 CFR 218.5(f); or

(2) A person who moves a locomotive or group of locomotives for distances of less than 100 feet and this incidental movement of a locomotive or locomotives is for inspection or maintenance purposes.

Medical examiner means a person licensed as a doctor of medicine or doctor of osteopathy. A medical examiner can be a qualified full-time salaried employee of a railroad, a qualified practitioner who contracts with the railroad on a fee-for-service or other basis, or a qualified practitioner designated by the railroad to perform functions in connection with medical evaluations of employees. As used in this rule, the medical examiner owes a duty to the railroad to make an honest and fully informed evaluation of the condition of an employee.

Newly hired employee is any person who is hired with no prior railroad experience, or one with less than one year of experience in transportation service on that railroad or another railroad.

Railroad means all forms of non-highway ground transportation that run on rails or electromagnetic guideways, including

(1) Commuter or other short-haul rail passenger service in a metropolitan or suburban area and

(2) High speed ground transportation systems that connect metropolitan areas, without regard to whether they use new technologies not associated with traditional railroads.

Such term does not include rapid transit operations within an urban area that are not connected to the general railroad system of transportation.

Railroad Officer means any supervisory employee of a railroad.

Segment means any portion of a railroad assigned to the supervision of one superintendent or equivalent transportation officer.

Substance abuse disorder refers to a psychological or physical dependence on alcohol or a drug or another identifiable and treatable mental or physical disorder involving the abuse of alcohol or drugs as a primary manifestation. A substance abuse disorder is "active" within the meaning of this Part if the person (1) is currently using alcohol and other drugs, except under medical supervision consistent with the restrictions described in § 219.103 of this chapter or (2) has failed to successfully complete primary treatment or successfully participate in aftercare as directed by an EAP Counselor.

Type I Simulator means a replica of the control compartment of a locomotive with all associated control equipment that:

(1) Functions in response to a person's manipulation and causes the gauges associated with such controls to appropriately respond to the consequences of that manipulation;

(2) Pictorially, audibly and graphically illustrates the route to be taken;

(3) Graphically, audibly, and physically illustrates the consequences of control manipulations in terms of their effect on train speed, braking capacity, and in-train force levels throughout the train; and

(4) Is computer enhanced so that it can be programmed for specific train consists and the known physical characteristics of the line illustrated.

Type II Simulator means a replica of the control equipment for a locomotive that:

(1) Functions in response to a person's manipulation and causes the gauges associated with such controls to

VOL
56
ISS
1
118
JE
19
1991
UMI

appropriately respond to the consequences of that manipulation;

(2) Pictorially, audibly, and graphically illustrates the route to be taken;

(3) Graphically and audibly illustrates the consequences of control manipulations in terms of their effect on train speed braking capacity, and in-train force levels throughout the train; and

(4) Is computer enhanced so that it can be programmed for specific train consists and the known physical characteristics of the line illustrated.

Type III Simulator means a replica of the control equipment for a locomotive that:

(1) Functions in response to a person's manipulation and causes the gauges associated with such controls to appropriately respond to the consequences of that manipulation;

(2) Graphically illustrates the route to be taken;

(3) Graphically illustrates the consequences of control manipulations in terms of their effect on train speed braking capacity, and in-train force levels throughout the train; and

(4) Is computer enhanced so that it can be programmed for specific train consists and the known physical characteristics of the line illustrated.

§ 240.9 Waivers.

(a) Any person may petition the Federal Railroad Administration for a waiver of compliance with any requirement prescribed in this Part.

(b) Each petition for a waiver under this section must be filed in the manner and contain the information required by part 211 of this chapter.

(c) If the Administrator finds that a waiver of compliance is in the public interest and is consistent with railroad safety, he or she may grant the waiver subject to any conditions he or she deems necessary.

§ 240.11 Consequences for Noncompliance.

(a) Any person (including a railroad and any manager, supervisor, official, or other employee or agent of a railroad) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least $250, but not more than $10,000 per violation, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed $20,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense. Appendix A is a statement of policy that contains a schedule of civil penalty amounts used in connection with this rule.

(b) Any person (including a railroad and any manager, supervisor, official, or other employee or agent of a railroad) who violates any requirement of this Part or causes the violation of any such requirement may be subject to disqualification from all safety-sensitive service in accordance with part 209 of this chapter.

(c) Any person (including a railroad and any manager, supervisor, official, or other employee or agent of a railroad) who knowingly and willfully falsifies any record required by this Part may be subject to criminal penalties under the provisions of 45 U.S.C. 438.

(d) In addition to the enforcement methods referred to in paragraphs (a), (b), and (c) of this section, FRA may also address violations of this Part by use of the emergency order, compliance order, and/or injunctive provisions of the Federal Railroad Safety Act.

§ 240.13 Information collection requirements.

(a) The information collection requirements of this Part are being reviewed by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have not yet been assigned an OMB control number.

(b) The information collection requirements are found in the following sections: § 240.101, § 240.103, § 240.105, § 240.107, § 240.109, § 240.111, § 240.113, § 240.115, § 240.117, § 240.119, § 240.121, § 240.123, § 240.125, § 240.127, § 240.129, § 240.201, § 240.205, § 240.207, § 240.209, § 240.211, § 240.213, § 240.215, § 240.219, § 240.221, § 240.223, § 240.227, § 240.229, § 240.301, § 240.303, § 240.305, § 240.307, § 240.309, § 240.401, § 240.403, § 240.405, § 240.407, § 240.411.

Subpart B—Component Elements of the Certification Process

§ 240.101 Certification program required.

(a) After September 17, 1991, each railroad in operation on that date and subject to this Part shall have in effect a written program for certifying the qualifications of locomotive engineers.

(b) A railroad commencing operations after September 17, 1991, shall have such a program in effect prior to commencing operations.

(c) After the pertinent date specified in paragraphs (e), (f), or (g) of § 240.201, each railroad shall have a certification program approved in accordance with § 240.103 that includes:

(1) A procedure for designating any person it determines to be qualified as a supervisor of locomotive engineers that complies with the criteria established in § 240.105;

(2) A designation of the classes of service that it determines will be used in compliance with the criteria established in § 240.107;

(3) A procedure for evaluating prior safety conduct that complies with the criteria established in § 240.109;

(4) A procedure for evaluating visual and hearing acuity that complies with the criteria established in § 240.121;

(5) A procedure for training that complies with the criteria established in § 240.123;

(6) A procedure for knowledge testing that complies with the criteria established in § 240.125;

(7) A procedure for skill performance testing that complies with the criteria established in § 240.127; and

(8) A procedure for monitoring operational performance that complies with the criteria established in § 240.129.

§ 240.103 Approval of design of individual railroad programs by FRA.

(a) Each railroad shall submit its written program and a description of how its program conforms to the specific requirements of this part in accordance with the procedures contained in appendix B and the following schedule:

(1) A Class I railroad (including National Railroad Passenger Corporation) and a railroad providing commuter service shall submit no later than November 15, 1991;

(2) A Class II railroad shall submit no later than May 1, 1992; and

(3) A Class III railroad (including a switching and terminal railroad or any other railroad not otherwise classified) shall submit no later than November 1, 1992.

(4) A railroad commencing operations after the pertinent date previously specified in this paragraph shall submit its certification program for approval at least 60 days before commencing operations.

(b) That submission shall state the railroad's election either:

(1) To accept responsibility for the training of student engineers and thereby obtain authority for that railroad to initially certify a person as an engineer in an appropriate class of service, or

(2) To recertify only engineers previously certified by other railroads. A railroad that elects to accept responsibility for the training of student engineers shall state in its submission whether it will conduct the training program or employ a training program conducted by some other entity on its behalf but adopted and ratified by that railroad.

(c) A railroad's program is considered approved and may be implemented thirty days after the required filing date (or the actual filing date) unless the Administrator notifies the railroad in writing that the program does not conform to the criteria set forth in this part.

(1) If the Administrator determines that the program does not conform, the Administrator will inform the railroad of the specific deficiencies.

(2) If the Administrator informs the railroad of deficiencies more than 30 days after the initial filing date, the original program may remain in effect until 30 days after approval of the revised program is received.

(d) A railroad shall resubmit its program within 30 days after the date of such notice of deficiencies. A failure to resubmit the program with the necessary revisions will be considered a failure to implement a program under this part.

(1) The Administrator will inform the railroad in writing whether its revised program conforms with this part.

(2) If the program does not conform, the railroad shall resubmit its program.

(e) A railroad that intends to materially modify its program after receiving initial FRA approval shall submit a description of how it intends to modify the program in conformity with the specific requirements of this Part at least 30 days prior to implementing such a change.

(1) A modification is material if it would affect the program's conformance with this part.

(2) The modification submission shall contain a description that conforms with the pertinent portion of the procedures contained in appendix B.

(3) The modification submission will be handled in accordance with the procedures of paragraphs (c) and (d) of this section as though it were a new program.

§ 240.105 Criteria for selection of designated supervisors of locomotive engineers.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) The railroad shall examine any person it is considering for qualification as a supervisor of locomotive engineers to determine that he or she:

(1) Knows and understands the requirements of this part;

(2) Can appropriately test and evaluate the knowledge and skills of locomotive engineers;

(3) Has the necessary supervisory experience to prescribe appropriate remedial action for any noted deficiencies in the training, knowledge or skills of a person seeking to obtain or retain certification; and

(4) Is a certified engineer.

§ 240.107 Criteria for designation of classes of service.

(a) Each railroad's program shall state which of the three classes of service, provided for in paragraph (b) of this section, that it will cover.

(b) A railroad may issue certificates for any or all of the following classes of service:

(1) Train service engineers,

(2) Locomotive servicing engineers, and

(3) Student engineers.

(c) The following operational constraints apply to each class of service:

(1) Train service engineers may operate locomotives singly or in multiples and may move them with or without cars coupled to them;

(2) Locomotive servicing engineers may operate locomotives singly or in multiples but may not move them with cars coupled to them; and

(3) Student engineers may operate only under direct and immediate supervision of an instructor engineer.

(d) Each railroad is authorized to impose additional conditions or operational restrictions on the service an engineer may perform beyond those identified in this section provided those conditions or restrictions are not inconsistent with this part.

§ 240.109 General criteria for eligibility based on prior safety conduct.

(a) Each railroad's program shall include criteria and procedures to implement this section.

(b) A railroad shall evaluate the prior safety conduct of any person it is considering for qualification as a locomotive engineer and the program shall require that a person is ineligible if the person has an adverse record of prior safety conduct as provided for in § 240.115, § 240.117, or § 240.119.

(c) The program shall require evaluation of data which reflect the person's prior safety conduct as a railroad employee and the person's prior safety conduct as an operator of a motor vehicle, provided that there is relevant prior conduct. The information to be evaluated shall include:

(1) The relevant data furnished from the evaluating railroad's own records, if the person was previously an employee of that railroad;

(2) The relevant data furnished by any other railroad formerly employing the person; and

(3) The relevant data furnished by any governmental agency with pertinent motor vehicle driving records.

(d) The railroad's process for evaluating information concerning prior safety conduct shall be designed to conform wherever necessary with the procedural requirements of § 240.111, § 240.113, § 240.115, § 240.117, § 240.119, and § 240.217.

(e) When evaluating a person's motor vehicle driving record or a person's railroad employment record, a railroad shall not consider information concerning motor vehicle driving incidents or prior railroad safety conduct that

(1) Occurred prior to the effective date of this rule; or

(2) Occurred at a time other than that specifically provided for in § 240.115, § 240.117 or § 240.119 of this subpart.

(f) A railroad's program shall provide a candidate for certification or recertification a reasonable opportunity to review and comment in writing on any record which contains information concerning the person's prior safety conduct, including information pertinent to determinations required under § 240.119 of this subpart, if the railroad believes the record contains information that could be sufficient to render the person ineligible for certification under this subpart.

(g) The opportunity for comment shall be afforded to the person prior to the railroad's rendering its eligibility decision based on that information. Any responsive comment furnished shall be retained by the railroad in accordance with § 240.215 of this part.

(h) The program shall include a method for a person to advise the railroad that he or she has never been a railroad employee or obtained a license to drive a motor vehicle. Nothing in this section shall be construed as imposing a duty or requirement that a person have prior railroad employment experience or obtain a motor vehicle driver's license in order to become a certified locomotive engineer.

(i) Nothing in this section, § 240.111, or § 240.113 shall be construed to prevent persons subject to this part from entering into an agreement that results in a railroad's obtaining the information needed for compliance with this subpart in a different manner than that prescribed in § 240.111 or § 240.113.

VOL 56 ISS 118 JE 19 1991 UMI

§ 240.111 Individual's duty to furnish data on prior safety conduct as motor vehicle operator.

(a) Except for initial certifications under paragraphs (b), (h), or (i) of § 240.201 or for persons covered by § 240.109(h), each person seeking certification or recertification under this part shall, within 180 days preceding the date of the railroad's decision on certification or recertification:

(1) Take the actions required by paragraphs (b) through (h) or paragraph (g) of this section to make information concerning his or her driving record available to the railroad that is considering such certification or recertification; and

(2) Take any additional actions, including providing any necessary consent required by State or Federal law to make information concerning his or her driving record available to that railroad.

(b) Each person seeking certification or recertification under this Part shall:

(1) Request, in writing, that the chief of each driver licensing agency identified in paragraph (c) of this section provide a copy of that agency's available information concerning his or her driving record to the railroad that is considering such certification or recertification; and

(2) Request, in accordance with the provisions of paragraph (d) or (e) of this section, that a check of the National Driver Register be performed to identify additional information concerning his or her driving record and that any resulting information be provided to that railroad.

(c) Each person shall request the information required under paragraph (b)(1) of this section from:

(1) The chief of the driver licensing agency which last issued that person a driver's license; and

(2) The chief of the driver licensing agency of any other state or states that issued or reissued him or her a driver's license within the preceding five years.

(d) Each person shall request the information required under paragraph (b)(2) of this section from the Chief, National Driver Register, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 in accordance with the procedures contained in appendix C unless the person's motor vehicle driving license was issued by one of the driver licensing agencies identified in appendix D.

(e) If the person's motor vehicle driving license was issued by one of the driver licensing agencies identified in appendix D, the person shall request the chief of that driver licensing agency to perform a check of the National Driver Register for the possible existence of additional information concerning his or her driving record and to provide the resulting information to the railroad.

(f) If advised by the railroad that a driver licensing agency or the National Highway Traffic Safety Administration has informed the railroad that additional information concerning that person's driving history may exist in the files of a state agency not previously contacted in accordance with this section, such person shall:

(1) Request in writing that the chief of the state agency which compiled the information provide a copy of the available information to the prospective certifying railroad; and

(2) Take any additional action required by State or Federal law to obtain that additional information.

(g) Any person who has never obtained a motor vehicle driving license is not required to comply with the provisions of paragraph (b) of this section but shall notify the railroad of that fact in accordance with procedures of the railroad that comply with § 240.109(d).

(h) The actions required for compliance with paragraph (a) of this section shall be undertaken within the 180 days preceding the date of the railroad's decision concerning certification or recertification.

§ 240.113 Individual's duty to furnish data on prior safety conduct as an employee of a different railroad.

(a) Except for initial certifications under paragraphs (b), (h), or (i) of § 240.201 or for persons covered by § 240.109(h), each person seeking certification or recertification under this part shall, within 180 days preceding the date of the railroad's decision on certification or recertification:

(1) Take the actions required by paragraph (b) of this section to make information concerning his or her prior railroad service record available to the railroad that is considering such certification or recertification; and

(2) Take any additional actions, including providing any necessary consent required by State or Federal law to make information concerning his or her service record available to that railroad.

(b) Each person seeking certification or recertification under this Part shall request, in writing, that the chief operating officer or other appropriate person of the former employing railroad provide a copy of that railroad's available information concerning his or her service record to the railroad that is considering such certification or recertification.

§ 240.115 Criteria for consideration of prior safety conduct as a motor vehicle operator.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) When evaluating a person's motor vehicle driving record, a railroad shall not consider information concerning motor vehicle driving incidents that occurred more than 36 months before the month in which the railroad is making its certification decision and shall only consider information concerning the following types of motor vehicle incidents:

(1) A conviction for, or completed state action to cancel, revoke, suspend, or deny a motor vehicle drivers license for, operating a motor vehicle while under the influence of or impaired by alcohol or a controlled substance; (2) A conviction for, or completed state action to cancel, revoke, suspend, or deny a motor vehicle driver's license for, refusal to undergo such testing as is required by State law when a law enforcement official seeks to determine whether a person is operating a vehicle while under the influence of alcohol or a controlled substance.

(c) If such an incident is identified,

(1) The railroad shall provide the data to the railroad's EAP Counselor, together with any information concerning the person's railroad service record, and shall refer the person for evaluation to determine if the person has an active substance abuse disorder;

(2) The person shall cooperate in the evaluation and shall provide any requested records of prior counseling or treatment for review exclusively by the EAP Counselor in the context of such evaluation; and

(3) If the person is evaluated as not currently affected by an active substance abuse disorder, the subject data shall not be considered further with respect to certification. However, the railroad shall, on recommendation of the EAP Counselor, condition certification upon participation in any needed aftercare and/or follow-up testing for alcohol or drugs deemed necessary by the EAP Counselor consistent with the technical standards specified in § 240.119(d)(3) of this part.

(4) If the person is evaluated as currently affected by an active substance abuse disorder, the person shall not be currently certified and the provisions of § 240.119(b) will apply.

§ 240.117 Criteria for consideration of operating rules compliance data.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A person who has demonstrated a failure to comply, as described in paragraph (e) of this section, with railroad rules and practices for the safe operation of trains shall not be currently certified as a locomotive engineer.

(c) A certified engineer who has demonstrated a failure to comply, as described in paragraph (e) of this section, with railroad rules and practices for the safe operation of trains shall have certification revoked.

(d) *Limitations on consideration of prior operating rule compliance data.* In determining whether a person may be or remain certified as a locomotive engineer, a railroad shall consider as operating rule compliance data only conduct described in paragraph (e) of this section that occurred within a period of 60 consecutive months prior to the determination. A review of an existing certification shall be initiated promptly upon the occurrence and documentation of any occurrence of conduct described in this paragraph.

(e) A railroad shall consider violations of its operating rules and practices that involve:

(1) Failure to control a locomotive or train in accordance with a signal indication;

(2) Failure to adhere to limitations concerning train speed;

(3) Failure to adhere to procedures for the safe use of train or engine brakes;

(4) Entering track segment without proper authority;

(5) Failure to comply with prohibitions against tampering with locomotive mounted safety devices; and

(6) Incidents of noncompliance with § 219.101 of this Chapter; however such incidents shall be considered as a violation only for the purposes of subsections (2) and (3) of paragraph (g) of this section.

(f) If in any single incident the person's conduct contravened more than one operating rule or practice, that event shall be treated as a single violation for the purposes of this section.

(g) A period of ineligibility described in this paragraph shall:

(1) Begin, for a person not currently certified, on the date of the railroad's written determination that the most recent incident has occurred; or

(2) Begin, for a person currently certified, on the date of the railroad's notification to the person that recertification has been denied or certification has been revoked; and

(3) Be determined according to the following standards:

(i) In the case of a single incident involving violation of one or more of the operating rules or practices described paragraphs (e)(1) through (e)(5) of this section, the person shall be ineligible to hold a certificate for a period of one month.

(ii) In the case of two separate incidents involving violations of one or more of the operating rules on practices described in paragraph (e) of this section that occurred within 36 months of each other, the person shall be ineligible to hold a certificate for a period of one year.

(iii) In the case of more than two such violations in any consecutive 60 month interval, the person shall be ineligible to hold a certificate for a period of five years.

(iv) Where, based on the occurrence of violations described in subparagraph (e)(6) of this section, different periods of ineligibility may result under the provisions of this section and § 240.119, the longer period of ineligibility shall control.

(h) *Future eligibility to hold certificate.* Only a person whose certification has been denied, suspended or revoked for a period of one year in accordance with the provisions of paragraph (g)(2) for reasons other than noncompliance with § 219.101 of this chapter shall be eligible for grant or reinstatement of the certificate prior to the expiration of the initial period of ineligibility. Such a person shall not be eligible for grant or reinstatement unless and until—

(1) The person has been evaluated by a designated supervisor of locomotive engineers and determined to have received adequate remedial training;

(2) The person has successfully completed any mandatory program of training or retraining, if that was determined to be necessary by the railroad prior to return to service; and

(3) At least one half the pertinent period of ineligibility specified in paragraph (g)(2) has elapsed.

§ 240.119 Criteria for consideration of data on substance abuse disorders and alcohol drug rules compliance.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) *Fitness requirement.* (1) A person who has an active substance abuse disorder shall not be currently certified as a locomotive engineer.

(2) Except as provided in paragraph (e) of this section, a certified engineer who is determined to have an active substance abuse disorder shall be suspended from certification. Consistent with other provisions of this part, certification may be reinstated as provided in paragraph (d) of this section.

(3) In the case of a current employee of the railroad evaluated as having an active substance abuse disorder (including a person identified under the procedures of § 240.115), the employee may, if otherwise eligible, voluntarily self-refer for substance abuse counseling or treatment under the policy required by § 219.403 of this chapter; and the railroad shall then treat the substance abuse evaluation as confidential except with respect to current ineligibility for certification.

(c) *Prior alcohol/drug conduct; Federal rule compliance.* (1) In determining whether a person may be or remain certified as a locomotive engineer, a railroad shall consider conduct described in paragraph (c)(2) of this section that occurred within a period of 60 consecutive months prior to the review. A review of certification shall be initiated promptly upon the occurrence and documentation of any incident of conduct described in this paragraph.

(2) A railroad shall consider any violation of § 219.101 or § 219.102 of this chapter and any refusal or failure to provide a breath or body fluid sample for testing under the requirements of Part 219 of this chapter when instructed to do so by a railroad representative.

(3) A period of ineligibility described in this paragraph shall:

(i) Begin, for a person not currently certified, on the date of the railroad's written determination that the most recent incident has occurred; or

(ii) Begin, for a person currently certified, on the date of the railroad's notification to the person that recertification has been denied or certification has been revoked; and

(4) The period of ineligibility described in this paragraph shall be determined in accordance with the following standards:

(i) In the case of a single violation of § 219.102 of this chapter, the person shall be ineligible to hold a certificate during evaluation and any required primary treatment as described in paragraph (d) of this section. In the case of two violations of § 219.102, the person shall be ineligible to hold a certificate for a period of two years. In the case of more than two such violations, the person shall be ineligible to hold a certificate for a period of five years.

(ii) In the case of one violation of § 219.102 of this chapter and one violation of § 219.101 of this chapter, the

VOL 56 ISS 118 JE 19 1991 UMI

person shall be ineligible to hold a certificate for a period of three years.

(iii) In the case of one violation of § 219.101 of this chapter, the person shall be ineligible to hold a certificate for a period of 9 months (unless identification of the violation was through a qualifying "co-worker report" as described in § 219.405 of this chapter and the engineer waives investigation, in which case the certificate shall be deemed suspended during evaluation and any required primary treatment as described in paragraph (d)). In the case of two or more violations of § 219.101, the person shall be ineligible to hold a certificate for a period of five years.

(iv) In the case of a refusal or failure to provide a breath or body fluid sample for testing under the requirements of part 219 of this chapter when instructed to do so by a railroad representative, the refusal or failure shall be treated for purposes of ineligibility under this paragraph in the same manner as a violation of—

(A) § 219.102, in the case of a refusal or failure to provide a urine specimen for testing; or

(B) § 219.101, in the case of a refusal or failure to provide a breath sample (subpart D), or a blood specimen for mandatory post-accident toxicological testing (subpart C)).

(d) *Future eligibility to hold certificate following alcohol/drug violation.* The following requirements apply to a person who has been denied certification or who has had certification suspended or revoked as a result of conduct described in paragraph (c) of this section:

(1) The person shall not be eligible for grant or reinstatement of the certificate unless and until the person has—

(i) Been evaluated by an EAP Counselor to determine if the person currently has an active substance abuse disorder;

(ii) Successfully completed any program of counseling or treatment determined to be necessary by the EAP Counselor prior to return to service; and

(iii) Presented a urine sample for testing under Subpart H of this Part that tested negative for controlled substances assayed and has tested negative for alcohol under paragraph (d)(4) of this section.

(2) An engineer placed in service or returned to service under the above-stated conditions shall continue in any program of counseling or treatment deemed necessary by the EAP Counselor and shall be subject to a reasonable program of follow-up alcohol and drug testing without prior notice for a period of not more than 60 months following return to service. Follow-up tests shall include not fewer than 6 alcohol tests and 6 drug tests during the first 12 months following return to service.

(3) Return-to-service and follow-up drug tests shall be performed consistent with the requirements of subpart H of part 219 of this chapter.

(4) Return-to-service and follow-up alcohol tests shall consist of—

(i) Analysis of a breath specimen for alcohol under safeguards consistent with those specified for reasonable cause breath testing under subpart C of part 219 of this chapter; or

(ii) Analysis of a blood specimen for alcohol in the same manner as prescribed in § 219.303(c) of this chapter. Alcohol tests shall be conducted while the employee is in duty status. However, this paragraph shall not be construed to require compensation of an employee or applicant for any period devoted exclusively to such tests.

(5) Satisfaction of the more stringent return-to-service requirements of this paragraph shall also be deemed to satisfy the requirements of § 219.104(d) of this chapter.

(6) This paragraph does not create an entitlement to utilize the services of a railroad EAP Counselor, to be afforded leave from employment for counseling or treatment, or to employment as a locomotive engineer. Nor does it restrict any discretion available to the railroad to take disciplinary action based on conduct described herein.

(e) *Confidentiality protected.* Nothing in this part shall affect the responsibility of the railroad under § 219.403 of this chapter ("Voluntary Referral Policy") to treat voluntary referrals for substance abuse counseling and treatment as confidential; and the certification status of an engineer who is successfully assisted under the procedures of that section shall not be adversely affected. However, the railroad shall include in its voluntary referral policy required to be issued pursuant to § 219.403 of this chapter a provision that, at least with respect to a certified locomotive engineer or a candidate for certification, the policy of confidentiality is waived (to the extent that the railroad shall receive from the EAP Counselor official notice of the substance abuse disorder and shall suspend or revoke the certification, as appropriate) if the person at any time refuses to cooperate in a recommended course of counseling or treatment.

§ 240.121 Criteria for vision and hearing acuity data.

(a) Each railroad's program shall include criteria and procedures implementing this section.

(b) *Fitness Requirement.* A person who does not have visual acuity and hearing acuity that meets or exceeds the levels prescribed in this section shall not, except as permitted by paragraph (e) of this section, currently be certified as a locomotive engineer.

(c) Except as provided in paragraph (e), each person shall have visual acuity that meets or exceeds the following thresholds:

(1) for distant viewing either

(i) Distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or

(ii) Distant visual acuity separately corrected to at least 20/40 (Snellen) with corrective lenses and distant binocular acuity of at least 20/40 (Snellen) in both eyes with or without corrective lenses;

(2) a field of vision of at least 70 degrees in the horizontal meridian in each eye; and

(3) the ability to recognize and distinguish between the colors of signals.

(d) Except as provided in paragraph (e) of this section, each person shall have hearing acuity that meets or exceeds the following thresholds when tested by use of an audiometric device (calibrated to American National Standard Specification for Audiometers, S3.6–1969): the person does not have an average hearing loss in the better ear greater than 40 decibels at 500Hz, 1,000 Hz, and 2,000 Hz with or without use of a hearing aid.

(e) A person not meeting the thresholds in paragraphs (c) and (d) of this section may be subject to further medical evaluation by a railroad's medical examiner to determine that person's ability to safely operate a locomotive. If the medical examiner concludes that, despite not meeting the threshold(s), the person has the ability to safely operate a locomotive, the person may be certified as a locomotive engineer and such certification conditioned on any special restrictions the medical examiner determines in writing to be necessary.

§ 240.123 Criteria for initial and continuing education.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A railroad shall provide for the continuing education of certified locomotive engineers to ensure that each engineer maintains the necessary knowledge, skill and ability concerning personal safety, operating rules and practices, mechanical condition of equipment, methods of safe train handling (including familiarity with

physical characteristics), and relevant Federal safety rules.

(c) A railroad that elects to train a previously untrained person to be a locomotive engineer shall provide initial training which, at a minimum:

(1) is composed of classroom, skill performance, and familiarization with physical characteristics components;

(2) includes both knowledge and performance skill testing;

(3) is conducted under the supervision of a qualified class instructor;

(4) is subdivided into segments or periods of appropriate duration to effectively cover the following subject matter areas:

(i) Personal safety,

(ii) Railroad operating rules,

(iii) Mechanical condition of equipment,

(iv) Train handling procedures (including use of locomotive and train brake systems),

(v) Familiarization with physical characteristics including train handling, and

(vi) Compliance with Federal regulations;

(5) is conducted so that the performance skill component shall

(i) Be under the supervision of a qualified instructor engineer located in the same control compartment whenever possible;

(ii) Place the student engineer at the controls of a locomotive for a significant portion of the time; and

(iii) Permit the student to experience whatever variety of types of trains are normally operated by the railroad.

§ 240.125 Criteria for testing knowledge.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A railroad shall have procedures for testing a person being evaluated for qualification as a locomotive engineer in either train or locomotive service to determine that the person has sufficient knowledge of the railroad's rules and practices for the safe operation of trains.

(c) The testing methods selected by the railroad shall be:

(1) designed to examine a person's knowledge of the railroad's rules and practices for the safe operation of trains;

(2) objective in nature;

(3) administered in written form;

(4) cover the following subjects:

(i) Personal safety practices;

(ii) Operating practices;

(iii) Equipment inspection practices;

(iv) Train handling practices including familiarity with the physical characteristics of the territory; and

(v) compliance with Federal safety rules;

(5) Sufficient to accurately measure the person's knowledge of the covered subjects; and

(6) Conducted without open reference books or other materials except to the degree the person is being tested on his or her ability to use such reference books or materials.

(d) The conduct of the test shall be documented in writing and the documentation shall contain sufficient information to identify the relevant facts relied on for evaluation purposes.

§ 240.127 Criteria for examining skill performance.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A railroad shall have procedures for examining the performance skills of a person being evaluated for qualification as a locomotive engineer in either train or locomotive service to determine whether the person has the skills to safely operate locomotives and/or trains, including the proper application of the railroad's rules and practices for the safe operation of locomotives or trains, in the most demanding class or type of service that the person will be permitted to perform.

(c) The testing procedures selected by the railroad shall be:

(1) Designed to examine a person's skills in safely operating locomotives or trains including the proper application of the railroad's rules and practices for the safe operation of locomotives or trains when performing the most demanding class or type of service that the person will be permitted to perform;

(2) Conducted by a designated supervisor of locomotive engineers;

(3) Cover the following subjects during the test period

(i) Operating practices;

(ii) Equipment inspection practices;

(iii) Train handling practices; and

(iv) Compliance with Federal safety rules;

(4) Be of sufficient length to effectively evaluate the person's ability to operate trains; and

(5) Conducted when the person either

(i) Is at the controls of the type of train normally operated on that railroad or segment of railroad and which this person might be permitted or required by the railroad to operate in the normal course of events after certification or

(ii) Is at the controls of a Type I or Type II simulator programmed to replicate the responsive behavior of the type of train normally operated on that railroad or segment of railroad and which this person might be permitted or required by the railroad to operate in the normal course of events after certification.

(d) The conduct of the test shall be documented in writing by the designated supervisor and the documentation shall contain:

(1) The relevant facts concerning the train being operated;

(2) The constraints applicable to its operation; and

(3) The factors observed and relied on for evaluation purposes by the designated supervisor.

§ 240.129 Criteria for monitoring operational performance of certified engineers.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A railroad shall have procedures for monitoring the operational performance of those it has determined as qualified as a locomotive engineer in either train or locomotive service.

(c) The procedures shall:

(1) Be designed to determine that the person possesses and routinely employs the skills to safely operate locomotives and/or trains, including the proper application of the railroad's rules and practices for the safe operation of locomotives and trains;

(2) Be designed so that each engineer shall be annually monitored by a designated supervisor of locomotive engineers;

(3) Be designed so that the locomotive engineer is either accompanied by the designated supervisor for a reasonable length of time or has his or her train handling activities electronically recorded by a train operations event recorder;

(d) The procedures may be designed so that the locomotive engineer being monitored either

(i) Is at the controls of the type of train normally operated on that railroad or segment of railroad and which this person might be permitted or required by the railroad to operate in the normal course of events after certification or

(ii) Is at the controls of a Type I or Type II simulator programmed to replicate the responsive behavior of the type of train normally operated on that railroad or segment of railroad and which this person might be permitted or required by the railroad to operate in the normal course of events after certification.

(e) The testing and examination procedures selected by the railroad for the conduct of a monitoring program shall be:

VOL 56 ISS 118 JE 19 1991 UMI

(1) Designed so that each locomotive engineer shall be given at least one unannounced test each calendar year.

(2) Designed to test engineer compliance with provisions of the railroad's operating rules that require response to signals that display less than a "clear" aspect, if the railroad operates with a signal system that must comply with part 236 of this chapter;

(3) Designed to test engineer compliance with provisions of the railroad's operating rules, timetable or other mandatory directives that require affirmative response by the locomotive engineer to less favorable conditions than that which existed prior to initiation of the test;

(4) Designed to test engineer compliance with provisions of the railroad's operating rules, timetable or other mandatory directives violation of which by engineers were cited by the railroad as the cause of train accidents or train incidents in accident reports filed in compliance with part 225 of this Chapter in the preceding calendar year;

(5) Designed so that the administration of these tests is effectively distributed throughout whatever portion of a 24-hour day that the railroad conducts its operations; and

(6) Designed so that individual tests are administered without prior notice to the engineer being tested.

Subpart C—Implementation of the Certification Process

§ 240.201 Schedule for implementation.

(a) After October 30, 1991, each railroad in operation on that date shall designate in writing any person(s) it deems qualified as a designated supervisor of locomotive engineers. Each person so designated shall have demonstrated to the railroad through training, testing or prior experience that he or she has the knowledge, skills, and ability to be a designated supervisor of locomotive engineers.

(b) No later than November 1, 1991, each railroad shall designate in writing all persons that it will deem to be qualified as certified locomotive engineers for the purpose of initial compliance with paragraph (d) of this section, except as provided for in paragraph (h) of this section.

(1) Each person so designated shall have demonstrated to the railroad through training, testing or prior experience that he or she has the knowledge and skills to be a certified locomotive engineer.

(2) Each railroad shall issue, no later than December 31, 1991, a certificate that complies with § 240.223 to each person that it designates as qualified under the provisions of paragraph (b) of this section.

(c) No railroad shall permit or require a person, designated as qualified for certification under the provisions of paragraph (b) of this section, to perform service as a certified locomotive or train service engineer for more than the 30-month period beginning on the pertinent date for compliance with the mandatory procedures for testing and evaluation set forth in the applicable provisions of paragraph (a), (f) or (g) of this section unless that person has been determined to be qualified in accordance with procedures that comply with subpart C.

(d) After December 31, 1991, no railroad shall permit or require any person to operate a locomotive in any class of locomotive or train service unless that person has been certified as a qualified locomotive engineer and issued a certificate that complies with § 240.223.

(e) After December 31, 1991, no Class I railroad (including the National Railroad Passenger Corporation) or railroad providing commuter service shall designate any person it deems qualified as a designated supervisor of locomotive engineers or initially certify or recertify a person as a locomotive engineer in either locomotive or train service unless that person has been tested, evaluated, and determined to be qualified in accordance with procedures that comply with subpart C.

(f) After May 31, 1992 no Class II railroad shall designate any person it deems qualified as a designated supervisor of locomotive engineers or initially certify or recertify a person as a locomotive engineer in any class of locomotive or train service unless that person has been tested, evaluated and determined to be qualified in accordance with procedures that comply with subpart C.

(g) After November 30, 1992 no Class III railroad (including a switching and terminal or other railroad not otherwise classified) shall designate any person it deems qualified as a designated supervisor of locomotive engineers or initially certify or recertify a person as a locomotive engineer in any class of locomotive or train service unless that person has been tested, evaluated and determined to be qualified in accordance with procedures that comply with subpart C.

(h) A railroad may continue to designate any person it deems qualified as a designated supervisor of locomotive engineers or as a certified engineer, on the basis of paragraph (b) determinations, prior to the pertinent date by which a railroad of its class must comply with the procedures for testing and evaluating persons required under subpart C. Each person designated as a locomotive engineer shall be issued a certificate that complies with § 240.223 prior to being required or permitted to operate a locomotive.

(i) A railroad commencing operations prior to the pertinent date for compliance by a railroad of its class may designate any person it deems qualified as a designated supervisor of locomotive engineers or as a certified locomotive engineer on the basis of paragraph (b) until the pertinent date for compliance with the procedures for testing and evaluating required under subpart C. Each person designated as a locomotive engineer shall be issued a certificate that complies with § 240.223 prior to being required or permitted to operate a locomotive.

§ 240.203 Determinations required as a prerequisite to certification.

(a) Except as provided in paragraph (c), after the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of service, shall, in accordance with its FRA-approved program determine in writing that:

(1) The individual meets the eligibility requirements of §§ 240.15, 240.117 and 240.119; and

(2) The individual meets the vision and hearing acuity standards of § 240.121;

(3) The individual has the necessary knowledge, as demonstrated by successfully completing a test that meets the requirements of § 240.125;

(4) The individual has the necessary applied knowledge and operating performance skills, as demonstrated by successfully completing an operational performance test that meets the requirements of § 240.127; and

(5) Where a person has not previously been certified, that the person has completed a training program that meets the requirements of § 240.123.

(b) A railroad may certify a person as a student engineer after determining that the person meets the vision and hearing acuity standards of § 240.121. A railroad may subsequently certify that student engineer as either a locomotive servicing engineer or a train service engineer without further review of his or her acuity status provided it determines that:

(1) The person successfully completed a training program that complies with § 240.123;

(2) The person meets the eligibility requirements of §§ 240.109 and 240.119; and

(3) A period of not more than twenty-four months has elapsed since the student engineer certification was issued.

§ 240.205 Procedures for determining eligibility base on prior safety conduct.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of service, shall determine that the person meets the eligibility requirements of § 240.115 involving prior conduct as a motor vehicle operator, § 240.117 involving prior conduct as a railroad worker, and § 240.119 involving substance abuse disorders and alcohol/drug rules compliance.

(b) In order to make the determination required under paragraph (a) of this section, a railroad shall have on file documents pertinent to the determinations referred to in paragraph (a) of this section, including a written document from its EAP Counselor either a document reflecting his or her professional opinion that the person has been evaluated as not currently affected by a substance abuse disorder or that the person has been evaluated as affected by an active substance abuse disorder and is ineligible for certification.

§ 240.207 Procedures for making the determination on vision and hearing acuity.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of service, shall determine that the person meets the standards for visual acuity and hearing acuity prescribed in § 240.121.

(b) In order to make the determination required under paragraph (a), a railroad shall have on file either:

(1) a medical examiner's certificate that the individual has been medically examined and meets these acuity standards; or

(2) a written document from its medical examiner documenting his or her professional opinion that the person does not meet one or both acuity standards and stating the basis for his or her determination that

(i) The person can nevertheless be certified under certain conditions or

(ii) The person's acuity is such that he or she cannot safely operate a locomotive even with conditions attached.

(c) Any examination required for compliance with this section shall be performed by or under the supervision of a medical examiner or a licensed physician's assistant such that:

(1) A licensed optometrist or a technician responsible to that person may perform the portion of the examination that pertains to visual acuity; and

(2) A licensed or certified audiologist or a technician responsible to that person may perform the portion of the examination that pertains to hearing acuity.

(d) If the examination required under this section discloses that the person needs corrective lenses or a hearing aid, or both, either to meet the threshold acuity levels established in § 240.121 or to meet a lower threshold determined by the railroad's medical examiner to be sufficient to safely operate a locomotive or train on that railroad, that fact shall be noted on the certificate issued in accordance with the provisions of this part.

(e) Any person with such a certificate notation shall use the relevant corrective device(s) while operating a locomotive in locomotive or train service unless the railroad's medical examiner subsequently determines in writing that the person can safely operate without using the device.

§ 240.209 Procedures for making the determination on knowledge.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of train or locomotive service, shall determine that the person has, in accordance with the requirements of § 240.125 of this Part, demonstrated sufficient knowledge of the railroad's rules and practices for the safe operation of trains.

(b) In order to make the determination required by paragraph (a) a railroad shall have written documentation showing that the person either

(i) Exhibited his or her knowledge by achieving a passing grade in testing that complies with this Part or

(ii) Did not achieve a passing grade in such testing.

(c) If a person fails to achieve a passing score under the testing procedures required by this Part no railroad shall permit or require that person to operate a locomotive as a locomotive or train service engineer prior to that person's achieving a passing score during a reexamination of his or her knowledge.

§ 240.211 Procedures for making the determination on performance skills.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of train or locomotive service, shall determine that the person has demonstrated, in accordance with the requirements of § 240.127 of this Part, the skills to safely operate locomotives or locomotives and trains, including the proper application of the railroad's rules and practices for the safe operation of locomotives or trains, in the most demanding class or type of service that the person will be permitted to perform.

(b) In order to make this determination, a railroad shall have written documentation showing the person either

(i) Exhibited his or her knowledge by achieving a passing grade in testing that complies with this part or

(ii) Did not achieve a passing grade in such testing.

(c) If a person fails to achieve a passing score under the testing and evaluation procedures required by this part, no railroad shall permit or require that person to operate a locomotive as a locomotive or train service engineer prior to that person's achieving a passing score during a reexamination of his or her performance skills.

(d) No railroad shall permit a designated supervisor of locomotive engineers to test, examine or evaluate his or her own performance skills when complying with this section.

§ 240.213 Procedures for making the determination on completion of training program.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to the initial issuance of a certificate to any person as a train or locomotive service engineer, shall determine that the person has, in accordance with the requirements of § 240.123 of this Part, the knowledge and skills to safely operate a locomotive or train in the most demanding class or type of service that the person will be permitted to perform.

(b) In making this determination, a railroad shall have written documentation showing that:

(1) The person completed a training program that complies with § 240.123 of this part;

(2) The person demonstrated his or her knowledge and skills by achieving a passing grade under the testing and evaluation procedures of that training program; and

(3) The person is familiar with the physical characteristics of the railroad or its pertinent segments.

§ 240.215 Retaining information supporting determinations.

(a) After the pertinent date in paragraphs (e), (f) or (g) of § 240.201, a railroad that issues, denies, or revokes a certificate after making the determinations required under § 240.203 shall maintain a record for each certified engineer or applicant for certification that contains the information the railroad relied on in making the determinations.

(b) The information concerning eligibility that the railroad shall retain includes:

(1) Any relevant data from the railroad's records concerning the person's prior safety conduct;

(2) Any relevant data furnished by another railroad;

(3) Any relevant data furnished by a governmental agency concerning the person's motor vehicle driving record; and

(4) Any relevant data furnished by the person seeking certification concerning his or her eligibility.

(c) The information concerning vision and hearing acuity that the railroad shall retain includes:

(1) The relevant test results data concerning acuity; and,

(2) If applicable, the relevant data concerning the professional opinion of the railroad's medical examiner on the adequacy of the person's acuity.

(d) The information concerning demonstrated knowledge that the railroad shall retain includes:

(1) Any relevant data from the railroad's records concerning the person's success or failure of the passage of knowledge test(s); and

(2) A sample copy of the written knowledge test or tests administered.

(e) The information concerning demonstrated performance skills that the railroad shall retain includes:

(1) The relevant data from the railroad's records concerning the person's success or failure on the performance skills test(s) that documents the relevant operating facts on which the evaluation is based including the observations and evaluation of the designated supervisor of locomotive engineers;

(2) If a railroad relies on the use of a locomotive operations simulator to conduct the performance skills testing required under this part, the relevant data from the railroad's records concerning the person's success or failure on the performance skills test(s) that documents the relevant operating facts on which the determination was based including the observations and evaluation of the designated supervisor of locomotive engineers; and;

(3) the relevant data from the railroad's records concerning the person's success or failure on tests the railroad performed to monitor the engineer's operating performance in accordance with § 240.129.

(f) If a railroad is relying on successful completion of an approved training program conducted by another entity, the relying railroad shall maintain a record for each certified engineer that contains the relevant data furnished by the training entity concerning the person's demonstration of knowledge and performance skills and relied on by the railroad in making its determinations.

(g) If a railroad is relying on a certification decision initially made by another railroad, the relying railroad shall maintain a record for each certified engineer that contains the relevant data furnished by the other railroad which it relied on in making its determinations.

(h) All records required under this section shall be retained for a period of six years from the date of the certification, recertification, denial or revocation decision and shall be made available to FRA representatives upon request during normal business hours.

(i) It shall be unlawful for any railroad to knowingly or any individual to willfully:

(1) Make, cause to be made, or participate in the making of a false entry on the record(s) required by this section; or

(2) Otherwise falsify such records through material misstatement, omission, or mutilation.

§ 240.217 Time limitations for making determinations.

(a) After the pertinent date in paragraphs (e), (f) or (g) of § 240.201, a railroad shall not certify or recertify a person as a qualified locomotive engineer in any class of train or engine service, if the railroad is making:

(1) A determination concerning eligibility and the eligibility data being relied on were furnished more than 180 days before the date of the railroad's certification decision;

(2) A determination concerning visual and hearing acuity and the medical examination being relied on was conducted more than 180 days before the date of the railroad's certification decision;

(3) A determination concerning demonstrated knowledge and the knowledge examination being relied on was conducted more than 360 days before the date of the railroad's certification decision; or

(4) A determination concerning demonstrated performance skills and the performance skill testing being relied on was conducted more than 360 days before the date of the railroad's certification decision;

(b) The time limitations of paragraph (a) do not apply to a railroad that is making a certification decision in reliance on determinations made by another railroad in accordance with § 240.227 or § 240.229.

(c) Except as provided in § 240.201 concerning implementation dates for initial certification decisions and paragraph (b) of this section, no railroad shall:

(1) Certify a person as a qualified locomotive engineer for an interval of more that 36 months; or

(2) Rely on a certification issued by another railroad that is more than 12 months old.

(d) Except as provided for in § 240.201 concerning initial implementation of the program, a railroad shall issue each person designated as a certified locomotive engineer a certificate that complies with § 240.223 no later than 30 days from the date of its decision to certify or recertify that person.

§ 240.219 Denial of Certification.

(a) A railroad shall notify a candidate for certification or recertification of information known to the railroad that forms the basis for denying the person certification and provide the person a reasonable opportunity to explain or rebut that adverse information in writing prior to denying certification.

(b) This section does not require further opportunity to comment if the railroad's denial is based solely on factors addressed by §§ 240.115, 240.117, and 240.119 and the opportunity to comment afforded by those sections has been provided.

(c) If it denies a person certification or recertification, a railroad shall notify the person of the adverse decision and explain, in writing, the basis for its denial decision. The document explaining the basis for the denial shall be mailed or delivered to the person within 10 days after the railroad's decision and shall give the date of the decision.

§ 240.221 Identification of qualified persons.

(a) After November 1, 1991, a railroad shall maintain a written record identifying each person designated by it as a supervisor of locomotive engineers.

(b) After November 1, 1991, a railroad shall maintain a written record identifying each person designated as a certified locomotive engineer. That listing of certified engineers shall indicate the class of service the railroad determines each person is qualified to perform and date of the railroad's certification decision.

(c) If a railroad is responsible for controlling joint operations territory, the listing shall include person(s) certified in accordance with § 240.229.

(d) The listing required by paragraphs (a), (b), and (c) shall be updated at least annually.

(e) The record required under this section shall be kept at the divisional or regional headquarters of the railroad and shall be available for inspection or copying by FRA during regular business hours.

(f) A railroad may obtain approval from FRA to maintain this record electronically or maintain this record at the railroad's general offices, or both. Requests for such approval shall be filed in writing with the Associate Administrator for Safety and contain sufficient information to explain how FRA will be given access to the data that is fully equivalent to that created by compliance with paragraph (e).

§ 240.222 Criteria for the certificate.

(a) As a minimum, each certificate issued in compliance with this part shall:

(1) Identify the railroad that is issuing it;

(2) Indicate that the railroad, acting in conformity with this part, has determined that the person to whom it is being issued has been determined to be qualified to operate a locomotive;

(3) Identify the person to whom it is being issued (including the person's name, date of birth and employee identification number, and either a physical description or photograph of the person);

(4) Identify any conditions or limitations, including the class of service or conditions to ameliorate vision or hearing acuity deficiencies, that restrict the person's operational authority;

(5) Show the date of its issuance;

(6) Be signed by a supervisor of locomotive engineers or other individual designated in accordance with paragraph (b) of this section;

(7) Show on the date of the person's last operating performance test as required by § 240.129 and § 240.303; and

(8) Be of sufficiently small size to permit being carried in an ordinary pocket wallet.

(b) Each railroad to which this part applies shall designate in writing any person, other than a supervisor of locomotive engineers, that it authorizes to sign the certificates described in this section. The designation can identify such persons by name or job title.

(c) Nothing in paragraph (a) of this section shall prohibit any railroad from including additional information on the certificate or supplementing the certificate through other documents.

(d) It shall be unlawful for any railroad to knowingly or any individual to willfully:

(1) Make, cause to be made, or participate in the making of a false entry on that certificate; or

(2) Otherwise falsify that certificate through material misstatement, omission, or mutilation.

§ 240.225 Reliance on qualification determinations made by other railroads.

After December 31, 1991, any railroad that is considering certification of a person as a qualified engineer may rely on determinations made by another railroad concerning that person's qualifications. A railroad relying on another's certification shall determine that:

(a) The prior certification is still valid in accordance with the provisions of §§ 240.201, 240.217, and 240.307;

(b) The prior certification was for the same classification of locomotive or train service being issued under this section;

(c) The person has received training on and visually observed the physical characteristics of the new territory in accordance with § 240.123;

(d) The person has demonstrated the necessary knowledge concerning its operating rules in accordance with § 240.125.

(e) The person has demonstrated the necessary performance skills concerning its operating rules in accordance with § 240.127.

§ 240.227 Reliance on qualification requirements of other countries.

(a) A railroad that conducts joint operations with a Canadian railroad may certify, for the purposes of compliance with this part, that a person is qualified to be a locomotive or train service engineer provided it determines that:

(1) The person is employed by the Canadian railroad; and

(2) The person meets or exceeds the qualifications standards issued by Transport Canada for such service.

(b) Any Canadian railroad that is required to comply with this regulation may certify that a person is qualified to be a locomotive or train service engineer provided it determines that:

(1) The person is employed by the Canadian railroad; and

(2) The person meets or exceeds the qualifications standards issued by Transport Canada for such service.

§ 240.229 Requirements for joint operations territory.

(a) After December 31, 1991, no railroad that is responsible for controlling the conduct of joint operations with another railroad shall permit or require any person to operate a locomotive in any class of train or engine service unless that person has been certified as a qualified locomotive engineer for the purposes of joint operations and issued a certificate that complies with § 240.223.

(b) Each railroad that is responsible for controlling the conduct of joint operations with another railroad shall certify a person as a qualified locomotive engineer for the purposes of joint operations either by making the determinations required under subpart C of this part or by relying on the certification issued by another railroad under this part.

(c) If the controlling railroad relies on the certification issued by another railroad, the controlling railroad shall determine:

(1) That the person has been certified as a qualified engineer under the provisions of this Part by the railroad which employs that individual;

(2) That the person certified as a locomotive engineer by the other railroad has demonstrated the necessary knowledge concerning the controlling railroad's operating rules, if the rules are different;

(3) That the person certified as a locomotive engineer by the other railroad has the necessary operating skills concerning the joint operations territory; and

(4) That the person certified as a locomotive engineer by the other railroad has the necessary familiarity with the physical characteristics for the joint operations territory.

(d) A railroad that controls joint operations and certifies locomotive engineers from a different railroad may comply with the requirements of paragraph (a) of this section by noting its supplemental certification decision on the original certificate as provided for in § 240.223(c).

(e) A railroad responsible for controlling the conduct of joint operations with another railroad shall be deemed to be in compliance with paragraph (a) of this section when it provides a qualified person to accompany a locomotive engineer who

VOL 56 ISS 118 JE 19 1991 UMI

VOL
56
ISS
118
JE
19
1991
UMI

lacks joint operations certification during that engineer's operations in joint operations territory. As used in this section qualified person means either a designated supervisor of locomotive engineers or a certified train service engineer determined by the controlling railroad to have the necessary knowledge concerning the controlling railroad's operating rules and to have the necessary operating skills including familiarity with its physical characteristics concerning the joint operations territory.

Subpart D—Administration of the Certification Programs

§ 240.301 Replacement of certificates.

A railroad shall have a system for the prompt replacement of lost, stolen or mutilated certificates and that system shall be reasonably accessible to certified locomotive engineers in need of a replacement certificate.

§ 240.303 Operational monitoring requirements.

(a) After December 31, 1991, each railroad to which this part applies shall, prior to FRA approval of its program in accordance with § 240.201, have a program to monitor the conduct of its certified locomotive engineers by performing both operational monitoring observations and by conducting unannounced operating rules compliance tests.

(b) The program shall be conducted so that each locomotive engineer shall be given at least one operational monitoring observation by a qualified supervisor of locomotive engineers in each calendar year.

(c) The program shall be conducted so that each locomotive engineer shall be given at least one unannounced compliance test each calendar year.

(d) The unannounced test program shall:

(1) Test engineer compliance with one or more provisions of the railroad's operating rules that require response to signals that display less than a "clear" aspect, if the railroad operates with a signal system that must comply with part 236 of this chapter;

(2) Test engineer compliance with one or more provisions of the railroad's operating rules, timetable or other mandatory directives that require affirmative response by the locomotive engineer to less favorable conditions than that which existed prior to initiation of the test;

(3) Test engineer compliance with provisions of the railroad's operating rules, timetable or other mandatory directives the violations of which by engineers were cited by the railroad as the cause of train accidents or train incidents in accident reports filed in compliance with part 225 of this chapter for the preceding year;

(4) Be conducted that so that the administration of these tests is effectively distributed throughout whatever portion of a 24-hour day that the railroad conducts its operations;

(5) be conducted so that individual tests are administered without prior notice to the locomotive engineer being tested; and

(6) be conducted so that the results of the test are recorded on the certificate and entered on the record established under § 240.215 within 30 days of the day the test is administered.

§ 240.305 Prohibited conduct by certified engineers.

After December 31, 1991,

(a) It shall be unlawful to:

(1) Operate a locomotive or train at a speed that exceeds the maximum authorized limit by at least 10 miles per hour or exceeds the maximum speed by more than one half of the authorized speed, whichever is less;

(2) Operate a locomotive or train past any signal, without completely stopping the locomotive or train, when that signal requires a complete stop before passing it; or

(3) Fail to comply with any mandatory directive concerning the movement of a locomotive or train by entering a segment of track without authority.

(b) Each locomotive engineer who has received a certificate required under this part shall:

(1) Have that certificate in his or her possession while on duty as an engineer; and

(2) Display that certificate upon the receipt of a request to do so from

(i) A representative of the Federal Railroad Administration,

(ii) An officer of the issuing railroad, or

(iii) An officer of another railroad when operating a locomotive or train in joint operations territory.

(c) Any locomotive engineer who is notified or called to operate a locomotive or train that would cause him or her to exceed the limits set forth in subpart B shall immediately notify the railroad that he or she is not qualified to perform that anticipated service.

(d) During the duration of any certification interval, a locomotive engineer who has a current certificate from more than one railroad shall immediately notify the other certifying railroad(s) if he or she is denied recertification by a railroad or has his or her certification revoked by a railroad.

(e) Nothing in this section shall be deemed to alter a certified locomotive engineer's duty to comply with other provisions of this chapter concerning railroad safety.

§ 240.307 Revocation of certification.

(a) A railroad that issues a person certification or recertification as a qualified locomotive engineer and, during that certification interval, acquires information which convinces the railroad that the person no longer meets the qualification requirements of this part, shall revoke the person's certificate as a qualified locomotive engineer.

(b) Pending a revocation determination under this section, the railroad shall:

(1) Upon receipt of reliable information indicating the person's lack of qualification under this part, immediately suspend the person's certificate;

(2) Prior to or upon suspending the person, provide notice of the reason for this suspension, the pending revocation, and an opportunity for hearing before a presiding officer other than the charging official;

(3) Convene the hearing within ten calendar days of the suspension when so demanded by the person;

(4) Determine, on the record of the hearing, whether the person no longer meets the qualification requirements of this part stating explicitly the basis for the conclusion reached;

(5) When appropriate, impose the pertinent period of revocation provided for in § 240.117 or § 240.119; and

(6) Retain the record of the hearing for 3 years after the date the decision is rendered.

(c) The hearing may be consolidated with any disciplinary or other hearing arising from the same facts but the presiding officer for the hearing shall make separate findings as to the revocation required under this section.

(d) A hearing that conforms procedurally to the applicable collective bargaining agreement shall be deemed to satisfy the procedural requirements of this section.

(e) A railroad that has relied on the certification by another railroad under the provisions of § 240.227 or § 240.229, shall revoke its certification if, during the pendency of that certification interval, the railroad acquires information which convinces it that another railroad has revoked its certification after determining, in accordance with the provisions of this section, that the person no longer meets the qualification requirements of this part.

(f) The requirement to provide a hearing under this section does not impose a duty on more than one railroad to hold a hearing prior to the revocation by more than one railroad arising from the same facts.

§ 240.309 Railroad oversight responsibilities.

(a) No later than March 31 of each year (beginning in calendar year 1993), each Class I railroad (including the National Railroad Passenger Corporation and a railroad providing commuter service) and Class II railroad shall conduct a formal annual review and analysis concerning the administration of its program for responding to detected instances of poor safety conduct by certified locomotive engineers during the prior calendar year.

(b) Each review and analysis shall involve:

(1) The number and nature of the instances of detected poor safety conduct including the nature of the remedial action taken in response thereto;

(2) The number and nature of FRA reported train accidents attributed to poor safety performance by locomotive engineers;

(3) The number and type of operational monitoring test failures and observations of inadequate skill performance recorded by supervisors of locomotive engineers; and

(4) If it conducts joint operations with another railroad, the number of locomotive engineers employed by such other railroad(s) to which such events were ascribed which the controlling railroad certified for joint operations purposes.

(c) Based on that review and analysis each railroad shall determine what action(s) it will take to improve the safety of train operations to reduce or eliminate future incidents of that nature.

(d) If requested in writing by FRA, the railroad shall provide a report of the findings and conclusions reached during such annual review and analysis effort.

(e) For reporting purposes, the nature of detected poor safety conduct shall be capable of segregation for study and evaluation purposes in the following manner:

(1) Incidents involving noncompliance with part 218;

(2) Incidents involving noncompliance with part 219;

(3) Incidents involving noncompliance with part 232;

(4) Incidents involving noncompliance with the railroad's operating rules involving operation of a locomotive or train to operate at a speed that exceeds the maximum authorized limit;

(5) Incidents involving noncompliance with the railroad's operating rules resulting in operation of a locomotive or train past any signal that requires a complete stop before passing it;

(6) Incidents involving noncompliance with the railroad's operating practices including train handling procedures resulting in improper use of dynamic brakes;

(7) Incidents involving noncompliance with the railroad's operating practices (including train handling procedures) resulting in improper use of automatic brakes;

(8) Incidents involving noncompliance with the railroad's operating practices (including train handling procedures) resulting in improper use of a locomotive's independent brake;

(9) Incidents involving noncompliance with the railroad's operating practices (including train handling procedures) resulting in excessive in-train force levels; and

(10) Incidents involving noncompliance with the railroad's operating practices that require operation of a train at a speed that permits stopping within less than the engineers range of vision.

(e) For reporting purposes each category of detected poor safety conduct identified in paragraph (d) of this section shall be capable of being annotated to reflect the following:

(1) The total number of incidents in that category;

(2) The number of incidents within that total which reflects incidents requiring an FRA accident/incident report; and

(3) The number of incidents within that total which were detected as a result of a scheduled operational monitoring effort.

(f) For reporting purposes each category of detected poor safety conduct identified in paragraph (d) of this section shall be capable of being annotated to reflect the following:

(1) The nature of the remedial action taken and the number of events subdivided so as to reflect which of the following actions was selected:

(i) Imposition of informal discipline;

(ii) Imposition of formal discipline;

(iii) Provision of informal training; or

(iv) Provision of formal training; and

(2) If the nature of the remedial action taken was formal discipline, the number of events further subdivided so as to reflect which of the following punishments was imposed by the hearing officer:

(i) The person was withheld from service;

(ii) The person was dismissed from employment or

(iii) The person was issued demerits. If more than one form of punishment was imposed only that punishment deemed the most severe shall be shown.

(g) For reporting purposes each category of detected poor safety conduct identified in paragraph (d) of this section which resulted in the imposition of formal or informal discipline shall be annotated to reflect the following:

(1) The number of instances in which the railroad's internal appeals process reduced the punishment initially imposed at the conclusion of its hearing; and

(2) The number of instances in which the punishment imposed by the railroad was reduced by any of the following entities: the National Railroad Adjustment Board, a Public Law Board, a Special Board of Adjustment or other body for the resolution of disputes duly constituted under the provisions of the Railway Labor Act.

Subpart E—Dispute Resolution Procedures

§ 240.401 Review board established.

(a) Any person who has been denied certification, denied recertification, or has had his or her certification suspended or revoked and believes that a railroad incorrectly determined that he or she failed to meet the qualification requirements of this regulation when making the decision to deny, suspend, or revoke certification, may petition the Federal Railroad Administrator to review the railroad's decision.

(b) The Federal Railroad Administrator has delegated initial responsibility for adjudicating such disputes to the Locomotive Engineer Review Board.

(c) The Locomotive Engineer Review Board shall be composed of at least three employees of the Federal Railroad Administration selected by the Administrator.

§ 240.403 Petition Requirements.

(a) To obtain review of a railroad's decision to deny certification, deny recertification, or revoke certification, a person shall file a petition for review that complies with this section.

(b) Each petition shall:

(1) Be in writing;

(2) Be submitted in triplicate to the Docket Clerk, Federal Railroad Administration, 400 Seventh Street SW., Washington, DC, 20590;

(3) Contain all available information that the person thinks supports the

VOL 56 ISS 118 JE 19 1991 UMI

person's belief that the railroad acted improperly, including:

(i) The petitioner's full name;

(ii) The petitioner's current mailing address;

(iii) The petitioner's daytime telephone number;

(iv) The name and address of the railroad; and

(v) The facts that the petitioner believes constitute the improper action by the railroad, specifying the locations, dates, and identities of all persons who were present or involved in the railroad's actions (to the degree known by the petitioner);

(4) Explain the nature of the remedial action sought;

(5) Be supplemented by a copy of all written documents in the petitioner's possession that document that railroad's decision; and

(6) Be filed in a timely manner.

(c) A petition seeking review of a railroad's decision to deny certification or recertification filed with FRA more than 180 days after the date of the railroad's denial decision will be denied as untimely.

(d) A petition seeking review of a railroad's decision to revoke certification in accordance with the procedures required by § 240.307 filed with FRA more than 180 days after the date of the railroad's revocation decision will be denied as untimely.

§ 240.405 Processing qualification review petitions.

(a) Each petition shall be acknowledged in writing by FRA and the acknowledgement shall contain the docket number assigned to the petition.

(b) Upon receipt of the petition, FRA will notify the railroad that it has received the petition and provide the railroad with a copy of the petition.

(c) The railroad will be given a period of not to exceed 30 days to submit to FRA any information that the railroad considers pertinent to the petition.

(d) A railroad that submits such information shall:

(1) Identify the petitioner by name and the docket number of the review proceeding;

(2) Provide a copy of the information being submitted to FRA to the petitioner.

(e) Each petition will then be referred to the Locomotive Engineer Review Board for a decision.

(f) The Board will determine whether the denial or revocation of certification or recertification was improper under this regulation (*i.e.*, based on an incorrect determination that the person failed to meet the qualification requirements of this regulation) and grant or deny the petition accordingly. The Board will not otherwise consider the propriety of a railroad's decision, *i.e.*, it will not consider whether the railroad properly applied its own more stringent requirements.

(g) Notice of that decision will be provided in writing to both the petitioner and the railroad. The decision will include findings of fact on which it is based.

§ 240.407 Request for a hearing.

(a) If adversely affected by the decision, either the original petitioner or the railroad involved shall have a right to an administrative hearing concerning that decision.

(b) To exercise that right, the adversely affected party shall file a written request within 20 days of service of the Board's decision on them.

(c) Failure to request a hearing within the period provided in paragraph (b) of this section constitutes a waiver of the right to a hearing.

(d) If a party elects to request a hearing, that person shall submit a written request to the Docket Clerk containing the following:

(1) The name, address, and telephone number of the respondent and the requesting party's designated representative, if any;

(2) The specific facts that the requesting party alleges the Board wrongly determined in making its decision; and

(3) The signature of the requesting party or the requesting party's representative, if any.

(e) Upon receipt of a hearing request complying with paragraph (d) of this section, the Federal Railroad Administration shall schedule a hearing at the earliest practicable date.

§ 240.409 Hearings.

(a) An administrative hearing for review of a locomotive engineer qualification petition shall be conducted by a presiding officer, who can be any person authorized by the FRA Administrator, including an administrative law judge.

(b) The presiding officer may exercise the powers of the Federal Railroad Administrator to regulate the conduct of the hearing for the purpose of achieving a prompt and fair determination of all material issues in controversy.

(c) The presiding officer shall convene and preside over the hearing.

(d) Testimony by witnesses at the hearing shall be given under oath and the hearing shall be recorded verbatim.

(e) The presiding officer shall employ the Federal Rules of Evidence for United States Courts and Magistrates as general guidelines for the introduction of evidence. All relevant and probative evidence shall be received unless the presiding officer determines the evidence to be unduly repetitive or so extensive and lacking in relevancy that its admission would impair the prompt, orderly, and fair resolution of the proceeding.

(f) The presiding officer may:

(1) Administer oaths and affirmations;

(2) Issue subpoenas as provided for in § 209.7 of part 209 in this chapter;

(3) Adopt any needed procedures for the submission of evidence in written form;

(4) Examine witnesses at the hearing;

(5) Convene, recess, adjourn or otherwise regulate the course of the hearing; and

(6) Take any other action authorized by or consistent with the provisions of this part and permitted by law that may expedite the hearing or aid in the disposition of the proceeding.

(g) The party favored by FRA's disposition of the initial petition under this subpart, may participate in the hearing as a third party. Parties may appear and be heard on their own behalf or through designated representatives. Respondents may offer relevant evidence including testimony and may conduct such cross-examination of witnesses as may be required for a full disclosure of the relevant facts.

(h) The record in the proceeding shall be closed at conclusion of the hearing unless the presiding officer allows additional time for the submission of information. In such instances the record shall be left open for such time as the presiding officer grants for that purpose.

(i) At the close of the record, the presiding officer shall prepare a written decision in the proceeding.

(j) The decision:

(1) Shall contain the findings of fact and conclusions of law, as well as the basis therefore, concerning all material issues of fact or law presented on the record;

(2) Shall be served on the respondent and any other directly affected party;

(3) Shall not become final for 35 days after issuance;

(4) Constitutes final agency action unless an aggrieved party files an appeal within 35 days after issuance; and

(5) Is not precedential.

(k) The FRA shall have the burden of proving that its grant or denial of the initial petition was in accordance with law and supported by substantial evidence.

§ 240.411 Appeals.

(a) Any party aggrieved by the presiding officer's decision may file an appeal. The appeal must be filed within 35 days of issuance of the decision with the Federal Railroad Administrator, 400 Seventh Street SW., Washington, DC 20590. A copy of the appeal shall be served on each party. The appeal shall set forth objections to the presiding officer's decision, supported by reference to applicable laws and regulations and with specific reference to the record.

(b) A party may file a reply to the appeal within 25 days of service of the appeal. The reply shall be supported by reference to applicable laws and regulations and with specific reference to the record, if the party relies on evidence contained in the record.

(c) The Administrator may extend the period for filing an appeal or a response for good cause shown, provided that the written request for extension is served before expiration of the applicable period provided in this section.

(d) The Administrator has sole discretion to permit oral argument on the appeal. On the Administrator's own initiative or written motion by any party, the Administrator may grant the parties an opportunity for oral argument

(e) The Administrator may affirm, reverse, alter or modify the decision of the presiding officer and the Administrator's decision constitutes final agency action.

APPENDIX A TO PART 240—SCHEDULE OF CIVIL PENALTIES [1]

Section	Violation	Willful violation
Subpart B—Component Elements		
240.101—Program Failures		
(a) Failure to have program	$5,000	$10,000
(b) Program that fails to address a subject	2,500	5,000
240.103—Failure to:		
(a) follow Appendix B	1,000	2,000
(d) to resubmit, when directed by FRA	1,000	2,000
240.105—Failure to have adequate procedure for selection of supervisors	2,500	5,000
240.107—Classes of Service		
(a) Failure to designate classes of service	2,000	4,000
240.108—Limitations on considering prior conduct records		
(a) Failure to have procedure for determining eligibility	2,500	5,000
(e) Considering excluded data	2,000	4,000
(f,g) Failure to provide timely review opportunity	2,000	4,000
240.111—Furnishing Motor Vehicle Records		
(a) Failure to action required to make information available	1,000	2,000
(b) Failure to request:		
(1) local record	1,000	2,000
(2) NDR record	1,000	2,000
(f) Failure to request additional record	1,000	2,000
(e) Failure to notify of absence of license	750	1,500
(h) Failure to submit request in timely manner	750	1,500
240.113—Furnishing prior employment information		
(a) Failure to take action required to make information available	1,000	2,000
(b) Failure to request record	1,000	2,000
240.115—Criteria for considering prior motor vehicle conduct		
(b) Considering excluded data	2,000	4,000
(c) Failure to		
(1) consider data	5,000	7,500
(3,4) properly act in response to data	2,500	5,000
240.117—Consideration of operational rules compliance records		
(a) Failure to have program and procedures	5,000	10,000
(b–d) Failure to have adequate program or procedure	2,500	5,000
240.119—Consideration of substance abuse /rules compliance records		
(a) Failure to have program and procedures	5,000	10,000
(b–e) Failure to have adequate program or procedure	2,500	5,000
240.121—Failure to have adequate procedure for determining acuity	2,500	5,000
240.123—Failure to have		
(a) adequate procedures for continuing education	2,500	5,000
(b) adequate procedures for training new engineers	2,500	5,000
240.125—Failure to have		
(a) adequate procedures for testing knowledge	2,500	5,000
(d) adequate procedures for documenting testing	2,500	5,000
240.127—Failure to have		
(a) adequate procedures for evaluating skill performance	2,500	5,000
(c) adequate procedures for documenting skills testing	2,500	5,000
240.129—Failure to have		
(a–b) adequate procedures for monitoring performance	2,500	5,000
Subpart C—Implementation of the Process		
240.201—Schedule for Implementation		
(a) Failure to select supervisors by specified date	1,000	2,000
(b) Failure to identify grandfathered engineers	2,000	4,000
(c) Failure to issue certificate to engineer	1,000	2,000
(d) Allowing uncertified person to operate	5,000	10,000
(e–g) Certifying without complying with subpart C	2,500	5,000
(h–i) Failure to issue certificate to engineer	1,000	2,000
(j) Allowing person to continue to operate after 12/31/92 without testing or evaluation	2,500	5,000
240.203 (a) Designating a person as a supervisor without determining that		
(1) person knows and understands this part;	2,500	5,000
(2) person can test and evaluate engineers;	5,000	7,500
(3) person has experience to prescribe remedies	2,500	5,000

VOL 56 ISS 118 JE 19 1991 UMI

Section	Violation	Willful violation
(b) Certifying a person without determining that		
(1) person meets the eligibility criteria;	2,500	7,500
(2) person meets the medical criteria;	2,500	5,000
(3) person has demonstrated knowledge	2,500	5,000
(4) person has demonstrated skills	2,500	5,000
(c) Certifying a person without determining that		
(1) person has completed training program	2,500	5,000
(2) person meets the eligibility criteria	2,500	5,000
(3) time has elapsed		
240.205—Procedures for determining eligibility based on prior safety conduct		
(a) Selecting person lacking eligibility	2,500	7,500
(d) Failure to have basis for taking action	2,500	5,000
240.207—Ineligibility based on medical condition		
(a) Selecting person lacking proper acuity	2,000	4,000
(b) Failure to have basis for finding of proper acuity	1,000	2,000
(c) Acuity examinations performed by unauthorized person	1,000	2,000
(d) Failure to note need for device to achieve acuity	1,000	2,000
(e) Failure to use device needed for proper acuity	1,000	2,000
240.209—Demonstrating knowledge		
(b) Failure to properly determine knowledge	2,500	5,000
(c) Improper test procedure	2,000	4,000
(d) Failure to document test results	1,000	2,000
(e) Allowing person to operate despite test failure	2,500	5,000
240.211—Demonstrating skills		
(b) Failure to properly determine knowledge	2,500	5,000
(c) Improper test procedure	2,000	4,000
(d) Failure to document test results	1,000	2,000
(e) Allowing person to operate despite test failure	2,500	5,000
240.213—Completion of approved training program		
(a) Failure to properly determine	2,500	5,000
(b) Failure to document successful program completion	2,000	4,000
240.215—Supplying information		
(a, f–h) Failure to have a record	1,000	2,000
(b) Failure to have complete record	500	1,000
(i) Falsification of record	(-)	10,000
240.217—Time limits for making determinations		
(a, c) Exceeding time limit	2,000	4,000
240.219—Denial of certification		
(a) Failure to notify or provide opportunity for comment	2,000	4,000
(c) Failure to notify, provide data, or untimely notification	2,000	4,000
240.221—Identification of persons		
(a–b) Failure to have record	2,000	4,000
(c) Failure to update record	2,000	4,000
(b) Failure to issue certificate	1,000	2,000
(e–f) Failure to make record available	1,000	2,000
240.223—Certificate criteria		
(a) Improper certificate	500	1,000
(b) Failure to designate those with signatory authority	500	1,000
(d) Falsification of certificate	(-)	10,000
240.225—Railroad Relying on Determination of Another		
(a) Reliance on expired certification	2,500	5,000
(b) Reliance on wrong class of service	2,500	5,000
(c) Failure to familiarize person with new operational territory	2,000	4,000
(d) Failure to determine knowledge	2,000	4,000
240.227—Railroad Relying on Requirements of a Different Country		
(a) Joint operator reliance		
(1) on person not employed	1,000	2,000
(2) on person who fails to meet Canadian requirements	1,000	2,000
(b) Canadian railroad reliance		
(1) on person not employed	1,000	2,000
(2) on person who fails to meet Canadian requirements	1,000	2,000
240.229—Railroad Controlling Joint Operation Territory		
(a) Allowing uncertified person to operate	2,000	4,000
(b) Certifying without making determinations or relying on another railroad	2,500	5,000
(c) Certifying without determining:		
(1) certification status	2,500	5,000
(2) knowledge	2,500	5,000
(3) skills	2,500	5,000
(4) familiarity with physical characteristics	2,000	4,000
(d) Failure to provide qualified person	2,000	4,000
Subpart D—Program Administration		
240.301—Failure to have system for certificate replacement	2,000	4,000
240.303—Monitoring operations		
(a) Failure to have program	4,000	8,000
(b) Failure to observe each person annually	1,000	2,000
(c) Failure to test each person annually	1,000	2,000
(d) Failure to test properly	1,000	2,000
240.305—Certified engineer conduct		
(a) Failure of engineer to		
(1) properly control speed	2,500	5,000
(2) stop at signal	2,500	5,000

Section	Violation	Willful violation
(3) obey rules for track occupancy authority	2,500	5,000
(b) Failure of engineer to		
(1) carry certificate	1,000	2,000
(2) display certificate when requested	1,000	2,000
(c–d) Failure of engineer to notify railroad of limitations, revocation or denial	4,000	8,000
240.309—Revocation of certification		
(a) Failure to withdraw person from service	2,500	5,000
(b) Failure to notify, provide hearing opportunity, or untimely procedures	2,000	4,000
240.307—Oversight responsibility report		
(a) Failure to report or to report on time	500	1,000
(b–f) Incomplete or inaccurate report	2,000	4,000

[1] A penalty may be assessed against an individual only for a willful violation. The Administrator reserves the right to assess a penalty of up to $20,000 for any violation where circumstances warrant. See 49 CFR part 209, appendix A.

Appendix B to Part 240—Procedures for Submission and Approval of Locomotive Engineer Qualification Programs

This appendix establishes procedures for the submission and approval of a railroad's program concerning the training, testing, and evaluating of persons seeking certification or recertification as a locomotive engineer in accordance with the requirements of this part (see §§ 240.101, 240.103, 240.105, 240.107, 240.123, 240.125, 240.127 and 240.129). It also contains guidance on how FRA will exercise its review and approval responsibilities.

Submission by a Railroad

As provided for in § 240.101, each railroad must have a program for determining the qualifications of each person it permits or requires to operate a locomotive. In designing its program a railroad must take into account the trackage and terrain over which it operates, the system(s) for train control that are employed, the operational design characteristics of the track and equipment being operated including train length, train makeup, and train speeds. Each railroad must submit its individual program to FRA for approval as provided for in § 240.103. Each program must be accompanied by a request for approval organized in accordance with this appendix. Requests for approval must contain appropriate references to the relevant portion of the program being discussed. Requests should be submitted in writing on standard sized paper (8-1/2 x 11) and can be in letter or narrative format. The railroad's submission shall be sent to the Associate Administrator for Safety, FRA. The mailing address for FRA is 400 Seventh Street, SW., Washington, DC 20590.

Organization of the Submission

Each request should be organized to present the required information in the following standardized manner. Each section must begin by giving the name, title, telephone number, and mailing address of the person to be contacted concerning the matters addressed by that section. If a person is identified in a prior section, it is sufficient to merely repeat the person's name in a subsequent section.

Section 1 of the Submission: General Information and Elections

The first section of the request must contain the name of the railroad, the person to be contacted concerning the request (including the person's name, title, telephone number, and mailing address) and a statement electing either to accept responsibility for educating previously untrained persons to be qualified locomotive engineers or recertify only engineers previously certified by other railroads (see § 240.103(b)).

If a railroad elects not to conduct the training of persons not previously trained to be a locomotive engineer, the railroad is not obligated to submit information on how the previously untrained will be trained. A railroad that makes this election will be limited to recertifying persons initially certified by another railroad. A railroad that initially elects not to accept responsibility for training its own locomotive engineers can rescind its initial election by obtaining FRA approval of a modification of its program (see § 240.103(e)).

If a railroad elects to accept responsibility for conducting the education of persons not previously trained to be locomotive engineers, the railroad is obligated to submit information on how such persons will be trained but has no duty to actually conduct such training. A railroad that elects to accept the responsibility for the training of such persons may authorize another railroad or a non-railroad entity to perform the actual training effort. The electing railroad remains responsible for assuring that such other training providers adhere to the training program the railroad submits.

This section must also state which class or classes of service the railroad will employ. (See § 240.107).

Section 2 of the Submission: Selection of Supervisors of Locomotive Engineers

The second section of the request must contain information concerning the railroad's procedure for selecting the person or persons it will rely on to evaluate the knowledge, skill, and ability of persons seeking certification or recertification. As provided for in § 240.105 each railroad must have a procedure for selecting supervisors of locomotive engineers which assures that persons so designated can appropriately test and evaluate the knowledge, skill, and ability of individuals seeking certification or recertification.

Section 240.105 provides a railroad latitude to select the criteria and evaluation methodology it will rely on to determine which person or persons have the required capacity to perform as a supervisor of locomotive engineers. The railroad must describe in this section how it will use that latitude and evaluate those it designates as supervisors of locomotive engineers so as to comply with the performance standard set forth in § 240.105(b). The railroad must identify, in sufficient detail to permit effective review by FRA, the criteria for evaluation it has selected. For example, if a railroad intends to rely on one or more of the following, a minimum level of prior experience as an engineer, successful completion of a course of study, or successful passage of a standardized testing program, the submission must state which criteria it will employ.

Section 3 of the Submission: Training Persons Previously Certified

The third section of the request must contain information concerning the railroad's program for training previously certified locomotive engineers. As provided for in § 240.123(b) each railroad must have a program for the ongoing education of its locomotive engineers to assure that they maintain the necessary knowledge concerning personal safety, operating rules and practices, mechanical condition of equipment, methods of safe train handling (including familiarity with physical characteristics), and relevant Federal safety rules.

Section 240.123(b) provides a railroad latitude to select the specific subject matter to be covered, duration of the training, method of presenting the information, and the frequency with which the training will be provided. The railroad must describe in this section how it will use that latitude to assure that its engineers remain knowledgeable concerning the safe discharge of their train operation responsibilities so as to comply with the performance standard set forth in § 240.123(b). This section must contain sufficient detail to permit effective evaluation of the railroad's training program in terms of the subject matter covered, the frequency and duration of the training sessions, the training environment employed (for example, and use of classroom, use of computer based training, use of simulators, use of film or slide presentations, use of on-job-training) and which aspects of the program are voluntary or mandatory.

Safe train handling involves both abstract knowledge about the appropriate use of engine controls and the application of that

VOL 56 ISS 118 JE 19 1991 UMI

knowledge to trains of differing composition traversing varying terrain. Time and circumstances have the capacity to diminish both abstract knowledge and the proper application of that knowledge to discrete events. Time and circumstances also have the capacity to alter the value of previously obtained knowledge and the application of that knowledge. In formulating how it will use the discretion being afforded, each railroad must design its program to address both loss of retention of knowledge and changed circumstances, and this section of the submission to FRA must address these matters.

For example, locomotive engineers need to have their fundamental knowledge of train operations refreshed periodically. Each railroad needs to advise FRA how that need is satisfied in terms of the interval between attendance at such training, the nature of the training being provided, and methods for conducting the training. A matter of particular concern to FRA is how each railroad acts to assure that engineers remain knowledgeable about safe train handling procedures if the territory over which a locomotive engineer is authorized to operate is territory from which the engineer has been absent. The railroad must have a plan for the familiarization training that addresses the question of how long a person can be absent before needing more education and, once that threshold is reached, how the person will acquire the needed education. Similarly, the program must address how the railroad responds to changes such as the introduction of new technology, new operating rule books, or significant changes in operations including alteration in the territory engineers are authorized to operate over.

Section 4 of the Submission: Testing and Evaluating Persons Previously Certified

The fourth section of the request must contain information concerning the railroad's program for testing and evaluating previously certified locomotive engineers. As provided for in § 240.125 and § 240.127, each railroad must have a program for the ongoing testing and evaluating of its locomotive engineers to assure that they have the necessary knowledge and skills concerning personal safety, operating rules and practices, mechanical condition of equipment, methods of safe train handling (including familiarity with physical characteristics), and relevant Federal safety rules. Similarly, each railroad must have a program for ongoing testing and evaluating to assure that its locomotive engineers have the necessary vision and hearing acuity as provided for in § 240.121.

Sections 240.125 and 240.127 require that a railroad rely on written procedures for determining that each person can demonstrate his or her knowledge of the railroad's rules and practices and skill at applying those rules and practices for the safe operation of a locomotive or train. Section 240.125 directs that, when seeking a demonstration of the person's knowledge, a railroad must employ a written test that contains objective questions and answers and covers the following subject matters: (i) Personal safety practices; (ii) operating practices; (iii) equipment inspection practices; (iv) train handling practices (including familiarity with the physical characteristics of the territory); and (v) compliance with relevant Federal safety rules. The test must accurately measure the person's knowledge of all of these areas.

Section 240.125 provides a railroad latitude in selecting the design of its own testing policies (including the number of questions each test will contain, how each required subject matter will be covered, weighting (if any) to be given to particular subject matter responses, selection of passing scores, and the manner of presenting the test information). The railroad must describe in this section how it will use that latitude to assure that its engineers will demonstrate their knowledge concerning the safe discharge of their train operation responsibilities so as to comply with the performance standard set forth in § 240.125.

Section 240.127 directs that, when seeking a demonstration of the person's skill, a railroad must employ a test and evaluation procedure conducted by a designated supervisor of locomotive engineers that contains an objective evaluation of the person's skills at applying the railroad's rules and practices for the safe operation of trains. The test and evaluation procedure must examine the person's skills in terms of all of the following subject matters: (i) Operating practices; (ii) equipment inspection practices; (iii) train handling practices (including familiarity with the physical characteristics of the territory); and (iv) compliance with relevant Federal safety rules. The test must be sufficient to effectively examine the person's skills while operating a train in the most demanding type of service which the person is likely to encounter in the normal course of events once he or she is deemed qualified.

Section 240.127 provides a railroad latitude in selecting the design of its own testing and evaluation procedures (including the duration of the evaluation process, how each required subject matter will be covered, weighting (if any) to be given to particular subject matter response, selection of passing scores, and the manner of presenting the test information). The section should provide information concerning the procedures which the railroad will follow that achieve the objectives described in FRA's recommended practices (see appendix E) for conducting skill performance testing. The section also gives a railroad the latitude to employ either a Type 1 or a Type 2 simulator (properly programmed) to conduct the test and evaluation procedure. A railroad must describe in this section how it will use that latitude to assure that its engineers will demonstrate their skills concerning the safe discharge of their train operation responsibilities so as to comply with the performance standard set forth in § 240.127.

Section 240.121 provides a railroad latitude to rely on the professional medical opinion of the railroad's medical examiner concerning the ability of a person with substandard acuity to safely operate a locomotive. The railroad must describe in this section how it will assure that its medical examiner has sufficient information concerning the railroad's operations to effectively form appropriate conclusions about the ability of a particular individual to safely operate a train.

Section 5 of the Submission: Training, Testing, and Evaluating Persons Not Previously Certified

Unless a railroad has made an election not to accept responsibility for conducting the initial training of persons to be locomotive engineers, the fifth section of the request must contain information concerning the railroad's program for educating, testing, and evaluating persons not previously trained as locomotive engineers. As provided for in § 240.123(c), a railroad that is issuing an initial certification to a person to be a locomotive engineer must have a program for the training, testing, and evaluating of its locomotive engineers to assure that they acquire the necessary knowledge and skills concerning personal safety, operating rules and practices, mechanical condition of equipment, methods of safe train handling (including familiarity with physical characteristics), and relevant Federal safety rules.

Section 240.123 establishes a performance standard and gives a railroad latitude in selecting how it will meet that standard. A railroad must describe in this section how it will use that latitude to assure that its engineers will acquire sufficient knowledge and skill and demonstrate their knowledge and skills concerning the safe discharge of their train operation responsibilities. This section must contain the same level of detail concerning initial training programs as that described for each of the components of the overall program contained in sections 2 through 4 of this appendix. A railroad that plans to accept responsibility for the initial training of locomotive engineers may authorize another railroad or a non-railroad entity to perform the actual training effort. The authorizing railroad may submit a training program developed by that authorized trainer but the authorizing railroad remains responsible for assuring that such other training providers adhere to the training program submitted. Railroads that elect to rely on other entities, to conduct training away from the railroad's own trackage, must indicate how the student will be provided with the required familiarization with the physical characteristics for its trackage.

Section 6 of the Submission: Monitoring Operational Performance by Certified Engineers

The final section of the request must contain information concerning the railroad's program for monitoring the operation of its certified locomotive engineers. As provided for in § 240.129, each railroad must have a program for the ongoing monitoring of its locomotive engineers to assure that they operate their locomotives in conformity with the railroad's operating rules and practices including methods of safe train handling and relevant Federal safety rules.

Section 240.129 requires that a railroad annually observe each locomotive engineer demonstrating his or her knowledge of the railroad's rules and practices and skill at applying those rules and practices for the safe operation of a locomotive or train. Section 240.129 directs that the observation

be conducted by a designated supervisor of locomotive engineers but provides a railroad latitude in selecting the design of its own observation procedures (including the duration of the observation process, reliance on tapes that record the specifics of train operation, and the specific aspects of the engineer's performance to be covered). The section also gives a railroad the latitude to employ either a Type 1 or a Type 2 simulator (properly programmed) to conduct monitoring observations. A railroad must describe in this section how it will use that latitude to assure that the railroad is monitoring that its engineers demonstrate their skills concerning the safe discharge of their train operation responsibilities. A railroad that intends to employ train operation event recorder tapes to comply with this monitoring requirement shall indicate in this section how it anticipates determining what person was at the controls and what signal indications or other operational constraints, if any, were applicable to the train's movement.

Section 7 of the Submission: Procedures for Routine Administration of the Engineer Certification Program

The final section of the request must contain a summary of how the railroad's program and procedures will implement the various specific aspects of the regulatory provisions that relate to routine administration of its certification program for locomotive engineers. At a minimum this section needs to address the procedural aspects of the rule's provisions identified in the following paragraph.

Section 240.109 provides that each railroad must have procedures for review and comment on adverse prior safety conduct, but allows the railroad to devise its own system within generalized parameters. Sections 240.115, 240.117 and 240.119 require a railroad to have procedures for evaluating data concerning prior safety conduct as a motor vehicle operator and as railroad workers, yet leave selection of many details to the railroad. Sections 240.203, 240.217, and 240.219 place a duty on the railroad to make a series of determinations but allow the railroad to select what procedures it will employ to assure that all of the necessary determinations have been made in a timely fashion; who will be authorized to conclude that person is or is not qualified; and how it will communicate adverse decisions. Documentation of the factual basis the railroad relied on in making determinations under §§ 240.205, 240.207, 240.209, 240.211, and 240.213 is required, but these sections permit the railroad to select the procedures it will employ to accomplish compliance with these provisions. Sections 240.225 and 240.227 permit reliance on qualification determinations made by other entities and permit a railroad latitude in selecting the procedures it will employ to assure compliance with these provisions. Similarly, § 240.229 permits use of railroad selected procedures to meet the requirements for certification of engineers performing service in joint operations territory. Sections 240.301 and 240.307 allow a railroad a certain degree of discretion in complying with the requirements for replacing lost certificates or the conduct of certification revocation proceedings.

This section of the request should outline in summary fashion the manner in which the railroad will implement its program so as to comply with the specific aspects of each of the rule's provisions described in preceding paragraph.

FRA Review

The submissions made in conformity with this appendix will be deemed approved within 30 days after the required filing date or the actual filing date whichever is later. No formal approval document will be issued by FRA. The brief interval for review reflects FRA's judgment that railroads generally already have existing programs that will meet the requirements of this part. FRA has taken the responsibility for notifying a railroad when it detects problems with the railroad's program. FRA retains the right to disapprove a program that has obtained approval due to the passage of time as provided for in section § 240.103.

FRA initially proposed specifying the details for most aspects of the programs being submitted under this appendix. The proposed rule contained a distillation of the essential elements of pre-existing training, testing, evaluating, and monitoring programs that appear to result in railroads having locomotive engineers who operate locomotives and trains safely. The proposal contained very specific details for each aspect of the program that appeared to contribute to that result. Those details included such things as the duration of classes intended to teach operating rules as well as the interval and methodology for acquiring familiarization with physical characteristics of an engineer's operational territory. Railroads commenting on the proposed rule did not question the validity of the FRA's views concerning the essential elements of an effective program but did convince FRA that they should be given more discretion to formulate the design of their individual programs.

Rather than establish rigid requirements for each element of the program as initially proposed, FRA has given railroads discretion to select the design of their individual programs within a specified context for each element. The proposed rule, however, provides a good guide to the considerations that should be addressed in designing a program that will meet the performance standards of this final rule. In reviewing program submissions, FRA will focus on the degree to which a particular program deviates from the norms identified in its proposed rule. To the degree that a particular program submission materially deviates from the norms set out in its proposed rule which was published in the Federal Register on December 11, 1990 (54 FR 50890), FRA's review and approval process will be focused on determining the validity of the reasoning relied on by a railroad for selecting its alternative approach and the degree to which the alternative approach is likely to be effective in producing locomotive engineers who have the knowledge, skill, and ability to safely operate trains.

Appendix C to Part 240—Procedures for Obtaining and Evaluating Motor Vehicle Driving Record Data

The purpose of this Appendix is to outline the procedures available to individuals and railroads for complying with the requirements of section 4(a) of the Railroad Safety Improvement Act of 1988 and §§ 240.109, 240.111 and 240.205 of this part. These provisions require that railroads consider the motor vehicle driving record of each person prior to issuing him or her certification or recertification as a qualified locomotive engineer.

To fulfill that obligation, a railroad must review a certification candidate's recent motor vehicle driving record. Generally, that will be a single record on file with the state agency that issued the candidate's current license. However, it can include multiple records if the candidate has been issued a motor vehicle driving license by more than one state agency. In addition, the railroad must determine whether the certification candidate is listed in the National Driver Register and, if so listed, to review the data that caused the candidate to be so listed.

Access to State Motor Vehicle Driving Record Data

The right of railroad workers, their employers, or prospective employers to have access to a state motor vehicle licensing agency's data concerning an individual's driving record is controlled by state law. Although many states have mechanisms through which employers and prospective employers such as railroads can obtain such data, there are some states in which privacy concerns make such access very difficult or impossible. Since individuals generally are entitled to obtain access to driving record data that will be relied on by a state motor vehicle licensing agency when that agency is taking action concerning their driving privileges, FRA places responsibility on individuals, who want to serve as locomotive engineers to request that their current state drivers licensing agency or agencies furnish such data directly to the railroad considering certifying them as a locomotive operator. Depending on the procedures adopted by a particular state agency, this will involve the candidate's either sending the state agency a brief letter requesting such action or executing a state agency form that accomplishes the same effect. It will normally involve payment of a nominal fee established by the state agency for such a records check. In rare instances, when a certification candidate has been issued multiple licenses, it may require more than a single request.

The National Driver Register

In addition to seeking an individual state's data, each engineer candidate is required to request that a search and retrieval be performed of any relevant information concerning his or her driving record contained in the National Driver Register. The National Driver Register (NDR) is a system of information created by Congress in 1960. In essence it is a nationwide repository of information on problem drivers that was created in an effort to protect motorists. It is

VOL 56 ISS 118 JE 19 1991 UMI

a voluntary State/Federal cooperative program that assists motor vehicle driver licensing agencies in gaining access to data about actions taken by other state agencies concerning an individual's motor vehicle driving record. The NDR is designed to address the problem that occurs when chronic traffic law violators, after losing their license in one State travel to and receive licenses in another State. Currently the NDR is maintained by the National Highway Traffic Safety Administration (NHTSA) of the Department of Transportation under the provisions of the National Driver Register Act (23 U.S.C. 401 note). Under that statute, state motor vehicle licensing authorities voluntarily notify NHTSA when they take action to deny, suspend, revoke or cancel a person's motor vehicle driver's license and, under the provisions of a 1982 change to the statute, states are also authorized to notify NHTSA concerning convictions for operation of a motor vehicle while under the influence of, or impaired by, alcohol or a controlled substance, and for traffic violations arising in connection with a fatal traffic accident, reckless driving or racing on the highway even if these convictions do not result in an immediate loss of driving privileges.

The information submitted to NHTSA contains, at a minimum, three specific pieces of data: the identification of the state authority providing the information, the name of the person whose license is being affected, and the date of birth of that person. It may be supplemented by data concerning the person's height, weight, color of eyes, and social security account number, if a State collects such data.

Access to NDR Data

Essentially only individuals and state licensing agencies can obtain access to the NDR data. Since railroads have no direct access to the NDR data, FRA requires that individuals seeking certification as a locomotive engineer request that an NDR search be performed and direct that the results be furnished to the railroad. FRA requires that each person request the NDR information directly from NHTSA unless the prospective operator has a motor vehicle driver license issued by a state motor vehicle licensing agency that is "participating" under the provisions of the National Driver Register Act of 1982. Participating states can directly access the NDR data on behalf of the prospective engineer. The state agencies that currently are authorized to access NDR data in that manner are identified in appendix D of this regulation.

Requesting NHTSA to Perform the NDR Check

The procedures for requesting NHTSA performance of an NDR check are as follows:

1. Each person shall submit a written request to National Highway Traffic Safety Administration at the following address: Chief, National Driver Register, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

2. The request must contain:

(a) The full legal name;

(b) Any other names used by the person (*e.g.*, nickname or professional name);

(c) The date of birth;

(d) Sex;

(e) Height;

(f) Weight;

(g) Color of eyes;

(h) Driver's license number (unless that is not available).

3. The request must authorize NHTSA to perform the NDR check and to furnish the results of the search directly to the railroad.

4. The request must identify the railroad to which the results are to be furnished, including the proper name of the railroad, and the proper mailing address of the railroad.

5. The person seeking to become a certified locomotive engineer shall sign the request, and that signature must be notarized.

FRA requires that the request be in writing and contain as much detail as is available to improve the reliability of the data search. Any person may supply additional information to that being mandated by FRA. Furnishing additional information, such as the person's Social Security account number, will help to more positively identify any records that may exist concerning the requester. Although no fee is charged for such NDR checks, a minimal cost may be incurred in having the request notarized. The requirement for notarization is designed to ensure that each person's right to privacy is being respected and that records are only being disclosed to legally authorized parties.

Requesting a State Agency to Perform the NDR Check

As discussed earlier in connection with obtaining data compiled by the state agency itself, a person can either write a letter to that agency asking for the NDR check or can use the agency's forms for making such a request. If a request is made by letter the individual must follow the same procedures required when directly seeking the data from NHTSA. At present there are only a limited number of state licensing agencies that have the capacity to make a direct NDR inquiry of this nature. It is anticipated that the number of states with such capability will increase in the near future; therefore, FRA will continue to update the identification of such states by revising Appendix D to this regulation to identify such state agencies. Since it would be more efficient for a prospective locomotive engineer to make a single request for both aspects of the information required under this rule, FRA anticipates that state agency inquiry will eventually become the predominant method for making these NDR checks. Requests to state agencies may involve payment of a nominal fee established by the state agency for such a records check.

State agencies normally will respond in approximately 30 days or less and advise whether there is or is not a listing for a person with that name and date of birth. If there is a potential match and the inquiry state was not responsible for causing that entry, the agency normally will indicate in writing the existence of a probable match and will identify the state licensing agency that suspended, revoked or canceled the relevant license or convicted the person of one of the violations referenced earlier in this appendix.

Actions When a Probable NDR Match Occurs

The response provided after performance of an NDR check is limited to either a notification that no potential record match was identified or a notification that a potential record match was identified. If the latter event occurs, the notification will include the identification of the state motor vehicle licensing authority which possesses the relevant record. If the NDR check results indicate a potential match and that the state with the relevant data is the same state which furnished detailed data (because it had issued the person a driving license), no further action is required to obtain additional data. If the NDR check results indicate a potential match and the state with the relevant data is different from the state which furnished detailed data, it then is necessary to contact the individual state motor vehicle licensing authority that furnished the NDR information to obtain the relevant record. FRA places responsibility on the railroad to notify the engineer candidate and on the candidate to contact the state with the relevant information. FRA requires the certification candidate to write to the state licensing agency and request that the agency inform the railroad concerning the person's driving record. If required by the state agency, the person may have to pay a nominal fee for providing such data and may have to furnish written evidence that the prospective operator consents to the release of the data to the railroad. FRA does not require that a railroad or a certification candidate go beyond these efforts to obtain the information in the control of such a state agency, and a railroad may act upon the pending certification without the data if an individual state agency fails or refuses to supply the records.

If the non-issuing state licensing agency does provide the railroad with the available records, the railroad must verify that the record pertains to the person being considered for certification. It is necessary to perform this verification because in some instances only limited identification information is furnished for use in the NDR and this might result in data about a different person being supplied to the railroad. Among the available means for verifying that the additional state record pertains to the certification candidate are physical description, photographs and handwriting comparisons.

Once the railroad has obtained the motor vehicle driving record which, depending on the circumstance, may consist of more than two documents, the railroad must afford the prospective engineer an opportunity to review that record and respond in writing to its contents in accordance with the provisions of § 240.219. The review opportunity must occur before the railroad evaluates that record. The railroad's required evaluation and subsequent decision making must be done in compliance with the provisions of this part.

Appendix D to Part 240—Identification of State Agencies That Perform National Driver Register Checks

Under the provisions of § 240.111 of this part, each person seeking certification or recertification as a locomotive operator must request that a check of the National Driver Register (NDR) be conducted and that the resulting information be furnished to his or her employer or prospective employer. Under the provisions of paragraphs (d) and (e) of § 240.111, each person seeking certification or recertification as a locomotive engineer must request that National Highway Traffic Safety Administration conduct the NDR check, unless he or she was issued a motor vehicle driver license by one of the state agencies identified in this appendix. If the certification candidate received a license from one of the designated state agencies, he or she must request the state agency to perform the NDR check. The state motor vehicle licensing agencies listed in this appendix participate in a program that authorizes these state agencies, in accordance with the National Driver Register Act of 1982, to obtain information from the NDR on behalf of individuals seeking data about themselves. Since these state agencies can more efficiently supply the desired data and, in some instances, can provide a higher quality of information, FRA requires that certification candidates make use of this method in preference to directly contacting NHTSA.

Although the number of state agencies that participate in this manner is limited, FRA anticipates that an increasing number of states will do so in the future. This appendix will be revised periodically to reflect current participation in the program. As of December 31, 1989, the motor vehicle licensing agencies of the following states participate under the provisions of the 1982 changes to the NDR Act: North Dakota, Ohio, Virginia, and Washington.

Appendix E to Part 240—Recommended Procedures for Conducting Skill Performance Tests

FRA requires (see § 240.127 and § 240.211) that locomotive engineers be given a skill performance test prior to certification or recertification and establishes certain criteria for the conduct of that test. Railroads are given discretion concerning the manner in which to administer the required testing. FRA has afforded railroads this discretion to allow individual railroad companies latitude to tailor their testing procedures to the specific operational realities. This appendix contains FRA's recommendations for the administration of skill performance testing that occurs during operation of an actual train. It can be modified to serve in instances where a locomotive simulator is employed for testing purposes. These recommended practices, if followed, will ensure a more thorough and systematic assessment of locomotive engineer performance.

The Need for a Systematic Approach

There are numerous criteria that should be monitored when a designated supervisor of locomotive engineers is observing a person to determine whether that individual should be certified or recertified as a qualified locomotive engineer. The details of those criteria will vary for the different classes of service, types of railroads, and terrain over which trains are being operated. At a minimum, the attention of a designated supervisor of locomotive engineers should concentrate on several general areas during any appraisal. Compliance with the railroad's operating rules, including its safety directives and train handling rules, and compliance with Federal regulations should be carefully monitored. But, in order to effectively evaluate employees, it is necessary to have something against which to compare their performance. In order to hold a locomotive engineer accountable for compliance, a railroad must have adequate operating, safety and train handling rules. Any railroad that fails to have adequate operating, safety, or train handling rules will experience difficulty in establishing a objective method of measuring an individual's skill level. Any railroad that requires the evaluation of an individual's performance relative to its train handling rules needs to have established preferred operating ranges for throttle use, brake application, and train speed. The absence of such criteria results in the lack of a meaningful yardstick for the designated supervisor of locomotive engineers to use in measuring the performance of locomotive engineers. It also is essential to have a definite standard so that the engineer and any reviewing body can know what the certification candidate is being measured against.

Evaluating the performance of certain train operation skills will tend to occur in all situations. For example, it would be rare for a designated supervisor of locomotive engineers to observe any operator for a reasonable period of time and not have some opportunity to review that engineer's compliance with some basic safety rules, compliance with basic operating rules, and performance of a brake test. As the complexity of the operation increases, so does the number of items that the operator must comply with. Higher speeds, mountainous terrain, and various signal systems place increased emphasis on the need for operator compliance with more safety, operating, and train handling rules. Accounting for such variables in any universal monitoring scheme immediately results in a fairly complex system.

FRA therefore recommends that designated supervisors of locomotive engineers employ a written aid to help record events and procedures that as a minimum should be observed for when conducting a skills performance test. FRA is providing the following information to assist railroads in developing such a written aid so as to ensure meaningful testing. When conducting a skills performance test, a designated supervisor of locomotive engineers should be alert to the following:

—Does the employee have the necessary books (Operating Rules, Safety Rules, Timetable, etc.)?

—Are predeparture inspections properly conducted (Radio, Air Brake Tests, Locomotive, etc.)?

—Does the employee comply with applicable safety rules?

—Does the employee read the bulletins, general orders, etc.?

Enroute, does the employee:

—Comply with applicable Federal Rules?

—Monitor gauges?

—Properly use the horn, whistle, headlight?

—Couple to cars at a safe speed?

—Properly control in train slack and buff forces?

—Properly use the train braking systems?

—Comply with speed restrictions?

—Display familiarity with the physical characteristics?

—Comply with signal indications?

—Respond properly to unusual conditions?

At the conclusion of the trip, does the employee:

—Apply a hand brake to the locomotives?

—Properly report locomotive defects?

Obviously, the less sophisticated the railroad's operations are, the fewer the number of identified practices that would be relevant. Hence, this list should modified accordingly.

The Need for Objectivity, Use of Observation Form

It is essential that railroads conduct the performance skills testing in the most objective manner possible, whether this testing is the locomotive engineer's initial qualification testing or periodic retesting. There will always be some potential for the subjective views, held by the designated supervisor of locomotive engineers conducting the testing, to enter into evaluations concerning the competency of a particular individual to handle the position of locomotive engineer. Steps can be taken, and need to be taken, to minimize the risk that personality factors adversely influence the testing procedure.

One way to reduce the entry of subjective matters into the qualification procedures is through the use of a document that specifies those criteria that the designated supervisor of locomotive engineers is to place emphasis on. The use of an observation form will reduce but not eliminate subjectivity. Any skill performance test will contain some amount of subjectivity. While compliance with the operating rules or the safety rules is clear in most cases, with few opportunities for deviation, train handling offers many options with few absolute right answers. The fact that an engineer applies the train air brakes at one location rather than a few yards away does not necessarily indicate a failure but a question of judgment. The use of dynamic braking versus air brakes at a particular location may be a question of judgment unless the carrier has previously specified the use of a preferred braking method. In any case the engineer's judgment, to apply or not apply a braking system at a given location, is subject to the opinion of the designated supervisor of locomotive engineers.

A railroad should attempt to reduce or eliminate such subjectivity through use of some type of observation or evaluation. For railroads developing any evaluation form, the areas of concern identified earlier will not be relevant in all instances. Railroads that do not have sophisticated operations would only

VOL
56
ISS
118
JE
19
1991
UMI

need a short list of subjects. For example, most smaller railroads would not require line items pertaining to compliance with signal rule compliance or the use of dynamic brakes. Conversely, in all instances the observation forms should include the time and location that the observer started and ended the observation. FRA believes that there shou d be a minimum duration for all performance skills examinations. FRA allows railroads to select a duration appropriate for their individual circumstances, requiring only that the period be "of sufficient length to effectively evaluate the person." In exercising its discretion FRA suggests that the minimums selected by a railroad be stated in terms of a distance since the examination has to be of a sufficient duration to adequately monitor the operator's skills in a variety of situations. FRA also suggests that the format for the observation form include a space for recording the observer's comments. Provision for comments ideally would allow for the inclusion of "constructive criticism" without altering the import of the evaluation and would permit subjective comments where merited.

Issued in Washington, DC on June 11, 1991.

DEPARTMENT OF EDUCATION

Grants; Children and Youth With Serious Emotional Disturbance Program

AGENCY: Department of Education.

ACTION: Notice of proposed priorities and selection criteria.

SUMMARY: The Secretary proposes to establish annual funding priorities and selection criteria for the new Program for Children and Youth with Serious Emotional Disturbance to ensure effective use of program funds and to direct funds to areas of identified need during fiscal year 1991.

DATES: Comments must be received on or before July 19, 1991.

ADDRESSES: All comments concerning these proposed priorities should be addressed to: Linda Glidewell, Division of Innovation and Development, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, room 3095—M/S 2313–2640), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Linda Glidewell, telephone: (202) 732–1099. (TDD: (202) 732–6153.)

SUPPLEMENTARY INFORMATION: The Program for Children and Youth with Serious Emotional Disturbance provides assistance for projects designed to improve special education and related services to children and youth with serious emotional disturbance (SED).

Proposed Priorities and Selection Criteria

The Secretary proposes to establish the following priorities and selection criteria for the Program for Children and Youth with Serious Emotional Disturbance, CFDA 84.237. In accordance with the Education Department General Administrative Regulations (EDGAR, 34 CFR 75.105(c)(3)), the Secretary proposes to give an absolute preference under this program to applications that respond to the following priorities; that is, the Secretary proposes to select for funding only those applications proposing projects that meet one of these priorities.

Priority 1: Analyzing the Professional Knowledge Base for Students With Serious Emotional Disturbance (CFDA 84.237)

Issue

Children and youth with serious emotional disturbance represent a large group of unserved and underserved students with disabilities. Students experiencing serious emotional disturbance provide a complex and multi-faceted problem in the delivery of appropriate educational programs. They have one of the highest probabilities of failure in school, work and the community. To improve outcomes for these students the educational community must participate in the development of a plan to identify the most critical areas for improving curricula, instruction, service delivery, and professional development.

Over the past several years, a considerable knowledge base regarding the provision of educational services to individuals with serious emotional disturbance has accumulated. This knowledge base contains programs demonstrated to be effective in obtaining desired student outcomes; research relating to the identification, assessment, instruction, and service delivery system; and the experiences of successful and non-successful instructional personnel. The development of a plan requires an ordering, formatting, and mapping of the knowledge base to identify the critical features that must be addressed.

Background

The Department has been engaging practitioners, researchers, parents, and professional associations in describing current practice and research needs. Current efforts include evaluating outcomes for students with serious emotional disturbance, analyzing definition issues, and compiling information on effective intervention strategies. However, additional information is needed on personnel preparation and placement procedures for students with serious emotional disturbance.

The current efforts in educational reform have highlighted many issues related to teacher preparation. Issues such as teacher competencies, credentialling procedures, and retention are critical to the overall educational reform movement and particularly critical to programs for students with serious emotional disturbance. Research has indicated that teachers in programs for students with serious emotional disturbance have the highest attrition of any teaching group. Yet, little is known regarding their preparation for the teaching profession. There is a critical need to assess our professional knowledge base relative to the structure and content of personnel preparation programs.

Students with serious emotional disturbance provide a unique challenge and place unique demands on service delivery. These students constitute a heterogenous group in terms of academic, social, and emotional needs. As a result of this diversity, a wide range of placement options are required to best address the needs of these students. The extent to which the service delivery system attempts to meet the needs of these students in alternative placements and the process, rationale, and procedures for placement decisions are largely unknown. There is a critical need to address not only the extent to which these students needs are being addressed outside the traditional educational system, but how these students are reintroduced into the system if they have been removed for service.

Purpose

The purpose of this priority is to provide information to support the development of plans for improving outcomes for children with serious emotional disturbance. This priority supports activities designed to identify, organize, interpret, and disseminate the knowledge bases related to personnel preparation and student placement. One award will be funded in each area for up to 24 months duration.

Focus

Each project funded under this priority must develop procedures for: (a) Identifying and organizing the current state of knowledge; (b) interpreting the current state of knowledge to draw implications for research and practice; and (c) disseminating the project's findings and interpretations to policy makers practitioners, parents, and researchers.

Personnel Preparation. It is anticipated that one cooperative agreement will be awarded dealing with the preparation of teachers to work with students with serious emotional disturbance. The project must determine the current status of personnel preparation from at least three perspectives. First, the project must review each State's requirements for teacher licensure and approving programs for training teachers of students with serious emotional disturbance, and prepare a compendium of these extant data materials. Based on this review of State licensure and approval criteria, the project must develop a conceptual framework that is comprehensive and reflects the complexity contributing to State variations. This comprehensive conceptual framework must be used to select a representative sample of States for subsequent analysis. The comprehensive conceptual framework must be used as the basis for defining the sampling frames for selecting States. Each sampling frame derived from the comprehensive conceptual framework must include at least two or three representative States consistent with that particular frame. The selection of these States must allow for testing for the replication of findings across State entities. The project must provide a comprehensive profile of approaches to State program approval; examples of course sequences and content associated with those sequences; and examples of the knowledge, skills, and competencies required by the States in licensing teachers of children and youth with serious emotional disturbance. This must provide a comprehensive comparison of the various approaches along relevant dimensions identified in the applicant's organizational framework.

Second, the project must compare the accrediting agency (e.g., National Council Accreditation Teacher Education (N.C.A.T.E.)) standards in relation to teacher training for children and youth with serious emotional disturbance. This comparison must include course requirements, and field experiences that impact the design and structure of training programs. However, the comparison need not be limited to these factors and may include other factors that impact the design and structure of training programs deemed relevant by the project. The diversity of approaches currently employed by institutions of higher education to meet accrediting agency standards across States and institutions must be highlighted.

Third, the project must classify approaches to personnel preparation programs for preparing teachers to work with children and youth with serious emotional disturbance. For example, personnel preparation programs might be classified according to the primary roles for which they train personnel such as case managers of instructional services; designers and providers of specially designed instruction; or crisis managers of student behavior. The project must provide a method of classification that will identify the major approaches as a framework for communicating the critical content and process features of personnel preparation programs. This information must be prepared for use by policy makers, researchers, teacher trainers, and other consumers. The project must provide a synthesis of information, gathered from the literature, practitioners, and administrators, that highlights the critical issues related to personnel preparation including the quality of the work environment, alternative career opportunities, and salary studies.

Student Placement Issues. A second cooperative agreement will be awarded for an analysis of placement issues related to children with serious emotional disturbance. In this agreement, the project will address the complex issues relating to placement decisions for children with serious emotional disturbance. Specific attention must be given to the decisions to place children with serious emotional disturbance outside the school system to receive educational services (e.g., private hospitals or out of district residential programs), and decisions to return children to their community and school. Projects must provide information on the rationale, procedures, participants, and contexts for those decisions.

Activities

Identification of Knowledge Sources. Projects must provide an initial identification of the source and nature of information to be considered. These information sources may include, but are not limited to: (1) Research literature; (2) professional literature containing program descriptions and evaluations; (3) State legal and policy documents including applicable regulations and policies; (4) practitioners (including teachers and administrators) involved in the delivery or management of programs for students with serious emotional disturbance; and (5) parents of students with serious emotional disturbance. Information sources may be readily available (e.g., extant data bases or documents) or sources that require that the project access potential sources using a range of methodologies in order to access useful information.

Organization of Knowledge Base. Projects must develop an initial framework for organizing information along relevant dimensions. This framework must provide a map of what is known in the areas of personnel preparation and student placement as it relates to children and youth with serious emotional disturbance. This framework must be developed with input from potential consumers of the information (e.g., policy makers, parents, practitioners, and researchers) so as to ensure the usability and validity of project efforts.

Interpretation of Knowledge Base. Projects must develop detailed descriptions of procedures for analyzing and interpreting information that will provide implications for developing plans for improving outcomes for children and youth with serious emotional disturbance. Procedures must be appropriate for the nature of information collected.

Coordination/Collaboration. Each project must cooperate with the Department to ensure non-duplicative efforts with other projects and maximize efficiency in identifying and obtaining information. Recipients of awards will be required to meet in Washington, DC after award to coordinate project activities. Projects must have access to extant information sources and collaborate with relevant stakeholders in the respective areas. Information must also be shared between relevant projects to ensure that resulting implications for research and practice are as current and complete as possible.

Dissemination Activities. Projects must make available to relevant national, professional, and parent organizations their methods, findings, and interpretations.

National Dissemination and Exchange Forum. Each project must provide draft copies of their findings and interpretations to participants invited to attend a national forum. Project directors must present the results of their activities at the national forum, and participate in discussions with representatives from professional associations, the research community, policy makers, parents, and other parties having significant involvement with children and youth with serious emotional disturbance. It is anticipated that the final drafts of findings and interpretations will be based on the feedback from this forum.

Selection Criteria

The following selection criteria will be used to evaluate applications for projects submitted under this priority.

(a) *Plan of operation.* (10 points)

(1) The Secretary reviews each application to determine the quality of the plan of operation for the project.

(2) The Secretary looks for—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) How the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national

VOL 56 ISS 118 JE 19 1991 UMI

origin, gender, age, or disabling condition.

(3) The Secretary reviews each application to determine the quality of the evaluation plan for the project, and considers the extent to which the methods of evaluation are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

Cross Reference

34 CFR 75.590, *Evaluation by the grantee.*

(b) *Quality of key personnel.* (10 points)

(1) The Secretary reviews each application to determine the qualifications of the key personnel that the applicant plans to use on the project.

(2) The Secretary considers—

(i) The qualifications of the project director (if one is to be used);

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(2) (i) and (ii) of this section will commit to the project; and

(iv) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or disabling condition.

(3) To determine personnel qualifications, the Secretary considers experience and training in fields related to the objectives of the project and other evidence that the applicant provides.

(c) *Budget and cost effectiveness.* (5 points)

(1) The Secretary reviews each application to determine if the project has an adequate budget and is cost effective.

(2) The Secretary considers the extent to which—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(d) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application to determine if the applicant plans to devote adequate resources to the project.

(2) The Secretary considers the extent to which—

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(e) *Importance.* (15 points) The Secretary reviews each application to determine the importance of the project in leading to the understanding of, remediation of, or compensation for, the problem or issue that relates to the early intervention with or special education of infants, toddlers, children, and youth with disabilities.

(f) *Impact.* (15 points) The Secretary reviews each application to determine the probable impact of the proposed research products on infants, toddlers, children, and youth with disabilities, or personnel responsible for their education.

(g) *Organizational capability.* (5 points) The Secretary considers—

(1) The applicant's experience in special education; and,

(2) The ability of the applicant to disseminate the findings of the project to appropriate groups to ensure that the findings can be used effectively.

(h) *Technical soundness.* (35 points) The Secretary reviews each application to determine the technical soundness of the research or evaluation plan, including—

(1) The design;

(2) The proposed sample;

(3) The instrumentation; and

(4) The data analysis procedures.

Priority 2: Designing and Implementing a Comprehensive System of Education and Support for Children With Serious Emotional Disturbance (CFDA 84.237)

Issue

Although public school programming for children with serious emotional disturbance has expanded significantly since passage of Public Law 94–142, these children remain an under-identified and underserved population. The Eleventh and Twelfth Annual Reports to Congress on the Implementation of the Education of the Handicapped Act included reported data and findings from the National Longitudinal Study that suggested the inadequacy of current efforts to meet the complex needs of these children. School dropout rates, course failure, and post-school arrest rates of adolescents and young adults with serious emotional disturbance provide clear evidence of the need to provide early and more effective family, school, community, mental health, and social service practices.

The problems of children with serious emotional disturbance are evidenced not only in school settings but also at home and in the community. Children with serious emotional disturbance and their families are likely to become involved with multiple service systems (e.g. education, mental health, juvenile justice, social service, and the child welfare systems). Services are often fragmented due to a lack of coordination between service systems. Effective identification and treatment of children with serious emotional disturbance and their families requires the involvement and expertise of multiple service providers and often of multiple agencies to effect a comprehensive system of services that addresses the child's physical, emotional, social and educational needs.

There have been several promising initiatives to promote comprehensive community based systems of support for children with serious emotional disturbance. However, there remains a critical absence of information on models for integrating school and community assistance and resources to provide the full array of services needed by children with serious emotional disturbance and their families.

Purpose

This priority will support partnership among school districts, communities, and States for projects that: (a) Design and assess the feasibility for providing education and support services, and (b) develop and implement a comprehensive system of education and support for children with serious emotional disturbance. This priority is structured in two phases:

Phase 1—This phase will support approximately 10 projects to design and assess the feasibility for developing and implementing a comprehensive system of education and support for children with serious emotional disturbance. Phase 1 will be for an 18-month period. A broad spectrum of projects reflecting different contexts (i.e. policy, fiscal, inter-agency relationships, geography, ethnic diversity) will be supported in order to accumulate across projects the full range of issues, options, and designs required to provide a comprehensive system of education and support for children with serious emotional disturbance.

Phase 2—This phase will provide continued support for three to four projects from Phase 1 for an additional two-year period in order to implement the system design. Although not all projects will be selected for Phase 2, projects must include a plan for both phases.

The purpose of these projects is to identify the issues and options the school districts, communities, and States must address in order to develop a comprehensive system of education and support for children with serious emotional disturbance and their families. Each project must prove the design feasibility of procedures and structures that if implemented would have the capacity for efficiently and effectively providing: Early screening and identification, case management, evaluation, comprehensive plan of service (including the Individualized Education Program (IEP)), service continuity, and multi-agency coordination and planning. Projects must design systems to provide education and support services that are available, responsive to diverse and changing needs, coordinated, and provided in a manner assuring continuity in meeting the needs of children with serious emotional disturbance and their families.

Activities

Phase 1: Phase 1 projects must develop a design for a comprehensive education and support system for children with serious emotional disturbance and assess its feasibility for implementation. The Department has substantial interest in these projects being able to collectively contribute to advancing an understanding of the design features and implementation issues and solutions to problems related to developing a comprehensive system of education and support for children with serious emotional disturbance and their families.

School District, Community, and State Site Selection. The project must select a school district, community, and State where two or more public agencies have an historical track record of collaboration, coordination, and resource sharing at the State and community level. Project sites must be selected on the basis of having all or most components of a comprehensive system of education and support for children with serious emotional disturbance. The project sites must be selected where the prerequisite fiscal, administrative commitment, and experience are consistent with designing and implementing system improvements. Each project, at a minimum, must include the active participation of a local school district, a community mental health agency, and a social service agency. Other agencies such as primary health providers and juvenile justice offices should be encouraged, if appropriate, to participate as part of a comprehensive system. Each project must provide letters of commitment to participate in the design of this comprehensive system.

Site. Each project must determine the range, nature, and frequency of educational and other care needs of children with serious emotional disturbance in its school district and community. Based on this analysis and profile of educational and support needs, each project must review current school and community practice related, but not limited to: Early screening and identification, case management and ombudsperson assistance, family participation, evaluation, comprehensive plan of service (including Individualized Education Programs (IEP)), service continuity, and multi-agency coordination and planning. The needs of children with serious emotional disturbance and their families, and the analysis of current practice, provides the template for identifying potential areas for designing system improvement.

Designing System Improvements. For each potential system improvement area identified, projects must determine: (a) The rationale, including support from a review of the literature as well as service provision experience, for giving priority attention to that area; (b) current system limitations; (c) system improvement options considered; (d) criteria for selecting and rejecting various improvement options; and (e) implementation requirements. System improvement options considered must draw on the growing professional knowledge base of effective strategies for:

(1) The appropriate identification and treatment of children with serious emotional disturbance whose families, as a whole, are from racially, ethnically or linguistically diverse populations;

(2) The integration of validated practices into a coordinated system for delivering educational and community services;

(3) The coordinated delivery of a full range of school and community services (e.g. special education, mental health, child welfare, recreation, health, juvenile justice, etc.); and

(4) The successful collaboration between multiple service providers with respect to resources (particularly financial), eligibility criteria, policy and other areas.

The system improvements to be designed must draw from previous special education, mental health, and human services research. Specific interventions may be implemented by educational, related service, or other community service personnel in a range of educational and community based settings, but those personnel and settings must be part of a coordinated system of educational and community services.

Determining Feasibility of System Improvement Design. Each project must determine the capacity and readiness of the school district, community, and State sites to implement each identified potential system improvement in terms of, but not limited to: Policy, fiscal, administrative, personnel, attitude, and timeframe implications. Criteria for determining feasibility shall be documented for each proposed system improvement, the arguments for and against each proposed system improvement described, and evidence provided for each potential system improvement as to the likely feasibility of implementation, effectiveness, and impact. Projects must determine critical coordination issues they identify during implementation such as leadership, staff and parent training, and interagency relationships.

Collaboration. All Phase 1 projects must cooperate with the Department in providing their reviews of literature and rationale for the selection of designs for improving components of their systems. Projects must budget one trip to Washington, DC, to develop a cross-project dissemination product of the rationals for giving priority attention to those areas including support from the reviews of literature. Projects will then be required to use the information derived from this meeting to refine the final development of designs during the last six months of Phase 1.

Phase 2: The selection of up to four projects for the Phase 2 option will be based upon the innovativeness and quality of proposed system improvements, strength of evidence to support feasibility of implementation, contribution to understanding diverse contexts (i.e. geography, inter-agency relationships) thought to affect implementation, evidence of strength of commitment, resources to implement system improvements, realistic timeline for achieving full implementation, and evidence of full participation by parents and advocates.

Implementing System Improvements. Each project selected for Phase 2 implementation must address child and family needs. An implementation schedule must reflect the rationale for sequencing activities, and evidence of critical implementation support. Procedures for ensuring the integrity of the improvements must be implemented. The implementation of system improvements must be achieved and documentation maintained describing the nature and extent of participation of all relevant parties.

Evaluating Comprehensive System of Education and Support. The primary question being tested is the efficacy and effectiveness of a comprehensive system of education and care for children with serious emotional disturbance and their families. Each project must rigorously

VOL
56
ISS
1
1
8
JE
19
1991
UMI

study this question. Each project must conduct an evaluation that not only addresses the question of overall efficacy, but the contribution of individual components. The component designs and overall system improvement features must be documented in such a way that others interested in utilizing these designs and system improvement features could evaluate their applicability and potential for implementation in their school district and community. In addition, each project must document and study implementation and exportability of each component as well as the overall model.

Collaboration. The Department has substantial interest in the projects awarded under this priority. This interest includes capturing across projects the full range, nature, and frequency of educational and support needs of children with serious emotional disturbance; current state of school, community, and State services; identification of areas for targeting comprehensive system improvements; and options and rationales for system improvements selected for implementation. This requires each project to cooperate with the Department in designing their studies to permit a cross-project summary of findings. Projects must also cooperate with the Department in working with coalitions of professionals and parent organizations to develop cross-project dissemination materials to be used by those organizations with their respective membership.

Dissemination Activities. Individual projects must make available to relevant national, professional, and parent organizations their methods, findings, and interpretations.

Selection Criteria

The following selection criteria will be used to evaluate applications for projects submitted under this priority.

(a) *Plan of operation.* (10 points)

(1) The Secretary reviews each application to determine the quality of the plan of operation for the project.

(2) The Secretary looks for—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) How the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or disabling condition.

(b) *Quality of key personnel.* (10 points)

(1) The Secretary reviews each application to determine the qualifications of the key personnel the applicant plans to use on the project.

(2) The Secretary considers—

(i) The qualifications of the project director (if one is to be used);

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(2) (i) and (ii) of this section will commit to the project; and

(iv) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or disabling condition.

(3) To determine personnel qualifications, the Secretary considers experience and training in fields related to the objectives of the project and other evidence that the applicant provides.

(c) *Budget and cost effectiveness.* (5 points)

(1) The Secretary reviews each application to determine if the project has an adequate budget and is cost effective.

(2) The Secretary considers the extent to which—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(d) *Evaluation plan.* (10 points)

(1) The Secretary reviews each application to determine the quality of the evaluation plan for the project.

Cross Reference

34 CFR 75.590, *Evaluation by the grantee.*

(2) The Secretary considers the extent to which the methods of evaluation are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(e) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application to determine if the applicant plans to devote adequate resources to the project.

(2) The Secretary considers the extent to which—

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(f) *Importance.* (10 points) The Secretary reviews each application to determine—

(1) The extent to which the service delivery problem addressed by the proposed project is of concern to others in the Nation; and,

(2) The importance of the project in addressing the problem or issue.

(g) *Innovativeness.* (15 points)

(1) The Secretary reviews each application to determine the innovativeness of the proposed project.

(2) The Secretary looks for a conceptual framework that—

(i) Is founded on previous theory and research; and

(ii) Provides a basis for the unique strategies and approaches to be incorporated into the model.

(h) *Organizational capability.* (10 points) The Secretary considers—

(1) The applicant's experience in special education or early intervention services; and

(2) The applicant's ability to disseminate findings of the project to appropriate groups to ensure that they can be used effectively.

(i) *Technical soundness.* (25 points) The Secretary reviews each application to determine the technical soundness of the plan for the development, implementation, and evaluation of the model with respect to such matters as—

(1) The population to be served;

(2) The model planning process;

(3) Recordkeeping systems;

(4) Coordination with other service providers;

(5) The identification and assessment of students;

(6) Interventions to be used, including proposed curricula;

(7) Individualized educational program planning; and

(8) Parent and family participation.

Intergovernmental Review

The Program for Children and Youth with Serious Emotional Disturbance is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Program Authority: 20 U.S.C. 1428.

(Catalog of Federal Domestic Assistance Number 84.237, Program for Children and Youth with Serious Emotional Disturbance)

Dated: April 25, 1991.

Lamar Alexander,

Secretary of Education.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Grant Availability to Federally Recognized Indian Tribes for Projects Implementing Traffic Safety on Indian Reservations

June 11, 1991.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of a grant program.

SUMMARY: The Bureau of Indian Affairs (BIA) intends to make funds available to Federally-Recognized Indian tribes on an annual basis for the purpose of financing highway traffic safety projects which are designed to reduce the high number of traffic accidents and their resulting fatalities, injuries, and property damage within Indian reservations. Due to the limited funding available for this program, all projects will be reviewed and selected on a competitive basis. This notice is intended to inform Indian tribes on the availability of the grant monies and the process in which the projects are selected.

DATES: Applications must be received by July 1 of each program year.

ADDRESSES: Each tribe must submit its application to the BIA Agency or Area Office serving the area in which the tribe is located. The application will be addressed to the attention of: "Indian Highway Safety Program Coordinator". Application packets will be distributed on May 1 of each program year to the tribal address as shown on the latest Tribal Leaders' List whch is compiled by the Bureau of Indian Affairs' Tribal Government Services, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Tribes should direct all questions concerning the grant program and applications to the Area Indian Highway Safety Program Coordinator having responsibilities for the applicant tribe. More general inquiries on the National Indian Highway Safety Program may be directed to Charles L. Jaynes, Program Administrator, Bureau of Indian Affairs, P.O. Box 2006, Albuquerque, New Mexico 87103. Telephone: (505) 766–2181.

SUPPLEMENTARY INFORMATION:

Background

The Federal-Aid Highway Act of 1973 (Pub. L. 93–87) provides for U.S. Department of Transportation funding to assist Indian tribes in financing highway safety projects. These projects are designed to reduce the number of traffic crashes and their resulting fatalities, injuries, and property damage within Indian reservations. All Federally-recognized Indian tribes on Indian reservations are eligible to receive this assistance, and at such time as highway safety projects are approved, the tribal governing bodies will carry out and administer the programs. All tribes which avail themselves of this assistance are reimbursed for costs incurred under the terms of a Federal/Reservation agreement. The Department of Transportation pays from 75% to 100% of all costs of highway safety projects approved for funding under provisions of the Highway Safety Act.

Responsibilities

For purposes of application of the Act, Indian reservations are collectively considered a "State" and the Secretary, U.S. Department of the Interior (DOI), is considered the "Governor of a State". The Secretary, DOI, delegated the authority to administer the programs throughout all the Indian reservations in the United States to the Commissioner, Bureau of Indian Affairs.

The Commissioner of the BIA further delegated the responsibility for primary administration of the Indian Highway Safety Program to the Central Office Division of Safety Management (DSM), located in Albuquerque, New Mexico. The Chief, DSM, as program administrator of the Indian Highway Safety Program, has one full-time staff member to assist in program matters and provide technical assistance to the Indian tribes. It is at this level that contacts with the U.S. Department of Transportation are made with respect to program approval, funding of projects and technical assistance. The U.S. Department of Transportation, through the National Highway Traffic Safety Administration (NHTSA) and the Federal Highway Administration (FHWA), is responsible for assuring that the Indian Highway Safety Program is carried out in accordance with 23 U.S.C. 402 and other applicable Federal regulations.

The National Highway Traffic Safety Administration is responsible for the apportionment of funds to the Secretary of the Interior, review and approval of the highway safety plan involving NHTSA highway safety areas of responsibilities, and technical guidance and assistance to BIA field offices and tribal coordinators by NHTSA regional offices in the general administration of the program.

The Federal Highway Administration is responsible for review and approval of highway safety plan involving FHWA highway safety areas of responsibilities and technical guidance and assistance to BIA field offices and tribal coordinators by FHWA division offices.

Program Areas

The Department of Transportation, at the direction of Congress, in the Omnibus Budget Reconciliation Act of 1981, conducted a major review to determine which state and local highway safety programs have been most effective in reducing traffic crashes, injuries and fatalities. The six most effective NHTSA and FHWA highway safety programs are: (1) Alcohol and other drugs Countermeasures; (2) Police Traffics; (3) Occupant Protection; (4) Traffic Records; (5) Emergency Medical Services, and; (6) Roadway Safety and Motorcycle Safety.

Funding Criteria

The Bureau of Indian Affairs will reimburse for costs associated with the following:

(1) Alcohol and other drugs Countermeasures—Salary (DWI) enforcement/education/rehabilitation); (DWI) training; breath-testing equipment; community/school alcohol traffic safety education; (DWI) offender education/rehabilitation, and vehicle expenses.

(2) Police Traffic Services—Salary (traffic enforcement/education); traffic enforcement training; speed enforcement equipment; community/school education, and vehicle expenses.

(3) Occupant Protection—(A) Child Car Seat Program—child car seats; car seat transportation/storage; education materials, and; office expenses. (B) Community Seat Belt Program—Salary; educational/promotional materials; office expenses; and training.

(4) Traffic Records—salary; computerized equipment.

(5) Emergency Medical Services—training is the only allowable cost for funding.

(6) Roadway Safety and Motorcycle Safety—Traffic signs (warning, regulatory, work zone); hardware and sign posts.

Project Application

Application packets will be forwarded to the tribes on May 1 of each program year. Upon receipt of the application packet, each tribe should prepare a proposed project application based upon the following guidelines:

A. *Program Planning.* Program planning shall be based upon the highway safety problems identified and countermeasures selected by the tribe for the purpose of reducing traffic crash factors.

B. *Problem Identification.* Highway traffic safety problems shall be identified from the best data available.

The data may be found in tribal enforcement records on traffic crashes. Other sources of data include ambulance records, court and police arrest records. The problem identification process may be aided by using professional opinions of personnel in law enforcement, Indian Health Service, driver education, road engineers, etc.

Impact problems will be identified during the identification process. An impact problem is a highway safety problem that contributes to car crashes, fatalities and/or injuries, and one which may be corrected by the application of countermeasures. Impact problems can be identified from analysis of statewide and/or tribal traffic records. The analyses should consider, as a minimum: Pedestrian, motorcycle, pedalcycle, passenger car, school bus, and truck accidents; records on problem drivers, roadside and roadway hazards, alcohol involvement, youth involvement, defective vehicle involvement, suspended or revoked driver involvement, speed involvement and safety belt usage.

C. *Countermeasure Selection.* When tribal highway traffic safety problems are identified, appropriate countermeasures shall be developed by the tribe to solve or reduce the problems. The development of these countermeasures should take into account the overall cost of the countermeasure versus its possible effects on the problem.

D. *Objectives/Performance Indicators.* After countermeasure selection, the objective(s) of the project must be expressed in clearly defined, time-framed and measurable terms.

E. *Budget Format.* The activities to be funded shall be outlined according to BIA object groups, i.e., personal services, travel, supplies and materials, equipment, contracts, training, etc. Each object group shall be quantified, i.e., personal activities should show number to be employed, hours to be employed, hourly rate of pay, etc. Each object group shall have sufficient detail to show what is to be procured, unit cost, quarter in which the procurement is to be made and the total cost, including any tribal contribution to the project.

F. *Evaluation Plan.* Evaluation is the process of determining whether a highway safety activity should be undertaken, if it is being properly conducted and if it has accomplished its objective. A plan explaining how the evaluation will be accomplished and identifying the criteria to be used in measuring performance shall be included in the grant application.

G. *Technical Assistance.* Bureau of Indian Affairs personnel will be available to tribes for technical assistance in the preparation of tribal project applications.

H. *Section 402 Project Length.* Section 402 funds shall not be used to fund the same project at one location or jurisdiction for more than three years.

Submission Deadline

Each tribe must submit its application to the BIA Agency or Area Office serving the area in which the tribe is located. The application will be sent to the attention of: Indian Highway Safety Program Coordinator. The application must be received by July 1 of each program year. Request for extension to this deadline will not be granted.

Selection Criteria

Project application will be reviewed and evaluated by the Indian Highway Safety Program Office and applications will be ranked by assigning points to four areas of consideration. Those areas of consideration and their respective point values are listed below:

Magnitude of Problem—50 Points

1. Does a highway safety problem exist?
2. Is the problem significant?
3. Does the project contribute to the solution of the problem identified?
4. Number of traffic crashes last three years? Alcohol related?
5. Number of reported fatalities last three years? Alcohol related?

Countermeasure Selection—40 Points

1. Are the countermeasures selected the most effective?
2. Are they cost effective?
3. Have objectives been stated in realistic performance terms and are they attainable?
4. Are the objectives time-framed and are the time-frames realistic and attainable?

Tribal Leadership and Community Support—10 Points

1. Are tribal resources used in this project? Tribal Resolution?
2. Does the project have community support? Support Letters?

Past Performance + or − —10 Points

1. Reporting (Financial & Programmatic).
2. Accomplishments.

Notification of Selection

The tribes selected to participate will be notified by letter. Each tribe will be requested to submit a Certification Regarding Drug-Free Workplace Requirements. Indian tribes receiving highway safety grants through the Indian Highway Safety Program must certify that they will maintain a drug-free workplace. The certification must be signed by an individual authorized to sign for the tribe. The certification must be received by the BIA and U.S. Department of Transportation prior to the release of grant funds for the tribe.

Notification of Non-Selection

The program Administrator will notify each tribe not selected. The tribe will be advised of the reason for non-selection.

Uniform Administrative Requirements for Grants-in-Aid

Uniform grant administration practices have been established on a national basis for all grant-in-aid programs by OMB Circular A–102, "Uniform Administrative Requirements for Grants-in-Aid to State and Local Governments". Cost principles applicable to grants and contracts with State and local governments have been established by OMB Circular A–87 and NHTSA Order 462–13A. It is the responsibility of the Program Administrator, Area Coordinators, and Contracting/Grants Officers to establish operating procedures consistent with the applicable provisions of those circulars.

Standards for Financial Management System

Tribal financial management systems must provide for:

1. Accurate, current, and complete disclosure of financial results of the highway safety project.
2. Adequate recordkeeping.
3. Control over and accountability for all funds and assets.
4. Comparison of actual with budgeted amounts.
5. Documentation of accounting records.
6. Appropriate auditing. Highway safety projects will be included in the tribal A–128 Single Audit.

Tribal programs will provide a monthly financial status report to the Department of Transportation. This report of expenditures will be submitted to the Program Administrator no later than 15 days beyond the reporting month.

Project Monitoring

During the program year, it is the responsibility of the BIA to maintain a degree of project oversight, provide technical assistance as needed to assist the tribe in fulfilling its objectives, and assure that grant provisions are complied with.

Project Evaluation

A performance evaluation will be conducted for each highway safety project by the Bureau of Indian Affairs. The evaluation will measure the actual accomplishments to the planned activity.

Eddie F. Brown,

Assistant Secretary—Indian Affairs.

Office of Assistant Secretary

Public and Indian Housing Drug Elimination Program; Notice of Funding Availability

VOL 56 ISS 118 JE 19 1991 UMI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. N-91-3268; FR-3052-N-01]

NOFA for the Public and Indian Housing Drug Elimination Program—FY 1991

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice of funding availability (NOFA) for FY 1991.

DATES: Applications are due on or before 5:15 p.m. local time, on July 26, 1991. An original and two copies of the application must be received by this deadline at the local HUD field office with jurisdiction over Public Housing Agency (PHA) applicants or, in the case of Indian Housing Authority (IHA) applicants, in the local HUD Office of Indian Programs, Attention: Assisted Housing Management Branch Director, or Office of Indian Programs Director.

SUMMARY: This NOFA announces HUD's FY 1991 funding of $140,775,000 for the Drug Elimination Program (DEP). In the body of this document is information concerning the purpose of the NOFA, applicant eligibility, available amounts, selection criteria, and application processing, including how to apply and how selections will be made.

FOR FURTHER INFORMATION CONTACT: Malcolm E. Main, Drug-Free Neighborhoods Division, Office of Resident Initiatives, Public and Indian Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708-1197 or 708-3502. A telecommunications device for deaf persons (TDD) is available at (202) 708-0850. (These are not toll-free telephone numbers.)

SUPPLEMENTARY INFORMATION: .

Paperwork Reduction Act Statement

The information collection requirements contained in this notice have been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980. Expedited review has been requested with a twenty day public comment period, so that the application process described in this notice may be carried out after approval of the described collections of information.

Pending approval of these collections of information by OMB and the assignment of an OMB control number, no person may be subjected to a penalty for failure to comply with these information collection requirements. The OMB control number, when assigned, will be announced by separate notice in the **Federal Register**.

The public reporting burden for this collection of information is estimated to include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the documents making up the collection of information. Information on the estimated public reporting burden is provided below:

Section of NOFA affected	No. of respondents	No. of respondents per response	Total annual responses	Hours per response	Total hours
I(c)(f)	300	1	300	6	1,800
III (entire)	500	1	500	70	35,000
Total annual reporting burden					36,800

Send comments regarding this burden estimate, or any other aspect of this collection of information, to the Department of Housing and Urban Development, Rules Docket Clerk, 451 Seventh Street, SW., room 10276, Washington, DC 20410; and to the Paperwork Reduction Project, Office of Management and Budget, Washington, DC 20503.

I. Purpose and Substantive Description

(a) Authority

This program is authorized under chapter 2, subtitle C, title V of the Anti-Drug Abuse Act of 1988 (42 U.S.C. 11901 *et seq.*), as amended by section 581 of the National Affordable Housing Act of 1990 (NAHA), approved November 28, 1990, Pub. L. 101-625. Before the NAHA amendments to the Drug Elimination Program, a final rule implementing DEP, codified as 24 CFR part 961, was issued by HUD at 55 FR 27598 (July 3, 1990). Because of the amendments made by NAHA, a revised rule for the Drug Elimination Program is being proposed that will amend 24 CFR part 961. However, the requirements of this NOFA will provide guidance for applicants that will implement the NAHA changes for this year's program funding while the rulemaking is pending.

HUD has determined that Congress intended the Drug Elimination Program as amended by NAHA to apply to the FY 1991 program funding. The NAHA amendments specifically authorize the appropriation of program funding for FY 1991, indicating a clear intent to carry out the Drug Elimination Program as amended by NAHA. While HUD is issuing a proposed rule for public comment to implement the NAHA amendments, a final rule could not take effect for at least ninety days at the very earliest, allowing for a sixty day comment period on the proposed rule and a thirty day waiting period after publication of the final rule, in keeping with the Department's rulemaking policy and procedure at 24 CFR part 10. The existing regulation at 24 CFR part 961 only implements the Drug Elimination Program as it existed before amendment by NAHA, and in some respects, the existing regulation frustrates the changes that Congress saw fit to enact. For example, NAHA permits the funding of drug treatment programs, the existing rule does not; the existing rule requires programs designed to reduce the use of drugs in and around public housing projects to be "innovative," but NAHA removes the requirement of innovation. Accordingly, HUD considers those portions of 24 CFR part 961 that conflict with NAHA no longer to be valid. Rather, the guidance provided in this NOFA is to be followed by program applicants.

Besides implementing NAHA, the additional information provided in this NOFA will be responsive to program applicants who, in HUD's experience in implementing DEP so far, have demonstrated a need for more detailed guidance in the preparation of applications.

(b) Allocation Amounts

The amount available for funding under this NOFA in FY 1991 is $140,775,000. The Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act 1991, approved November 5, 1990, Public Law 101-507, appropriated $150 million for the Drug Elimination Program and for drug information clearinghouse services for FY 1991. Of this amount, $1 million is to be used for technical assistance and training. The clearinghouse services have been allocated $725,000. In addition, section 520 of NAHA set aside five percent of funds appropriated for the Drug Elimination Program for the Youth Sports Program, a total figure of $7.5 million for FY 1991. The remaining $140,775,000 is the funding available for this program.

HUD is distributing grant funds under this NOFA to each of its 10 regional offices on the basis of a formula allocation. The formula has been re-computed for FY 1991 to achieve a more equitable distribution of funds. The formula allocation is based upon the relationship of the number of public/Indian housing units per region and the level of drug-related crime within each region, based upon statistics compiled by the U.S. Department of Justice, Federal Bureau of Investigation, ("Uniform Crime Reports for Drug Abuse Violations—1989").

Maximum grant award amounts under this NOFA are based upon a sliding scale, using either an overall cap to the grant award or a maximum per unit cap, depending upon the number of units in a housing authority. HUD's rationale for using this sliding scale is that larger PHAs have more efficient economies of scale. Under the schedule listed below, a housing authority with 20,000 units could apply for a maximum grant award of $3,000,000, i.e. 20,000 units x $150 per unit = $3,000,000, which is greater than the maximum flat grant award of $1,000,000. The maximum grant awards under this NOFA are as follows, although HUD has discretion to determine the amount of any grant award:

(i) For housing authorities with 1-499 units: the maximum grant award is either a maximum cap of $600 per unit or a maximum grant award of $50,000, whichever is greater;

(ii) For housing authorities with 500-4,999 units: the maximum grant award is either a maximum cap of $200 per unit or a maximum grant award of $250,000, whichever is greater;

(iii) For housing authorities with 5,000-44,999 units: the maximum grant award is either a maximum cap of $150 per unit or a maximum grant award of $1,000,000, whichever is greater;

(iv) For housing authorities with 45,000 or more units: the maximum grant award is a maximum cap of $100 per unit.

Any grant funds under this NOFA that are allocated to a region, but that are not reserved for obligation for specific grantees within the time period to be specified in the application package by the Secretary for this fiscal year, must be returned to HUD Headquarters for reallocation to other regions. The reallocation of these funds to the regions will be based upon the formula allocation method described in this NOFA, except that HUD will omit from the formula allocation those figures representing the extent of drug-related crime and the number of public housing units for the region that returned the grant funds. Regions that receive reallocated funds will use those funds to award grants to eligible applicants that did not get funded under the initial competition held under this NOFA. These grants will be awarded by each HUD regional office to the highest-ranked remaining applicants in the region that scored at least 80 points under the selection criteria. HUD is distributing grant funds under this NOFA to its 10 regional offices, in accordance with the following schedule:

HUD Region	Allocation
Region I	$7,516,600
Region II	25,485,194
Region III	14,859,144
Region IV	37,052,317
Region V	23,343,982
Region VI	14,746,201
Region VII	5,876,617
Region VIII	2,602,734
Region IX	6,478,466
Region X	2,964,583

(c) Eligibility

Eligible Applicants

Although section 581 of the National Affordable Housing Act of 1990 (NAHA), approved November 28, 1990, Public Law 101-625, expanded this program to include assisted housing, the appropriation for the program in the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act 1991, approved November 5, 1990, Public Law 101-507, did not include any funds for assisted housing. Hence, funding under his NOFA is available only for PHAs and IHAs authorized under the United States Housing Act of 1937 (other than under section 8). Assisted housing is not funded under this NOFA. Public Housing Agencies and Indian Housing Authorities are eligible to apply for Drug Elimination grants for drug elimination activities in public and Indian housing projects.

Eligible Activities

Grant funds may be used as indicated for one or more of the following activities designed to eliminate drug-related crime:

(a) *Security personnel.* (1) Employment of security personnel in public and Indian housing projects is permitted under this program. Security personnel employed under this section shall be required as a condition of employment to meet all relevant State, tribal or local insurance, training, licensing, or other similar requirements.

(2) Security personnel shall not be employed under this section to provide any services except those over and above what the local government is contractually obligated to provide under its Cooperation Agreement with the PHA or IHA (as required by the grantee's Annual Contributions Contract).

(b) *Additional security and protective services.* (1) Reimbursement of local/tribal law enforcement agencies for the cost of providing additional security and protective services for public and Indian housing projects is permitted under this program. The security and protective services provided must be either:

(i) A service that no local/tribal law enforcement agency (or agencies) provided for public or Indian housing projects administered by the grantee within the six months immediately preceding the publication of this Notice of Funding Availability (NOFA) allocating assistance under this program, except for services funded under this program; or

(ii) A quantifiable increase in the level of an ongoing service above that which the local/tribal law enforcement agency (or agencies) provided for public or Indian housing projects administered by the grantee, within the six months immediately preceding the publication of this NOFA allocating assistance under this program, except for services funded under this program.

(2) Additional security and protective services to be funded under this program must be over and above those that the local/tribal government where the proposed project is located is contractually obligated to provide under its Cooperation Agreement with the PHA or IHA (as required by the grantee's Annual Contributions Contract). Grant funds shall only be used to pay for the cost of additional law enforcement services over and above those for which the local/tribal government is already contractually

VOL 56 ISS 118 1991 JE 19 UMI

obligated to provide under the Cooperation Agreement. The additional services shall be verifiable through time sheets and written work assignments.

(3) Communications equipment, computers accessing local, tribal, State and national security networks and databases, facsimile machines, telephone equipment, bicycles, and scooters may be eligible items as incidental costs if used primarily in connection with the provision of additional services, such as the establishment of a law enforcement substation on the funded premises of the grantee. Acquisition procedures for equipment purchased with funding under this section must be in compliance with all HUD requirements and must remain the property of the grantee. For PHAs and IHAs, the procurement standards to be followed are found at 24 CFR 85.36.

(4) Funding is not permitted for the purchase of controlled substances for any purpose, including sting operations; or for the purchase, contract for or maintenance of security dogs for use by local/tribal law enforcement agencies.

(5) Funding is not permitted for compensating informants or confidential informants.

(6) Funding is not permitted under this section for the purchase or leasing of police cars, vans, buses, motorcycles, or motor bikes.

(7) Funding is not permitted to purchase or lease any clothing or equipment that would be normally provided by the law enforcement agency, i.e., uniforms, weapons, protective vests, etc.

(8) Funding under this section is only permitted if the grantee has executed an agreement for such additional law enforcement services.

(c) *Physical Improvements to Enhance Security.* (1) Physical improvements that are specifically designed to enhance security are permitted under this program. These improvements may include (but are not limited to) the installation of lighting systems, fences, bolts, locks; the landscaping or reconfiguration of common areas so as to discourage drug-related crime; and other physical improvements in public and Indian housing projects that are designed to enhance security and discourage drug-related activities.

(2) An activity or project that is funded under any other HUD program, such as the modernization program at 24 CFR Part 968 or 24 CFR Part 905, shall not also be funded by the program under this section.

(3) Funding is not permitted for physical improvements that involve the demolition of any units in a project.

(4) Funding is not permitted for any physical improvements that would result in the displacement of persons.

(5) Funding is not permitted for the acquisition of real property.

(d) *Employment of investigators.* (1) Employment of one or more individuals is permitted under this program to:

(i) Investigate drug-related crime in or around the real property comprising any public or Indian housing project; and

(ii) Provide evidence relating to any such crime in any administrative or judicial proceedings.

(2) Investigators employed under this program are required as a condition of employment to meet all relevant State, tribal, or local training, insurance, licensing, or other similar requirements.

(3) Funding is not permitted for the purchase of controlled substances for any purpose, including use in sting operations.

(4) Funding is not permitted for compensating informants or confidential informants.

(e) *Voluntary tenant patrols.* (1) The provision of training, communitions equipment, and other related equipment (including uniforms), for use by voluntary tenant patrols acting in cooperation with officials of local/ tribal law enforcement agencies is permitted under this program. Members must be volunteers and must be tenants of the project that the tenant patrol represents. Patrols established under this program are expected to undertake surveillance for drug-related criminal activity in the projects proposed for assistance, and to report such activities to the cooperating local law enforcement agency. Grantees are required to obtain liability insurance to protect themselves and the members of the voluntary tenant patrol against potential liability for the activities of the patrol under this program. The cost of this insurance will be considered an eligible program expense.

(2) The applicant, cooperating local law enforcement agency and the members of the tenant patrol are required, prior to putting the tenant patrol into effect, to enter into and execute a written agreement that describes the following:

(i) The nature of the activities to be performed by the tenant patrol, and the patrol's scope of authority;

(ii) The types of activities that a tenant patrol is expressly prohibited from undertaking, to include but not limited to, the carrying or use of firearms or other weapons, nightsticks, clubs, handcuffs, or mace in the course of their duties under this program;

(iii) The type of initial tenant patrol training and continuing training the members receive from the local law enforcement agency (training by the local law enforcement agency is required prior to putting the tenant patrol into effect);

(iv) Tenant patrol members must be advised that they may be subject to individual or collective liability for any actions undertaken outside the scope of their authority and that such acts are not covered under a PHA's or IHA's liability insurance.

(3) Tenant patrols established under this program are required to meet all relevant State, local or tribal training, insurance, licensing, or other similar, requirements.

(4) Communication equipment eligible for funding under this program shall be equipment that is reasonably related to the operation of the tenant patrol and that is otherwise permissible under State, local or tribal law.

(5) Related equipment eligible for funding under this program shall be equipment that is reasonably related to the operation of the tenant patrol and that is otherwise permissible under State, local or tribal law.

(6) Funding is not permitted to obtain ammunition, firearms or other weapons. Tenant patrols are expressly prohibited from carrying or using firearms or other weapons, nightsticks, clubs, handcuffs, or mace in the course of their duties under this program.

(7) Under this program, bicycles and uniforms (caps and other clothing items that identify voluntary tenant patrol members, including patrol t-shirts and jackets) to be used by the members of the tenant patrol may be eligible items.

(8) Funding is not permitted for the purchase of controlled substances for any purpose, including sting operations; or for the purchase, contract for, or maintenance of security dogs for use by local law enforcement agencies.

(9) Funding is not permitted under this program for the purchase or leasing of police cars, vans, buses, motorcycles or motor bikes, bullet-proof vests, etc.

(10) Funding is not permitted for compensating informants or confidential informants.

(11) Drug Elimination Program funds may not be used for any type of compensation for voluntary tenant patrol participants.

(f) *Programs to reduce the use of drugs.* Programs that reduce the use of drugs in and around the premises of public and Indian housing projects, including drug abuse prevention, intervention, referral and treatment programs are permitted under this program.

(1) *Drug Prevention.* Programs that will be considered for funding under this

program must provide a comprehensive drug prevention approach for public and Indian housing residents that will address the individual resident and his or her relationship to family, peers, and the community. Prevention programs must include activities designed to identify and change the factors present in public or Indian housing that lead to drug-related problems, and thereby lower the risk of drug usage. Many components of a comprehensive approach, such as refusal and restraint skills training programs or drug-related family counseling, may already be available in the community of which the housing project of the applicant is a part, and the applicant must act to bring those available program components onto the premises. The salary of a coordinator whose responsibilities would include finding out what community resources are already available and bringing these resources onto the premises, or providing residents referrals to them, as components of a comprehensive drug prevention program is an eligible activity under this paragraph. Activities that should be included in these programs are:

(i) Drug education opportunities for public and Indian housing residents. The causes and effects of illegal drug usage must be discussed in a formal setting to provide both young people and adults the working knowledge and skills they need to make informed decisions to confront the potential and immediate dangers of illegal drugs. Grantees may contract with drug education professionals to provide appropriate training or workshops. The drug education professionals contracted to provide these services shall be required to base their services upon the needs assessment and program plan of the grantee. These educational opportunities may be a part of resident meetings, youth activities, or other gatherings of public and Indian housing residents.

(ii) Family and other support services. Drug prevention programs must demonstrate that they will provide directly or otherwise make available services designed to distribute drug education information, to foster effective parenting skills, and to provide referrals for treatment and other available support services in the project or the community for public and Indian housing facilies.

(iii) Youth services. Drug prevention programs must demonstrate that they have included groups composed of young people as a part of their prevention programs. These groups must be coordinated by adults with the active participation of youth to organize youth leadership, sports, recreational, cultural and other activities involving public and Indian housing youth. The dissemination of drug education information, the development of peer leadership skills and other drug prevention activities must be a component of youth services. Activities or services funded under this program may not also be funded under the Youth Sports Program.

(iv) Economic/educational opportunities for residents and youth. Drug prevention programs should demonstrate a capacity to provide public and Indian housing residents the opportunities for interaction with or referral to established higher education or vocational institutions with the goal of developing or building on the residents' skills to pursue educational, vocational and economic goals. The program must also demonstrate the ability to provide public and Indian housing residents the opportunity to interact with private sector businesses in their immedate community for the same desired goals.

(2) *Intervention.* The aim of intervention is to identify and refer public and Indian housing resident drug users and to assist them in modifying their behavior or, if necessary, to obtain early treatment. The applicant must establish a program with the goal of preventing drug problems from continuing once detected. The training of housing staff and residents for this purpose is an eligible activity under this paragraph, as is the employment of a coordinator to establish and implement the program.

(3) *Drug Treatment.* Drug treatment programs designed to reduce use of drugs in and around public and Indian housing are made eligible under this program. The cost of leasing, acquiring, constructing or rehabilitating the facility space for a drug treatment program is not an eligible expense, but the costs of staffing and reasonable expenses for furnishing and equipping a facility are eligible expenses.

(i) Treatment funded under this program shall be in or around the premises of housing projects to provide tenants more effective treatment. For the purposes of this program, "in or around" means within, or immediately adjacent to, the physical boundaries of a public or Indian housing project.

(ii) Treatment professionals hired under this program are required to meet all relevant State, tribal, or local training or continuing training, insurance, licensing, or other similar requirements.

(iii) Funds awarded under this program are targeted towards the development and implementation of new treatment programs, or the improvement of, or expansion of existing programs on-site in public and Indian housing developments.

(iv) Each proposed drug treatment program should address the following goals:

(A) Increase resident accessibility to drug treatment services,

(B) Decrease criminal activity in and around public and Indian housing projects by reducing illicit drug use among public and Indian housing residents, and

(C) Provide services designed for youth and/or maternal drug abusers, i.e., prenatal/post partum care, specialized counseling in women's issues, parenting classes.

(v) Treatment programs should meet the following criteria:

(A) Applicants must be able to demonstrate the ability to provide comprehensive drug treatment programs which may include drug-free housing units specially set asite for residents in treatment and their families, if any, who normally reside with them, and intensive outpatient and aftercare components, all of which must be on-side. Grant funds may also be used to provide necessary treatment-related services to residents and their families in their existing units. Applicants may provide the service of formal referral arrangements to other treatment programs not in or around the assisted projects in instances where the resident is able to obtain treatment costs from sources other than this program.

(B) Family/collateral counseling.

(C) Linkages to educational/ vocational counseling.

(D) Therapeutic approaches which have proven effective with similar populations will be considered, e.g., therapeutic community approaches, cognitive restructuring approaches which empower residents cognitive restructuring approaches which empower residents to address their recovery, behavioral approaches with emphaisis on educational and vocational accomplishments.

(E) Coordination of services to appropriate local drug, HIV-related service agencies, state mental health and public health programs.

(vi) Applicants must demonstrate a working partnership with the Single State Agency or current state licensure provider, to coordinate, develop and implement the drug treatment proposal.

(vii) The Single State Agency or State licensure provider must certify that the drug treatment provider(s) has provided drug treatment services to similar

VOL 56 ISS 118 JE 19 1991 UMI

populations, identified in the application, for two prior years.

(viii) The Single State Agency must certify that the drug treatment proposal is consistent with the State treatment plan; and that the treatment provider(s) meets all State licensing requirements.

(4) Funding is not permitted for treatment of residents at long-term, in-patient treatment programs, or any programs not in or around the premises of the grantee's housing projects.

(5) Funding is not permitted for insurance for residents for drug treatment.

(6) Funding is not permitted for detoxification procedures, short term or long term, designed to reduce or eliminate the presence of toxic substances in the body tissues of a patient.

(7) Funding is not permitted for the leasing, acquisition, construction or rehabilitation of drug treatment facilities.

(8) Funding is not permitted for maintenance drug programs. Maintenance drugs are medications that are prescribed regularly for a long period of supportive therapy (e.g., methadone maintenance), rather than for immediate control of a disorder.

(9) Funding is not permitted to subgrantees until they obtain required insurance coverage.

(10) Funding is not permitted for T-shirts, caps, (except tenant patrol uniforms) buttons, advertising campaigns, rallies, marches, or community celebrations.

(11) The administrative costs related to screening or evicting residents for drug-related crimes are not permitted.

(12) Funding is not permitted for the purchase of vehicles for youth activities.

(13) Funding is permitted for the leasing of vehicles for youth activities.

(g) *RMCs and RCs.* Funding under this program is permitted for PHAs and IHAs to contract with RMCs and incorporated RCs to develop security and drug abuse prevention programs involving site residents. Such programs may include (but are not limited to) voluntary tenant patrol activities, drug education, drug intervention, referral, and outreach efforts.

(d) Selection Criteria and Ranking Factors: Selection Criteria.

Each application for funding under this NOFA must include a plan as described below for addressing the problem of drug-related crime on the premises of the public or Indian housing for which the application is being submitted. Each application submitted by a PHA or IHA for a grant under this NOFA will be evaluated on the basis of the following selection criteria:

(1) *Factor 1: The extent of the drug-related crime problem in the public or Indian housing project or projects proposed for assistance.* (Maximum points: 35) In assessing this criterion, HUD will consider the following factors:

(i) The severity of the drug-related crime problem, as reflected by:

(A) Crime statistics and other data as described in this paragraph or paragraph (B), submitted in the applicant's plan that is prepared in accordance with Section III(c)(2) of this NOFA. Information under this paragraph would consist of the best available objective data on the nature, source, and extent of the problem of drug-related crime, and the problems associated with drug-related crime. These data may include (but not necessarily be limited to) crime statistics from Federal, State, tribal or local law enforcement agencies, or information from the applicant's records on the types and sources of drug-related crime in the projects proposed for assistance; descriptive data as to the types of offenders committing drug-related crime in the applicant's projects (e.g., age, residence, etc.); the number of lease terminations or evictions for drug-related criminal activity; the number of emergency room admissions for drug use or drug-related crime; the number of police calls for drug-related criminal activity; the number of residents placed in treatment for substance abuse; and the school drop-out rate and level of absenteeism for youth. If crime statistics are not available at the project or precinct level, the applicant may use other reliable, objective data including those derived from its records or those of RMCs or RCs. The crime statistics should be reported both in real numbers, and as a percentage of the residents in each project (e.g., 20 arrests for distribution of heroin in a project with 100 residents reflects a 20% occurrence rate). The data should cover the past one-year period and, to the extent feasible, should indicate whether these data reflect a percentage increase or decrease in drug-related crime over the past several years. Applicants must address in their assessment how these crimes have affected the PHA's or IHA's targeted projects, and how the applicant's overall plan and strategy is specifically tailored to address these drug-related crime problems.

(B) To the extent that data in accordance with paragraph (A), above, are not available, HUD will consider other relevant information. Examples of such information include: Resident/staff surveys on drug-related issues or on-site reviews to determine drug activity; the use of local government or scholarly studies or other research conducted in the past year that analyze drug activity in the targeted projects; vandalism costs and related vacancies attributable to drug-related crime; information from schools, health service providers, residents and police; and the opinions and observations of individuals having direct knowledge of drug-related crime problems concerning the nature and extent of those problems in the projects proposed for assistance. (These individuals may include law enforcement officials, resident or community leaders, school officials, community medical officials, drug treatment or counseling professionals, or other social service providers.)

(C) In awarding points under paragraphs (1)(i)(A) and (B) of this section, HUD will evaluate the extent to which the applicant has provided data that reflects a severe drug-related crime problem, both in terms of the frequency and nature of the drug-related crime incidents and the problems associated with drug-related crime in the projects proposed for funding; the extent to which such data are meaningfully grouped by the variables listed under paragraphs (1)(i)(A) and (B) of this section; and the extent to which such data reflect an increase in drug-related crime over a period of time in the projects proposed for assistance. However, a reduction in drug-related crime in the housing of an applicant for years during which the applicant had in place a program under this part will not be considered to the disadvantage of the applicant. (Maximum points under paragraphs (A) and (B) of this section: 20.)

(ii) The relative severity of the drug-related crime in the applicant's projects, as reflected by the statistics submitted under paragraphs (1)(i)(A) and (B) of this section, in comparison to other applications submitted for funding under this program. However, a reduction in drug-related crime in the housing of an applicant for years during which the applicant had in place a Drug Elimination Program will not be considered to the disadvantage of the applicant. (Maximum points: 5)

(iii) The extent to which the applicant has analyzed the data compiled under paragraphs (1)(i)(A) and (B) of this section, and has clearly articulated its needs for reducing drug-related crime in the projects proposed for assistance. (Maximum points: 10)

(2) *FACTOR 2: The quality of the plan to address the crime problem in the public or Indian housing projects proposed for assistance, including the extent to which the plan includes initiatives that can be sustained over a period of several years.* (Maximum points: 35) The portion of this criterion dealing with initiatives that can be sustained over a period of years has been added by NAHA. In assessing this criterion, HUD will consider the following factors:

(i) The extent to which the applicant establishes a relationship between its drug-related crime problem (as identified in its plan assessment and its strategy for eliminating drug-related crime under the plan; the extent to which the applicant has considered and articulated its strategy goals and objectives; the extent to which the applicant's strategy provides for a comprehensive approach to eliminating drug-related crime in its projects (e.g., the strategy includes management practices, enforcement/security techniques, and a combination of intervention, referral, treatment and prevention programs); and the extent to which funding under this program will be targeted to the applicant's identified needs. (Maximum points: 15)

(ii) The extent to which the applicant's strategy is realistic, given the amount of funding requested under this program in relation to the overall strategy, and the timetable indicated by the applicant for beginning and completing each component of the strategy; the extent to which the applicant provides a cost analysis for each component of its strategy and describes the financial and other resources (as applied for under this NOFA and from other sources) that may reasonably be expected to be available to carry out each component; the extent to which the applicant describes the activities to be funded under this NOFA and indicates how such activities will be coordinated with, and complemented by, current services; and the extent to which the applicant describes how funding decisions were reached. (Maximum points: 5)

(iii) The extent to which the applicant has developed an evaluation process that includes measures it believes to be critical in evaluating the success of the plan; the extent to which the applicant has described in its plan the information to be gathered, and the method to be used to gather this information; and the extent to which the applicant relates the evaluation process to its assessment of the drug-related crime problem in the targeted projects (e.g., tracking of changes in identified crime statistics). (Maximum points: 10)

(iv) The extent to which the plan identifies non-HUD resources that the applicant reasonably expects to be available for the continuation of the program at the end of the grant term and the extent to which the applicant identifies initiatives that can be sustained over a period of years beyond the grant term. (Maximum points: 5)

(3) *FACTOR 3: The capability of the applicant to carry out the plan.* (Maximum points: 25) In assessing this criterion, HUD will consider the following factors:

(i) The extent of the applicant's administrative capability to manage its projects, as measured by its performance with respect to operative HUD requirements under the ACC and 24 CFR Chapter IX. In evaluating administrative capability under this factor, HUD will also consider whether there are any unresolved findings from prior HUD reviews or audits undertaken by the Inspector General, the General Accounting Office, or Independent Public Accountants; whether the applicant is operating under court order; and, if applicable, the progress made by a Troubled PHA in achieving goals established under a Memorandum of Agreement executed with HUD. (Maximum points: 10)

(ii) The extent to which the applicant has implemented effective screening procedures to determine an individual's suitability for public or Indian housing (consistent with the requirements of 42 U.S.C. 3604(f) and 24 CFR 100.202, and 29 U.S.C. 794 and 24 CFR 8.4 which deal with individuals with disabilities); implemented a plan to reduce vacancies; implemented eviction procedures in accordance with 24 CFR part 966, subpart B, and section 503 of NAHA; or undertaken other management practices to eliminate drug-related crime in its projects. (Maximum points: 5)

(iii) The extent of, and degree of, success reflected by the applicant's prior track record in implementing and managing HUD grant programs (including funding under this program or other grant programs such as CIAP, youth sports, child care, resident management, etc.), and other Federal drug-related grant programs. (Maximum points: 5)

(iv) The extent to which the applicant has already undertaken successful anti-drug related crime efforts that will serve as the foundation for the proposed grant under this program. (Maximum point: 5)

(4) *Factor 4: The extent to which tenants, the local government and the local community support and participate in the design and implementation of the activities proposed to be funded under the application.* (Maximum points: 30) Prior to amendment by NAHA, the statutory wording of this criterion read, "the extent to which the local government and local community support the anti-crime activities of the public housing agency." In assessing this criterion, HUD will consider the following factors:

(i) The extent to which the local community, as represented by local organizations, businesses, and residents, and local government, through its agencies and officials, participate in the design and implementation of the applicant's plan; and the extent to which the applicant has leveraged funds and other resources from other public and private sources, as evidenced by letters of commitment to provide funding, staff, or in-kind resources. (Maximum points: 10)

(ii) The extent to which the relevant governmental jurisdiction has met its law enforcement obligations under the Cooperation Agreement with the applicant (as required by the grantee's Annual Contributions Contract with HUD). (Maximum points: 10)

(iii) The extent to which project tenants, and an RMC or RC, where they exist, are involved in the planning and development of the grant application and plan strategy, and support and participate in the design and implementation of the activities proposed to be funded under the application as reflected by information provided by the applicant, augmented with information concerning tenants, the applicant's response to tenant and RMC/RC comments, and the certification of resident involvement. (Maximum points: 10)

Ranking Factors

Each application for a grant award that is submitted in a timely manner to the local HUD field office or, in the case of IHAs, to the appropriate HUD Office of Indian Programs, and that otherwise meets the requirements of this NOFA, will be evaluated in accordance with the selection criteria specified above. Applications from PHAs will be jointly evaluated and scored by the HUD field and regional offices with jurisdiction over the public housing authority. Applications from IHAs will be jointly evaluated and scored by the HUD Office of Indian Programs and the regional office with jurisdiction over the housing authority. *An application must receive a minimum score of 80 points out of the maximum of 125 points awardable under this competition to be eligible for funding.* Each HUD regional office will rank the eligible applications for its region based upon their overall rating scores. Grants will be awarded by each HUD regional office to the highest-ranked applications within its region.

II. Application Process

(a) To apply for a grant, PHAs must request an application package from the local HUD field office with jurisdiction over their agency. Indian Housing Authorities (IHAs) must request an application package from the HUD Office of Indian Programs with jurisdiction over their authority. Application packages are also available through the Drug Information Strategy Clearinghouse, by calling 1-800-245-2691. (See the appendix to this NOFA for a list of HUD field offices, and HUD Offices of Indian Programs.)

(b) PHAs must submit an original plus two copies of their completed grant application by the submission deadline to the local HUD field office with jurisdiction over their agency. IHAs must submit their completed grant application by the submission deadline to the HUD Office of Indian Programs with jurisdiction over their authority. (A complete listing of HUD regional and field offices, including HUD Offices of Indian Programs, is provided in the appendix to this NOFA).

(c) The deadline for the submission of grant applications under this NOFA is 5:15 p.m. local time, on July 25, 1991. Applications (original and two copies) must be physically received by the deadline at the local HUD field office or, in the case of IHAs, in the local HUD Office of Indian Programs, with jurisdiction over the PHA or IHA. Attention: Assisted Housing Management Branch Director, or Office of Indian Programs Director. It is not sufficient for an application to bear a postage date within the submission time period. Applications submitted by facsimile are not acceptable.

III. Checklist of Application Submission Requirements

The application requirements consist of the following procedures:

(a) An application package may be obtained from the local HUD field office or Office of Indian Programs having jurisdiction over the PHA or Indian housing authority making an application, or by calling HUD's Drug Information and Strategy Clearinghouse, telephone 800-245-2691. The application package contains information on all exhibits and certifications required under this NOFA.

(b) For assistance in completing the application or information on training/workshops, the PHA or Indian housing authority may contact the local HUD field office, or Office of Indian Programs, or Drug-Free Neighborhoods Division, Office of Resident Initiatives, Public and Indian Housing, Department of Housing and Urban Development, telephone 202-708-3502 or 202-708-3503.

(c) To qualify for a grant under this program, an applicant must submit an application to HUD that contains the following:

(1) Standard Grant Application Form SF-424 and SF-424A with narrative describing each major program and its related cost;

(2) A plan for addressing the problem of drug-related crime on the premises of the housing for which the application is being submitted that provides the following information:

(i) An assessment of the severity of the drug-related crime problem, as reflected by crime statistics or other information prepared in accordance with section I(d)(1) (A) and (B), above, of this NOFA;

(A) The assessment provided under paragraph (i) can be accomplished through a variety of methods, using more than one existing source of information, including: surveys; on-site reviews/management reviews; statistical indicators (such as type of crimes, area where the offenders reside, age of offenders, school attendance, health service referrals, grade point averages, vandalism costs, vacancy rates, unemployment rates, library check out records, etc.); research or studies conducted by local officials; and analysis and critique of a particular drug-related crime problem;

(ii) The applicant must specify the measures that it believes to be important in evaluating the success of the plan, including goals that relate back to the assessment data provided under paragraph (i); discuss the types of information the applicant will need to measure the plan's success; and indicate the method by which the applicant will gather and analyze this information;

(iii) The plan must include a narrative discussion of the applicant's current activities, if any, to eliminate drug-related crime in its targeted projects, including its efforts to implement screening procedures to determine an applicant's suitability for public housing (consistent with the requirements of 42 U.S.C. 3604(f) and 24 CFR 100.202, and 29 U.S.C. 794 and 24 CFR 8.4 which deal with individuals with disabilities); its efforts to implement eviction procedures in accordance with 24 CFR part 866, subpart B, and section 503 of NAHA; its efforts to implement a plan to reduce vacancies; or its other management practices to eliminate drug-related crime in the applicant's projects; the applicant should also describe its experience, if any, in implementing and managing other HUD grant programs (e.g., CIAP, youth sports, child care, etc.), and other Federal anti-drug-related crime programs; describe the current activities, if any, being undertaken by community and governmental entities, project residents, or RMCs or RCs, to address the problem of drug-related crime in the projects proposed for assistance; and provide a listing of the names of agencies or other entities (including the applicant), if any, currently providing assistance to address the drug-related crime problem in the targeted projects and describe what assistance they are providing;

(iv) A narrative discussion of the applicant's strategy for addressing the problem of drug-related crime in each of the projects proposed for assistance must be included in the plan; at a minimum, the discussion must include the following information for each of the projects proposed for assistance:

(A) A narrative describing each major activity in the applicant's strategy and how these components interrelate; the applicant should specifically address whether it plans to implement a comprehensive drug elimination strategy that involves management practices, enforcement/security techniques, and a combination of drug abuse prevention, intervention, referral, and treatment programs; the applicant should indicate how its proposed activities will complement, and be coordinated with, current services;

(B) The anticipated cost of each component of the strategy, and the financial and other resources (including funding under this program, and from other resources) that may reasonably be expected to be available to carry out each component;

(C) A timetable for beginning and completing each component of the strategy;

(D) The role of residents, and RMCs and RCs where they exist, in planning and developing the grant application and strategy, and in implementing the applicant's plan; the applicant must provide the name of the RMC or incorporated RC that will develop any security and drug abuse prevention programs involving site residents; the applicant must describe the role of any other entities (e.g., local and State governments and community organizations) in planning and carrying out the strategy;

(E) The resources that the applicant may reasonably expect to be available at the end of the grant term to continue the anti-drug related effort and how they will be allocated to plan components that can be sustained over a period of years;

(F) If grant amounts are to be used for physical improvements, a statement as to how these improvements will be coordinated with the applicant's modernization program under 24 CFR part 968 or 24 CFR part 905;

(G) If grant amounts are to be used for prevention, intervention or treatment programs to reduce the use of drugs in and around the premises of public or Indian housing projects, a statement by the applicant as to the nature of the program, a discussion of how the program represents a prevention, intervention or treatment strategy, and how the program will further the PHA's or IHA's strategy to eliminate drug-related crime in the projects proposed for assistance;

(3) Summary of any written resident and resident organization comments submitted to the applicant on the design and implementation of the plan;

(4) A certification by the applicant that:

(i) The applicant's assessment of its drug-related crime problem is based upon the best available objective data; and that the description of current activities being undertaken by the applicant to address the problem of drug-related crime in its projects, and the information regarding the applicant's strategy for addressing the problem of drug-related crime in its projects are both accurate and complete;

(ii) The applicant will maintain a drug-free workplace in accordance with the requirements of the Drug-Free Workplace Act of 1988, 24 CFR part 24, subpart F (Applicants may submit a copy of their most recent drug-free workplace certification, which must be dated within the past year.);

(iii) The applicant will comply with the requirements of section 319 of the Department of the Interior Appropriations Act (Pub. L. 101-121, approved October 23, 1989), as implemented in HUD's interim final rule published in the Federal Register on February 26, 1990 (55 FR 6736) (This statute generally prohibits recipients and subrecipients of Federal contracts, grants, cooperative agreements and loans from using appropriated funds for lobbying the Executive or Legislative Branches of the Federal Government in connection with a specific, contract, grant, or loan.);

(5) A certification by the chief executive officer of a State or a unit of general local government (including an Indian tribe), in which the projects proposed for assistance are located that:

(i) Grant funds provided under this part will not substitute for activities currently being undertaken by the jurisdiction to address the problem of drug-related crime in these projects;

(ii) Any additional security and protective services to be provided under this program meet the requirements of this program as indicated in this NOFA;

(iii) The relevant governmental jurisdiction will take the actions described in the applicant's strategy under its plan;

(iv) That the locality is meeting its obligations under the Cooperation Agreement with the PHA or IHA, particularly with regard to law enforcement services (Whether or not a locality is meeting its obligations under the Cooperation Agreement with the applicant, the CEO for the locality must describe the current level of law enforcement services being provided to the projects proposed for assistance. If the jurisdiction is not meeting its obligations under the Cooperation Agreement, the CEO should identify any special circumstances relating to its failure to do so.);

(6) If applying for voluntary tenant patrol funding, a certification from the chief of the local law enforcement agency, that the law enforcement agency has entered into, or will enter into, an agreement with the voluntary tenant patrol and the applicant, in accordance with the requirements of this program;

(7) A certification by the RMC or RC, or other involved resident group where an RMC or RC do not exist, that the grant application was jointly prepared with the applicant, and that the applicant's description of the activities that the resident group will implement under the program is accurate and complete;

(8) Letters of commitment from governmental or private entities that describe the financial or other resources (e.g., staff or in-kind resources) that the entity agrees to provide for the applicant's anti-drug related crime efforts under this program;

(9) If applying for treatment program funding, a certification that the applicant has notified and consulted with the relevant Single State Agency or authority with drug program coordination responsibilities concerning its application; that the drug treatment provider(s) has provided drug treatment to a similar population for two prior years; that the proposed drug treatment project is consistent with the State treatment plan; and that the treatment providers meet all State licensing requirements.

IV. Corrections to Deficient Applications

(a) HUD will notify an applicant, in writing, within three working days of the receipt of the application, of any curable technical deficiencies in the application. The applicant must submit corrections in accordance with the information specified in HUD's letter within 14 calendar days from the date of receipt of HUD's letter notifying the applicant of any such deficiency.

(b) Curable technical deficiencies relate to items that:

(1) are not necessary for HUD review under selection criteria/ranking factors; and

(2) cannot be submitted after the application due date has expired, to improve the substantive quality of the proposal. An example of a technical deficiency would be the failure of an applicant to submit a certification with its proposal.

V. Other Matters

(a) *Environmental Impact.* A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying from 7:30 to 5:30 weekdays in the Office of the Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, DC 20401.

(b) *Federalism impact.* The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the provisions of this NOFA do not have "federalism implications" within the meaning of the Order. The NOFA implements a program that encourages PHAs and IHAs to develop a plan for addressing the problem of drug-related crime, and makes available grants to PHAs and IHAs to help them carry out their plans. As such, the program helps PHAs and IHAs to combat serious drug-related crime problems in their projects, thereby strengthening their role as instrumentalities of the States. Further review under the Order is also unnecessary since the NOFA generally tracks the statute and involves little implementing discretion.

(c) *Family Impact.* The General Counsel, as the Designated Official for Executive Order 12606, the Family, has determined that the provisions of this NOFA have the potential for significant positive impact on family formation, maintenance and general well-being within the meaning of the Order. The NOFA implements a program that encourages PHAs and IHAs to develop a plan for addressing the problem of drug-related crime, and makes available

VOL 56 ISS 118 JE 19 1991 UMI

grants to help PHAs and IHAs to carry out this plan. As such, the program is intended to improve the quality of life of public and Indian housing project residents by reducing the incidence of drug-related crime and should have a strong positive effect on family formation, maintenance and general well-being for PHAs and IHAs selected for funding. Further review under the Order is also not necessary since the NOFA essentially tracks the authorizing legislation and involves little exercise of HUD discretion.

(d) *Section 102 HUD Reform Act.* On March 14, 1991, the Department published in the **Federal Register** a final rule to implement section 102 of the Department of Housing and Urban Development Reform Act of 1989 (24 CFR part 12, 56 FR 11032). Section 102 contains a number of provisions that are designed to ensure greater accountability and integrity in the provision of certain types of assistance administered by the Department.

Since HUD makes assistance under this program available on a competitive basis, Part 12 requires HUD to:

—Ensure that documentation and other information regarding each application submitted to the Department are sufficient to indicate the basis upon which assistance was provided or denied. HUD must make this material available for public inspection for a five-year period. (§ 12.14(b)) HUD will provide further guidance on how this material may be accessed in a later Notice published in the **Federal Register.**

—Publish a Notice in the **Federal Register** at least quarterly indicating the recipients of the assistance. (§ 12.16(a))

Subpart C of the rule requires applicants that seek assistance from HUD for a specific project or activity must make the disclosures required under § 12.32. This subpart will be made effective through later publication of a Notice in the **Federal Register.** Since it will apply to applications solicited on or after the effective date of the Notice, this NOFA is not subject to its provisions.

Authority: Sec. 8127, Public Housing Drug Elimination Act of 1988 (42 U.S.C. 11901 et. seq.); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: June 5, 1991.

Michael B. Janis,

General Deputy Assistant, Secretary for Public and Indian Housing.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 24

[FHWA Docket No. 91-14]

RIN 2125 AC75

Uniform Relocation Assistance and Real Property Acquisition Regulation for Federal and Federally Assisted Programs

AGENCY: Federal Highway Administration (FHWA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposal would amend 49 CFR 24.103(d), which concerns the qualifications of appraisers who value property for Federal and federally assisted projects. The proposed amendment provides that, if a detailed appraisal is necessary, and the agency employs a contract (fee) appraiser to perform the appraisal, such appraiser must be certified in accordance with title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) Public Law 101-73, 103 Stat. 183, 511 (Aug. 9, 1989). The FIRREA requires the establishment of State programs for the licensing and certification of appraisers. Using such certified appraisers for detailed appraisals of property subject to the Uniform Relocation Assistance and Real Property Acquisition Policies Act (Uniform Act), 42 U.S.C. 4601-4655, would strengthen the integrity of the acquisition process. If adopted, this proposal would apply to the real property acquisition activities of 17 Federal agencies as well as the Department of Transportation.

DATES: Comments must be received on or before August 19, 1991.

ADDRESSES: Submit signed, written comments to FHWA Docket No. 91-14, Federal Highway Administration, room 4232, HCC-10, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m., e.t., Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Gerald B. Saunders, Chief, Operations Division, Office of Right-of-Way, HRW-20, (202) 366-0142; or Reid Alsop, Office of the Chief Counsel, HCC-31, (202) 366-1371. The address is Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Background

The FIRREA established requirements for the licensing and certification of appraisers for thrift institution appraisal work when there is a Federal financial interest in the transaction. These requirements are implemented through laws enacted by the States. Governmentwide regulations implementing the Uniform Act currently contain appraisal criteria in 49 CFR 24.103.

While the FIRREA applies only to transactions which are associated with thrift institutions, there is a similar Federal concern for the integrity of the appraisal process for Federal or federally assisted projects or programs covered by the Uniform Act. The FIRREA requires establishment of a nationwide State-based system for appraiser licensing and certification. Extending this system to projects or programs under the Uniform Act would ensure consistency in the qualifications of contract (fee) appraisers, and thereby enhance acquisition practices.

To carry out this idea, the Office of Management and Budget (OMB) organized an interagency group and charged it with the responsibility to formulate an implementation proposal for applying the system established by FIRREA to Federal and federally assisted programs or projects. The FHWA was a member of that group, along with representatives of several other Federal agencies which have a significant amount of appraisal work for programs covered by the Uniform Act. The implementation proposal developed by the group is described below:

Implementation Proposal

As lead agency for implementation of the Uniform Act, the FHWA is proposing an amendment to 49 CFR part 24, the governmentwide regulations that implement the Uniform Act, which would apply FIRREA principles to certain transactions covered by the Uniform Act.

Section 24.103(a), Standards of Appraisal, currently provides that detailed appraisals are required only for complex appraisal problems, and the agency itself is the decision-maker regarding if or when a detailed appraisal is required. It further provides that "A detailed appraisal shall reflect nationally recognized appraisal standards * * *" This proposal would add a part of the national system for appraisal licensing and certification established by FIRREA, to the appraisal criteria contained in the governmentwide regulations implementing the Uniform Act.

Section 24.103(d), Qualifications of Appraisers, currently provides that each affected agency shall establish appraiser qualifications that are consistent with the level of difficulty of the appraisal. This proposal would amend § 24.103(d) by adding a new paragraph (d)(2) which would provide that when an agency contracts out the appraisal assignment for preparation of a detailed appraisal, the agency must use the services of an appraiser who is certified in accordance with the FIRREA.

The FIRREA provides for two levels of appraiser qualification. The senior level is "certified," and the second level is "licensed." This distinction is reflected in the proposed amendment.

This proposal would not prevent an agency from going beyond the minimum standards (certified appraisers required only for preparation of detailed appraisals for complex acquisitions) in establishing its licensing and certification requirements. This could be mandated by State law, or it could be a policy decision of the agency. Several States extended the applicability of licensing and certification requirements to virtually all appraisal activities in enacting legislation to implement the FIRREA, and State law would control as to federally assisted acquisitions undertaken in such States.

This proposal does not address the use of licensed appraisers, which would be left to the discretion of the agency or the provisions of State law. However, there is no change to the policy statement in § 24.103(d) that "Appraiser qualifications shall be consistent with the level of difficulty of the appraisal assignments."

This proposal does not include agency staff appraisal personnel in the certification requirement, because:

1. The FIRREA does not mandate such coverage, and we desire to parallel FIRREA to the extent practicable;
2. The majority of State laws and/or regulations implementing FIRREA exclude governmental staff;
3. There are provisions elsewhere in 49 CFR part 24, such as the requirement for an independent review of the appraisal and the requirement to establish minimum qualifications for all appraisers, that serve as safeguards against a substandard appraisal product; and
4. The vast majority of acquisitions subject to the Uniform Act are made by agencies with the power of eminent domain, with its inherent checks and balances, including judicial review.

This proposal is not intended to discourage the use of agency staff appraisal personnel when the use of staff personnel is more cost-effective and productive. Further, it should not be interpreted to discourage staff appraisers from taking steps to become licensed or certified. Rather, staff appraisers should be encouraged to become licensed or certified.

It is noted that The Appraisal Standards Board of the Appraisal Foundation has determined that the appraisal criteria in section 24.103 are consistent with the Uniform Standards of Professional Appraisal Practice developed by the Board pursuant to FIRREA and published in the Federal Register (55 FR 53609, Dec. 31, 1990).

Cross References

Part 24 of title 49, CFR, constitutes the governmentwide regulation implementing the Uniform Act. The regulations of seventeen other Federal Departments and agencies contain a cross reference to this part in their regulations, and the change proposed in this notice of proposed rulemaking would be directly applicable to the real property acquisition activities of these departments and agencies. Those departments and agencies, and the parts of the Code of Federal Regulations which contain a cross reference to this part, are listed below:

Department of Agriculture

7 CFR Part 21

Department of Commerce

15 CFR Part 11

Department of Defense

32 CFR Part 2509

Department of Education

34 CFR Part 15

Department of Energy

10 CFR Part 1039

Environmental Protection Agency

40 CFR Part 4

Federal Emergency Management Agency

44 CFR Part 25

General Services Administration

41 CFR Part 105-51

Department of Health and Human Services

45 CFR Part 15

Department of Housing and Urban Development

24 CFR Part 42

Department of the Interior

41 CFR Part 114-50

Department of Justice

41 CFR Part 128-16

Department of Labor

29 CFR Part 12

National Aeronautics and Space Administration

14 CFR Part 1206

Pennsylvania Avenue Development Corporation

36 CFR Part 904

Tennessee Valley Authority

18 CFR Part 1306

Veterans Administration

38 CFR Part 25

Consequently, the proposed change in this NPRM would be directly applicable to the real property acquisition activities of those seventeen departments and agencies. The proposed change would also apply to other agencies within DOT that are covered by the Uniform Act.

Rulemaking Analyses and Notices

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

The FHWA has analyzed the effect of this action and determined that it is not major within the meaning of Executive Order 12291 or significant within the meaning of Department of Transportation regulatory policies and procedures. The rulemaking would not affect the level of funding available in Federal or federally assisted programs covered by the Uniform Act, or otherwise have a significant economic impact, so that neither a preliminary regulatory impact analysis nor a preliminary regulatory evaluation is required.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 605(b)) requires that for each rule with a "significant economic impact upon a substantial number of small entities" an analysis be prepared describing the rule's impact on small entities, and identifying any significant alternatives to the rule that would minimize the economic impacts on small entities. The proposed rule would require that there be consistency in the qualifications of contract appraisers when detailed appraisals are required for Federal and federally assisted projects. Based on information available to FHWA at this time and under the criteria of the Regulatory Flexibility Act, the FHWA hereby certifies that this action will not have a significant economic impact on a substantial number of small entities.

Environmental Impacts

The FHWA has also analyzed this action for the purpose of the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), and has determined that this action would not have any effect on the human environment.

Executive Order 12612 (Federalism Assessment)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this action does not have sufficient federalism implications to warrant the preparation of a federalism assessment. The current regulation requires that detailed appraisals must reflect nationally recognized appraisal standards and that agencies must establish appraiser qualifications consistent with the level of difficulty of the appraisal. The FIRREA established a new nationwide State-based system for appraiser qualifications, that is applicable to various federally-related transactions. Applying FIRREA to fee appraisers that undertake detailed appraisals on projects covered by the Uniform Act reflects current regulatory requirements and is not considered to have significant federalism impacts.

Paperwork Reduction Act

This proposed rule is not subject to the Paperwork Reduction Act, 44 U.S.C. 3501, *et seq.*, since it does not require the collection or retention of any new data.

Regulation Identification Number

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 24

Real property acquisition, Relocation assistance, Reporting and recordkeeping requirements, Transportation.

In accordance with the foregoing, the FHWA proposes to amend Part 24 of Title 49, Code of Federal Regulations, as set forth below.

PART 24—[AMENDED]

1. The authority citation for part 24 is revised to read as follows:

Authority: 42 U.S.C. 4601 *et seq.*; 49 CFR 1.48(cc).

2. Section 24.103(d) is amended by designating the text after the heading "Qualifications of appraisers" as paragraph (d)(1) and by adding paragraph (d)(2) to read as follows:

§ 24.103 Criteria for appraisals.

* * * * *

(d) *Qualifications of appraisers.*

(1) * * *

(2) If the appraisal assignment requires the preparation of a detailed appraisal pursuant to § 24.103(a), and the Agency uses a contract (fee) appraiser to perform the appraisal, such appraiser shall be certified in accordance with Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) (12 U.S.C. 1331 *et seq*).

* * * * *

Issued on: June 11, 1991.

T.D. Larson,

Administrator.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Approved Tribal-State Compact: Indian Gaming

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of approved Tribal-State Compact.

SUMMARY: Pursuant to 25 U.S.C. 2710, of the Indian Gaming Regulatory Act of 1988 (Pub. L. 100-497), the Secretary of the Interior shall publish, in the Federal Register, Notice of approved Tribal-State Compacts for the purpose of engaging in Class III (casino) gambling on Indian reservations. The Assistant Secretary—Indian Affairs, Department of the Interior, through his delegated authority has approved a Tribal-State Compact between the Yankton Sioux Tribe and the State of South Dakota executed on April 29, 1991.

DATES: June 19, 1991.

ADDRESSES: Office of Tribal Services, Bureau of Indian Affairs, Department of the Interior, MS/MIB 4603, 1849 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Joyce Grisham, Bureau of Indian Affairs, Washington, DC (202) 208-7445.

Dated: June 13, 1991.

Eddie F. Brown,

Assistant Secretary—Indian Affairs.

Public Laws

102d Congress, 1st Session, 1991

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 102d Congress, 1st Session, 1991.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

Superintendent of Documents Subscriptions Order Form

Order Processing Code: *6216

Charge your order. It's easy!

New edition .... Order now !

For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1989
SUPPLEMENT: Revised January 1, 1991

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Order from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-9325.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 56 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: July 2, at 9:00 am
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC

Rules and Regulations

Federal Register
Vol. 56, No. 119
Thursday, June 20, 1991

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 572

RIN 3206-AE34

Expanded Authority To Pay Travel Expenses for New Appointments and Interviews

AGENCY: Office of Personnel Management.

ACTION: Final regulations.

SUMMARY: The Office of Personnel Management (OPM) is issuing final regulations to implement provisions of the Federal Employees Pay Comparability Act of 1990 (FEPCA). The Act permits agencies to pay candidates' travel expenses for interviews and new appointees' travel expenses to the first post of duty for any position.

EFFECTIVE DATE: July 22, 1991.

FOR FURTHER INFORMATION CONTACT: Tracy E. Spencer (202) 606-0960 or FTS 266-0960.

SUPPLEMENTARY INFORMATION: FEPCA amended 5 U.S.C. 5723 to remove the requirement that a shortage of candidates exist before agencies may pay new appointees' travel and transportation expenses and to provide explicit authority for agencies to pay candidates' travel expenses to report for interviews.

Interim regulations implementing these provisions were published on February 14, 1991 (56 FR 6204). Those regulations removed all instructions for determining shortages but retained language reinforcing agency discretion in deciding whether to pay relocation or interview expenses for any position.

We received only one comment on the interim regulations. The General Services Administration (GSA), which is responsible for regulating actual payments under 5 U.S.C. 5723, suggested that we include a cross-reference to GSA's Federal Travel Regulations (FTR) (41 CFR chapters 301-304). That suggestion has been adopted. With that change, we are adopting the interim regulations as final.

Executive Order 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) or Executive Order 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it affects only the procedures used to appoint certain Federal employees.

List of Subjects in 5 CFR Part 572

Administrative practice and procedures, Government employees.

Office of Personnel Management.

Constance Berry Newman,

Director.

Accordingly, OPM's interim regulations under part 572 published February 14, 1991, at 56 FR 6204, are adopted as final with the following changes:

PART 572—TRAVEL AND TRANSPORTATION EXPENSES; NEW APPOINTEES AND INTERVIEWS

1. The authority for part 572 continues to read as follows:

Authority: 5 U.S.C. 5708b and 5723.

2. Section 572.101 is revised to read as follows:

§ 572.101 Agency authority.

(a) An agency may determine which positions qualify for the payment of a new appointee's travel expenses to the first post of duty. Payment of travel and transportation expenses will be in accordance with the Federal Travel Regulation (FTR) (41 CFR chapters 301-304).

(b) An agency may determine which interviewees are eligible for payment of pre-employment interview travel expenses. Payment of these travel expenses will be in accordance with the FTR.

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 921, 922, 923 and 924

[Docket No. FV-91-266FR]

Expenditures and Assessment Rates for Specified Marketing Orders for the 1991-92 Fiscal Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule authorizes expenditures and establishes assessment rates for the 1991-92 fiscal year (April 1-March 31) under Marketing Order Nos. 921, 922, 923 and 924. These expenditures and assessment rates are needed by the marketing committees established under these marketing orders to pay marketing order expenses and collect assessments from handlers to pay those expenses. This action will enable these committees to perform their duties and the orders to operate.

EFFECTIVE DATE: April 1, 1991 through March 31, 1992 for each order.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525-S, Washington, DC 20090-6456; telephone: (202) 475-3918.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement and Marketing Order Nos. 921 (7 CFR part 921) regulating the handling of fresh peaches grown in designated counties in Washington; 922 (7 CFR part 922) regulating the handling of apricots grown in designated counties in Washington; 923 (7 CFR part 923) regulating the handling of cherries grown in designated counties in Washington; and 924 (7 CFR part 924) regulating the handling of fresh prunes grown in designated counties in Washington and in Umatilla County, Oregon. These agreements and orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This final rule has been reviewed by the U.S. Department of Agriculture

VOL 56 ISS 119 JE 20 1991 UMI

(Department) in accordance with Departmental Regulation 1512-1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 70 handlers of Washington peaches, 30 handlers of Washington apricots, 85 handlers of Washington cherries, and 35 handlers of Washington-Oregon prunes subject to regulation under their respective marketing orders. In addition, there are about 390 Washington peach producers, 190 Washington apricot producers, 1,115 Washington cherry producers and 375 Washington-Oregon prune producers in their respective production areas. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of these handlers and producers may be classified as small entities.

These marketing orders, administered by the Department, require that assessment rates for a particular fiscal year shall apply to all assessable fresh fruit handled from the beginning of such year. An annual budget of expenses is prepared by each marketing committee and submitted to the Department for approval. The members of these committees are handlers and producers of the regulated commodities. They are familiar with the committees' needs and with the costs for goods, services, and personnel in their local areas and are thus in a position to formulate appropriate budgets. The budgets are formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by each committee is derived by dividing anticipated expenses by the tons of fresh fruit expected to be shipped under the order. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committees' expected expenses. Recommended budgets and rates of assessment are usually acted upon by the committees shortly before a season starts, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approvals must be expedited so that the committees will have funds to pay their expenses.

A proposed rule concerning the 1991-92 budget was published in the Federal Register (56 FR 14318, April 9, 1991), with a comment period ending May 31, 1991. Comments were received from the Washington Fresh Peach Marketing Committee (WPMC), the Washington Apricot Marketing Committee (WAMC), the Washington Cherry Marketing Committee (WCMC), and the Washington-Oregon Fresh Prune Marketing Committee (WOPMC). The committees met in late May to review crop and marketing conditions. On the basis of these reviews, each committee filed comments unanimously recommending changes in their expenditure and assessment rate levels from those contained in the proposed rule. The recommended changes are based on the more recent crop and expenditure estimates. These changes are incorporated in the final rule.

The expenditure amounts and assessment rates contained in the proposed rule were issued on the recommendations of the Stone Fruit Executive Committee (SFEC) in March, based on the best information available at that time. The SFEC is made up of officers of the marketing committees established under these orders, and is authorized to recommend the budgets early in the season.

The WPMC met May 22, 1991 and unanimously recommended 1991-92 expenditures of $21,356 and an assessment rate of $2.00 per ton of assessable peaches shipped under M.O. 921. This compares with expenditures of $21,304 and an assessment rate of $3.00 contained in the proposed rule. The lower expenditures reflected a reduction in auditing costs. The recommended $2.00 assessment rate is based on revised estimated 1991-92 shipments of 7,875 tons of assessable peaches. This would generate income of $15,750 and result in a reduction in the WPMC's reserve fund. The WPMC's reserves are adequate to cover the anticipated deficit for 1991-92. Budgeted expenditures were $18,841 and the assessment rate was $1.00 per ton in 1990-91.

The WAMC met May 22, 1991 and unanimously recommended 1991-92 expenditures of $7,723 and an assessment rate of $1.50 per ton of assessable apricots shipped under M.O. 922. This compares with expenditures of $7,700 and an assessment rate of $4.00 contained in the proposed rule. The lower expenditures reflect a reduction in auditing costs. The recommended $1.50 assessment rate is based on revised estimated 1991-92 shipments of 3,700 tons of assessable apricots. This would generate income of $5,550 and result in a reduction of the WAMC's reserve fund. The WAMC's reserves are adequate to cover the anticipated deficit for 1991-92. Budgeted expenditures were $6,965 and the assessment rate was $1.00 per ton in 1990-91.

The WCMC met May 23, 1991 and unanimously recommended 1991-92 expenditures of $96,092 and an assessment rate of $3.00 per ton of assessable cherries shipped under M.O. 923. This compares with expenditures of $104,130 and an assessment rate of $5.00 contained in the proposed rule. The lower expenditures reflect a reduction in auditing costs and an $8,000 reduction in market development expenditures. The recommended $3.00 assessment rate is based on revised estimated 1991-92 shipments of 31,000 tons of assessable cherries. This would generate income of $93,000 and result in a reduction in the WCMC's reserve fund. The WCMC's reserves are adequate to cover the anticipated deficit for 1991-92. Budgeted expenditures were $94,545 and the assessment rate was $2.00 per ton in 1990-91. The 1991-92 cherry market development project will be submitted for approval once the recommended budget is approved.

The WOPMC met May 29, 1991 and unanimously recommended 1991-92 expenditures of $16,578 and an assessment rate of $2.00 per ton of assessable prunes shipped under M.O. 924. This compares with expenditures of $18,115 and an assessment rate of $3.00 contained in the proposed rule. The lower expenditures reflect a reduction in auditing costs and the elimination of $1,500 for production research. The recommended $2.00 assessment rate is based on revised estimated 1991-92 shipments of 5,750 tons of assessable prunes. This would generate income of $11,500 and result in a reduction in the WOPMC's reserve fund. The WOPMC's reserves are adequate to cover the anticipated deficit for 1991-92. Budgeted expenditures were $16,149 and the assessment rate was $1.50 per ton in 1990-91.

The stone fruit marketing committees' 1991-92 budgets are similar in scope and size to those approved for 1990-91. These committees share a joint office and related expenses, based on an arrangement among the committees. The budgeted expenditures are for marketing order administration, which includes employees' salaries and travel, office operations, and miscellaneous costs, along with expenditures for cherry market development.

Based on the above, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

This final rule adds new §§ 921.230, 922.230, 923.231, and 924.231 under these marketing orders, based on the committees' recommendations and other information.

After consideration of the information and recommendations submitted by the committees and other available information, it is found that this final rule will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because approval of the expenses and assessment rates must be expedited. The fiscal year for each of these marketing orders began on April 1, 1991, and the committees need sufficient funds to pay their expenses, which are incurred on a continuous basis.

List of Subjects in 7 CFR Parts 921, 922, 923 and 924

Apricots, Cherries, Marketing agreements, Peaches, Prunes, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR parts 921, 922, 923 and 924 are amended as follows:

1. The authority citation for 7 CFR parts 921, 922, 923 and 924 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

Note: These sections will not appear in the annual Code of Federal Regulations.

PART 921—FRESH PEACHES GROWN IN DESIGNATED COUNTIES IN WASHINGTON

2. A new § 921.230 is added to read as follows:

§ 921.230 Expenses and assessment rate.

Expenses of $21,356 by the Washington Fresh Peach Marketing Committee are authorized, and an assessment rate of $2.00 per ton of assessable peaches is established for the fiscal year ending March 31, 1992. Any unexpended funds from the 1990-91 fiscal year may be carried over as a reserve.

PART 922—APRICOTS GROWN IN DESIGNATED COUNTIES IN WASHINGTON

3. A new § 922.230 is added to read as follows:

§ 922.230 Expenses and assessment rate.

Expenses of $7,723 by the Washington Apricot Marketing Committee are authorized, and an assessment rate of $1.50 per ton is established for the fiscal year ending March 31, 1992. Any unexpended funds from the 1990-91 fiscal year may be carried over as a reserve.

PART 923—SWEET CHERRIES GROWN IN DESIGNATED COUNTIES IN WASHINGTON

4. A new § 923.231 is added to read as follows:

§ 923.231 Expenses and assessment rate.

Expenses of $96,092 by the Washington Cherry Marketing Committee are authorized, and an assessment rate of $3.00 per ton is established for the fiscal year ending March 31, 1992. Any unexpended funds from the 1990-91 fiscal year may be carried over as a reserve.

PART 924—FRESH PRUNES GROWN IN DESIGNATED COUNTIES IN WASHINGTON AND UMATILLA COUNTY, OREGON

5. A new § 924.231 is added to read as follows:

§ 924.231 Expenses and assessment rate.

Expenses of $16,578 by the Washington-Oregon Fresh Prune Marketing Committee are authorized, and an assessment rate of $2.00 per ton of assessable prunes is established for the fiscal year ending March 31, 1992. Any unexpended funds from the 1990-91 fiscal year may be carried over as a reserve.

Dated: June 17, 1991.

William J. Doyle,

Associate Deputy Director, Fruit and Vegetable Division.

[FR Doc. 91-14727 Filed 6-19-91; 8:45 am]

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Parts 1944

Section 502 Rural Housing Loan Policies, Procedures and Authorizations

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) is amending its regulations to implement changes made to the Housing Act of 1949 by section 702 of the Cranston-Gonzalez National Affordable Housing Act. This action is required to be taken to clarify the determination of family size and composition for eligibility under the rural housing loan making program. The intended effect is to assist low-income families whose children have been removed from the applicant/borrower family and placed in foster care. Therefore, the final rule is issued on an emergency basis by the Agency to comply with this Congressional mandate.

DATES: This action will take effect on July 22, 1991.

FOR FURTHER INFORMATION CONTACT: Karen S. Murray, Senior Loan Specialist, Farmers Home Administration, USDA, room 5334-S, South Agriculture Building, 14th and Independence Ave., SW., Washington, DC 20250, Telephone (202) 382-1474.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512-1 which implements Executive Order 12291, and has been determined to be nonmajor because there is no substantial change from practices under existing rules that would have an annual effect on the economy of $100 million or more. There is no major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies or geographical regions, or significant adverse effects on competition, employment, productivity, innovation, or in the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Discussion

Section 702 of the Cranston-Gonzalez National Affordable Housing Act amends section 501(b)(4) of the Housing Act of 1949 by inserting the following new sentence: "The temporary absence of a child from the home due to placement in foster care should not be

VOL 56 ISS 119 JE 20 1991 UMI

considered in considering family composition and family size." This language has been incorporated into subpart A of part 1944 of this chapter, where appropriate.

Section 534 of the Housing Act of 1949 requires that all rules and regulations issued pursuant to that Act must be published for public comment. The one noted exception is for a rule or regulation issued on an emergency basis. This action is not published for proposed rule making because it does nothing more than implement a statutory language change over which FmHA has no administrative control, and as such, must be implemented immediately.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, subpart G Environmental Program. It is the determination of FmHA that this action does not constitute a major Federal Action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not required.

Programs Affected

This program is listed in the catalog of Federal Domestic Assistance under 10.410, Low Income Housing Loans.

Intergovernmental Consultation

For the reason set forth in the final rule and related Notice to 7 CFR part 3015, subpart V, 48 FR 29115, June 24, 1983, this program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

List of Subjects in 7 CFR Part 1944

Home improvement, Loan programs—housing and community development, Low and moderate income housing—rental, Mobile homes, Mortgages, Rural housing, Subsidies.

Therefore, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1944—HOUSING

1. The authority citation for part 1944 continues to read as follows:

Authority: 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart A—Section 502 Rural Housing Loan Policies, Procedures, and Authorizations.

2. Section 1944.2 is amended by revising paragraph (j) to read as follows:

§ 1944.2 Definitions.

* * * * *

(j) *Household or family.* The applicant, co-applicant, and all other persons who will make the applicant's dwelling their primary residence for all or part of the next 12 months. Children who are members of the family, but have been removed and placed in foster care, will be counted as residents of the household. Foster care children placed in the borrower's home and live-in aides will not be counted as members of the household.

* * * * *

3. Section 1944.8 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 1944.8 Adjusted annual income.

* * * * *

(a) A deduction of $480 for each resident of the household, as defined by § 1944.2 of this subpart, other than the applicant, spouse, or co-applicant, who is:

* * * * *

Dated: May 15, 1991.

La Verne Ausman,

Administrator, Farmers Home Administration.

BILLING CODE 3410–07–M

7 CFR Part 1945

Final Implementation of Farmer Program Loan Provisions of the 1990 Farm Bill

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) adopts its interim rule published January 16, 1991 (56 FR 1563–1565) as a final rule without change. This action amends FmHA regulations by authorizing special disaster assistance to eligible farmers and ranchers who sustained severe production losses in 1989 or 1990 as a result of natural disasters. This action is necessary to finalize the interim rule, which implemented the provisions of the 1990 Farm Bill (Pub. L. 101–624), dated November 28, 1990, that was incorporated into existing FmHA regulations.

EFFECTIVE DATE: June 20, 1991.

FOR FURTHER INFORMATION CONTACT: Mary Ferguson, Loan Specialist, Farmer Programs Loan Making Division, Farmers Home Administration, USDA South Building, 14th Street and Independence Avenue SW., Washington, DC 20250, telephone (202) 475–4018.

SUPPLEMENTARY INFORMATION:

Classification

This action was reviewed under USDA procedures established in Department Regulation 1512–1, which implements Executive Order 12291, and has been determined nonmajor because it will not result in an annual effect on the economy of $100 million or more.

Intergovernmental Consultation

For the reasons set forth in the final rule related to notice, 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983) and FmHA Instruction 1940–J, "Intergovernmental Review of Farmers Home Administration Programs and Activities" (December 23, 1983), Emergency Loans are excluded from the scope of Executive Order 12372, which require intergovernmental consultation with State and local officials.

Programs Affected

These changes affect the following FmHA program as listed in the Catalog of Federal Domestic Assistance:

10.404—Emergency Loans.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." It is the determination of FmHA that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not required.

Discussion of Final Rule

On January 16, 1991, FmHA published an interim rule amending 7 CFR part 1945, subpart D, in the **Federal Register** (56 FR 1563–1565) with a comment period ending February 15, 1991. The 1990 Farm Bill (Pub. L. 101–624), dated November 28, 1990, amended FmHA's statutory loan making authorities. It was necessary to implement these authorities upon publication to provide immediate assistance to farmers and ranchers who had suffered major crop production losses as a result of natural disasters in 1989 or 1990.

The Bill mandates changes in the emergency loan regulations. These changes ease the requirements for obtaining assistance under this program, as did previous changes made as a result of the Disaster Assistance Acts of 1988 and 1989. These changes are fully addressed in the interim rule. These regulations provide assistance to many needy farmers and ranchers who, without this assistance, are or will be in danger of losing their operations.

Discussion of Comments

No comments were received.

List of Subjects in 7 CFR Part 1945

Agriculture, Disaster assistance.

Therefore, FmHA adopts its interim rule, dated January 16, 1991 (56 FR 1563–1565), as a final rule without change.

Dated: May 20, 1991.

La Verne Ausman,

Administrator, Farmers Home Administration.

BILLING CODE 3410–07–M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Parts 204 and 245

[INS Number: 1419–91]

Powers and Duties of Service Officers; Petition To Classify Alien as Immediate Relative of a United States Citizen or Preference Immigrant; Adjustment of Status to That of a Person Admitted for Permanent Residence

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Interim rule with request for comments.

SUMMARY: This interim rule implements section 702 of the Immigration Act of 1990 (IMMACT 90), Public Law 101–649, November 29, 1990, by allowing a citizen or lawful permanent resident petitioner, or an alien applicant for permanent resident status, to seek an exemption from the general prohibition against approval of immigration benefits based upon a marriage entered into while the beneficiary or applicant was under deportation, exclusion or related judicial proceedings. This rule is necessary to establish procedures to allow persons who have bona fide marriages to obtain immigration benefits without complying with the two year foreign residency requirements.

DATES: This interim rule is effective June 20, 1991. Comments must be received on or before July 22, 1991.

ADDRESSES: Please submit written comments, in triplicate, to the Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, 425 I Street NW., Room 5304, Washington, DC 20536. To ensure proper handling please reference INS number 1419–91 on your correspondence.

FOR FURTHER INFORMATION CONTACT: Rita A. Boie, Senior Immigration Examiner, Adjudications Branch, Immigration and Naturalization Service, 425 I Street NW., Room 7223, Washington, DC 20536, telephone (202) 514–5014.

SUPPLEMENTARY INFORMATION: The Immigration Marriage Fraud Amendments of 1986 (IMFA) were enacted to deter aliens from marrying solely to obtain immigration benefits. Two provisions of the IMFA were specifically designed to reduce the incentive for an alien to enter into a fraudulent marriage during deportation or exclusion proceedings. These provisions restricted the immigration benefits that could be granted based upon the marriage. Both required the alien to live outside the United States for at least two years following the marriage. Only after the foreign residency requirement was fulfilled would the alien be eligible to obtain permanent residence based upon the marriage. These provisions were incorporated into the Act as sections 204(h) and 245(e).

Section 702 of IMMACT 90 was enacted to allow aliens in marriages which were clearly bona fide to be exempted from compliance with the foreign residence requirement. Section 702 also contained a purely technical amendment redesignating section 204(h) of the Act as section 204(g).

This interim rule allows the petitioner or applicant to request consideration for the new exemption by filing a relative visa petition or application for adjustment of status, accompanied by clear and convincing evidence that the marriage is bona fide. No additional application forms or fees are required.

Procedures are also established for use by applicants or petitioners who wish to appeal a denial based upon failure to qualify for the exemption. Denials of visa petitions may be appealed to the Board of Immigration Appeals. Adjustment of status applications denied by the district director because the applicant did not qualify for the exemption may be appealed to the Associate Commissioner, Examinations. Adjustment of Status applications denied by the district director for other reasons will continue to be reviewable only in deportation proceedings.

Those whose earlier requests for benefits were denied because of failure to comply with the foreign residence requirement may reapply. Citizens petitioning for immediate relatives and applicants for adjustment of status who are not under deportation proceedings may choose to file new applications or petitions. As an alternative, they may file motions to reopen prior applications or petitions. An applicant for adjustment of status who is under deportation proceedings may file a motion with the immigration judge having jurisdiction over the deportation proceeding. The new applications, petitions or motion must be accompanied by clear and convincing evidence of a bona fide marriage.

Preference petitioners may also request consideration for the new benefits. However, these petitioners must file new petitions, unless the filing date of the original petition is on or after November 29, 1990. This restriction is necessary because preference aliens are issued immigrant visas strictly in priority date order. The priority date for a relative preference petition is established by the date the petition is properly filed with the Service. In many categories, the demand for visas far exceeds the number allowed by law. Preference aliens whose priority dates cannot be reached are placed on a waiting list. To allow these aliens to utilize the earlier date would mean that they would obtain immigrant visas before aliens who waited to file until they were fully qualified under the laws and regulations in effect at the time. Such a result would be unfair to the fully qualified aliens and would be contrary to regulations and long-held Service precedents.

Technical revisions to the existing regulations are contained in this rule. These revisions are necessary to clarify requirements and procedures established by the regulations and to remove grammatical inconsistencies caused by the addition of the new exemptions.

Additional technical revisions to regulations which were not affected by the IMMACT 90 amendments are also contained in this rule. References to the cancellation of the Notice to Applicant for Admission Detained for Hearing before Special Inquiry Officer have been removed since neither the Act nor the Code of Federal Regulations contain provisions authorizing the cancellation of the Notice.

The method by which the Service determines the date deportation proceedings begin for the purpose of applying the two year foreign residence requirement is also changed. Formerly, the Service considered the alien to be under deportation proceedings on the

VOL 56 ISS 119 JE 20 1991 UMI

date the Order to Show Cause was issued when determining whether or not the alien was subject to this requirement. This rule provides that aliens named in Orders to Show Cause issued on or after June 20, 1991 will not be considered to be under deportation proceedings until the Order to Show Cause is filed with the Office of the Immigration Judge. This new definition of the commencement of deportation proceedings conforms with the provisions of 8 CFR 3.13 and 8 CFR 242.1.

The general prohibition against approval of an application for adjustment of status is extended to marriages entered into on November 10, 1986, while the alien was under proceedings. The prior regulations inadvertently excluded reference to marriages entered into on that date. The language of the IMFA clearly states that this prohibition will apply to marriages entered into both on and after November 10, 1986.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date are impracticable and unnecessary as the changes have been mandated by the passage of Public Law 101-649, (IMMACT 90), which amends the Marriage Fraud Amendments of 1986 (IMFA). Early implementation will allow United States citizens and aliens who have entered into bona fide marriages to obtain immigration benefits without being required to comply with the two year foreign residency requirement.The change in the method by which the Service determines the date on which deportation proceedings commence will result in fewer aliens being subject to the foreign residence requirement.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule does not have a significant economic impact on a substantial number of small entities. This rule is not a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have Federalism implications warranting the preparation of a Federalism Assessment in accordance with E.O. 12612.

The information collection requirement contained in this regulation has been cleared by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act. The OMB control number for this collection is contained in 8 CFR 299.5.

Reporting and recordkeeping requirements, Visa petitions.

8 CFR Part 245

Aliens, Immigration, Reporting and recordkeeping requirements.

Accordingly, chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 204—PETITION TO CLASSIFY ALIEN AS IMMEDIATE RELATIVE OF A UNITED STATES CITIZEN OR AS A PREFERENCE IMMIGRANT

1. The authority citation for part 204 continues to read as follows:

Authority: 66 Stat. 166, 173, 175, 178, 179, 182, 217; 100 Stat. 3537, 8 U.S.C. 1101, 1103, 1151, 1153, 1154, 1182, 1186a, 1255 and 8 CFR part 2.

2. In § 204.1, paragraph (a)(2)(iii) is revised to read as follows:

§ 204.1 Petition.

(a) * * *

(2) * * *

(iii) *Marriage during proceedings—general prohibition against approval of visa petition.* A visa petition filed on behalf of an alien by a United States citizen or lawful permanent resident spouse shall not be approved if the marriage creating the relationship occurred on or after November 10, 1986, and while the alien was in deportation or exclusion proceedings, or judicial proceedings relating thereto.

(A) *Commencement of proceedings.* The period during which the alien is in deportation or exclusion proceedings, or judicial proceedings relating thereto commences:

(*1*) With the issuance of the Order to Show Cause and Notice of Hearing (Form I–221) prior to June 20, 1991;

(*2*) With the filing of an Order to Show Cause and Notice of Hearing (Form I–221) issued on or after June 20, 1991 with the Office of the Immigration Judge;

(*3*) With the issuance of the Notice to Applicant for Admission Detained for Hearing before Immigration Judge (Form I–122);

(B) *Termination of proceedings.* The period during which the alien is in deportation or exclusion proceedings, or judicial proceedings relating thereto terminates:

(*1*) When the alien departs from the United States while an order of deportation is outstanding or before the expiration of the voluntary departure time granted in connection with an alternate order of deportation under 8 CFR 243.5;

(*2*) When the alien departs from the United States pursuant to an order of exclusion;

(*3*) When the alien is found not to be excludable or deportable from the United States;

(*4*) When the Order to Show Cause is canceled pursuant to 8 CFR 242.7(a);

(*5*)When proceedings are terminated by the immigration judge, or the Board of Immigration Appeals; or

(*6*) When a petition for review or an action for habeas corpus is granted by a Federal Court on judicial review.

(C) *Exemptions.* This prohibition shall no longer apply if:

(*1*) The alien is found not to be excludable or deportable from the United States;

(*2*) The Order to Show Cause is canceled pursuant to 8 CFR 242.7(a);

(*3*) Proceedings are terminated by the immigration judge or the Board of Immigration Appeals;

(*4*) A petition for review or an action for habeas corpus is granted by a Federal Court on judicial review;

(*5*) The alien has resided outside the United States for two or more years following the marriage;

(*6*) The petitioner establishes eligibility for the bona fide marriage exemption under section 204(g) of the Act by providing clear and convincing evidence that the marriage was entered into in good faith and in accordance with the laws of the place where the marriage took place, was not entered into for the purpose of procuring the alien's entry as an immigrant, and no fee or other consideration was given (other than to an attorney for assistance in preparation of a lawful petition) for the filing of the petition.

(D) *Request for exemption.* No application or fee is required to request an exemption. The request must be made in writing and submitted with the Form I–130, Petition for Alien Relative. The request must state the reason for seeking the exemption and must be supported by documentary evidence establishing eligibility for the exemption.

(E) *Evidence to establish eligibility for the bona fide marriage exemption.* In order to establish that the marriage was entered into in good faith and not entered into for the purpose of procuring the alien's entry as an immigrant, the petitioner shall submit evidence such as:

(*1*) Documentation showing joint ownership of property;

(*2*) Lease showing joint tenancy of a common residence;

(*3*) Documentation showing commingling of financial resources;

(*4*) Birth certificates of children born to the petitioner and beneficiary;

(*5*) Affidavits of third parties having knowledge of the bona fides of the marital relationship, or

(*6*) Other documentation establishing that the marriage was not entered into in order to evade the immigration laws of the United States.

(F) *Decision.* Any petition filed during the prohibited period shall be denied, unless the petitioner establishes eligibility for an exemption from the general prohibition. The petitioner shall be notified in writing of the decision of the director.

(G) *Denials.* The denial of a petition because the marriage took place during the prohibited period shall be without prejudice to the filing of a new petition after the beneficiary has resided outside the United States for the required period of two years following the marriage. The denial shall also be without prejudice to the consideration of a new petition or a motion to reopen the visa petition if deportation or exclusion proceedings are terminated after the denial other than by the beneficiary's departure from the United States. Furthermore, the denial shall be without prejudice to the consideration of a new petition or motion to reopen the visa petition, if the petitioner establishes eligibility for the bona fide marriage exemption contained in this part: *Provided,* That no motion to reopen visa petition proceedings may be accepted if the approval of the motion would result in the beneficiary being accorded a priority date within the meaning of section 203(c) of the Act earlier than November 29, 1990.

(H) *Appeals.* The decision of the Board of Immigration Appeals concerning the denial of a relative visa petition because the petitioner failed to establish eligibility for the bona fide marriage exemption contained in this part will constitute the single level of appellate review established by statute.

(I) *Priority Date.* A preference beneficiary shall not be accorded a priority date within the meaning of section 203(c) of the Act based upon any relative petition filed during the prohibited period, unless an exemption contained in this part has been granted. Furthermore, a preference beneficiary shall not be accorded a priority date prior to November 29, 1990, based upon the approval of a request for consideration for the bona fide marriage exemption contained in this part.

PART 245—ADJUSTMENT OF STATUS TO THAT OF PERSON ADMITTED FOR PERMANENT RESIDENCE

3. The authority citation for part 245 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1151, 1154, 1182, 1186a, 1255, and 1257; 8 CFR part 2.

4. In § 245.1, paragraph (b)(14) is revised to read as follows:

§ 245.1 Eligibility.

* * * * *

(b) * * *

(14) Any alien who seeks to adjust status based upon a marriage which occurred on or after November 10, 1986, and while the alien was in deportation or exclusion proceedings, or judicial proceedings relating thereto.

(i) *Commencement of proceedings.* The period during which the alien is in deportation or exclusion proceedings, or judicial proceedings relating thereto commences:

(A) With the issuance of the Order to Show Case and Notice of Hearing (Form I–221) prior to June 20, 1991;

(B) With the filing of the Order to Show Cause and Notice of Hearing (Form I–221) issued on or after June 20, 1991 with the Office of the Immigration Judge; or

(C) With the issuance of the Notice to Applicant for Admission Detained for Hearing before Immigration Judge (Form I–122).

(ii) *Termination of Proceedings.* The period during which the alien is in deportation or exclusion proceedings, or judicial proceedings relating thereto terminates:

(A) When the alien departs from the United States while an order of deportation is outstanding or before the expiration of the voluntary departure time granted in connection with an alternate order of deportation under 8 CFR 243.5;

(B) When the alien departs from the United States pursuant to an order of exclusion;

(C) When the alien is found not to be excludable or deportable from the United States;

(D) When the Order to Show Cause is canceled pursuant to 8 CFR 242.7(a);

(E) When the proceedings are terminated by the immigration judge or the Board of Immigration Appeals; or

(F) When a petition for review or an action for habeas corpus is granted by a Federal Court on judicial review.

(iii) *Exemptions.* This prohibition shall no longer apply if:

(A) The alien is found not to be excludable or deportable from the United States;

(B) The Order to Show Cause is canceled pursuant to 8 CFR 242.7(a);

(C) Proceedings are terminated by the immigration judge or Board of Immigration Appeals;

(D) A petition for review or an action for habeas corpus is granted by a Federal Court on judicial review;

(E) The alien has resided outside the United States for two or more years following the marriage; or

(F) The alien establishes that the marriage is bona fide by providing clear and convincing evidence that the marriage was entered into in good faith and in accordance with the laws of the place where the marriage took place, was not entered into for the purpose of procuring the alien's entry as an immigrant, and no fee or other consideration was given (other than to an attorney for assistance in preparation of a lawful petition) for the filing of a petition.

(iv) *Request for exemption.* No application or fee is required to request the exemption under section 245(e) of the Act. The request must be made in writing and submitted with the Form I–485, Application for Permanent Residence. The request must state the basis for requesting consideration for the exemption and must be supported by documentary evidence establishing eligibility for the exemption.

(v) *Evidence to establish eligibility for the bona fide marriage exemption.* Section 204(g) of the Act provides that certain visa petitions based upon marriages entered into during deportation, exclusion or related judicial proceedings may be approved only if the petitioner provides clear and convincing evidence that the marriage is bona fide. Evidence that a visa petition based upon the same marriage was approved under the bona fide marriage exemption to section 204(g) of the Act will be considered primary evidence of eligibility for the bona fide marriage exemption provided in this part. The applicant will not be required to submit additional evidence to qualify for the bona fide marriage exemption provided in this part, unless the district director determines that such additional evidence is needed. In cases where the district director notifies the applicant that additional evidence is required, the applicant must submit documentary evidence which clearly and convincingly establishes that the marriage was entered into in good faith and no

VOL 56 ISS 119 JE 20 1991 UMI

entered into for the purpose of procuring the alien's entry as an immigrant. Such evidence may include:

(A) Documentation showing joint ownership of property;

(B) Lease showing joint tenancy of a common residence;

(C) Documentation showing commingling of financial resources;

(D) Birth certificates of children born to the applicant and his or her spouse;

(E) Affidavits of third parties having knowledge of the bona fides of the marital relationship, or

(F) Other documentation establishing that the marriage was not entered into in order to evade the immigration laws of the United States.

(vi) *Decision.* An application for adjustment of status filed during the prohibited period shall be denied, unless the applicant establishes eligibility for an exemption from the general prohibition.

(vii) *Denials.* The denial of an application for adjustment of status because the marriage took place during the prohibited period shall be without prejudice to the consideration of a new application or a motion to reopen a previously denied application, if deportation or exclusion proceedings are terminated while the alien is in the United States. The denial shall also be without prejudice to the consideration of a new application or motion to reopen the adjustment of status application, if the applicant presents clear and convincing evidence establishing eligibility for the bona fide marriage exemption contained in this part.

(viii) *Appeals.* An application for adjustment of status to lawful permanent resident which is denied by the district director solely because the applicant failed to establish eligibility for the bona fide marriage exemption contained in this part may be appealed to the Associate Commissioner, Examinations, in accordance with 8 CFR part 103. The appeal to the Associate Commissioner, Examinations, shall be the single level of appellate review established by statute.

BILLING CODE 4410-10-M

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Parts 7 and 23

[Docket No. 91-5]

Lease Financing Transactions

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: This Office of the Comptroller of the Currency (the OCC) is amending its regulation on lease financing transactions of national banks. This action is prompted by an amendment to Revised Statute 5136 (12 U.S.C. 24) by section 108 of the Competitive Equality Banking Act (CEBA), Public Law 100-86, 101 Stat. 579 (August 10, 1987). The final rule is designed to balance a national bank's interest in exercising its statutory authority with the national interest in a safe and sound national banking system. Through this final rule, the OCC is re-issuing its current Interpretive Ruling on lease financing transactions, presently codified at 12 CFR 7.3400, as a subpart of the new regulation. The OCC had issued this Interpretive Ruling earlier, recognizing that, incidental to the authority to make loans, national banks were also authorized to enter into lease financing transactions. See 44 FR 22393 (April 13, 1979). Re-issuing the Interpretive Ruling as part of this final rule consolidates the OCC's substantive lease financing regulations and clarifies the two types of lease financing authority available to national banks.

To achieve this consolidation, the final rule is organized into three subparts. Subpart A applies to all lease financing transactions, whether entered into under the authority of 12 U.S.C. 24(7), as incidental to banking, or under the specific authority of section 108 of CEBA. Subpart B addresses additional requirements applicable only to lease financing transactions entered into under section 108 of CEBA. Subpart C incorporates the provisions of Interpretive Ruling 7.3400 into the regulation, and addresses additional requirements applicable only to lease financing transactions entered into under the general authority of 12 U.S.C. 24(7).

In order to integrate the provisions of Interpretive Ruling 7.3400 into the framework of the final rule, the OCC has substantially reorganized it. Notwithstanding this reorganization of the Interpretive Ruling, the OCC has made only two substantive changes: (1) addressing the re-leasing of property acquired for lease financing transactions; and (2) applying 12 U.S.C. 371c-1 to lease financing transactions. Both of these changes have been addressed through the generally applicable provisions of subpart A.

EFFECTIVE DATE: July 22, 1991.

FOR FURTHER INFORMATION CONTACT: Robert J. Hemming, National Bank Examiner, Supervision Policy/Research Division (202) 874-5350; Richard Shack, Bank Accounting (202) 874-5350; or Robert J. Roth, Attorney, Legal Advisory Services Division (202) 874-5300.

SUPPLEMENTARY INFORMATION:

Background

This final rule is derived from a notice of proposed rulemaking (NPRM) published by the OCC on December 27, 1989. See 54 FR 53071. Nineteen comments were received during the comment period, which ended February 26, 1990. Portions of the proposal have been modified in response to comments received during the comment period. Following is a discussion of the major issues raised by the commenters. Included in this discussion are any substantive changes from the NPRM and their incorporation into the final rule.

Discussion of Comment Letters

"Net lease basis" Definition

Several commenters accepted the OCC's invitation to comment on whether the definition of net lease should be rewritten to afford banks greater flexibility in exercising their statutory leasing authority. The vast majority of the commenters advocated expanding the definition of net lease to include various marketing, finder or other activities in connection with a bank's lease financing operations. After evaluating these comments, the OCC has decided to provide relief from some of the restrictions imposed by the net lease definition.

Accordingly, a new paragraph (d) has been added to section 23.2 which authorizes national banks to arrange for any of the services proscribed by paragraph (a), *i.e.*, repair and maintenance, insurance, etc., to be provided by third-party servicers on behalf of lessees whose property national banks hold title to as lessor. The OCC believes that the expansion of the net lease definition is consistent with the parameters set forth in *M & M Leasing Corporation* v. *Seattle First National Bank*, 563 F.2d 1377 (9th Cir. 1977), *cert. denied*, 436 U.S. 956 (1978) (M & M Leasing), since the lessee, and not the bank, will remain responsible for paying for the cost of insurance and for all repairs and maintenance. The OCC believes that the rendering of such service responsibilities by third-parties is distinguishable from situations in which operational services are provided by the lessor.

Arranging for such incidental service arrangements provides national banks with an efficient means by which they may exercise greater control over the leased property while in the hands of the lessee, thereby protecting the residual value of the property by ensuring that such property is properly insured and serviced during the lease term. In providing lessees with the opportunity to purchase incidental service arrangements, national banks should ensure that such programs are structured to comply with the antitying provisions of 12 U.S.C. 1972.

In addition, it is the OCC's intention that the restrictions imposed by paragraph (a) not be read as precluding national banks from engaging in activities incidental to the leasing function which the OCC has previously found to be within the business of banking. Thus, acting as finder under Interpretative Ruling 7.7200 or similar agent or broker functions would not be foreclosed to national banks due to the restrictions on net leases imposed by paragraph (a).

The OCC has also made an additional change to the net lease definition in § 23.2. Specifically, § 23.2(b)(1) has been changed to clarify that a lessor, in addressing a deteriorating lease situation, is not only freed from the "net lease" requirements under § 23.2(a), but also from the residual value limitations imposed under § 23.11. While both CEBA and 12 U.S.C. 24(7) leases must be on a net basis, only the latter must be on a full-payout basis. As proposed, § 23.2(b)(1) could have been interpreted as removing only the net lease requirement in paragraph (a) without any impact on the full-payout requirement applicable to leases entered into under 12 U.S.C. 24(7). This change is intended to retain the flexibility contained in the distress provision previously found in Interpretive Ruling 7.3400(d)(1), which made specific reference to net, full payout leases.

Investment in Personal Property

a. Legally Binding Written Commitment Requirement. Several commenters objected to the proposed change in § 23.3(a) which would have prevented banks from acquiring property on behalf of a lessee in the absence of a legally binding written commitment to lease. These commenters noted that this proposed change was more restrictive than that imposed by current Interpretive Ruling 7.3400, which authorizes a national bank to acquire such property at the request of the lessee who wishes to lease it from the bank. In addition, some commenters noted that several types of leasing activities make it impractical to have a lease signed prior to the order or acquisition of the property.

In proposing the legally binding written commitment standard, it was not the OCC's intent to interfere with established bank leasing practices. The primary purpose of the change was to prevent national banks from either inventorying or speculating in property which it may not subsequently be able to lease or sell. The measure was further intended to limit a bank's exposure in the event a potential lessee refused to proceed with a lease financing transaction. The final rule adopts a compromise position which the OCC believes provides sufficient flexibility to bank lessors, while ensuring that banks are adequately insulated from loss associated with an unconsummated lease transaction in which the bank has already acquired the property. This has been accomplished by amending § 23.3(a) to require either a legally binding written commitment to lease or a legally binding written agreement which indemnifies the bank against loss in connection with the acquisition of the leased property.

b. Off-Lease Property Holding Period

Section 23.3(b) has also been modified in the final rule. Instead of a one year holding period for off-lease property with the possibility of subsequent extensions upon a showing of exceptional circumstances, the OCC is adopting a two year holding period for off-lease property, with no possibility of extension. The two year holding period will commence on the expiration date of the initial lease, or in the event of default, on the date the lease is declared in default. The OCC believes that this change will provide banks with a more realistic time frame for disposing of previously leased property, while at the same time eliminating the regulatory burden associated with requests for holding period extensions. Thus, upon the expiration of the two year holding period, national banks will be required to write-off any remaining book value for off-lease assets. National banks will be expected to actively attempt to either re-lease off-lease property or dispose of such property as soon as practicable. Adherence to the two year holding period will be verified through the examination process.

c. Interim or Bridge Leases

Finally, § 23.3(c) has been amended to provide additional guidance on the permissible uses of bridge or interim leases. The NPRM, in addressing the return of leased property at the expiration of a conforming lease term, or upon the default of a lessee, required that any subsequent bridge lease be in conformance with the requirements of subpart A and only be used to facilitate conforming long-term lease financing transactions. Some commenters sought clarification on whether the reference to subpart A implied that even short-term bridge leases would be required to comply with the § 23.1(b) requirement that a bank must reasonably expect to realize a return of its full investment in the leased property. As noted by the commenters, in most cases, a short-term bridge lease would not satisfy the full return on investment requirement. Additionally, the commenters sought clarification on whether § 23.3(c) would preclude a national bank from arranging for a lessee to go month-to-month on the expiration of a conforming lease.

Commenters noted that the need for short-term extensions might be desirable in certain equipment leasing transactions in which project delays may extend the remaining project term beyond the initial lease term, but may not warrant a long-term renewal. In such cases, the lessee may wish to continue leasing the equipment on a month-to-month basis pending the project's completion. In such situations, commenters felt a bridge lease would be appropriate notwithstanding the fact that such leases would not be facilitating conforming long-term leases.

The OCC believes that interim leases of off-lease property benefit banks in several ways. First, interim leases generate additional rental revenues. Second, they reduce bank costs associated with storage, transportation, security, etc. pending sale or long-term lease of the property. Finally, interim leases benefit banks by requiring the interim lessee to pay for the various servicing, repair and insurance obligations associated with the property during the off-lease period.

Accordingly, the final rule liberalizes the use of short-term leases by amending § 23.3(c) to authorize a national bank/lessor to enter into occasional interim lease financing transactions, but only at the conclusion of a lease which originally conformed with the requirements of subpart A and either subpart B or C, or which would have conformed with those provisions except for a default by the original

VOL

UMI

lessee. Based on this amendment a national bank may lease off-lease property on a month-to-month basis to either the initial lessee (assuming the lessee has not defaulted on the original lease) or to a new lessee, subsequent to the termination of a conforming lease. Under these limited circumstances, the lease need only comply with the net lease requirements of subpart A and will not be subject to the more specific requirements of subpart B or C. This change is intended to aid national banks in maintaining cash flow associated with off-lease property pending sale or re-lease of the property as a conforming lease transaction.

Application of Lending Limits; Restrictions on Transactions with Affiliates

Section 23.5 of the final rule makes it clear that lease financing transactions, whether entered into under Section 108 of CEBA or 12 U.S.C. 24(7), are subject to the per borrower limitations of 12 U.S.C. 84. This section also makes the substantive provisions of 12 U.S.C. 371c and 371c–1 applicable to all lease financing transactions.

Some commenters objected to the application of 12 U.S.C. 84 to CEBA leases, stating that such leases are not required to be the functional equivalent of loans and, therefore, should be exempt from the loans to one borrower restriction imposed by the section. Notwithstanding this view, the OCC believes that 12 U.S.C. 84 should apply to CEBA leases in order to limit a bank's risk of exposure to any one lessee or group of lessees and to promote diversification of a bank's lease portfolio. Consistent with the NPRM, nonrecourse debt may be subtracted from the aggregate book value of leased property to determine the lessee's appropriate lending limit position.

Minimum Lease Term

Section 23.8, which imposes a minimum lease term of 90 days, is intended to address the Conference Report statement that section 108 of CEBA is not intended to allow national banks to engage in daily or short-term leases of personal property. Some commenters opposed the imposition of any minimum lease term for CEBA leases. Others suggested that the prohibition against short-term rentals was intended only to protect nonbank rental companies, such as daily or weekly car rental agencies from national bank competition and that the requirement that all leases be on a "net lease" basis effectively prohibited a bank from inventorying and maintaining property consistent with the needs of a short-term rental company. Some commenters suggested that if Congress wanted to establish a minimum lease term for CEBA leases it could have easily done so.

Congress enacted section 108 of CEBA to provide national banks with relief from the residual value restrictions imposed under Interpretive Ruling 7.3400, thereby enabling banks to engage in shorter term leases and compete with nonbank lessors in the high-grade commercial equipment lease market. The OCC believes that a 90 day minimum lease term provides national banks with sufficient flexibility to meet the leasing needs of its customers. Further, a minimum lease term is advisable in that it provides banks with a standard for determining what constitutes a permissible lease term. In addition, setting the minimum lease term at 90 days eliminates the need to test the outer limits of the meaning of the phrase short-term, thereby avoiding any possible conflict with Congress' express intent that national banks refrain from engaging in the daily or short-term equipment or automobile rental business.

The OCC has decided to modify the minimum lease term in the final rule to permit national banks to acquire property subject to existing leases having remaining maturities of less than 90 days, provided that such leases, at their inception, were in conformance with the general lease requirements of subpart A and those applicable to CEBA leases under subpart B. This amendment is intended to provide national banks with additional flexibility in managing their lease portfolios consistent with the intent of CEBA.

Calculating Volume Limitation for CEBA Leases

The NPRM made clear that the volume restriction for CEBA leases, which limits lease volume to 10 percent of an institution's assets, is computed with reference to a national bank's total consolidated assets. The OCC further stated that the 10 percent volume limitation is to be based on the aggregate book value of all tangible personal property held for lease financing transactions under section 108. In calculating this volume limitation, the NPRM indicated that nonrecourse debt is not to be subtracted.

Some commenters stated that the inclusion of nonrecourse debt in arriving at the overall volume limitation would substantially exaggerate a national bank's true exposure in a leasing transaction. As nonrecourse debt does not represent an obligation of the bank, it was suggested that attributing the nonrecourse debt to the bank for volume limitation purposes would be inappropriate. Moreover, in accounting for leveraged leases, the lessor bank records its investment net of the nonrecourse debt. Accordingly, the OCC has decided that when calculating the volume limitation on CEBA leases, nonrecourse debt may be subtracted from this calculation. This change more accurately reflects a bank's true lease exposure and is consistent with the treatment of nonrecourse debt in calculating a lessee's lending limit position.

Regulatory Flexibility Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601), it is certified that this final rule, will not have a significant impact on a substantial number of small entities.

Executive Order 12291

The OCC has determined that this final rule is not classified as a major rule, and therefore does not require a regulatory impact analysis.

List of Subjects 12 CFR Parts 7 and 23

National banks, Leasing, Lease financing transactions.

Authority and Issuance

For the reasons set forth in the Preamble, chapter I of title 12 of the Code of Federal Regulations is amended as set forth below:

PART 7—[AMENDED]

1. The authority citation for part 7 continues to read as follows:

Authority: 12 U.S.C. 1 et seq.; 12 U.S.C. 93a.

2. Section 7.3400, Interpretive Ruling 7.3400, is removed effective July 22, 1991.

PART 23—[ADDED]

3. Part 23 is added to read as follows:

PART 23—LEASING

Subpart A—General Provisions

Sec.
23.1 Authority.
23.2 Net lease basis.
23.3 Investment in personal property.
23.4 Segregation of records.
23.5 Application of lending limits; restrictions on transactions with affiliates.
23.6 Consumer Leasing Act of 1976.

Subpart B—CEBA Leases

Sec.
23.7 General rule.
23.8 Lease term.
23.9 Transition period.

Subpart C—Leases Under the Authority of 12 U.S.C. 24 (7)

Sec.
23.10 General rule.
23.11 Maximum estimated residual value.
23.12 Transition rule.

Authority: 12 U.S.C. 1; 12 U.S.C. 24(7) and (10); 93a.

Subpart A—General Provisions

§ 23.1 Authority.

(a) A national bank may engage in lease financing transactions under either of two distinct lines of authority. In order to enter into a lease financing transaction as specifically authorized by 12 U.S.C. 24(10), *i.e.*, a CEBA Lease, a national bank must comply with subparts A and B of this part. In order to enter into a lease financing transactions as generally authorized by 12 U.S.C. 24(7), a national bank must comply with subparts A and C of this part.

(b) On entering into a lease financing transaction in compliance with this subpart, a bank must reasonably expect to realize a return of its full investment in the leased property, plus the estimated cost of financing the property over the term of the lease, from —

(1) Rentals;

(2) Estimated tax benefits; and

(3) The estimated residual value of the property at the expiration of the term of the lease.

§ 23.2 Net lease basis.

(a) A *net lease* is a lease under which the national bank will not, directly or indirectly, provide or be obligated to provide for:

(1) The servicing, repair or maintenance of the leased property during the lease term.

(2) The purchasing of parts and accessories for the leased property; however, improvements and additions to the leased property may be leased to the lessee upon its request in accordance with any applicable requirements for maximum estimated residual value.

(3) The loan of replacement or substitute property while the leased property is being serviced.

(4) The purchasing of insurance for the lessee, except where the lessee has failed in its contractual obligation to purchase or maintain the required insurance.

(5) The renewal of any license or registration for the property unless such action by the bank is necessary to protect its interest as owner or financier of the property.

(b) If, in good faith, a national bank believes that there has been an unexpected change in conditions which threatens its financial position by significantly increasing its exposure to loss, the limitations contained in paragraph (a) of this section shall not prevent the bank—

(1) As the owner and lessor under a net lease, (including a full-payout lease entered into under 12 U.S.C. 24(7)), from taking reasonable and appropriate action to salvage or protect the value of the property or its interests arising under the lease; or

(2) As the assignee of a lessor's interest in a lease, from becoming the owner and lessor of the leased property pursuant to its contractual right, or from taking any reasonable and appropriate action to salvage or protect the value of the property or its interests arising under the lease.

(c) The limitations contained in paragraph (a) of this section do not prohibit a national bank from including any provisions in a lease, or from making any additional agreements, to protect its financial position or investment in the circumstances set forth in paragraph (b) of this section.

(d) The limitations contained in paragraph (a) of this section do not prohibit a national bank from arranging for any of the services enumerated in paragraph (a) of this section to be provided by a third party to a lessee (at the expense of the lessee) with respect to property leased by the lessee.

§ 23.3 Investment in personal property.

(a) A national bank may acquire specific property to be leased only after the bank has entered into either:

(1) A legally binding written agreement which indemnifies the bank against loss in connection with its acquisition of the property; or

(2) A legally binding written commitment to lease the property on terms which comply with the provisions of this subpart and either subpart B or C of this part.

(b) At the expiration of the lease (including any renewals or extensions with the same lessee), or in the event of a default on a lease agreement prior to the expiration of the lease term, all of the bank's interest in the property shall either be liquidated or re-leased in conformance with this subpart and either subpart B or C of this part, as soon as practicable, but in no event later than two years from the expiration of the lease. Property which the bank retains in anticipation of re-leasing must be revalued at the lower of current fair market value or book value prior to any subsequent lease.

(c) Notwithstanding the provisions of paragraph (b) of this section, on the return of leased property at the expiration of a conforming lease term, or on the default of a lessee, a short-term bridge or interim lease is permissible if it otherwise conforms with the net lease requirements of § 23.2 of this subpart A. Such a short-term bridge or interim lease need not comply with the further requirements of subpart B or C of this part. Short-term bridge or interim leases may be used pending the sale of off-lease property, or its re-lease as a conforming long-term lease financing transaction.

§ 23.4 Segregation of records.

Where a national bank enters into both CEBA leases and leases under the authority of 12 U.S.C. 24(7), the bank must specifically identify any records it maintains on its CEBA leases to distinguish them from those records which the bank maintains on its leases under the authority of 12 U.S.C. 24(7).

§ 23.5 Application of lending limits; restrictions on transactions with affiliates.

Leasing financing transactions entered into under this part are subject to the limitations on loans or extensions of credit under 12 U.S.C. 84 and to the restrictions on transactions with affiliates under 12 U.S.C. 371c and 371c–1. The Comptroller of the Currency reserves the right to determine that such leases are also subject to the limitations of any other law, regulation or ruling.

§ 23.6 Consumer Leasing Act of 1976.

Nothing in this part shall be construed to be in conflict with the duties, liabilities and standards imposed by the Consumer Leasing Act of 1976, 15 U.S.C. 1667 *et seq.*

Subpart B—CEBA Leases

§ 23.7 General rule.

Pursuant to 12 U.S.C. 24(10), a national bank may invest in tangible personal property, including, without limitation, vehicles, manufactured homes, machinery, equipment, or furniture, for lease financing transactions on a net lease basis, or may become the owner and lessor of such tangible personal property by purchasing the property from another lessor in connection with its purchase of the related lease; provided that the requirements of subpart A of this part and this subpart are met, and the aggregate book value of all tangible personal property held for lease (under the authority of 12 U.S.C. 24(10)) does not exceed 10 percent of the consolidated assets of the national bank.

VOL 56 ISS 119 JE 20 1991 UMI

§ 23.8 Lease term.

(a) Lease financing transactions entered into under this subpart must have an initial term of not less than 90 days.

(b) The minimum lease term provided for in paragraph (a) of this section, shall not be applicable to the acquisition of property subject to an existing lease with a remaining maturity of less than 90 days, provided that, at its inception, such lease was in conformance with the requirements of subpart A of this part and this subpart.

§ 23.9 Transition period.

(a) Lease financing transactions entered into under the authority of 12 U.S.C. 24(10) prior to July 22, 1991 may continue to be administered in accordance with the lease financing terms agreed to by the bank/lessor and lessee. With respect to the applicability of § 23.5, when making new extensions of credit, including leases, to a customer, a national bank must consider all outstanding leases regardless of the date on which they were made.

(b) Any lease which was entered into in good faith prior to July 22, 1991 which does not satisfy the requirements of subpart A of this part and this subpart may be renewed without violation of this part only if there is a binding agreement in the expiring lease which requires the bank to renew it at the lessee's option, and the bank cannot otherwise reasonably or properly avoid its commitment to do so, and the bank in good faith determines and demonstrates, by full documentation, that renewal of the lease is necessary to avoid significant financial loss and recover its total investment in, plus the cost of financing, the property.

Subpart C—Leases Under the Authority of 12 U.S.C. 24(7)

§ 23.10 General rule.

Pursuant to 12 U.S.C. 24(7), a national bank may become the legal or beneficial owner and lessor of specific personal property or otherwise acquire such property; or become the owner and lessor of personal property by purchasing the property from another lessor in connection with its purchase of the related lease; and incur obligations incidental to its position as the legal or beneficial owner and lessor of the leased property; provided that the lease is a net, full-payout lease representing a noncancelable obligation of the lessee, notwithstanding the possible early termination of that lease, and the requirements of subpart A of this part and this subpart are met.

§ 23.11 Maximum estimated residual value.

(a) Any unguaranteed portion of the estimated residual value relied upon by the bank to yield a full return under this subpart shall not exceed 25 percent of the original cost of the property to the lessor. The amount of any estimated residual value guaranteed by the manufacturer, the lessee, or a third party which is not an affiliate (as defined by 12 U.S.C. 371c) of the bank, may exceed 25 percent of the original cost of the property, where the bank has determined, and can provide full, supporting documentation, that the guarantor has the resources to meet the guarantee.

(b) Calculations of estimated residual value on leases of personal property to Federal, State, or local governmental entities may be based on reasonably anticipated future transactions or renewals.

(c) In all cases, both the estimated residual value of the property and that portion of the estimated residual value relied upon by the lessor to satisfy the requirements of a full-payout lease must be reasonable in light of the nature of the leased property and all relevant circumstances so that realization of the lessor's full investment plus the cost of financing the property primarily depends on the creditworthiness of the lessee and any guarantor of the residual value, and not on the residual market value of the leased item.

§ 23.12 Transition rule.

This part shall not apply to any leases executed prior to June 12, 1979. With respect to the applicability of § 23.5, when making new extensions of credit, including leases, to a customer, a national bank must consider all outstanding leases regardless of the date on which they were made. Any lease which was entered into in good faith prior to such date which does not satisfy the requirements of this part may be renewed without violation of this part only if there is a binding agreement in the expiring lease which requires the bank to renew it at the lessee's option, and the bank cannot otherwise reasonably or properly avoid its commitment to do so, and the bank in good faith determines and demonstrates, by full documentation, that renewal of the lease is necessary to avoid significant financial loss and recover its total investment in, plus the cost of financing, the property.

Dated: June 13, 1991.

Robert L. Clarke,

Comptroller of the Currency.

BILLING CODE 4810-33-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-NM-119-AD; Amendment 39-7045; AD 91-14-03]

Airworthiness Directives; McDonnell Douglas Model MD-11 and MD-11F Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to McDonnell Douglas Model MD-11 and MD-11F series airplanes, which requires inspections and repositioning, if necessary, of the tail tank fuel distribution pipe assembly in the left main landing gear wheel well. This amendment is prompted by an in-service report of an uncontained fuel leak in the wheel well. This condition, if not corrected, could result in a fuel leak in the left main landing gear wheel well area, and the possibility of an in-flight or ground fire.

DATES: Effective July 5, 1991.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of July 5, 1991.

ADDRESSES: The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: DC-10 Technical Publications, Technical Administrative Support, C1-L5B. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond Vakili, Aerospace Engineer, Propulsion Branch, ANM-140L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (213) 988-5282.

SUPPLEMENTARY INFORMATION: Recently, an uncontained fuel leak was detected in the left main landing gear wheel well of a McDonnell Douglas Model MD-11 series airplane. Investigation has revealed that the tail tank fuel pipe assembly migrated, which allowed the O-ring that provides the seal between the shroud of the pipe assembly and coupling shroud assembly to be exposed. This resulted in fuel leaking into the main landing gear wheel well. This condition, if not corrected, could result in a fuel leakage in the left main landing gear wheel well area, and the possibility of an in-flight or ground fire.

The FAA has reviewed and approved McDonnell Douglas MD-11 Alert Service Bulletin A28-14, dated April 11, 1991, which describes procedures to visually inspect the tail tank fuel pipe assembly for the proper position in the left main landing gear wheel well area, and to reposition the fuel pipe assembly, if required. The FAA has also reviewed and approved McDonnell Douglas Service Bulletin 28-14, dated May 17, 1991, which describes procedures for installing a fuel pipe assembly shroud support bracket; installation of this bracket precludes the need for the visual inspections.

Since this situation is likely to exist or develop on other airplanes of the same type design, this AD requires repetitive visual inspections and repositioning, if necessary, of the tail tank fuel distribution pipe assembly in the left main landing gear wheel well, in accordance with Alert Service Bulletin A28-14, previously described. To terminate the inspections, operators may install the support bracket in accordance with Service Bulletin 28-14.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

This is considered interim action. The FAA may consider further rulemaking to require additional corrective action to minimize migration of the tail tank fuel distribution pipe assemblies and the possibility of fuel leakage on Model MD-11 and MD-11F airplanes.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is a emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket (otherwise, an evaluation is not required). A copy of it, if filed, may be obtained from the Rules Docket.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

91-14-03. McDonnell Douglas: Amendment 39-7045. Docket No. 91-NM-119-AD.

Applicability: Model MD-11 and MD-11F series airplanes, with manufacturer's fuselage numbers 447 through 449, 451 through 461, and 463, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent fuel leakage from the tail tank fuel distribution pipe assembly shroud coupling when the shroud system contains fuel, accomplish the following:

(a) Within 30 flight hours after the effective date of this AD, and thereafter at intervals not to exceed 100 flight hours, visually inspect the tail tank fuel distribution pipe assembly located in the left main landing gear wheel well for correct pipe flange position, in accordance with the accomplishment instructions of McDonnell Douglas MD-11 Alert Service Bulletin A28-14, dated April 11, 1991 (hereinafter referred to as SB A28-14).

(1) If the pipe flange measurement is within the dimensions specified in SB A28-14, no action is required.

(2) If the pipe flange measurement is not within the dimensions specified in SB A28-14, prior to further flight, accomplish either subparagraph (a)(2)(i) or (a)(2)(ii) of this AD:

(i) Reposition the pipe assembly in accordance with the accomplishment instructions of SB A28-14 and continue inspections at intervals not to exceed 100 flight hours; or

(ii) Install a fuel pipe assembly shroud support bracket in accordance with the accomplishment instructions of McDonnell Douglas MD-11 Service Bulletin 28-14, dated May 17, 1991.

(b) Installation of a fuel pipe assembly shroud support bracket in accordance with the accomplishment instructions of McDonnell Douglas Service Bulletin 28-14, dated May 17, 1991, constitutes terminating action for the requirements of paragraph (a) of this AD.

(c) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may concur or comment and then send it to the Manger, Los Angeles ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(e) The inspection, repositioning, and installation requirements shall be done in accordance with McDonnell Douglas MD-11 Service Bulletin A28-14, dated April 11, 1991; and Service Bulletin 28-14, dated May 17, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: DC-10 Technical Publications, Technical Administrative Support, C1-L5B. Copies may be inspected at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

This amendment (39-7045, AD 91-14-03) becomes effective on July 5, 1991.

Issued in Renton, Washington, on June 12, 1991.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34-29886]

Exemption of Stocks Contained in Standardized Market Baskets From Registration Under Section 12(a) of the Securities Exchange Act of 1934

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission announces the adoption of Rule 12a–7 (Rule) under the Securities Exchange Act of 1934 (Act). The rule exempts from the registration provisions of section 12(a) of the Act securities that are traded as part of a market basket transaction provided that each component security otherwise is a national market system security and is listed and registered on another national securities exchange or quoted on the National Association of Securities Dealers Automated Quotation System. In addition, to be eligible for an exemption pursuant to Rule 12a–7, the stocks must be part of a standardized market basket containing at least 100 securities. The exemption is applicable only to facilitate the trading of securities as part of a standardized market basket that previously has been approved for exchange trading by the Commission pursuant to the requirements of section 19(b) of the Act.

EFFECTIVE DATE: July 22, 1991.

FOR FURTHER INFORMATION CONTACT: Sharon Lawson, Special Counsel, Office of Self-Regulatory Oversight, (202) 272–2408, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION:

I. Introduction and Background

The Securities and Exchange Commission ("Commission") is today announcing the adoption of Rule 12a–7 ("Rule") under the Securities Exchange Act of 1934 ("Act").[1] Under the Rule, securities comprising a market basket [2] can be traded on a national securities exchange, solely as part of the market basket, without registering the securities on such an exchange under section 12 of the Act, provided the conditions specified in the rule are satisfied at or prior to execution of the market basket trade.

The adoption of the Rule will permit the New York Stock Exchange, Inc. (NYSE) (and, potentially other exchanges in the future) to trade market basket contracts [3] without having to register, or be granted unlisted trading privileges (UTP), under section 12 of the Act in replacement securities in the indexes on which the contracts are based.[4]

As discussed in the Proposing Release, the Commission proposed the rule because of concern that trading in market baskets could be disrupted if the NYSE had to submit a UTP application for replacement securities in the index on which the market baskets are based and wait the 10 day notice period required under the Act before it could trade the replacement security as part of its market basket.[5] As discussed in more detail below, the Commission believes the limited exemption that will be provided by the Rule will avoid unduly disrupting the trading in stock market baskets on an exchange any time a stock in an index on which the market basket is based is replaced with another security.[6]

II. Discussion

As adopted Rule 12a–7 provides a limited exemption from the registration requirements of section 12(a) of the Act for those stocks that are traded on an exchange only as part of a standardized market basket.[7] Under the terms of the rule the exemption only is available for stocks included in a standardized market basket if the market basket has been approved by the Commission for listing on a national securities exchange pursuant to the requirements of section 19(b) of the Act. Accordingly, the exemption under the Rule is immediately available for those stocks included in the Commission approved market basket currently traded by the NYSE.[8]

Further, to be eligible for the exemption under the Rule, a stock must be a national market system (NMS) security as defined in rule 11Aa2–1 under the Act and either (1) registered on another national securities exchange or (2) quoted on the National Association of Securities Dealers Automated Quotation (NASDAQ) System. These requirements are important for several reasons.

First, the NMS designation requirement is significant because to be designated a NMS security last sale information must be reported through a consolidated transaction reporting system established pursuant to rule 11Aa3–1 under the Act. Although individual transactions in exempted securities would not be permitted under the rule, the Commission believes that consolidated transaction data is an important requirement for all individual stocks traded as part of a market basket on an exchange, because a buyer of a basket takes ownership of each component stock and will be free to sell or hold each stock separately.

Second, the requirements noted above ensure that there is adequate information available to the public on all stocks eligible for an exemption under the rule. This is because all exempted exchange-traded stocks under the rule must be registered on at least one national securities exchange under section 12(b). That section requires specific information and disclosure from issuers seeking to have their stock exchange traded.

As for over-the-counter (OTC) issues eligible for an exemption under the rule, the NMS requirement coupled with the requirement for NASDAQ quotation means that only those stocks meeting the National Association of Securities Dealers' (NASD) NASDAQ/NMS eligibility criteria would be entitled to an exemption under the rule. Under that criteria, such stocks, with limited exceptions for insurance and investment companies, must be registered under section 12(g) of the Act.[9] This is important because the information that must be provided by the issuer to register securities under section 12(g) is substantially similar to the information required to register a security on a national securities exchange under section 12(b). Moreover, issuers having securities registered under section 12 of the Act have continuing reporting obligations under other sections of the Act.[10] Accordingly, the requirements that stocks be NMS stocks that are either registered on a national securities exchange or quoted on NASDAQ to be eligible for an exemption under the Rule, ensures that information on such stocks is readily and publicly available, consistent with the purposes underlying the registration requirements of section 12.

Finally, we note that OTC securities that are designated NASDAQ/NMS stocks must meet specific quantitative and qualitative requirements similar to those required for exchange listed stocks.[11] Accordingly, the NMS designation requirement, coupled with NASDAQ quotation or exchange listing, will ensure that all the stocks eligible for an exemption under the Rule are active and liquid stocks.

In summary, the Commission believes that the conditions of the rule ensure that the regulatory purposes underlying section 12 will be met. For example, as noted above, with the limited exception for certain investment and insurance companies, only securities registered under either section 12(b) or 12(g) of the Act can be exempted under the rule, thereby assuring that information about the issuers of those securities is available to the public. Further, last sale reports must be available on a security for it to be eligible for the exemption. Finally, the Commission will continue to ensure that it is appropriate to grant stocks comprising a particular market basket an exemption under section 12(a) through its authority under section 19(b) to review market basket proposals of the national securities exchanges.[12]

The Commission recognizes that rule 12a–7 has the effect of eliminating the requirements for a discrete notice and comment period for each unlisted trading privilege application. The Commission believes that this result is justified because inclusion of a stock in a market basket should not have the potential of changing the primary locus of trading in the individual stock. In this regard, we note that each individual stock that is a component of a market basket only accounts for a small component of the total index value [13] and that the 12(a) exemption under the rule is only applicable to trading in the market basket. In addition, no issuer to date has commented on the inclusion of its stock in market basket trading. Accordingly, we believe that the impact on a particular underlying stock will be minimal. Finally, through the section 19(b) review process of market basket proposals and public comment on such proposals, the Commission will have an opportunity to assess the overall impact market basket trading may have on the stocks which are included in the basket and address any concerns.[14]

In light of the potential benefits to be achieved by market basket trading, we do not believe on balance that any further regulatory goals would be achieved by requiring the exchanges to register, or apply for UTP, on each individual stock included in a market basket. To the contrary, it is our belief that without the availability of the exemption in the rule, trading in market baskets could be unduly disrupted every time a security is replaced by another for little public benefit.

III. Regulatory Flexibility Act Status

Pursuant to section 605(b) of the Regulatory Flexibility Act,[15] when the Commission proposed rule 12a–7, the Chairman of the Commission certified that the proposed rule if adopted, would not have a significant economic impact on a substantial number of small entities. The Commission did not receive any comments on the Chairman's certification.

IV. Effects on Competition and Other Findings

Section 23(a)(2) of the Act [16] requires the Commission, in adopting rules under the Act, to consider the anti-competitive effect of such rules, if any, and to balance any impact against the regulatory benefits gained in terms of furthering the purposes of the Act. The Commission has considered the adoption of the rule in light of the standards cited in section 23(a)(2) and believes that the rule's adoption will not impose any burden on competition not necessary or appropriate in furtherance of the Act. This finding is made for the reasons set forth above in this release. As stated herein, the rule is designed to

---

[1] The Commission proposed for comment Rule 12a–7 in Securities Exchange Act Release No. 27834 (March 22, 1990), 55 FR 11307 (Proposing Release). No comments were received on the proposal.

[2] Market baskets or stock portfolios enable the trading of standardized baskets of stocks at an aggregate price in a single execution on an exchange floor. A trade in a market basket or portfolio results in a transfer to the buyer of ownership of each of the component stocks. When the transaction is completed, the buyer will be entitled to all rights attending ownership of the basket component stocks (including rights to vote and receive dividends), and will be free to sell or hold each stock separately.

[3] The NYSE trades Exchange Stock Portfolios based on the Standard & Poor's ("S&P") 500 Portfolio Index. Trading volume has been relatively low in market baskets. Since the commencement of trading in October 1989, a total of 289 baskets have traded on the NYSE, with only four basket contracts traded during the last six months.

At the time the rule was proposed the Chicago Board Options Exchange ("CBOE") also traded market baskets based on the S&P 500 Index. The CBOE, however, has informed the Commission that it is delisting market baskets from exchange trading because of lack of investor interest, the last trade having occurred on November 2, 1989. *See* letter from Robert F. Ackermann, Vice President, CBOE to Howard Kramer, Assistant Director, Commission, dated December 18, 1990. Nevertheless, CBOE rules would permit it to trade market baskets on the S&P 500 and 100 indexes, at a future date, if it so desired.

[4] Section 12 of the Act requires any security, other than an exempt security, to be registered in accordance with the requirements of that section before it can be traded on a national securities exchange. Section 12(f) of the Act, however, permits the Commission to extend UTP to national securities exchanges if the security is registered pursuant to section 12 of the Act or would be required to be so registered except for the exemption from registration provided in section 12(g) of the Act. Under section 12(f)(5) of the Act, before approving an application for UTP, 10 days notice must be given to the issuer of the security and the exchange on which the security is registered.

[5] Changes in an index can occur at any time for a variety of reasons such as the elimination of a component security due to a merger, acquisition, or going private transaction. As discussed in the Proposing Release, if an exchange traded contract was unable to be amended immediately, buyers, in addition to incurring unnecessary transaction costs, would incur new basis risk because the price of the index, as amended, could deviate by more than a minimal amount from the price of the component stocks of the market basket contract.

[6] Since Commission approval of market baskets in October 1989, there have been UTP requests for approximately nine replacement stocks. The CBOE and NYSE were permitted to trade these replacement stocks immediately pursuant to no-action letters issued by the Commission staff on the condition, among other things, that the markets promptly submit UTP requests for the replacement stocks. To date no comments on the UTP requests for replacement securities have been received.

[7] Under the rule, the term standardized market basket is defined as a group of at least 100 stocks purchased or sold in a single execution and at a single trading location with physical delivery and transfer of ownership of each component stock resulting from such execution.

[8] *See* note 3, *supra*. Of course a stock would have to meet the other requirements of the rule to be granted an exemption from registration.

[9] *See* NASD By-Laws, Schedule D, Part III, Para. 1910. The NASD's rules authorize the securities of insurance companies meeting the conditions of section 12(g)(2)(G) of the Act and closed-end investment companies registered under section 8 of the Investment Company Act of 1940 and whose securities are registered under the Securities Act of 1933 to be designated NASDAQ/NMS securities. Such issuers are subject to comprehensive disclosure under State law and the Federal securities laws, respectively. American Depository Receipts based on the equity security of a foreign issuer also are eligible for NASDAQ/NMS inclusion if the underlying equity securities are registered under section 12 of the Act.

[10] *See, e.g.*, section 13 of the Act and the rules thereunder.

[11] For example, these requirements set forth quantitative standards for inclusion in NASDAQ/NMS such as minimum public float and market value.

[12] In limiting the exemption under the rule to stocks included in market baskets that are only traded on a national securities exchange, the Commission does not intend to raise any implications that it believes such a market basket would not be appropriate for quotation on the NASDAQ System. Unlike the registration requirements for securities traded on exchanges under section 12(a) of the Act, there is no section of the Act that would prohibit the NASD from trading exchange listed stocks as part of a market basket approved by the Commission. The Commission, however, recognizes the competitive implications of exchange off-board trading restrictions that would prohibit exchange members from trading certain securities off an exchange floor. In this context, the Commission would be concerned about any exchange restrictions that would limit the ability of a market to quote and trade a market basket product similar to the market baskets approved for trading on the NYSE and CBOE.

[13] As noted above, the rule only applies to standardized market baskets which contain at least 100 stocks.

[14] Although not all securities ultimately included in a market basket will be known at the time of the Commission's review of a proposal to trade a market basket due to future substitutions, the Commission will know the characteristics and type of securities which are intended to be included in a proposed market basket.

[15] 5 U.S.C. 605(b).

[16] 15 U.S.C. 78w(a)(2) (1988).

VOL 56 ISS 119 JE 20 1991 UMI

exempt from the registration requirements of section 12(a) of the Act certain stocks that are only traded on an exchange as part of a Commission approved market basket.

Insofar as the rule contains limitations, they are designed to promote the purposes of the Act by ensuring that adequate information will be available on the stocks included in a market basket consistent with the purposes underlying the section 12 registration requirements.

V. Statutory Basis

Rule 12a–7 is being adopted pursuant to 15 U.S.C. 78a *et seq.*, particularly sections 3(a)(12), 6, 11A, 12 and 23(a)(1) of the Act.

List of Subjects in 17 CFR Part 240

Reporting and recordkeeping requirements, Securities.

VI. Text of Rule

For the reasons set out in the preamble, title 17, chapter II, part 240 of the Code of Federal Regulations is amended as set forth below.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for part 240 is amended by adding the following citation after the general authority:

Authority: 15 U.S.C. 77c, 77d, 77s, 78c, 78d, 78i, 78j, 78l, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 79q, 79t, 80a–29, 80a–37, unless otherwise noted.

* * * § 240.12a–7 also issued under 15 U.S.C. 78a *et seq.*, particularly secs. 3(a)(12), 15 U.S.C. 78c(a)(12), 6, 15 U.S.C. 78(f), 11A, 15 U.S.C. 78k, 12, 15 U.S.C. 78(l), and 23(a)(1), 15 U.S.C. 78(w)(a)(1).

2. By adding § 240.12a–7 as follows:

§ 240.12a–7 Exemption of stock contained in standardized market baskets from section 12(a) of the Act.

(a) Any component stock of a standardized market basket shall be exempt from the registration requirement of section 12(a) of the Act, solely for the purpose of inclusion in a standardized market basket, provided that all of the following terms and conditions are met:

(1) The standardized market basket has been duly approved by the Commission for listing on a national securities exchange pursuant to the requirements of section 19(b) of the Act; and

(2) The stock is a National Market System security as defined in rule 11Aa2–1 under the Act (17 CFR 240.11Aa2–1) and is either:

(i) Listed and registered for trading on a national securities exchange by the issuer or

(ii) Quoted on the National Association of Securities Dealers Automated Quotation System;

(b) When used in this rule, the term standardized market basket means a group of at least 100 stocks purchased or sold in a single execution and at a single trading location with physical delivery and transfer of ownership of each component stock resulting from such execution.

By the Commission.

Dated: June 11, 1991.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 60

[FRL–3966–1]

Approval and Promulgation of Implementation Plans; ND Standards of Performance for New Stationary Sources

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is today providing notice that it granted delegation of authority to North Dakota on January 7, 1991 to implement and enforce the New Source Performance Standards (NSPS) for 40 CFR part 60, subpart QQQ. This is a result of a request for delegation from the State of North Dakota on June 26, 1990.

This notice also approves revisions to the North Dakota NSPS as part of the State Implementation Plan (SIP). Although the North Dakota NSPS were originally approved as part of the SIP, subsequent revisions to the State's NSPS were approved by delegation of authority to the State to implement and enforce the NSPS and were not included as part of the SIP. This created much confusion on the enforcement of these NSPS. This notice now clarifies past EPA actions by approving all of the State's NSPS regulations as part of the SIP.

DATES: *Effective Date:* This action will become effective on August 19, 1991, unless notice is received by July 22, 1991, that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the Federal Register.

ADDRESSES: Copies of the submittal are available for public inspection between 8 a.m. and 4 p.m. Monday through Friday at the following offices:

Environmental Protection Agency, region VIII, Air Programs Branch, 999 18th Street, suite 500, Denver, CO 80204–2405

Division of Environmental Engineering, State Department of Health and Consolidated Laboratories, P.O. Box 5520, Bismarck, North Dakota 58502–5520

Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

FOR FURTHER INFORMATION CONTACT: Vicki Stamper, Environmental Protection Agency, region VIII, Air Programs Branch, suite 500, Denver, CO 80202–2405, (303) 293–1676, (FTS) 330–1676.

SUPPLEMENTARY INFORMATION: EPA has two options for the approval of a State's NSPS regulations. Section 111(c) of the Clean Air Act permits EPA to delegate to the States the authority to implement and enforce standards set forth in 40 CFR part 60, NSPS. EPA also has the option of approving State NSPS regulations as part of the SIP. The difference between these two options is in the enforcement abilities of EPA and the State. Originally, North Dakota's NSPS regulations were approved as part of the SIP. However, subsequent revisions to the State's NSPS regulations were not approved as part of the SIP. Instead, the State was delegated the authority to implement and enforce the regulations. This resulted in much confusion over the authority for enforcement of the North Dakota NSPS regulations. By approving the June 26, 1990 revisions to North Dakota's NSPS regulations as part of the SIP, the authority for enforcement will be consistent for all of the State's NSPS regulations.

On May 26, 1976, the state of North Dakota submitted their original procedures for NSPS. EPA approved these NSPS regulations as part of the SIP on May 26, 1977 (42 FR 26078). Subsequent revisions to the State's NSPS regulations were delegated to the State on September 17, 1984 (49 FR 36328), December 16, 1988 (53 FR 50524), and July 17, 1990 (55 FR 29015).

On June 26, 1990, the State of North Dakota submitted revisions to its NSPS regulations. Such revisions included the addition of one NSPS for the following source category: Volatile organic compounds (VOC) emissions from petroleum refinery wastewater systems (40 CFR part 60, subpart QQQ). Pursuant to such submittal, on January 7, 1991, delegation was given with the following letter:

Hon. George A. Sinner,
Governor of North Dakota, State of North Dakota, Office of the Governor, Bismarck, North Dakota 58505.

Dear Governor Sinner: This letter is in response to your submittal dated June 26, 1990. The submittal was a revision to the implementation Plan for the Control of Air Pollution for the State of North Dakota. The submittal modified several chapters of the State's Air Pollution Control Regulations: the Prevention of Significant Deterioration of Air Quality (PSD) regulations to incorporate the nitrogen dioxide (NO_2) increments; the Ambient Air Quality Standards to amend the State's hydrogen sulfide standard; the Standards of Performance for New Stationary Sources (NSPS); the Emission Standards for Hazardous Air Pollutants (NESHAPS); and various other minor changes. This letter addresses only the modification to the NSPS chapter which added a new category of NSPS. The remaining regulations are being addressed through separate actions.

Subsequent to states adopting NSPS regulations, the Environmental Protection Agency (EPA) delegates the authority for the implementation and enforcement of those NSPS so long as those regulations are equivalent to, or more stringent than, the federal regulations. EPA, therefore, is acting on the delegation of authority to North Dakota for implementation and enforcement of one NSPS.

EPA has reviewed the pertinent statutes and regulations of the State of North Dakota and has determined that they provide an adequate and effective procedure for the implementation and enforcement of the NSPS by the State of North Dakota. Therefore, pursuant to section 111(c) of the Clean Air Act (CAA), as amended, and 40 CFR part 60, EPA hereby delegates its authority for the implementation and enforcement of the NSPS to the State of North Dakota as follows:

(A) Responsibility for all sources located, or to be located in the State of North Dakota subject to the standards of performance for new stationary sources promulgated in 40 CFR part 60. The category of new stationary sources covered by this delegation is as follows: volatile organic compounds (VOC) emissions from the petroleum refinery wastewater systems (subpart QQQ).

(B) Not all authorities of NSPS can be delegated to states under section 111(c) of the CAA. The EPA Administrator retains the authority to implement those sections of NSPS that require: (1) Approving equivalency determinations and alternative test methods; (2) decision making to ensure national consistency; and (3) EPA rulemaking to implement. Therefore, EPA cannot delegate the authority provided in 40 CFR 60.804 [33–15–13–64(30)(1) in North Dakota's Regulations].

(C) As 40 CFR part 60 is updated by EPA, North Dakota must revise its rules and regulations accordingly.

This delegation is based upon and is a continuation of the same conditions as those stated in EPA's original delegation letter of August 30, 1976, except that condition 5, relating to Federal facilities, has been voided by the Clean Air Act Amendments of 1977. It is also important to note that EPA retains concurrent enforcement authority as stated in condition 2 and if at any time there is a conflict between a State and Federal Regulation (40 CFR Part 60), the Federal Regulation must be applied if it is more stringent than that of the State, as stated in condition 7 of our letter dated August 30, 1976.

A copy of the August 30, 1976 letter was published in the notices section of the Federal Register of October 18, 1976 (41 FR 44884), along with the associated rulemaking notifying the public that certain reports and applications required from operators of new or modified sources shall be submitted to the State of North Dakota (41 FR 44885). Copies of the Federal Register are enclosed for your convenience.

Since this delegation is effective immediately, there is no need for the State to notify the EPA of its acceptance. Unless we receive written notice of objections from you within ten days of the date on which you receive this letter, the State of North Dakota will be deemed to have accepted all the terms of this delegation.

Sincerely,

James J. Scherer,

Regional Administrator.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective August 19, 1991, unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted.

If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective August 19, 1991.

Final Action

As stated above, the North Dakota NSPS rules have been processed under separate actions. This notice clarifies that all of North Dakota's NSPS rules are approved as part of the SIP. The NSPS authority, however, does not extend beyond what was stated in the above letter, i.e., EPA retains the authority specified in 40 CFR 60.804. Federal approval of the North Dakota NSPS rules includes only those regulations which are equal and consistent with the Federal regulations. Approval of such rules are noted in 40 CFR 52.1820(c) and 40 CFR 60.4(c).

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities [See 46 FR 8709].

This action has been classified as a table 3 action by the Regional Administrator under procedures published in the Federal Register on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this section must be filed in the United States Court of Appeals for the appropriate circuit by [60 days from the date of publication]. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purpose of judicial review nor does it extend the time within which a petition for judicial review must be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements [See section 307(b)(2).]

The Agency has reviewed this request for revision of the federally-approved SIP for conformance with the provisions of the 1990 Amendments enacted on November 15, 1990. The Agency has determined that this action conforms with those requirements irrespective of the fact that the submittal preceded the date of enactment.

List of Subjects

40 CFR Part 52

Air pollution control, Incorporation by reference.

40 CFR Part 60

Air pollution control, Asphalt, Asphalt concrete plants, Bulk gasoline terminals, Coal preparation plants, Electric utility steam generators, Equipment leaks of volatile organic compounds (VOC's), Fossil fuel fired steam generators, Grain elevators, Incinerators, Lime manufacturing plants, Nitric acid plants, Nonmetallic mineral processing plants, Onshore natural gas processing.

VOL 56 ISS 119 JE 20 1991 UMI

Petroleum, Petroleum dry cleaners, Petroleum refineries, Petroleum liquid storage vessels, Phosphate fertilizer industry, Portland cement plants, Sewage treatment plants, Sulfur dioxide (SO_2) emissions, Stationary gas turbines, Synthetic organic chemical manufacturing, Sulfuric acid plants, Volatile organic compounds (VOC), Petroleum refinery wastewater systems.

Dated: May 29, 1991.

Jack McGraw,

Acting Regional Administrator.

PART 52—[AMENDED]

40 CFR part 52, subpart JJ is amended as follows:

Subpart JJ—North Dakota

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642

2. Section 52.1620 is amended to by adding paragraph (c)(21) to read as follows:

§ 52.1620 Identification of plan.

* * * * *

(c) * * *

(21) On June 20, 1990, the Governor of North Dakota submitted revisions to the plan for new source performance standards.

(i) Incorporation by reference.

(A) Revisions to the Air Pollution Control Rules of the State of North Dakota Chapter 33–15–12 which was effective on June 1, 1990.

(ii) Additional material.

(A) January 7, 1991, letter from James J. Scherer, EPA, to George A. Sinner, Governor, State of North Dakota, on the authority for implementation and enforcement of the New Source Performance Standards (NSPS) for 40 CFR part 60, subpart QQQ.

PART 60—[AMENDED]

40 CFR part 60, subpart A, is amended as follows:

Subpart A—General Provisions

1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7411

2. Section 60.4(c) is amended by revising the table to read as follows:

§ 60.4 Address.

* * * * *

BILLING CODE 6560–50–M

40 CFR Part 180

[PP 9F3744/R1123; FRL–3931–9]

RIN 2070 AB–78

M-One Plus Bioinsecticide; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance for residues of the insecticide M-One Plus® Bioinsecticide containing the delta endotoxin of *Bacillus thuringiensis* variety *San Diego* encapsulated in killed *Pseudomonas fluorescens* when used in or on all food and feed crops. This request for an exemption from the requirement of a tolerance was requested by Mycogen Corp. This regulation eliminates the need to establish a maximum permissable level for residues of this killed microbial pesticide.

EFFECTIVE DATE: Effective on June 20, 1991.

ADDRESSES: Written objections, identified by document control number [PP 9F3744/R1123], may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Phillip G. Hutton, Product Manager (PM) 17, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 207, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)–557–2690).

SUPPLEMENTARY INFORMATION: EPA issued a notice in the Federal Register of March 19, 1990 (54 FR 21664), which announced that it had received pesticide petition (PP) 9F3744 from the Mycogen Corporation, 5451 Oberlin Drive, San Diego, CA 92121, proposing that 40 CFR part 180 be amended by establishing an exemption from the requirement of a tolerance for residues of the insecticide M-One Plus Bioinsecticide in or on all raw agricultural commodities (RACs) when formulated in an encapsulated system.

No comments were received in response to this notice of filing. However, comments were received when the EPA published its receipt of an application for an Experimental Use Permit (and temporary tolerance exemption) for this pesticide. The comments received raised a concern that the EPA would register M-One Plus under the existing 40 CFR 180.1011 tolerance exemption for *Bacillus thuringiensis*. EPA responded by indicating to the commenter that MVP was considered a new active ingredient and therefore would require a unique risk assessment and determination regarding the requirement for a tolerance or exemption from the requirement for a tolerance. This satisfied the concerns of the commenter. The experimental use permit and temporary exemption from the requirement of a tolerance were then granted.

M-One Plus is a killed microbial pesticide and is to be registered for the control of coleopteran larvae, through the toxic action of the *B. t.* protein crystal. This protein toxin is selective for the larvae of coleoptera. Such specificity is advantageous in limiting the potential effects on nontarget organisms, especially beneficial parasites and predators in other orders of insects. The recommended application rates are as follows: 1.5 to 4 quarts per acre depending on the severity of the larval infestation. For best results, the initial spray must be made when eggs hatch and small larvae are first observed.

Residue Chemistry Data

Residue chemistry data were not required. Such data were determined to be necessary only if the submitted toxicology studies indicated that additional Tier II or III toxicology data would be required as specified in 40 CFR 158.165(e). The submitted toxicology data for this use indicated that the product is of low mammalian toxicity/pathogenicity and Tier II or III data were not required. Therefore, no residue data are required in order to grant an exemption from the requirement of a tolerance for M-One Plus Bioinsecticide.

Toxicology Data

The following data submitted in support of the petition and other relevant material have been evaluated. The toxicology data considered in support of this exemption from the requirements of a tolerance include the following:

1. *Acute Oral Toxicity in Rats (Technical Grade Active Ingredient*

VOL 56 ISS 119 JE 20 1991 UMI

[TGAI]), Guideline Nos. 81-1/152-30. The acute oral LD_{50} for the TGAI as indicated by the data is greater than 5050 mg/kg (4.63 ml/kg), the highest dose tested, when administered undiluted to albino rats.

2. *Acute Dermal Toxicity in Rats (Technical), Guideline Nos. 81-2/152-31.* The acute dermal LD_{50} for the TGAI as indicated by the data is greater than 2020 mg/kg (1.85 mL/kg), the highest dose tested, when administered undiluted to albino rats.

3. *Acute Pulmonary Toxicity in Rats (Technical), Guideline Nos. 81-3/152-32.* The acute pulmonary LD_{50} for the TGAI (technical) as indicated by the data is greater than 0.1 mL per animal, the highest dose tested, or approximately 10^5 nonviable cells per animal when administered undiluted to albino rats.

4. *Acute Intravenous Toxicity in Rats (Technical), Guideline Nos. 152-33.* The acute intravenous LD_{50} for the TGAI (technical) as indicated by the data is greater than 0.5 mL per animal, the highest dose tested, or approximately 10^4 nonviable cells per animal when administered as a 1:100 dilution in sterile water to albino rats.

5. *Primary Dermal Irritation in Rabbits (Technical), Guideline Nos. 81-5/152-34.* The TGAI produced mild dermal irritation with a primary irritation score of 2.96 when tested in albino rabbits and is not considered a primary irritant.

6. *Eye Irritation in Rabbits (Technical), Guideline Nos. 81-4/152-35.* The TGAI technical was rated as minimally irritating in nonwashed eyes of albino rabbits when administered as 0.1 mL of a 50 percent v/v solution of the test material in sterile water. The maximum average irritation score was 3.7 and the test material was categorized in Toxicity Category III.

The results of the above studies indicate that the potential acute toxicity/pathogenicity of M-One Plus is sufficiently low to support the proposed exemption from the requirements for a tolerance on all raw agricultural commodities (RACs).

1. M-One Plus Bioinsecticide is *Bacillus thuringiensis* variety *San Diego* delta endotoxin which has been genetically engineered into *Pseudomonas fluorescens* which is subsequently rendered nonviable. This effectively creates a biologically encapsulated delta endotoxin as the active ingredient. This also renders the endotoxin less sensitive to environmental ultraviolet light inactivation.

2. This product is an aqueous flowable, based on an encapsulated system.

3. M-One Plus Bioinsecticide will be applied on a variety of vegetable crops at rates varying from 1.5 to 4 quarts per acre.

A lack of demonstrable toxicity to M-One Plus Bioinsecticide indicates that its use to aid in control of a wide variety of coleopteran pests would not result in hazards to public health. The data submitted or referenced in this petition and other relevant material have been evaluated. The toxicological data considered in support of the exemption from the requirements of a tolerance did not show any deleterious effects that would indicate a cause for concern from the use of this product.

The acceptable daily intake and maximum permissible intake considerations are not relevant to this petition, because of the low toxicity/pathogenicity demonstrated in the submitted studies.

M-One Plus Bioinsecticide is considered useful for the purpose for which the exemption from the requirements of a tolerance is sought. It is concluded that a tolerance for M-One Plus is not necessary to protect the public health. Therefore, 40 CFR part 180 is amended as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections and/or a request for a hearing with the Hearing Clerk, at the address given above. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested and the requestor's contentions on each such issue pursuant to 40 CFR 178.32. A request for the hearing will be granted if the Administrator determines that the material submitted shows the following: there is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account the uncontested claims or facts to the contrary; resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291. Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels, or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests

Dated: June 17, 1991.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In subpart D, new § 180.1108 is added, to read as follows:

§ 180.1108 Delta endotoxin of Bacillus thuringiensis variety San Diego encapsulated into killed Pseudomonas fluorescens; exemption from the requirement of a tolerance.

The delta endotoxin of *Bacillus thuringiensis* variety *San Diego* encapsulated into killed *Pseudomonas fluorescens* is exempt from the requirements of a tolerance in or on all raw agricultural commodities.

ADDRESSES: Written objections, identified by the document control number [PP 1F3963/R1122], may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Phillip O. Hutton, Product Manager (PM) 17, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 207, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-557-2690.

SUPPLEMENTARY INFORMATION: EPA issued a notice in the Federal Register of May 1, 1991 (56 FR 1997), which announced that it had received pesticide petition (PP) 1F3963 from the Mycogen Corp., 5451 Oberlin Drive, San Diego, CA 92121, proposing that 40 CFR part 180 be amended by establishing an exemption from the requirement of a tolerance for residues of the insecticide MVP Bioinsecticide in or on all raw agricultural commodities (RACs) when formulated in an encapsulated system.

No comments were received in response to this notice of filing. However, comments were received when EPA published the receipt of an application for an Experimental Use Permit (EUP) for this pesticide. The comments raised a concern that EPA would register MVP under the existing 40 CFR 180.1011 tolerance exemption for *Bacillus thuringiensis*. EPA responded to the commenter that MVP was considered a new active ingredient and therefore would require a unique risk assessment and exemption from the requirement for a tolerance. This satisfied the concerns of the commenter. The temporary tolerance exemption and the experimental use permit were subsequently granted.

MVP is a killed microbial pesticide and is to be registered for the control of lepidopterous larvae, through the toxic action of the *B. t.* protein crystal. This protein toxin is selective for the larvae of lepidoptera. Such specificity is advantageous in limiting the potential effects on nontarget organisms, especially beneficial parasites and predators in other orders of insects.

The recommended application rates are as follows: 1 to 4 quarts per acre depending on the severity of the larval infestation. If the infestations are exceptionally heavy, 3 to 4 quarts per acre are recommended. The higher recommended rates should be used for aerial application. For best results, the initial spray must be made when eggs hatch and small larvae are first observed.

Residue Chemistry Data

Residue chemistry data were not required. Such data were determined to be required only if the submitted toxicology data indicated that additional Tier II or III toxicology data are necessary as specified in 40 CFR 158.165(e). The submitted toxicology data for this use indicated that the product is of low mammalian toxicity/pathogenicity and Tier II or III data were not required. Therefore, no residue data are required in order to grant an exemption from the requirement of a tolerance for MVP.

Toxicology Data

The following data were submitted in support of the petition, and other relevant material have been evaluated. The toxicology data considered in support of this exemption from the requirements of a tolerance include the following:

1. *Acute Oral Toxicity in Rats (Technical Grade Active Ingredient [TGAI]), Guideline Nos. 81-1/152-30.* The acute oral LD_{50} for the TGAI as indicated by the data is greater than 5050 mg/kg (4.63 mL/kg), the highest dose tested, when administered undiluted to albino rats.

2. *Acute Oral Toxicity in Rats (Flowable), Guideline Nos. 81-1/152-30.* The acute oral LD_{50} for the typical end-use product (TEP) as indicated by the data is greater than 5050 mg/kg (4.76 mL/kg), the highest dose tested, when administered undiluted to albino rats.

3. *Acute Dermal Toxicity in Rats (Technical), Guideline Nos. 81-2/152-31.* The acute dermal LD_{50} for the TGAI as indicated by the data is greater than 2020 mg/kg (1.85 mL/kg), the highest dose tested, when administered undiluted to albino rats.

4. *Acute Pulmonary Toxicity in Rats (Technical), Guideline Nos. 81-3/152-32.* The acute pulmonary LD_{50} for the TGAI (technical) as indicated by the data is greater than 0.1 mL per animal, the highest dose tested, or approximately 10^5 nonviable cells per animal when administered to albino rats.

5. *Acute Intravenous Toxicity in Rats (Technical), Guideline Nos. 152-33.* The acute intravenous LD_{50} for the TGAI (technical) as indicated by the data is greater than 0.05 mL per animal, the highest dose tested, or approximately 10^5 nonviable cells per animal when administered as a 1:100 dilution in sterile water to albino rats. While this dosage is considered low, it was demonstrated that higher dosages of the killed gram-negative bacterium elicit shock reactions typical of reactions to the cell wall components of gram-negative bacteria in general.

6. *Primary Dermal Irritation in Rabbits (Technical), Guideline Nos. 81-5/152-34.* The TGAI produced mild to moderate dermal irritation with a primary irritation score of 1.04 when tested in albino rabbits and is not considered a primary irritant on that basis. However, there were signs of irritation at 14 days, and focal bleeding was reported on day 1. Therefore, the product is classified in Toxicity Category II.

7. *Primary Dermal Irritation in Rabbits (Flowable), Guideline Nos. 81-5/152-34.* The TEP flowable produced mild dermal irritation with a primary irritation score of 0.66 when tested in albino rabbits and is not considered a primary irritant.

8. *Eye Irritation in Rabbits (Technical), Guideline Nos. 81-4/152-35.* The TGAI technical was rated as minimally irritating in nonwashed eyes of albino rabbits when administered as 0.1 mL of a 50 percent v/v solution of the test material in sterile water. The maximum average irritation score was 3.7 and the test material was categorized in Toxicity Category III.

9. *Eye Irritation in Rabbits (Flowable), Guideline Nos. 81-4/152-35.* The TEP flowable was rated as minimally irritating in nonwashed eyes of albino rabbits when administered as 0.1 mL of undiluted test material. The maximum average irritation score was 1.3 and the test material was categorized in Toxicity Category III.

10. *Dermal Sensitization in Guinea Pigs (Flowable), Guideline Nos. 81-6/152-36.* The TEP was categorized as a mild sensitizer when administered undiluted to albino guinea pigs. Average skin reaction scores ranged from 0 to 0.6 on a scale of 0 to 4.0.

The exemption from the requirement for a tolerance on all raw agricultural commodities (RAC's) is toxicologically supported.

1. MVP Bioinsecticide is *Bacillus thuringiensis* variety *kurstaki* delta endotoxin which has been genetically engineered into *Pseudomonas fluorescens* which is subsequently rendered nonviable. This effectively creates a biologically encapsulated delta endotoxin as the active ingredient. This also renders the endotoxin less sensitive to environmental ultraviolet light inactivation.

2. This product is an aqueous flowable, based on an encapsulated system.

VOL 56 ISS 119 JE 20 1991 UMI

3. MVP Bioinsecticide will be applied on a wide variety of vegetable crops at rates varying from 1 to 4 quarts per acre.

A lack of demonstrable toxicity to MVP Bioinsecticide indicates that its use to aid in control of a wide variety of lepidopteran pests would not result in hazards to public health.

Due to the quantity of product being used and its host specificity, it is unlikely that the environment will be adversely affected. The acceptable daily intake and maximum permissible intake considerations are not relevant to this petition, because the submitted toxicology data support the exemption from a requirement for a tolerance.

The data submitted or referenced in this petition and other relevant material have been evaluated. The toxicological data considered in support of the exemption from the requirements of a tolerance did not show any deleterious effects that would indicate a cause for concern from the use of this product.

MVP Bioinsecticide is considered useful for the purpose for which the exemption from the requirements of a tolerance is sought. It is concluded that a tolerance for MVP is not necessary to protect the public health. Therefore, 40 CFR part 180 is amended as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections and/or request a hearing with the Hearing Clerk at the address given above. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections mustinclude a statement of the factual issue(s) on which a hearing is requested pursuant to 40 CFR 178.32, and the hearing will be granted if the Administrator determines that the material shows the following: There is a genuine and subetential issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291. Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels, or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administative practicle and procedure, Agricultural commodities, Pesticides and pests

Dated: June 17, 1991.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In subpart D, by adding new § 180.1107, to read as follows:

§ 180.1107 Delta endotoxin of Bacillus thuringiensis variety kurstaki encapsulated into killed Pseudomonas fluorescens; exemption from the requirement of a tolerance.

The delta endotoxin of *Bacillus thuringiensis* variety *kurstaki* encapsulated into killed *Pseudomonas fluorescens* is exempt from the requirements of a tolerance in or on all raw agricultural commodities.

[FR Doc. 91-14823 Filed 6-19-91; 8:45 am]

BILLING CODE 6560-50-F

FEDERAL EMERGENCY MANAGEMENT AGENCY

Federal Insurance Administration

44 CFR Part 67

Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are determined for the communities listed below.

The base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2754.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the Federal Register for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR part 67. An opportunity for the community or individuals to appeal proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for floodplain management in flood-prone areas in accordance with 44 CFR part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base (100-year) flood elevations are finalized in the communities listed

below. Elevations at selected locations in each community are shown. No appeal was made during the ninety-day period and the proposed base flood elevations have not been changed.

Approximately 90 feet downstream of Missouri-Kansas- Texas Railroad	*639
Mineral Bayou Tributary 6:	
At the confluence with Mineral Bayou	*954
At Sunnyside Drive	*968
Chuckwa Creek:	
At the confluence with Mineral Bayou	*596
Approximately 1,900 feet upstream of confluence of Chuckwa Creek Tributary 4	*680
Chuckwa Creek Tributary 2:	
At confluence with Chuckwa Creek	*625
Approximately 1,125 feet upstream of the confluence of Chuckwa Creek Tributary 2 South Branch	*697
Chuckwa Creek Tributary 2 South Branch:	
At confluence with Chuckwa Creek Tributary 2	*691
Approximately 1,500 feet upstream of confluence with Chuckwa Creek Tributary 2	*697
Chuckwa Creek Tributary 3:	
At confluence with Chuckwa Creek	*662
Approximately 1.0 mile upstream of confluence with Chuckwa Creek	*712
Chuckwa Creek Tributary 4:	
At confluence with Chuckwa Creek	*671
At Wilson Road	*672
Maps available for inspection at the County Courthouse, 402 Evergreen, Durant, Oklahoma.	
Caddo County (unincorporated areas) (FEMA Docket No. 7016)	
Deer Creek:	
Approximately 1,000 feet downstream of confluence of Deer Creek East Tributary	*1,476
Approximately 1,100 feet upstream of confluence of Deer Creek West Tributary	*1,488
Deer Creek West Tributary:	
At the confluence with Deer Creek	*1,487
Approximately .5 mile upstream of confluence with Deer Creek	*1,498
Deer Creek East Tributary:	
At the confluence with Deer Creek	*1,477
Approximately 1.1 miles upstream of confluence with Deer Creek	*1,537
Sugar Creek:	
Approximately 8 miles upstream of the confluence with Washita River	*1,212
Approximately .8 mile upstream of Washita Avenue	*1,353
Box Elder Creek West Tributary:	
At confluence with Box Elder Creek	*1,264
Approximately 3,100 feet upstream of confluence with Box Elder Creek	*1,274
Box Elder Creek:	
At State Route 19	*1,257
Approximately 1.1 miles upstream of State Route 19	*1,272
Tonkawa Creek:	
Approximately 100 feet downstream of Peirce Road	*1,168
Approximately .4 mile downstream of Section Line Road	*1,194

Source of flooding and location	#Depth in feet above ground. Elevation in feet (NGVD)
Maps available for inspection at the Caddo County Courthouse, Anadarko, Oklahoma.	
Devol (town), Cotton County (FEMA Docket No. 7016)	
Red River Tributary 1:	
Approximately 1,300 feet downstream of U.S. Route 70 and State Route 36	*1,019
Approximately 3,000 feet upstream of U.S. Route 70 and State Route 36	*1,032
Maps available for inspection at the Town Hall, Devol, Oklahoma.	
Enid (city), Garfield County (FEMA Docket No. 7016)	
Tributary 1:	
At confluence with Tributary 3	*1,145
At upstream side of Willow Road	*1,167

Approximately 400 feet upstream of North Central Oklahoma Railway	*1,486
Approximately 1,150 feet upstream of North Central Oklahoma Railway	*1,494
Maps available for inspection at the Town Hall, 505 W. Fifth Street, Hydro, Oklahoma	
Kingfisher County (unincorporated areas) (FEMA Docket No. 7016)	
Kingfisher Creek (Lower Reach):	
Approximately 0.9 mile downstream of U.S. Route 81 (Main Street)	*1,040
Approximately 1.56 miles upstream of State Routes 3 and 35	*1,075
Kingfisher Creek (Upper Reach):	
Approximately 1.4 miles downstream of Unnamed Road	*1,148
Approximately 0.8 mile upstream of Unnamed Road	*1,183
Kingfisher Creek Tributary A:	
At confluence with Kingfisher Creek	*1,054
At Will Rogers Drive	*1,073
Dead Indian Creek:	
At confluence with Kingfisher Creek	*1,057
At Will Rogers Drive	*1,083
Kingfisher Creek Tributary B:	
At confluence with Kingfisher Creek	*1,066
Approximately 1.3 miles upstream of confluence with Kingfisher Creek	*1,075
Cooper Creek:	
Approximately 1.16 miles downstream of Ist Street	*1,107
Approximately 1.22 miles upstream of Ist Street	*1,122
Cimarron River:	
Approximately 1.7 miles upstream of confluence of Turkey Creek at low flow	*1,037
Approximately 1,750 feet downstream of U.S. Route 81	*1,024
Turkey Creek (Main Channel):	
At confluence with Cimarron River at high flow (approximately 1.6 miles downstream of Boundary Street)	*1,034
Approximately 0.7 mile upstream of Boundary Street	*1,041
Turkey Creek—West Overflow (east of railroad tracks):	
Approximately 1.3 miles downstream of U.S. Route 81	*1,024
Approximately .5 mile upstream of Red Fork Drive	*1,041
Turkey Creek—East Overflow (east of railroad tracks):	
Approximately 1.7 miles downstream of corporate limits	*1,034
At corporate limits	*1,032
Uncle John's Creek:	
At confluence with Kingfisher Creek	*1,042
Approximately 0.3 mile upstream of Oklahoma Avenue	*1,048
Maps available for inspection at the Kingfisher County Courthouse, Kingfisher, Oklahoma.	
Lahoma (town), Garfield County (FEMA Docket No. 7016)	
Lahoma Tributary:	
Approximately .4 mile downstream of U.S. Route 60 and State Route 15	*1,231

VOL 56 ISS 119 JE 20 1991 UMI

Source of flooding and location	#Depth in feet above ground. Elevation in feet (NGVD)
Approximately .4 mile upstream of U.S. Route 90 and State Route 16	*1,250
Unnamed Tributary of Lahoma Tributary:	
At the downstream corporate limits	*1,254
Approximately 100 feet upstream of corporate limits	*1,254
Maps available for inspection at the Town Hall, 203 Main Street, Lahoma, Oklahoma.	
Loclosha (town), Caddo County (FEMA Docket No. 7016)	
Sugar Creek:	
Approximately 125 feet downstream of downstream corporate limits of Town of Loclosha	*1,340
At upstream corporate limits of Town of Loclosha	*1,349
Maps available for inspection at the Town Hall, Loclosha, Oklahoma.	
Nash (town), Grant County (FEMA Docket No. 7016)	
East Side Creek:	
Approximately 900 feet downstream of Grand Avenue	*1,111
Approximately 1,400 feet upstream of Grand Avenue	*1,119
Maps available for inspection at the Town Hall, 115 South Main Street, Nash, Oklahoma.	
Okmulgee County (unincorporated areas) (FEMA Docket No. 7016)	
Deep Fork Creek:	
Approximately 3.1 miles downstream of Burlington Northern Railroad	*625
Approximately 2.2 miles upstream of confluence of South Okmulgee Creek	*648
Coal Creek:	
Approximately .5 mile downstream of confluence of Coal Creek Tributary	*645
Approximately .5 mile upstream of upstream crossing of Union Pacific Railroad	*686
Cusseta Creek:	
At confluence of Deep Fork Creek	*629
Approximately .8 mile upstream of U.S. Route 62 and State Route 56	*644
South Okmulgee Creek:	
At confluence with Deep Fork Creek	*645
Approximately 1.7 miles upstream of confluence with Deep Fork Creek	*845
North Okmulgee Creek:	
Approximately 100 feet downstream of State Route 56	*666
Approximately 1.42 miles upstream of Gun Club Road	*680
Dutch Creek:	
At confluence with Coal Creek	*666
Approximately 55 feet upstream of Interstate Highway 40	*691
Cusseta Creek Tributary:	
At confluence with Cusseta Creek	*631
At County Road	*645
Unnamed Creek:	
At confluence with Coal Creek	*660
Approximately 880 feet upstream of U.S. Routes 62 and 75	*666
Maps available for inspection at 719 E. Eighth Street, Okmulgee, Oklahoma.	
OREGON	
Grants Pass (city), Josephine County (FEMA Docket No. 7016)	
Rogue River:	
At Dowson Lane	*905
Approximately 1,000 feet downstream of the sewage treatment plant	*909
At Bella Alra Drive	*921
Approximately 1,400 feet upstream of Elm Lane extended	*926

DEPARTMENT OF DEFENSE

48 CFR Parts 243, 249, and 252

Department of Defense Federal Acquisition Regulation Supplement; Contract Modifications and Termination of Contracts; Correction

AGENCY: Department of Defense (DOD).

ACTION: Interim rule with request for comments; correction.

SUMMARY: The Defense Acquisition Regulations (DAR) Council has issued an interim DFARS rule to implement section 4201 of the Fiscal Year 1991 DoD Authorization Act (Pub. L. 101-510) which requires the Secretary of Defense to notify the Secretary of Labor if a modification or termination of a major defense contract or subcontract will have a substantial impact on employment. This is a correction to the interim rule, published on May 28, 1991, (56 FR 24030), to provide the effective date of the interim rule.

DATES: *Effective Date:* May 14, 1991.

Comment Date: Comments on the interim rule should be submitted in writing at the address shown below on or before June 28, 1991, to be considered in the formulation of the final rule. Please cite DAR Case 90-339 in all correspondence.

ADDRESSES: Interested parties should submit written comments to: Defense Acquisition Regulations Council, ATTN: Mr. Eric Mens, Procurement Analyst, DAR Council, OUSD(A)DP(DARS), room 3D139, The Pentagon, Washington, DC 20301-3000. Telefax Number (703) 697-9845.

FOR FURTHER INFORMATION CONTACT: Mr. Eric Mens, Procurement Analyst, DAR Council, (703) 697-7266.

Nancy L. Ladd,

Colonel, USAF, Director, Defense Acquisition Regulations Council.

BILLING CODE 3810-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AB42

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for the Winged Mapleleaf Freshwater Mussel

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Fish and Wildlife Service (Service) determines the winged mapleleaf mussel (*Quadrula fragosa*) to be an endangered species under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act). Historically, this freshwater mussel occurred extensively in the Mississippi, Tennessee, Ohio and Cumberland River drainages in the states of Ohio, Indiana, Missouri, Tennessee, Nebraska, Iowa, Illinois, Wisconsin, Oklahoma and Kentucky. As a result of land use changes, river alterations and pollution, the winged mapleleaf mussel has been reduced to a single known population located in the St. Croix River between northwestern Wisconsin and east/central Minnesota. Critical habitat is not being proposed.

EFFECTIVE DATE: July 22, 1991.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the Fish and Wildlife Service Regional Office, Federal Building, Ft. Snelling, Twin Cities, Minnesota 55111.

FOR FURTHER INFORMATION CONTACT: Mr. Bill Harrison, Chief, Division of Endangered Species at the above address (612/725-3276 or FTS 725-3276).

SUPPLEMENTARY INFORMATION:

Background

The earliest record of the winged mapleleaf mussell (*Quadrula fragosa*) dates from 1835 when Conrad described this North American freshwater mussel from the Scioto River, Ohio. He described this species as similar to the mapleleaf mussel (*Quadrula quadrula*),

VOL 56 ISS 119 JE 20 1991 UMI

but "much more ventricose" having more prominent tubercles and being very distinct. Occurrence records of the winged mapleleaf were not infrequently reported until about 1920. From the 1920's to the present, few occurrences were reported and some experts considered it extinct. These few post-1925 occurrence records include the collection of three specimens from Wayland, Missouri (Ohio State Museum of Zoology collection), possibly as late as 1966 and a small population on the St. Croix River between Minnesota and Wisconsin discovered in 1987 (Marion Havlik, Malacological Consultants, *in litt.*, 1990).

There is a disagreement about whether the winged mapleleaf mussel, *Quadrula fragosa*, is a distinct species or a subspecies of *Quadrula quadrula*. *Quadrula fragosa* was synonymized as a variant of *Q. quadrula* by Neel (1941) based on morphological intergrades. Since Neel's study Burch (1975), Johnson (1980), and Oesch (1990) have recognized the synonymy. Recently, David Stansbery (Ohio State University, *in litt.*, 1991) has refuted Neel based on his own research of morphological characteristics, stating, "An examination of material of these two species in all or nearly all of our major museums over the years has failed to turn up any intergrading forms between the two. This total lack of intergrades indicates that they are distinct species rather than subspecies or environmental forms as was previously believed by myself and others * * *" Stansbery also said that there may be a second population or sibling species of *Q. fragosa* on the Kiamichi River in Oklahoma. The Service recognizes the need for further taxonomic and distributional research, but does not intend to allow the St. Croix River population to go extinct while the uncertainties are resolved.

The winged mapleleaf can be distinguished from *Q. quadrula* using several characteristics. The shell is more inflated and more quadrate in outline. The shell's beaks are more elevated and turned forward over the lunule (Baker 1928). The winged mapleleaf is more alate and has ridges on the alae while the mapleleaf often has distinct pustules (Stansbery, pers. comm.). Young in the genus *Quadrula* are almost indistinguishable (Neel 1941).

Little is known about the ecology and habits of the winged mapleleaf, presumably because of its historic rarity and early population reductions. Baker (1928) reported it occupied larger rivers on a mud bottom in water two meters or more in depth. Ortmann (1925) indicated it may prefer gravel bars. Recent observation on the extant population indicated that it exists in the riffle areas of the St. Croix and is absent from muddy microhabitat (David Heath, Wisconsin Department of Natural Resources, *in litt.*, 1989).

Few historical records exist that report population demographics or brooding period of the winged mapleleaf. Recent attempts have been made to determine when the winged mapleleaf broods young. No individuals have been observed brooding young. In addition, in a simple of 41 specimens, none were collected that were younger than four years of age (Heath and Rasmussen 1990). In fact, a survey by the Wisconsin Department of Natural Resources conducted in 1988 suggests that the St. Croix population has not reproduced since 1983. Population density at the only known location was one individual per 52 square meters and constituted less than 0.02% of the mussel community.

A fairly rich mussel assemblage of 32 species inhabit the extant winged mapleleaf site on the St. Croix River. Most associates are fairly common species in the upper Mississippi River system, but several species are considered rare. These rare species, which are characteristic of well-preserved streams, include the Federal Category 2 spectacle case (*Cumberlandia monodonta*), salamander mussel (*Simpsonaias ambigua*), and the Federally endangered Higgins' eye (*Lampsilis higginsi*). Other rare species that co-occur include the snuffbox (*Epioblasma triquetra*), purple wartyback (*Cyclonaias tuberculata*), and buckhorn (*Tritogonia verrucosa*).

The historic geographic range of the winged mapleleaf is fairly well-documented. It occurred in at least ten states; Ohio, Indiana, Missouri, Tennessee, Nebraska, Iowa, Illinois, Wisconsin, Oklahoma, and Kentucky. Disregarding the single known extant population, nearly all collections were made prior to 1925.

Simpson (1900, 1914) and La Rocque (1967) reported the winged mapleleaf from the Ohio, Cumberland, and Tennessee River systems west probably to Minnesota and Nebraska. It was reported from the Ohio River by the Commonwealth of Kentucky Department of Fish and Wildlife Resources (1989), Sterki (1907), Coker (1921), Call (1886, 1900), Simpson (1900, 1914), La Rocque (1967), Stansbery (1985, 1989), and vouchered in the United States National Museum (USNM) collection. Ohio River tributaries where the winged mapleleaf was reported include the Scioto River (Conrad 1836, the Ohio State University Museum of Zoology (OSUMZ) collection), the Licking River (Commonwealth of Kentucky State Natural Preserves Commission 1988, Commonwealth of Kentucky Department of Fish and Wildlife Resources 1989), Racoon Creek (OSUMZ collection, Watters 1988), the Wabash River (Call 1886, OSUMZ collection, USMN collection, La Rocque 1967) and the White River (Call 1886, Academy of Natural Sciences of Philadelphia (ANSP) collection).

Within the Tennessee River System, collections have been reported from the Tennessee River (Ortmann 1925, Starnes and Bogan 1988), the Cumberland River (Wilson and Clarke 1914, Danglade 1914, Starnes and Bogan 1988, Commonwealth of Kentucky State Natural Preserves Commission 1989, Commonwealth of Kentucky Department of Fish and wildlife Resources 1989), the Harpeth River (Starnes and Bogan 1988), and from the Duck River (Ortmann 1925, Starnes and Bogan 1988).

In the upper Mississippi River system, it has been reported from the Mississippi River (Utterback 1915–1916, Stansbery 1969, Frest 1987, Grier and Mueller 1922–1923, Shimek 1888, 1921, Field Museum of Natural History (FMNH) collection, OSUMZ collection, Illinois Natural History Survey (INHS) collection, USNM collection, Keys 1889, Havlik and Stansbery 1977, Havlik and Marking 1980, Heath 1981–1985, Bell Museum of Natural History (BMNH) collection). Upper Mississippi River tributaries containing winged mapleleaf included the Cedar River (Frest 1987, Shimek 1888, FMNG collection, OSUMZ collection, USMN collection); the Des Moines River (Keyes 1889); the Racoon River; the Iowa River (Keyes 1889); the Illinois, Kaskaskia and Spoon Rivers, (Grier and Mueller 1922–1923, Baker 1906; FMNH collection, ANSP collection, Starrett 1971, and Strode 1891, 1892); and the Sangamon River (OSUMZ collection, ANSP collection, University of Michigan Museum of Zoology (UMMZ) collection, INHS collection). Additional upper Mississippi River drainage locales where the winged mapleleaf have been recorded include the Wisconsin and Baraboo Rivers (Baker 1928, Morrison 1929, Heath 1988b, FMNH collection, BMNH collection, OSUMZ collection), the Minnesota River (Havlik 1990, OZUMZ collection, BMNH collection), and the St. Croix River (Heath 1985, University of Illinois Museum of Natural History (UIMNH) collection).

In Oklahoma, the winged mapleleaf occurred in the Boggy, Little, and Neosho Rivers (Isley 1925). There may be an existing population or sibling species of *Q. fragosa* in the Kiamichi River (Stansbery, *in litt.*, 1991). In Nebraska the mussel occurred in the Bow and Blue Rivers (Aughey 1877). Missouri records were from the Osage, Fox, and 102 (at St. Joseph) Rivers (Utterback 1915–1916, OSUMZ collection).

The winged mapleleaf freshwater mussel was included as a Category 2 species in the 1984 notice of review (49 FR 21664–21675). Category 2 species are those for which the Service does not have conclusive data on biological vulnerability and threat to the degree that support a proposed rule. In the 1989 notice of review (54 FR 554–579) the mussel was changed to a Category 3C species, which indicated that it was more abundant and/or widespread than previously thought, and that threats were not substantial. However, the Service was advised that this designation might be in error. Subsequently, all states with historic records were again contacted. As a result of that correspondence and information gained through recent surveys, the Service determined that the species was in need of protection. The most recent surveys and biological data as to distribution and threats were incorporated into the proposed rule to determine endangered status for the winged mapleleaf freshwater mussel issued in the Federal Register of August 6, 1990 (55 FR 31664–31667).

Summary of Comments and Recommendations

In the August 6, 1990 proposed rule, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A notice inviting public comment was published in the St. Paul Pioneer Press, August 28, 1990.

Eight comments were received: five of these were letters of support for listing the winged mapleleaf mussel as endangered (Minnesota Department of Natural Resources, National Park Service, Wisconsin Department of Natural Resources, Dr. David Stansbery of the Museum of Zoology, Ohio State University, and Fish and Wildlife Service, Region 4); one letter, from Dr. Richard Johnson, Harvard University, questioned the taxonomic decision to treat *Q. fragosa* as a species. The Kansas Biological Survey observed that the mussel did not occur in Kansas as originally stated in the proposed rule. One letter, from Northern States Power Company, was in opposition to the proposed listing.

Northern States Power Company questioned the validity of listing this species based on present evidence. They believed that the taxonomic status of the species should be confirmed before listing. They suggested the flow regime at the power plant on the St. Croix River actually might be beneficial to the population since the regime hadn't changed in 84 years.

The Service considered these comments and criticisms and rewrote the final rule to address them. The Service recognizes that the taxonomic question needs further study, and that there is a need for more research on the distribution and ecology of the species. The Service decided to proceed with listing in view of the evidence of morphological distinctiveness and the potential threat to the St. Croix River population of *Quadrula fragosa*.

Summary of Factors Affecting the Species

After a thorough review and consideration of all available information, the Service has determined that the winged mapleleaf mussel, *Quadrula fragosa*, should be classified as an endangered species. Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provision of the Act set forth the procedures for adding species to the Federal lists. A species may be determined to be endangered or threatened according to one or more of the five factors described in section 4(a)(1). These factors and their application to the winged mapleleaf are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Historically, the winged mapleleaf mussel was known from eleven states and three major drainage systems in North America. This species has been eliminated from 99% of its historical range. Habitat modification including land use changes, river channel modifications, and pollution are the primary factors threatening the continued existence of the winged mapleleaf. The species was usually found in well-preserved large to medium-sized clear-water streams in riffles or on gravel bars. These areas have been lost due to the development of impoundments, channelization, soil erosion, and sediment accumulation originating from land use practices.

Additional threats to the small, remaining population include expanded agriculture or modified land use practices in the watershed, toxic substance spills, point discharges of harmful chemicals, low water levels, and large recreational boat traffic. The small size of the population makes it particularly vulnerable to single catastrophic events and genetic deterioration. These factors may affect the host fish (presently unknown) which is necessary for the reproduction of the winged mapleleaf in addition to affecting the remaining mussel population.

Minnesota and Wisconsin Departments of Natural Resources agree that the peaking operation of Northern States Power Company power plant located upstream from the mussel bed is posing a possible threat to the mussel population. The normal winter operation of Northern States Power Company is a twice daily peaking mode (once a day during droughts) with only 800 cfs being discharged between peaking operations. It appears that this is not enough water to cover the beds at night so the clams are exposed to freezing, abrasion, and predation. In fact, in 1989, the peaking operation completely exposed the beds during the night. In 1991, the Wisconsin Department of Natural Resources surveyed the bed and found that a layer of ice 13 inches deep was laid directly on the gravel of the bed with each lowering of flow (Miller, *in litt.*, 1991). The ice layer adhered to and abraded the bottom exposing the mussels. The Minnesota Department of Natural Resources conducted a wetted perimeter study for this portion of the river and found that the dam must release 1980 cfs to adequately protect the mussel beds (Nargang, *in litt.*, 1991). Given the direct exposure that the mussel bed is currently experiencing, the Service believes that there is an immediate danger to the only known population of *Q. fragosa*. The Service will cooperate with Northern States Power Company, the Minnesota and Wisconsin Departments of Natural Resources, and the National Park Service to study the affect of "peaking" on the population.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Collection of the winged mapleleaf for these purposes is believed to have been a minor factor in its decline. It was harvested during the early 1900's for the pearl button industry in the United States (Coker 1921). At present the population is partially protected from harvest by Wisconsin harvesting laws and by a National Park Service Superintendent Determination (March 5, 1990) for the St. Croix

VOL 56 ISS 119 JE 20 1991 UMI

National Scenic Riverway. Some recreational collecting may occur.

C. *Disease or predation.* No disease or predation has been recorded for the winged mapleleaf.

D. *The inadequacy of existing regulatory mechanisms.* The winged mapleleaf is presently protected by Wisconsin and by a Superintendent Determination (March 5, 1990) of the National Park Service (NPS) for the St. Croix National Scenic Riverway. The Act offers possibilities for additional protection through Section 6 by cooperation between States and the Service, and cooperation through section 7 (interagency cooperation) requirements, in particular with the NPS St. Croix National Scenic Riverway.

E. *Other natural or manmade factors affecting its continued existence.* The single remaining population is small, located on less than five miles of the St. Croix River and is immediately threatened by lack of any reproduction. During surveys in 1988 and 1989, Heath and Rasmussen (1990) were unable to locate individuals less than four years of age although members of related species in the genus *Quadrula* were collected that were less than four years of age. In addition, they were unable to locate any winged mapleleaf individuals brooding young. Lack of young individuals and brooding females could be a natural cyclic phenomenon, an artifact of sampling, or an abrupt cessation of reproduction, but other mussels at the location did not evidence reproductive problems. If recent observations reflect trends in the population, the continued existence of the species is in serious doubt.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list the winged mapleleaf as an endangered species. Due to the threats and vulnerability of the single remaining population, it is believed that the species will continue to decline unless immediate corrective actions are taken. For reasons detailed below, it is not considered prudent to propose designation of critical habitat.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time the species is proposed to be endangered or threatened. The Service finds that designation of critical habitat is not presently prudent for the winged mapleleaf freshwater mussel. This determination is based on the premise that such designation would not be beneficial to the species (50 CFR 424.12), and little additional benefit would be gained, since the single extant location is presently receiving protection from the NPS and the State of Wisconsin. Critical habitat designation would not provide additional protection over that afforded through the normal section 7 consultation procedures. The NPS and the States of Minnesota and Wisconsin are cognizant of the location of this population of winged mapleleaf and of the importance of protecting its habitat.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibition against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) requires agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. The NPS administers the portion of the St. Croix River where the winged mapleleaf is found. The Service has not identified any ongoing or proposed NPS projects that could affect this species.

The Act and its implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (including harass, harm, pursue, hunt, shoot, wound, kill, trap, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

The Act and 50 CFR 17.22 and 17.23 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connections with otherwise lawful activities. In some instances, permits may be issued for a specified time to relieve undue economic hardship that would be suffered if such relief were not available.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Rules

Federal Register
Vol. 56, No. 119
Thursday, June 20, 1991

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 581

RIN 3206-AE54

Processing Garnishment Orders for Child Support and/or Alimony

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: On November 5, 1990, Congress enacted the Federal Employees Pay Comparability Act of 1990, Public Law 101-509. As a result of this legislation, the Office of Personnel Management proposes a revision to its regulations in 5 CFR part 581 concerning the processing of garnishment orders for child support and/or alimony. The proposed amendment adds several new types of bonuses, allowances, and adjustments that were authorized by the Pay Comparability Act to the list of payments that OPM considers to be remuneration for employment for purposes of garnishment. At the request of the Federal Retirement Thrift Investment Board, we are deleting the reference to 5 U.S.C. 8437 in the authority citation.

DATES: Comments should be received by July 22, 1991.

ADDRESSES: Send or deliver comments and/or designated agent information, including new WITS telephone number(s), to Jaime Ramon, General Counsel, Office of Personnel Management, room 7355, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Murray M. Meeker, (202) 606-1980 or FTS 266-1980.

SUPPLEMENTARY INFORMATION: Governmental entities are urged to review the current list of designated agents, appendix A to part 581 (55 FR 1354, January 16, 1990), to ensure that their listing is correct. The great majority of entities who have received new Washington Interagency Telecommunications System (WITS) telephone numbers have not yet notified OPM of their new number(s).

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have significant economic impact on a substantial number of small entities because their effects are limited primarily to Federal employees.

List of Subjects in 5 CFR Part 581

Alimony, Child welfare, Government employees, Wages.

U.S. Office of Personnel Management.
Constance Berry Newman,
Director.

Accordingly, OPM proposes to amend 5 CFR part 581 as follows:

PART 581—PROCESSING GARNISHMENT ORDERS FOR CHILD SUPPORT AND/OR ALIMONY

1. The authority citation for part 581 is revised to read as follows;

Authority: 42 U.S.C. 659, 661-662; 15 U.S.C. 1673; E.O. 12105

2. Section 581.103 is amended by republishing paragraph (a) introductory text, revising paragraphs (a)(10), (a)(20), (a)(21), (a)(22), and (a)(23)(v), and by adding paragraphs (a)(24), (a)(25), (a)(26), and (a)(27) to read as follows:

§ 581.103 Moneys which are subject to garnishment.

(a) For the personal service of a civilian employee obligor:

* * * * *

(10) Recruitment incentives, recruitment and relocation bonuses and retention allowances;

* * * * *

(20) Cash awards, including performance-based cash awards;

(21) Agency and Presidential incentive awards (except where such award is for making a suggestion);

(22) Senior Executive Service rank and performance awards;

(23) Moneys due for the services of a deceased employee obligor, including:

* * * * *

(v) Amounts of checks drawn for moneys due which were not delivered by the governmental entity to the employee obligor prior to the employee obligor's death or which were not negotiated and returned to the governmental entity because of the death of the employee obligor, except those moneys due that are listed in § 581.104(i);

(24) Interim geographic adjustments and locality-based comparability payments;

(25) Staffing differentials;

(26) Supervisory differentials; and

(27) Special pay adjustments for law enforcement officers in selected cities.

* * * * *

[FR Doc. 91-14754 Filed 6-19-91; 8:45 am]
BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1924

Construction and Repair

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its Construction and Repair regulations. This action is taken to implement the provisions of the Cranston-Gonzalez National Affordable Housing Act, to remove a sentence that restricts random development of sites in open country. A paragraph is added to explain site approval in remote rural areas. The intended effect of this action is to strengthen the Agency's mission rural development.

DATES: Comments must be received on or before August 19, 1991.

ADDRESSES: Submit written comments in duplicate to the Office of the Chief, Regulations Analysis and Control Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture building, 14th and Independence SW., Washington DC 20250. All written comments will be available for public inspection at the above address.

FOR FURTHER INFORMATION CONTACT: Billy J. Chapman, Senior Loan Specialist, at Farmers Home Administration, USDA, Room 5464, South Agriculture Building, 14th and Independence SW, Washington DC 20250, Telephone (202) 382-1485.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512-1 which implements Executive Order 12291, and has been determined to be nonmajor because there is no substantial change from practices under existing rules that would have an annual effect on the economy of $100 million or more. There is no major increase in cost or prices for consumers, individual industries, Federal, States, or local government agencies or geographical regions or significant adverse effects on competition, employment, productivity, innovation or in the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

La Verne Ausman, Administrator of Farmers Home Administration, has determined that this action will not have a significant economic impact on a substantial number of small entities because the regulatory changes affect FmHA processing and servicing of insured and guaranteed rural housing loans.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal Action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91-190, an Environmental Impact Statement is not required.

Intergovernmental Consultation

For the reason set forth in the final rule related notice to 7 CFR part 3015, subpart V, 48 FR 29115, June 24, 1983, this program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Programs Affected

This change affects a program listed in the catalog of Federal Domestic Assistance under 10.410, Very Low and Low Income Housing Loans.

List of Subjects in 7 CFR Part 1924

Housing standards, Low and moderate income housing, Rural areas.

Discussion

On November 28, 1990, the President signed the Cranston-Gonzalez National Affordable Housing Act. This act provided for revision to FmHA's site approval instructions, mandating that: "The Secretary may not refuse to make, insure, or guarantee a loan that otherwise meets the requirements under this section solely on the basis that the housing involved is located in an area that is excessively rural in character or excessively remote."

This revision removes language regarding random development of sites in open country, and includes language that allows approval of such sites.

The substance of the revisions will have a significant impact on the program. For this reason, this action is set forth as a proposed rule.

Therefore, as proposed, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1924—CONSTRUCTION AND REPAIR

1. The authority citation for part 1924 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart C—Planning and Performing Site Development Work

2. Section 1924.107 is amended by revising the introductory text of paragraph (e), paragraph (e)(1)(iii), and adding paragraph (e)(1)(iv) to read as follows:

§ 1924.107 Location.

* * * * *

(e) A scattered site must be planned and developed under this subpart, subpart A of part 1944, and subpart G of part 1940, with particular emphasis on location as specified in § 1940.304. A scattered site must comply with all of the following:

(1) * * *

(iii) May be a site located within a subdivision which has HUD or VA acceptance that meets the requirements of § 1924.119(c) of this subpart, or

(iv) May be a site located in open country or a remote rural area.

* * * * *

Dated: April 23, 1991.

La Verne Ausman,
Administrator, Farmers Home Administration.

[FR Doc. 91-14666 Filed 6-19-91; 8:45 am]
BILLING CODE 3410-07-M

7 CFR Part 1980

Guaranteed Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its regulation to allow Community and Business Programs guaranteed loans where guarantee authority is unavailable when the application is filed to be placed in a pending status rather than disapproved.

This action will enhance the application process and expand and clarify the requirements for eligible lenders for guaranteed loans due to amendments in the law and to allow additional lenders to participate in the guaranteed loan programs. The intended effect of the action will be to promote additional development in rural areas.

DATES: Comments must be received on or before July 22, 1991.

ADDRESSES: Submit written comments in duplicate to the Chief, Regulations Analysis and Control Branch, Farmers Home Administration, U.S. Department of Agriculture, room 6348, South Agriculture Building, Washington, DC 20250. All written comments will be available for public inspection during regular work hours at the above address.

FOR FURTHER INFORMATION CONTACT: Beverly I. Craver, Business and Industry Loan Specialist, Farmers Home Administration, USDA, Room 6327, 14th and Independence Avenue SW., Washington, DC 20250, Telephone (202) 475-3805.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512-1, which implements Executive Order 12291 and has been determined to be non-major. The annual effect on the economy is less than $100 million and there will be no significant increase in costs or prices for consumers, individual industries, organizations, governmental agencies or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

VOL 56 ISS 119 JE 20 1991 UMI

Intergovernmental Review

The programs impacted by this action are listed in the Catalog of Federal Domestic Assistance under numbers 10.422, Business and Industrial Loans; 10.423, Community Facilities Loans; and 10.418, Water and Waste Disposal Systems for Rural Communities Loans and are subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials (7 CFR part 3015, subpart V, 48 FR 29112, June 24, 1983). FmHA conducts intergovernmental consultation in the manner delineated in FmHA Instruction 1901–H.

Environmental Impact Statement

The action has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." FmHA has determined that this proposed action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not required.

Background

The current regulation for the FmHA guaranteed loan programs requires that all guaranteed loan applications must be approved or disapproved not later than 60 days after receipt of a completed application. Public Law 101–624 requires loans that would otherwise be disapproved due to lack of funds available to make the loan will be placed in a pending status. When funds become available the pending applications will be either approved or disapproved within 60 days.

The current FmHA regulation allows insurance companies to be eligible lenders if they are regulated by the National Association of Insurance Commissioners. Currently this Association does not have regulatory control over insurance companies. The regulation is being revised to read that insurance companies must be regulated by a State or national insurance regulatory agency.

The current FmHA regulation allows credit unions to participate as eligible lenders only for guaranteed Farmer Program loans. The regulation is being revised to extend lender eligibility criteria for all guaranteed loans to include credit unions if they are subject to credit examination and supervision by either the National Credit Union Administration or a State agency.

In addition, the titles of two forms to be used with Disaster Assistance for Rural Business Enterprise (DARBE) guaranteed loans are being corrected in an administrative provision in the current regulations.

Lists of Subjects in 7 CFR Part 1980

Loan programs—Agriculture, Business and industry, Community facilities, and Disaster assistance

Accordingly, chapter XVIII, title 7, of the Code of Federal Regulations is proposed to be amended as follows:

PART 1980—GENERAL

1. The authority citation for part 1980 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 7 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart A—General

2. Section 1980.13 is amended by revising the introductory text of paragraph (b) to read as follows:

§ 1980.13 Eligible lenders.

* * * * *

(b) *An eligible lender is:* Any Federal or State chartered bank, Farm Credit Bank, other Farm Credit System institution with direct lending authority, Bank for Cooperatives, Savings and Loan Association, Building and Loan Association, mortgage company that is a part of a bank-holding company, or an insurance company that is regulated by a State or national insurance regulatory agency. These entities must be subject to credit examination and supervision by either an agency of the United States or a State. Eligible lenders may also include credit unions that are subject to credit examination and supervision by either the National Credit Union Administration or a State agency. For Farmer Program loans an agricultural credit corporation which is a subsidiary of any Federal or State chartered bank is an eligible lender. Only those lenders listed in this paragraph are eligible to make and service guaranteed loans, and such lenders must be in good standing with their licensing authority and have met licensing, loan making, loan servicing, and other requirements of the State in which the collateral will be located and the loan making and/or loan servicing office requirements in paragraph (b)(3) of this section. A lender must have the capability to adequately service the loan for which a guarantee is requested.

* * * * *

3. Section 1980.47 is amended by revising the introductory paragraph and adding paragraph (d) as follows:

§ 1980.47 Time frame for processing applications for loan guarantees.

All guaranteed loan applications must be approved or disapproved, and the lender notified in writing, not later than 60 days after receipt of a completed application, except as noted in paragraph (d) of this section.

* * * * *

(d) Applications for Community and Business Programs guaranteed loans that would otherwise be disapproved due to the lack of guarantee authority available to make the loan will now be placed in a pending status. The applications will remain in a pending status until guarantee authority becomes available. Within sixty days after funds become available, Farmers Home Administration will notify the applicants of the approval or disapproval of the loan.

4. Section 1980.83(b) is amended by revising the entries for FmHA Form No. 1980–71 and 1980–72 to read as follows:

§ 1980.83 FmHA Forms.

* * * * *

(b) * * *

FmHA Form No.	Title of form	Purpose and code
*	*	*
1980–71	Lender's Agreement—Disaster Assistance for Rural Business Enterprises (DARBE) Guaranteed Loans.	Used to establish contract between FmHA and lender on a DARBE guaranteed loan. (2)
1980–72	Loan Note Guarantee—Disaster Assistance for Rural Business Enterprises (DARBE) Guaranteed Loans.	Used to express terms of the guarantee of a DARBE guaranteed loan. (1)

[BPD–604–P]

RIN 0938–AE93

Medicare Program; Aggregation of Medicare Claims and Administrative Appeals and Judicial Review

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: Under section 1869 of the Social Security Act, Medicare beneficiaries and, under certain circumstances, providers, physicians and other entities furnishing health care services, may appeal adverse determinations regarding certain claims for benefits payable under Part A and Part B of Medicare. For administrative appeals at the carrier (or intermediary, where appropriate) hearing level or administrative law judge (ALJ) level and for any subsequent judicial review, the amount remaining in dispute must meet or exceed the threshold amounts set by the statute. Section 1869 permits claims to be aggregated to reach the ALJ and judicial review threshold amounts. This proposed rule would establish in Medicare regulations a uniform policy on aggregation of Medicare claims to obtain the right to a carrier (or, if appropriate, intermediary) hearing, an ALJ hearing and judicial review. The proposed rule would also apply to appeals of determinations made by Peer Review Organizations (PROs), health maintenance organizations (HMOs) and competitive medical plans (CMPs).

DATES: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on August 19, 1991.

ADDRESSES: Mail comments to the following address:

Health Care Financing Administration, Department of Health and Human Services, Attention: BPD–604–P, P.O. Box 26676, Baltimore, Maryland 21207

If you prefer, you may deliver your comments to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Due to staffing and resource limitations, we cannot accept facsimile (FAX) copies of comments.

In commenting, please refer to file code BPD–604–P. Comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in room 309–G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: 202–245–7890).

SUPPLEMENTARY INFORMATION:

Background

Statutory Basis

Section 1869 of the Social Security Act (the Act) grants Medicare beneficiaries who are dissatisfied with certain Medicare determinations the right to a hearing before an administrative law judge (ALJ) and the right to judicial review. The Social Security Administration (SSA) makes determinations concerning entitlement to Medicare. Other determinations concerning payment are made initially by Medicare contractors. Fiscal intermediaries make most Part A and some Part B determinations; carriers make most Part B determinations. Our regulations generally address appeals of claims arising under Part A at 42 CFR part 405, subpart G and appeals of claims under Part B at 42 CFR part 405, subpart H.

PROs also make certain types of Part A and Part B determinations. Section 1155 of the Act establishes beneficiary rights to hearings and judicial review of certain Medicare issues (mostly inpatient hospital service denials) adjudicated initially by PROs. Our regulations address this subject at 42 CFR part 473, subpart B.

For enrollees of HMOs and CMPs, the HMO or CMP is responsible for making the initial determinations. Section 1876(c)(5)(B) of the Act establishes beneficiary rights to ALJ hearings and judicial review of certain Part A and Part B claims submitted by or on behalf of enrollees of HMOs or CMPs. Our regulations address this subject at 42 CFR 417.600 to 417.638.

For the following discussion, the term "provider" refers to a hospital, skilled nursing facility, home health agency, hospice program or comprehensive outpatient rehabilitation facility, that has in effect an agreement to participate in Medicare. See section 1861(u) of the Act and 42 CFR 400.202.

The term "supplier" is defined in § 400.202 and means a physician or other practitioner, or an entity other than a provider, who furnishes health care services under Medicare. Although "supplier" encompasses physicians, our usual phraseology is "physician or supplier".

Under section 1879(d) of the Act, a provider, or a physician or supplier that has taken assignment of a claim, may have the same appeal rights as that of an individual beneficiary under certain limited circumstances when the issue in dispute involves medical necessity, custodial care, or home health denials involving the failure to meet homebound or intermittent skilled nursing care requirements.

Under section 1842(1) of the Act, a physician who does not accept assignment must refund to the beneficiary any amounts collected for services found to be not reasonable and necessary. A refund is not required if the physician did not know and could not reasonably have been expected to know that Medicare would not pay for the services, or if the beneficiary was appropriately informed in advance that Medicare would not pay for the services and agreed to pay for them. Our regulations at 42 CFR 411.406 provide that if payment is denied for nonassignment-related claims because the services are found to be not reasonable and necessary, the physician who does not accept assignment will have the same appeal rights as the physician who submits claims on an assignment-related basis, as detailed in subpart H of part 405 and subpart B of part 473. (See 55 FR 24561, June 18, 1990.)

Omnibus Budget Reconciliation Act of 1986

Before the enactment of the Omnibus Budget Reconciliation Act of 1986 (OBRA '86) (Pub. L. 99–509), section 1869 of the Act provided for ALJ hearings and

VOL 56 ISS 119 JE 20 1991 UMI

judicial review of claims for entitlement to Medicare Parts A and B, and of disputes over claims for benefits under Part A. There was no provision for ALJ hearings or judicial review for disputes over the amount of Part B benefits, except under section 1876 of the Act pertaining to HMO and CMP denials, and under certain PRO matters as authorized by section 1155 of the Act. Instead, as specified in section 1842(b)(3)(C) of the Act and 42 CFR part 405, subpart H, Medicare carriers (or, if appropriate, intermediaries) performed initial determinations and reviews of claims for Part B benefits and provided for hearings before a carrier (or, if appropriate, intermediary) hearing officer when the amount remaining in controversy was $100 or more.

Section 9341 of OBRA '86 amended Section 1869 of the Act to permit hearings before ALJs and judicial review of claims for benefits under Part B.

OBRA '86 also provided that, for a Part B ALJ hearing, the amount in controversy must be at least $500 and, for judicial review, the amount in controversy must be at least $1000. It did not change the existing amount in controversy requirements ($100 and $1000, respectively, under the Medicare Part A provisions and $200 and $2000, respectively, under the PRO provisions) for ALJ hearings and judicial review.

OBRA '86 further provided that "in determining the amount in controversy, the Secretary, by regulations, shall permit claims to be aggregated if the claims involve the delivery of similar or related services to the same individual or involve common issues of law and fact arising from services furnished to two or more individuals." This provision applies to both Part A and Part B claims.

The legislative history that accompanied OBRA '86 did not indicate whether the intent of the aggregation provision was to expand or restrict appeal rights. Nor did it indicate whether the types of aggregation then permitted for Part A ALJ hearings and judicial review were also appropriate for Part B appeals.

The Omnibus Budget Reconciliation Act of 1990

The Omnibus Budget Reconciliation Act of 1990 (OBRA '90) (Pub. L. 101–508) provided additional legislative direction regarding the aggregation of Medicare claims. Section 4113 of OBRA '90 states the following:

"The Secretary of Health and Human Services shall carry out a study of the effects of permitting the aggregation of claims that involve common issues of law and fact furnished in the same carrier area to two or more individuals by two or more physicians within the same 12-month period for purposes of appeals provided for under section 1869(b)(2). Such study shall be conducted in at least four carrier areas. The Secretary shall report on the results of such study and any recommendations to the Committee on Finance of the Senate and the Committees on Energy and Commerce and Ways and Means of the House of Representatives by December 31, 1992."

Aggregation Before OBRA '86

Before OBRA '86 the statute was silent on the issue of aggregating claims to meet the threshold amounts to establish a right to Part A or Part B hearings or judicial review. We had, however, provided for beneficiaries to aggregate certain Part A claims in our regulations at 42 CFR 405.740 and 405.745. The amount in controversy for a Part A hearing is so low ($100) that a one-day hospital stay or short series of home health treatments was sufficient for almost every beneficiary to meet the threshold amount. Our regulations at 42 CFR 405.741 provide that the presiding officer at the hearing (i.e., the ALJ) determines whether the $100 threshold is met. The current regulations do not allow a provider to aggregate claims involving more than one beneficiary.

We had also in § 405.820(b) provided for the aggregation of Part B claims to reach the amount in controvery required for a hearing before a carrier hearing officer. This regulation permits a beneficiary to aggregate any and all Part B claims for treatment provided or medical equipment or supplies (or both) furnished to him or her within certain time periods. A physician or supplier may aggregate any and all claims accepted on an assignment-related basis for services or supplies he or she provided to one or more beneficiaries. Each such claim must be at the proper level of appeal and the request for subsequent appeal of each such claim must be timely filed.

Status of Regulations

To implement section 9341 of OBRA '86, HCFA and SSA (the agency responsible for conducting ALJ hearings) published a joint notice (52 FR 20023, June 1, 1988) stating that ALJ hearings under Part B would be governed to the extent possible by existing SSA regulations at 20 CFR part 404, Subparts J and R, and existing Part A regulations at 42 CFR part 405, subpart G. The notice further provided that "ALJ hearings will be held for Medicare Part B claims that meet the amount in controversy requirement established by section 9341 of OBRA '86." Manual instructions implementing the new appeal provisions directed the carriers to continue using the existing Part B regulation governing aggregation for carrier hearings, as these rules differed from the OBRA '86 provisions, and the statutory provisions required implementation by regulation.

Proposed Revisions

Scope of Revisions

We are developing a proposed rule that, among other things, would implement the various appeals provisions contained in section 9341 of OBRA '86 and the congressional intent enunciated in section 4113 of OBRA '90. This has proven to be a time-consuming process because of the complexities of the provisions and the statute's lack of specificity regarding aggregation of claims by two or more claimants. In view of the current amount of interest in our policy on aggregating claims to establish the amount in controversy requirements for an ALJ hearing and judicial review, we are issuing this proposal apart from the other appeal provisions. This proposal would apply to determining the amount in controversy thresholds for both Part A and Part B ALJ hearings under sections 1869, 1876, 1879, 1155 and 1842(1) of the Act, to Part B carrier appeals, and to judicial review under Parts A and B. We would apply to Part B ALJ hearings our consistent policy that determinations of the amount in controversy are made by the ALJs.

Proposal

Review of congressional reports that accompanied OBRA '86 and precursor bills discloses no discussion of the basis for the statutory change addressing aggregation of claims. The specific statutory language directs the Secretary to issue regulations for aggregation of claims under the circumstances specified in section 1869(b)(2) of the Act to reach threshold amounts in controversy for ALJ hearings and judicial review. We would rescind our current regulations governing aggregation for carrier hearings under Part B (§ 405.820(b)(2)) because they conflict with the literal reading of the OBRA '86 amendment. We believe that it is appropriate to have a uniform aggregation policy for all levels of administrative appeal. We would use the same aggregation policy for all levels of review because it would be administratively cumbersome and confusing to claimants to use different policies. The current regulations governing aggregation under Part A (§§ 405.740(c) through 405.740(f)) and governing determination of amount in controversy (§ 405.741) need only minor

amendment to satisfy the OBRA '86 requirements.

The amendment to section 1869 of the Act is written in the passive voice and does not state who may aggregate claims for appeal. However, all of section 1869 is written in terms of individual beneficiary rights of appeal, without reference to rights of appeal by providers, physicians, or suppliers. By regulation, the Secretary has provided that, in certain circumstances, providers and physicians and suppliers who accept assignment may pursue appeals. This right to appeal is derivative of the beneficiary's rights. Except for the appeal provisions concerning limitation of liability, refund requirements, and certain PRO and HMO/CMP appeals, the statute is otherwise silent on the rights of providers, physicians and suppliers to appeal individual benefit determinations. Accordingly, in construing the aggregation amendment, we first consider its application to beneficiaries, and then consider its effect on providers, physicians and suppliers.

The first clause of the amendment applies to claims that "involve the delivery of similar or related services to the same individual." It describes the circumstances under which an individual claimant has a right to combine claims for services furnished or received. The second clause, "* * * claims involving common issues of law and fact arising from services furnished to two or more individuals", describes the rights of providers, physicians and suppliers to aggregate claims for services furnished to two or more beneficiaries, rights that derive from the appeal rights of the involved beneficiaries.

Providers and physicians and suppliers who accept assignment (and, in certain cases, physicians who do not accept assignment) would be able to aggregate claims for beneficiaries to whom they provided services, but would not be permitted to aggregate claims with other providers, physicians, or suppliers. This interpretation is consistent with the focus of the statute on individual beneficiary rights. It further avoids the inadvertent creation of direct or indirect group appeal rights for beneficiaries, providers, physicians and suppliers not contemplated by Congress.

The plain language of section 1869 of the Act addresses appeal rights of individual beneficiaries or other individual claimants whose rights are derived from those individual beneficiaries; it does not address the rights of groups of beneficiaries or other claimants. The Secretary has interpreted this provision on an individual basis since the inception of the Medicare program.

We have considered, but have decided against, permitting aggregation by groups of claimants because, in our view the OBRA '86 aggregation provision is not a basis for establishing group appeals. Section 1869 of the Act in all respects applies to claims filed by "individuals"; that is, by beneficiaries. Because the OBRA '86 aggregation provision amended section 1869 of the Act, we believe that only individual appeals are affected. Therefore, only individual claimants may aggregate their claims to reach the jurisdictional minimums required for an ALJ hearing. Had Congress intended to create a sweeping change in Medicare's Part A and Part B appeals processes by permitting for the first time group appeals for claimants, we believe it would have amended section 1869 of the Act to enunciate such a policy change clearly. Further, the fact that Congress included in the law a mechanism for individuals to aggregate claims evinces its intent to retain the concept of individual appeals. Allowing several different claimants to group their claims to meet a relatively low jurisdictional minimum renders the requirement for a minimum amount in controversy meaningless and leads to a potential result whereby hundreds and even thousands of claimants could effectively unite to appeal denials of trivial amounts.

We believe that, in the absence of specific legislative history guidance, the OBRA '86 aggregation rule should apply to physicians and suppliers accepting assignment of individual claims. Because it has been our longstanding policy that assignees of Medicare Part B claims generally have the same appeal rights as beneficiaries, we see no reason why this aggregation rule should not also apply to these individuals.

Moreover, we consider permitting group appeals for claimants premature in light of the OBRA '90 provision in which Congress directed HHS to conduct a pilot study to investigate the effect of permitting aggregation by two or more claimants when physician services are furnished. We believe this action by Congress confirms, for the present, that Congress has not required the Secretary to provide for aggregation of claims by two or more claimants. Moreover, by requiring this study, Congress has implicitly accepted the position for the time being that individual claimants alone may aggregate their claims.

To aggregate claims under Parts A and B, we propose the following operational rules:

1. The request for a carrier hearing (or, if appropriate, intermediary hearing) or ALJ hearing must specifically identify the claims that comprise the total amount in controversy. The claimant must identify each claim by: Type of item or service, date of service, person or entity that furnished the item or service and the amount being contested. The claimant must also identify the basis for the aggregation; i.e., describe way the claims are either "similar or related" or involve "common issues of law and fact." For example, a beneficiary breaks a hip and is provided with several treatments by a physical therapist over a period of months. The beneficiary submits claims to the carrier for these treatments and they are denied or reduced. In addition to identifying the type of service, the dates of service, the practitioner's name, and the amount contested, the beneficiary should also include in his or her request for carrier or ALJ hearing a statement that the claims are "similar or related" because they arise from the same continuous course of treatment. In another example, several different beneficiaries are provided with routine chest x-rays by the same radiologist under similar circumstances. All claims submitted by the radiologist are denied by the carrier on the same statutory basis. In his request for carrier or ALJ hearing, the radiologist should state, among other things, that aggregation of the claims is being sought because they involve "common issues of law and fact arising from services furnished to two or more individuals"; i.e., the denials for each claim are on the same statutory basis and the same factual issue for each claim is presented for appeal.

2. At each review level, the filing time limit must be met for all claims to be aggregated. For example, the claims involved in two or more carrier hearing officer decisions, one received on June 5 and one received on July 10, may be aggregated by a claimant in a single request for an ALJ hearing only if the hearing is requested not later than August 4 since the hearing must be requested within 60 days after receipt of the first carrier hearing decision.

3. For an ALJ hearing under Part A (or Part B, for certain PRO or HMO/CMP matters), the claims first must have been reconsidered by the appropriate entity;

4. For a carrier (or, as appropriate, intermediary) fair hearing under Part B, the claims must have been reviewed by the carrier or intermediary, except when an initial payment request has not been

VOL 56 ISS 119 JE 20 1991 UMI

acted upon with reasonable promptness as provided by § 405.801(a);

5. For an ALJ hearing under Part B, except for certain PRO or HMO/CMP matters, the claims must have a carrier (or, as appropriate, intermediary) hearing officer decision;

6. Unless provided elsewhere, a claimant may not combine Part A and Part B claims together to meet the requisite amount in controversy for a carrier (or, as appropriate, intermediary) hearing, ALJ hearing or judicial review.

We would amend § 405.740 to reflect the aggregation provisions of section 1869(b)(2) of the Act for providers and beneficiaries for Part A ALJ hearings under title XVIII. Except for the amounts in controversy threshould for ALJ hearings, the additional provisions of the revised § 405.740 would be approximately the same as those for Part B in proposed § 405.820(b)(2).

As noted earlier, we would rescind our current regulations at 42 CFR 405.820(b)(2), which allow an individual Part B claimant to combine any and all claims from different physicians and suppliers, and a physician or supplier-claimant to combine any and all claims accepted on an assignment-related basis from different beneficiaries. Based on the amended statute, as discussed above, we would permit aggregation only for those claims involving "similar or related services to the same individual" or for those claims involving "common issues of law and fact arising from services furnished to two or more individuals." The phrase "common issues of law and fact" requires commonality of both the factual basis for the denial and the appealable issue presented by the denial. Accordingly, we interpret this phrase to mean that a provider, or a physician or supplier who accepts claims on an assignment-related basis, may aggregate only those claims in which that provider, physician or supplier furnishes the same item or service to two or more individuals and for which adverse determinations were made on the same statutory basis, and the appeal is made on the same basis.

We are proposing to revise 42 CFR 405.820(b)(2) to allow Part B claims to be aggregated to meet amount in controversy requirements for carrier appeals, ALJ hearings and judicial review as follows:

1. A beneficiary may aggregate claims from the same or different physician(s) or supplier(s) if the claims involve the delivery of similar or related services.

2. A single physician or supplier of services may aggregate assigned claims from the same beneficiary if the claims involve the delivery of similar or related services, or may aggregate assigned claims from several different beneficiaries if common issues of law and fact are involved; i.e., the same service is furnished to two or more beneficiaries and the adverse determinations were made on the same grounds.

3. We are also proposing to extend these aggregation rules to appeals involving section 1842(1) of the Act, which concerns refunds to beneficiaries for medically unnecessary services from physicians not accepting assignment. We would permit a single physician to (a) aggregate unassigned claims from the same beneficiary if the claims involve the delivery of similar or related services to the same individual or (b) aggregate unassigned claims from several beneficiaries if common issues of law and fact are involved.

In §§ 405.701, Basis and Scope, and 405.802, Definitions, we would add definitions of "delivery of similar or related services," "services," "common issues of law and fact," "common issues of law," "common issues of fact," and "mutually exclusive bases for appeal." We would also revise the title of § 405.701 to include definitions and we would rearrange the current contents of § 405.802 into alphabetical order.

"Delivery of similar or related services" to the same individual would refer to services that are—

a. In the case of part A, similar or related by virtue of having been provided under the same diagnosis related group (DRG) code, or by virtue of such similarity or identity that they are identically coded, or by virtue of having been provided to a single beneficiary during the same continuous course of treatment or continous period of medical care; or

b. In the case of part B, similar or related by virtue of such similarity or identity that they have the same procedural terminology and code (identical CPT code), or by virtue of having been provided to a single beneficiary during the same continuous course of treatment or continous period of medical care;

"Services" would refer to any medical service, test, course of treatment, period of care, item, device, supply, or equipment that may be covered under part A or part B of Medicare, or both.

"Common issues of law and fact" arising from services furnished to two or more individuals presumes the essential similarity of the issues presented in both of two contexts: law and fact.

"Common issues of law" occur when two or more claims have been denied on the same statutory basis and present the same issue for appeal; e.g., the issue relates to denials or reductions of program payment under the identical statutory exclusion and the basis for the appeal is that payment should be made because the statutory exclusion was improperly applied and the services are actually covered by the program under the same circumstances in all the aggregated cases.

We believe that common issues of law must arise from the same statutory provision and must present the same issue concerning application of that provision for review. For example, even though two claims for the same service may be denied under section 1862(a)(1)(A) of the Act, they would not share the necessary "common issues of law" if the first claim was denied because that service is considered experimental for the first patient's condition, but the second claim was denied as not required by the second individual's medical condition.

Each statutory basis for denial or each basis for appeal is mutually exclusive from each and every other statutory basis for denial or appeal. Aggregation of claims on the basis of more than one statutory basis for denial or appeal would not be permitted. Mutually exclusive bases for appeal include but are not limited to:

Erroneous application by a Medicare contractor of a specific statutory basis for denial; program payment should have been made.

Erroneous application by a Medicare contractor of a specific statutory basis for denial; program payment should not have been made, but the liability of the provider, physician, or supplier is affected because the provider, physician, or supplier did not know or have reason to know that the service was not covered.

Whether proper and timely notice of noncoverage was given to the beneficiary.

Erroneous application of an applicable coinsurance.

Amount of an applicable deductible.

The number of days of the 60-day lifetime reserve utilized for inpatient hospital coverage.

Whether the charges for items and services furnished under Part B are reasonable.

"Common issues of fact" occur when two or more claims arise from the same face pattern; i.e., the issues relate to "similar or related services," as defined here; the issues would relate to two or more beneficiaries in an identical manner ("common issues of fact" may arise when medical necessity determinations relating to two or more beneficiaries result in substantially similar, but not necessarily exact, medical findings); and the nature of the denials, and their effects, are the same (e.g., denials or program payment resulting in the provider, physician, or supplier being held fully liable for the unpaid amounts).

Because determinations of the amount in controversy are made by the appropriate hearing officer, ALJ or court, we would revise § 405.741, which concerns determining the amount in controversy, and add a provision to § 405.820(b). We would provide that the carrier or intermediary hearing officer, ALJ, or court, as appropriate, determines whether the amount in controversy meets the required threshold level. We would further provide that the carrier or intermediary hearing officer, ALJ, or reviewing court, as appropriate, will also make the determination as to what constitutes "similar or related services" and "common issues of law and fact."

We emphasize that the purpose of these regulations is to provide criteria for aggregation of claims in order to meet the amount in controversy requirements (i.e., the jurisdictional threshold) for appealing Medicare claims. These rules are not meant to address procedures (or alter existing provisions) concerning the conduct of hearings once the required amount in controversy is established or to address the discretion of the presiding officer to join claims in a single hearing for administrative purposes.

The level of review between the ALJ hearing and judicial review levels is known as Appeals Council review. If dissatisfied with the ALJ hearing decision or dismissal, a party to the hearing may request that the Appeals Council review that action or the Appeals Council may initiate such review on its own motion. The Appeals Council may deny or dismiss the request for review or grant the request. If the Appeals Council grants the request for review, it may reverse, affirm or modify a decision or dismissal made by an ALJ, or remand the case to an ALJ for further action. Because the Appeals Council has the authority to review an ALJ's decision or dismisal, it may also address whether or not an ALJ properly applied the operating rules for aggregating claims, as set forth in these regulations. For example, in a case in which an ALJ fails to aggregate claims as required by these regulations and dismisses a request for hearing due to an insufficient amount in controversy, the Appeals Council may find that aggregation was warranted and remand the case to an ALJ for a hearing. However, neither HCFA contractors, ALJs nor the Appeals Council are required to initiate aggregation if it has not been requested by a claimant.

Section 405.832 of the regulations gives the hearing officer the authority to dismiss a claimant's hearing request for various reasons, one of which (§ 405.832(d)) is the failure to meet the threshold $100 amount in controversy requirement. We would add to this provision the right of a claimant to appeal such dismissal to an ALJ where the underlying basis of the dismissal is the hearing officer's determination that the claims at issue may not be aggregated because they do not involve "delivery of similar or related services" or "common issues of law and fact." Further, we are providing that the ALJ must remand the case to the hearing officer when the ALJ finds that the hearing officer wrongfully dismissed the appeal request because of failure to meet the amount in controversy requirements.

Sections 417.630 and 473.44 of the existing regulations specify procedures for determining amounts in controversy for beneficiary appeals of matters arising under sections 1876 and 1155 of the Act. Section 417.630, by cross-reference, applies the rules of §§ 405.740 and 405.820(b) for determining the amount in controversy. Section 473.44, by cross-reference, applies the rules of § 405.740 for determining the amount in controversy. We would retain these cross-references, making the proposed rules for aggregating claims applicable to claims under sections 1876 and 1155. We would further amend § 473.44 to include a cross-reference to § 405.820(b) to address claims involving Part B services. (Section 417.630 already addresses Part B services.)

We are also proposing to make some technical changes to update cross references.

Regulatory Impact Statement

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any proposed rule that meets one of the E.O. 12291 criteria for a "major rule"; that is, that will be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a proposed rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all beneficiaries, physicians, providers, and suppliers are treated as small entities.

Section 1869 of the Act provides that, for claims arising under Part A, a beneficiary may request a hearing before an ALJ if he or she is dissatisfied with a determination by the intermediary if the amount of Part A benefits in controversy is at least $100. Under our current rules at § 405.740, a beneficiary may aggregate certain Part A claims to reach the threshold amount.

For claims arising under Part B, section 1842(b)(3)(C) of the Act provides that a beneficiary dissatisfied with the initial review determination may request a fair hearing before a carrier hearing officer if the amount in controversy is at least $100. This provision was not amended by section 9341 of OBRA '86. It remains in the satute. In determining the amount in controversy for carrier hearings in the past, we have used the following procedures found in 42 CFR 405.820(b) and section 12015H of the Medicare Carriers Manual:

1. A beneficiary may combine any and all claims from different physicians and/or suppliers; and

2. A physician or supplier may combine any and all assigned claims from different beneficiaries.

Effective January 1, 1987, section 9341 of OBRA '86 amended section 1869(b) of the Act to allow beneficiaries a right to an ALJ hearing if, among other things, the amount of part B benefits in controversy is $500 or more.

Other provisions of the statute, or the Secretary's regulations, also permit providers, physicians or suppliers to exercise a beneficiary's hearing rights in certain limited circumstances.

Section 1869 as amended also directed the Secretary, when determining the amount in controversy for either part A or part B ALJ hearings, to allow two or more claims to be aggregated if the claims involve the delivery of similar or related services to the same individual or involve common issues of law and fact arising from services furnished to two or more individuals.

For the reporting period October 1989 through April 1990 total payments awarded to beneficiaries, suppliers, and providers as a result of ALJ hearings and intermediary and carrier appeals were less than $20 million (Bureau of Program Operations, Health Care Financing Administration). We do not believe that the provisions in this proposed rule would alter that amount significantly. Therefore, we do not believe that this proposed rule would

VOL 56 ISS 119 JE 20 1991 UMI

meet the $100 million threshold criterion of E.O. 12291. We also do not believe that the other threshold criteria of E.O. 12291 and the RFA will be met. Therefore, we have determined, and the Secretary certifies, that a regulatory impact analysis under E.O. 12291 and a regulatory flexibility analysis under the RFA are not required.

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a proposed rule may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

We are not preparing a rural impact statement because we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on the operations of a substantial number of small rural hospitals.

Paperwork Burden

These changes do not impose paperwork collection requirements. Consequently, they need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Response to Comments

Because of the large number of items of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments that we receive by the date and time specified in the "Dates" section of this preamble, and, if we decide to proceed with a final rule, we will respond to the comments in the preamble of that rule.

List of Subjects in 42 CFR Part 405

Administrative practice and procedure, Health facilities, Health maintenance organizations (HMO), Health professions, Kidney diseases, Laboratories, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

Chapter IV, title 42 of the Code of Federal Regulations would be amended as follows:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

A. Part 405, subpart G is amended to read as follows:

Subpart G—Reconsiderations and Appeals Under Medicare Part A

1. The authority citation for subpart G is revised to read as follows:

Authority: Secs. 1102, 1154, 1155, 1869(b), 1871, 1872 and 1879 of the Social Security Act (42 U.S.C. 1302, 1320c, 1320c–3, 1320c–4, 1306ff(b) 1395hh, 1395ii and 1395pp).

2. In § 405.701, the section heading is revised and a new paragraph (d) is added to read as follows:

§ 405.701 Basis, purpose and definitions.

* * * * *

(d) *Definitions.* As used in subpart G, the term—

*Common issues of * * * fact,* in the phrase "common issues of law and fact," occurs when two or more claims arise from the same fact patten; that is, the issues relate to the delivery of similar or related services, as defined in this paragraph; the issues relate to two or more beneficiaries in an identical manner; and the nature of the denials, and their effects, are the same (e.g., denials of program payment resulting in the provider, physician, or supplier being held fully liable for the unpaid amounts).

Common issues of law, in the phrase "common issues of law and fact," occur when two or more claims have been denied on the same statutory basis and present the same issue for appeal; e.g., the issue relates to denials of program payment under the identical statutory exclusion; the basis for the appeal is that payment should be made because that statutory exclusion was improperly applied; and the service is actually covered by the program under the same circumstances in all the aggregated cases.

Common issues of law and fact arising from services furnished to two or more individuals refers to the essential similarity of the issues presented in both of two contexts: law and fact.

Delivery of similar or related services means services that are—

(1) In the case of Part A, similar or related by virtue of having been provided under the same diagnosis related group (DRG) code or International Classification of Diseases, Clinical Modification, 9th Edition (ICD-9-CM) code; or by virtue of having been provided to a single beneficiary during the same continuous course of treatment or continuous period of medical care; or

(ii) In the case of Part B, similar or related by virtue of such similarity or identity that they have the same procedural terminology and code (identifical Common Procedure Terminology (CPT) or HCFA Common Procedure Coding System (HCPCS) code), or by virtue of having been provided to a single beneficiary during the same continuous course of treatment or continuous period of medical care.

Mutually exclusive bases for appeal include but are not limited to:

(i) Erroneous application by a Medicare contractor of a specific statutory basis for denial; program payment should have been made.

(ii) Erroneous application by a Medicare contractor of a specific statutory basis for denial; program payment should not have been made, but the liability of the provider, physician, or supplier is affected because the provider, physician, or supplier did not know or have reason to know that the service was noncovered.

(iii) Whether proper and timely notice of noncoverage was given to the beneficiary.

(iv) Erroneous application of an applicable coinsurance.

(v) Amount of an applicable deductible.

(vi) The number of days of the 60-day lifetime reserve utilized for inpatient hospital services.

Services is defined in § 400.202 of this chapter.

3. In § 405.740, the introductory text and paragraphs (a) and (h) are revised and new paragraphs (i) (j) are added to read as follows:

§ 405.740 Principles for determining the amount in controversy.

The following principles are applicable for purposes of determining the amount in controversy:

(a) The amount in controversy is computed as the actual amount charged the individual for the items and services in question less deductible and coinsurance amounts applicable in the particular case.

* * * * *

(h) Notwithstanding the provisions of paragraph (a) of this section, when payment is made for certain excluded services pursuant to § 411.400 of this chapter, or the liability of the individual for those services is limited pursuant to § 411.402 of this chapter, the amount in controversy is computed as the amount that would have been charged the individual for the items and sevices in question, less deductible and coinsurance amounts applicable in the particular case, had such expenses not been paid pursuant to § 411.400 of this chapter or had such liability not been limited pursuant to § 411.402 of this chapter.

(i) Notwithstanding the provisions of paragraphs (c) through (f) of this section, two or more timely filed appeals may be aggregated to reach the $100 jurisdictional amount required for a hearing and the $1000 amount required for judicial review as follows:

(1) A beneficiary may combine claims from the same or different providers(s) if the claims involve the delivery of similar or related services.

(2) A single provider of services may combine its claims from the same beneficiary if the claims involve the delivery of similar or related services; or

(3) A single provider of services may combine its claims from several different beneficiaries if common issues of law and fact are involved; i.e., the same service is furnished to two or more beneficiaries and the adverse determinations were made on the same grounds.

(j) When a provider furnishes items or services under Medicare Part B, these appeals are conducted by intermediaries and administrative law judges under the regulations governing appeals of part B claims, found at 42 CFR part 405, subpart H.

4. Section 405.741 is revised to read as follows:

§ 405.741 Determinations of amount in controversy.

(a) The determination as to whether the amount in controversy is—

(1) $100 or more is made by the presiding officer;

(2) $1,000 or more is made by the reviewing court.

(b) In determining the amount in controversy, the presiding officer and the reviewing court, as appropriate, also make the determination as to what constitutes "similar or related services" and "common issues of law and fact."

(c) In the determination of "common issues of law" each statutory basis for denial or each basis for appeal is mutually exclusive from each and every other statutory basis for denial or appeal. Aggregating claims on the basis of more than one statutory basis for denial or appeal in order to reach a minimum amount in controversy needed for appeal is not permitted.

5. A new § 405.742 is added to read as follows:

§405.742 Procedural rules for aggregating claims.

In order for claims to be aggregated to meet the amount in controversy requirements of § 405.740(i) and (j) of this subpart, the following requirements must be met:

(a) The request for a hearing must specifically identify the claims that comprise the total amount in controversy. The claimant must identify each claim by: type of item or service, date of service, person or entity that furnished the item or service and the amount being contested. The claimant must also identify the basis for the aggregation; i.e., describe why the claims are either "similar or related" or involve "common isues of law and fact."

(b) At each review level, the filing time limit must be met for all claims to be aggregated. For example, the claims involved in two or more reconsideration determinations, one received on June 5 and one received on July 10, may be aggregated by a claimant in a single request for an ALJ hearing only if the hearing is requested not later than August 4 because the hearing must be requested within 60 days after receipt of the reconsideration determination.

(c) For a hearing under part A (or part B, for certain PRO or HMO/CMP matters), the claims first must have been reconsidered by the appropriate entity;

(d) Unless authorized elsewhere in the regulations, a claimant may not combine part A and part B claims together to meet the requisite amount in controversy for a hearing or judicial review.

B. Part 405, Subpart H is amended as follows:

Subpart H—Review and Hearing Under the Supplementary Medical Insurance Program

1. The authority citation for subpart H is revised to read as follows:

Authority: Secs. 1102, 1842(b)(3)(C), and 1869(b) of the Social Security Act (42 U.S.C. 1302, 1395u(b)(3)(C), 1395ff(b)).

2. Section 405.802 is revised to read as follows:

§ 405.802 Definitions.

As used in subpart H, the term—

Assignee means a physician or supplier who furnished services to a beneficiary under the supplementary medical insurance program and who has accepted a valid assignment executed by the beneficiary.

Assignment means the transfer by the assignor of his or her claim for payment to the assignee in return for the latter's promise not be charge more for his or her services than the carrier (or, as appropriate, intermediary) finds to be the reasonable charge or other approved amount.

Assignor means a beneficiary under Medicare Part B whose physician or supplier has taken assignment of a claim.

Carrier means an organization which has entered into a contract with the Secretary pursuant to section 1842 of the Act and which is authorized to make determinations with respect to part B of title XVIII of the Social Security Act.

*Common issues of * * * fact,* in the phrase "common issues of law and fact," occur when two or more claims arise from the same fact pattern; that is, the issues relate to the delivery of similar or related services, as defined in this section; the issues relate to two or more beneficiaries in an identical manner; and the nature of the denials, and their effects, are the same (e.g., denials of program payment resulting in the provider, physician, or supplier being held fully liable for the unpaid amounts.)

Common issues of law, in the phrase "common issues of law and fact," occur when two or more claims have been denied or reduced on the same statutory basis and present the same issue for appeal; e.g., the issue relates to denials of program payment under the identical statutory exclusion; the basis for the appeal is that payment should be made because that statutory exclusion was improperly applied; and the service is actually covered by the program under the same circumstances in all the aggregate cases.

Common issues of law and fact arising from services furnished to two or more individuals refers to the essential similarity of the issues presented in both of two contexts: Law and fact.

Delivery of similar or related services means services that are—

(1) In the case of part A, similar or related by virtue of having been provided under the same diagnosis related group (DRG) code or International Classification of Diseases, Clinical Modification, 9th Edition (ICD–9–CM) code, or by virtue of such similarity or identity that they are identically coded; or by virtue of having been provided to a single beneficiary during the same continuous course of treatment or continuous period of medical care; or

(2) In the case of part B, similar or related by virtue of such similarity or identity that they have the same procedural terminology and code (identical Common Procedure Coding System code); or by virtue of having been provided to a single beneficiary during the same continuous course of treatment of continuous period of medical care.

Mutually exclusive bases for appeal include but are not limited to:

VOL 56 ISS 119 JE 20 1991 UMI

(1) Erroneous application by a Medicare contractor of a specific statutory basis for denial; program payment should have been made.

(2) Erroneous application by a Medicare contractor of a specific statutory basis for denial; program payment should not have been made, but the liability of the provider, physician, or supplier is effected because the provider, physician, or supplier did not know or have reason to know that the service was noncovered.

(3) Whether proper and timely notice of noncoverage was given to the beneficiary.

(4) Erroneous application of an applicable coinsurance.

(5) Amount of an applicable deductible.

(6) Whether the charges for items and services furnished under Part B are reasonable.

Party means an individual enrolled under Medicare Part B, the individual's assignee, or other entity having standing in the initial or appellate proceedings.

Representative means an individual meeting the conditions described in §§ 405.870–405.871.

Services is defined in § 400.202 of this chapter.

3. In § 405.820, paragraphs (a), (b), and (d) are revised to read as follows:

§ 405.820 Right to hearing.

(a) *General.* Any party designated in § 405.822 is entitled to a carrier (or, if appropriate, intermediary) hearing after a review determination has been made by the carrier (or, if appropriate, intermediary) if the remaining amount in controversy is $100 or more as determined in accordance with paragraph (b) of this section when such party files a written request for a hearing. The same parties are also entitled to a hearing before an administrative law judge (ALJ) following the carrier (or, if appropriate, intermediary) hearing if the amount remaining in controversy is $500 or more and to judicial review following an ALJ hearing if the amount remaining in controversy is $1,000 or more.

(b) *Amount in controversy.* For the purpose of determining an individual's right to a hearing before a hearing officer or ALJ or to judicial review under paragraph (a) of this section:

(1) The amount in controversy is computed as the actual amount charged the individual for the items and services in question, less any amount for which payment has been made by the carrier and less any deductible and coinsurance amounts applicable in the particular case.

(2) In determining the amount in controversy, two or more timely filed claims may be aggregated under the following circumstances:

(i) A beneficiary may combine claims from the same or different physician(s) or supplier(s) of services if the claims involve the delivery of similar or related services;

(ii) A single physician or supplier of services may combine his or her assigned claims from the same beneficiary if the claims involve the delivery of similar or related services; or

(iii) A single physician or supplier of services may combine his or her assigned claims from several different beneficiaries if common issues of law and fact are involved; i.e., the same service is furnished to two or more beneficiaries and the adverse determinations were made on the same grounds.

(iv) In order to challenge the refund requirements under section 1842(l) of the Act, a single physician may combine his or hers assessigned claims from a single beneficiary if the claims involve the delivery of similar or related services to that individual, or a single physicen may combine his or her assessigned claims from several different beneficiaries if common issues of law and fact are involved.

(3) The determination as to whether the amount in controversy is $100 or more is made by the carrier (or, if appropriate, intermediary) hearing officer. The determination as to whether the amount in controversy is $500 or more is made by the ALJ. The determination as to whether the amount in controversy is $1000 or more is made by the reviewing court. In determining the amount in controversy, the carrier (or, if appropriate, intermediary) hearing officer, the ALJ and the reviewing court, as appropriate, will also make the determination as to what constitutes "similar or related services" and "common issues of law and fact." In the determination of "common issues of law," each statutory basis for denial or each basis for appeal is mutually exclusive from each and every other statutory basis for denial or appeal. Aggregating claims on the basis of more than one statutory basis for denial or appeal in order to reach a minimum amount in controversy needed for appeal is not permitted.

(4) Notwithstanding the provisions of paragraph (b)(1) of this section, when payment is made for certain excluded services pursuant to §411.400 of this chapter or the liability of the individual for those services is limited pursuant to § 411.402 of this chapter, the amount in controversy is computed as the amount that would have been charged the individual for the items or services in question, less any deductible and coinsurance amounts applicable in the particular case, had such expenses not been paid pursuant to § 411.400 of this chapter or had such liability not been limited pursuant to § 411.402 of this chapter.

* * * * *

(d) *Time of filing request.* Except where the initial determination has been made at a carrier (or, if appropriate, intermediary) hearing (where a claim is not acted upon with reasonable promptness (see § 405.801 of this subpart)), there is a period of 6 months after the date of the notice of the review determination within which a party to the initial or review determination may request a carrier (or, if appropriate, intermediary) hearing. The carrier (or, if appropriate, intermediary) may, upon request by a party, extend the period for filing the request for carrier (or, if appropriate, intermediary) hearing.

4. A new § 405.827 is added to read as follows:

§ 405.827 Procedural rules for aggregating claims.

In order for claims to be aggregated to meet the amount in controversy requirements of § 405.820(b) of this subpart, the followng requirements must be met:

(a) The request for a carrier (or, if appropriate, intermediary) or ALJ Hearing must specifically identify the claims that comprise the total amount in controversy. The claimant must identify each claim by: Type of item or service, date of service, person or entity that furnished the item or service and the amount being contested. The claimant must also identify the basis for the aggregation; i.e., describe why the claims involve the delivery of "similar or related services" or involve "common issues of law and fact."

(b) At each review level, the filing time limit must be met for all claims to be aggregated. For example, the claims involved in two or more carrier hearing officer decisions, one received on June 5 and one received on July 10, may be aggregated by a claimant in a single request for an ALJ hearing only if the hearing is requested not later than August 4 because the hearing must be requested within 60 days after receipt of the carrier hearing decision.

(c) For a carrier (or, if appropriate, an intermediary) hearing, the Part B) claims must have been reviewed by the carrier (or intermediary), except when an initial payment request has not been acted upon with reasonable promptness as provided by § 405.801(a);

(d) For an ALJ hearing under Part B, the claims first must have received a hearing before a carrier (or, if appropriate, intermediary) hearing officer; and

(e) Unless provided elsewhere in regulations, a claimant may not combine Part A and Part B claims together to meet the requisite amount in controversy for a carrier (or, if appropriate, intermediary) hearing, ALJ Hearing or judicial review.

5. In § 405.832, paragraphs (c) and (d) are revised as follows:

§ 405.832 Dismissal of request for carrier (or, if appropriate, intermediary) hearing.

* * * * *

(c) *Dismissal for cause.* The hearing officer may, on his own motion, dismiss a hearing request, either entirely or as to any stated issue, under either of the following circumstances:

(1) Where the party requesting a hearing is not a proper party under § 405.822 or does not otherwise have a right to a hearing under section 1842(b)(3)(C) of the Act; or

(2) Where the party who filed the hearing request dies and there is no information before the hearing officer showing that an individual who is not a party may be prejudiced by the carrier's determination.

* * * * *

(d) *Dismissal for failure to meet amount in controversy.* The hearing officer may on his own motion dismiss a hearing request where the amount in controversy is less than $100.

(1) Dismissal by the hearing officer because requirements for aggregating claims on the basis of "delivery of similar or related services" or "common issues of law and fact" (as those terms are defined in § 405.802) are not met may be appealed to an ALJ within 60 days of the date of receipt of the notice of dismissal to the party.

(2) The ALJ must remand the case for hearing to the hearing officer if the dismissal described in paragraph (d)(1) of this section is found to be improper.

* * * * *

PART 473—RECONSIDERATION AND APPEALS

Subpart B is amended to read as follows:

A. The authority citation for part 473 continues to read as follows:

Authority: Secs. 1102, 1154, 1155, 1866, 1871, and 1879 of the Social Security Act (42 U.S.C. 1302, 1320c-3, 1320-4, 1395cc, 1395hh, and 1395pp).

B. Section 473.44(a) is revised to read as follows:

§ 473.44 Determining the amount in controversy for a hearing.

(a) After a party has submitted a request for a hearing, the ALJ determines the amount in controversy in accordance with § 405.740 of this chapter for Part A services or § 405.820(b) of this chapter for Part B services.

BILLING CODE 4120-01-M

FEDERAL MARITIME COMMISSION

46 CFR Parts 580 and 581

[Docket No. 90-25]

Publication and Filing of Payments Made by Common Carriers to Foreign Freight Forwarders and Ocean Freight Brokers in Tariffs and Service Contracts

AGENCY: Federal Maritime Commission.

ACTION: Discontinuance of proceeding.

SUMMARY: The Federal Maritime Commission ("Commission") is discontinuing this rulemaking proceeding, which would have amended its foreign tariff and service contract filing regulations to require common carriers and conferences to state in their tariffs and service contracts the amount of payments made, and a description of services for which any payments are made, to foreign freight forwarders or ocean freight brokers. The Proposed Rule also would have defined foreign freight forwarders, foreign freight forwarding services and ocean freight brokers. The Commission has decided that no regulatory purpose would be served by pursuing the Rule at this time.

FOR FURTHER INFORMATION CONTACT: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523-5725.

SUPPLEMENTARY INFORMATION: The Commission initiated this proceeding by publishing in the **Federal Register** (55 FR 39181) a Proposed Rule ("Proposed Rule") to amend its tariff and service contract rules in 46 CFR parts 580 and 581. The Proposed Rule would have addressed the issue of payments made by carriers to intermediaries. Neither the Shipping Act of 1984 ("1984 Act") 46 U.S.C. app. 1701–1720, nor the Commission's regulations, define such intermediaries with respect to operations in inbound trades, nor do they explicitly require that payments made by carriers to such intermediaries be listed in the carriers' tariffs or service contracts.

The Commission received 17 comments from conferences, carriers, trade associations, a foreign freight forwarder and the Department of Justice. One commenter supported the Proposed Rule as published, noting its advantages for the freight forwarding community. Seven other commenters supported the Proposed Rule in part, while suggesting changes or additions ranging from clarification of a single item to the expansion of the scope of the Rule beyond that of the instant proceeding.

Nine commenters opposed the Proposed Rule. Some claimed that the Commission lacks authority to promulgate a final rule in this proceeding. These parties contended that neither the language of the statute nor its legislative history showed that Congress intended the Commission to have jurisdiction over third party entities which operate in the inbound trades. However, the Proposed Rule would not have regulated foreign freight forwarders or ocean freight brokers. Rather, it would have directed carriers to publish specific information regarding their practices and relationships with foreign freight forwarders and ocean freight brokers. The Commission, therefore, rejects the argument that it lacks the statutory authority to implement the Proposed Rule.

Other objections to the Rule were that it was unnecessary and unduly burdensome. Some complained that the Proposed Rule would require a carrier to update information each time it used the services of a new forwarder or broker, or entered into new arrangements with an existing forwarder or broker. Some also contended that the Proposed Rule

VOL
56
ISS
119
JE
20
1991
UMI

would inhibit service competition that results through the use of foreign freight forwarders and ocean freight brokers. By requiring conference carriers to adhere to the fixed terms of arrangements in collective tariffs, the Proposed Rule, according to one commenter, would deny individual conference carriers the flexibility which the 1984 Act preserved for them to respond to competition from their conference rivals.

The Commission takes cognizance of the commenters' concerns and is persuaded as to the merits of some of these. Moreover, the Non-Vessel-Operating Common Carrier Amendments of 1990 (Section 716 of Pub. L. No. 101–595) ["NVOCC Amendments"],[1] and the Commission's Interim Rule issued to implement them, may eliminate some of the problems which the Proposed Rule sought to resolve. NVOCCs are now required to post a $50,000 bond to evidence their financial responsibility, and to designate an agent for service of process if foreign-domiciled. Many persons thought to be operating as intermediaries as defined in the Proposed Rule are subject to the tariff filing and bonding requirements of the Interim Rule. Consequently, the impact of the instant rulemaking on the industry, as well as its utility for the Commission, may be reduced. The Proposed Rule may therefore be unnecessary. For all the above reasons, it appears that no regulatory purpose would be served by pursuing the Proposed Rule at this time.

Thus, upon consideration of the comments and intervening legislation, the Commission has decided against issuing a final rule, and is discontinuing this proceeding without prejudice to any subsequent determination by the Commission that further action is warranted. The Commission, however, will continue its enforcement efforts under the 1984 Act by pursuing possible malpractices involving shipper intermediaries on a case-by-case basis.

By the Commission.

Joseph C. Polking,

Secretary.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AB56

Endangered and Threatened Wildlife and Plants; Proposed Threatened Status for the Marbled Murrelet in Washington, Oregon and California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes to determine the marbled murrelet (*Brachyramphus marmoratus*) a threatened species in Washington, Oregon and California pursuant to the Endangered Species Act of 1973, as amended (Act). The subspecies ranges from Alaska (Aleutian Archipelago, Kodiak Island, and Kenai Peninsula) south to central California. Some wintering birds are found in southern California. The marbled murrelet is threatened by the loss or adverse modification of nesting habitat (old-growth and mature forests) primarily due to commercial timber harvesting. It is also threatened from mortality associated with current gill-net fishing operations and the effects of oil spills throughout its range. If made final, the proposed action would extend the Act's protection to the marbled murrelet in California, Oregon and Washington. The Service seeks data and comments from the public on this proposed rule.

DATES: Comments from all interested parties must be received by September 18, 1991. Public hearing requests must be received by August 5, 1991.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, U.S. Fish and Wildlife Service, Portland Field Station, 2600 SE 98th Ave, suite 100, Portland, Oregon 97266. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Russell D. Peterson, Field Supervisor, Portland Field Station at the above address [503/231–6179 or FTS 429–6179].

SUPPLEMENTARY INFORMATION:

Background

Life History Summary

The marbled murrelet (*Brachyramphus marmoratus*) is a robin-sized member of the Alcidae family. It was first described in 1789 by Gmelin as *Colymbus marmoratus*, but in 1837 Brandt placed it under the genus *Brachyramphus* (American Ornithologists' Union 1983). The North American subspecies (*B. m. marmoratus*) ranges from the Aleutian Archipelago in Alaska, eastward to Cook Inlet, Kodiak Island, Kenai Peninsula and Prince William Sound, southward coastally throughout the Alexander Archipelago of Alaska, and through British Columbia, Washington, Oregon, to central California. Some wintering birds are found in southern California. A separate subspecies (*B. m. perdix*) is present in Asia. Marbled murrelets feed primarily on fish and invertebrates in near-shore marine waters. Although some are found on rivers and inland lakes up to 50 miles from the ocean, most sightings have been within or adjacent to the marine environment (Carter and Sealy 1986).

Although the marbled murrelet is not colonial like most other alcids, small nesting aggregations are evident. Adult marbled murrelets have a low (1 egg per nest) and variable (not all adults may nest every year) reproductive rate. The marbled murrelet uses two nesting strategies; murrelets in the Alaskan Aleutian Archipelago eastward to the Alaskan Kenai Peninsula are apparently ground-nesters, whereas those of the Alaskan Alexander Archipelago and south are tree-nesters. In Alaska, there may be overlap in ground-nesting and tree-nesting on the Kenai Peninsula, Kodiak Island, and Prince William Sound area (Kuletz, USFWS, pers. com.). We ground nests have been located, to date, in the extensively forested area of its range, which extends from southeastern Alaska to central California.

In tree nests, adult marbled murrelets lay one egg on the flat surface of large moss covered branches of coniferous trees. Nesting occurs over an extended period from mid-April to late September (Carter and Sealy 1987). Incubation lasts about 30 days and fledgling takes another 28 days (Simons 1980, Hirsch et al. 1980). Both sexes incubate the egg in 24-hour shifts (Simons 1980). Flights by adults are made from ocean feeding areas to inland nest sites most often at dusk and dawn. The chick is fed at least once a day; only one fish at a time is carried to the young (Carter and Sealy 1987). The young are altricial, but remain in the nest longer than young of most other alcids. Before leaving the nest, the young molt into a distinctive juvenile plumage. Fledglings probably fly from the nest to the sea. Marbled murrelets do not reach sexual maturity until their second year. Longevity of marbled murrelets is unknown, as are survival and mortality rates.

Throughout the forested portion of the subspecies' range, marbled murrelets used old-growth and old-growth/mature forests occurring near the coastline for nesting and possibly for other activities, such as roosting. From the Alexander Archipelago of Alaska and south, nesting occurs in trees in old-growth and old-growth/mature forests (Binford et al. 1975; Carter and Sealy 1987; Quinlan and Hughes 1990; Nelson, OR Coop. Wildl. Res. Unit, pers. com.; Cummins, Wash. Dept. of Wildl., pers. com.; Burger 1990; Singer et al. 1988). Evidence of tree nesting in old-growth forests has been documented by: (1) Actual tree nests in old-growth trees located in California, Oregon, Washington, British Columbia, and southeast Alaska; (2) stranded downy young and fledglings found on the ground in or near old-growth forests; (3) murrelet concentrations offshore from old-growth and mature forests during the nesting season, and; (4) numerous sightings and aural detections of marbled murrelets flying in or adjacent to old-growth and mature forests (Marshall 1988). Furthermore, the bird is cryptically colored and lacks a leg structure typical of burrowing alcids.

Twelve tree nests have been located in North America: three each in Washington and California, four in Oregon, and one each in Alaska and British Columbia. All of these nests were located on large, moss covered limbs, associated with old-growth or mature trees. Stands containing nest trees were composed of large trees with open crowns. Nests were located high above ground and usually had good overhead protection; such locations would seem to allow easy access to the exterior of the forest. Nest sites were located in old-growth redwood (*Sequoia sempervirens*) stands in California and in stands dominated by Douglas-fir (*Pseudotsuga menziesii*) in Oregon and Washington. In Alaska, the nest was located in a mountain hemlock (*Tsuga mertensiana*) in an old-growth hemlock stand. In British Columbia, the nest tree was located in an old-growth stand of Sitka spruce (*Picea sitchensis*).

Small numbers of nestlings or flightless young have been found throughout the subspecies' range. Carter and Sealy (1987) reported that 8 of 10 downy young and 20 of 31 fledglings from throughout the range were located in old-growth coniferous forests, with the remaining being adjacent or near to old-growth forests.

Marbled Murrelet Detections and Old-growth Habitat

Significantly higher detection rates for marbled murrelets have been observed in old-growth forests compared to mixed-age and young forests in California, Oregon, and Washington (Ralph *et al.* 1990; Nelson 1990; Hamer 1990). The number of detections in California were also greater in larger stands of old-growth (greater than 500 acres) than in smaller stands (less than 100 acres), with the majority of transects near stands less than 60 acres having no detections (Paton and Ralph 1988, Ralph *et al.* 1990). Concentrations of murrelets offshore were almost always adjacent to old-growth forests on-shore. Where old-growth forests were absent, murrelets were absent offshore (Speich *et al.* 1988, Nelson 1990, Ralph *et al.* 1990).

Marbled Murrelet Detections and Forest Fragmentation

In Washington, marbled murrelet detections increased when the percent of old-growth/mature forests available made up over 30 percent of the landscape. Similarly, detections of murrelets decreased when the percent of clearcut/meadow available on the landscape increased above 25 percent (Hamer 1990). Nelson (1990) found that the number of detections were significantly lower in the highly fragmented Oregon Coast Range, compared to detection rates documented by Paton and Ralph (1988) in a less fragmented area in northern California.

Population Size

Washington's breeding population is estimated at about 5,000 birds (Speich et al. 1988). Fewer than 5,000 birds inhabit coastal Oregon (Marshall 1988, Varoujean and Williams 1987) with the most recent estimates being less than 1,000 pairs (Nelson, OR Coop. Wildl. Res. Unit, pers. com.). Biologists in California have conducted the most recent extensive inventories and estimate about 2,000 individuals, or fewer than 1,000 pairs, are present in the state during the breeding season (Marshall 1988). Marbled murrelets in British Columbia appear to occupy the entire length of the coast. The most thorough censuses have been done in Barkley and Clayoquot sounds on Vancouver Island and, based on these census results and other counts, it is estimated that there are approximately 20,000 to 45,000 breeding birds in British Columbia (Kaiser, Canadian Wildl. Serv., pers. com.; Rodway and COSEWIC 1990). The population in Alaska is not well understood, but has been estimated to be from 50,000 to more than 250,000; the greatest densities occur in southeast Alaska (Mendenhall 1988).

Seasonal changes (winter to summer) in population distribution and numbers are evident, indicating local migration. Breeding populations are discontinuously distributed throughout the forested portion of the range and gaps exist between separate nesting aggregations. Nesting aggregations are concentrated in remaining patches of old-growth and old-growth/mature forests. Small numbers of isolated birds exist between these concentrated aggregations, however the breeding status of these birds is unknown. A large break in the breeding distribution is located at the southern portion of the range in California, where about 300 miles separate southern breeding populations in San Mateo County from the next site to the north in Humboldt County (Humboldt Redwoods State Park). This unpopulated reach contained marbled murrelets prior to extensive logging (Paton and Ralph 1988). Another gap is located between the Olympic Peninsula in Washington and Tillamook County in Oregon. The degree of genetic exchange among marbled murrelets in the northern and southern portions of the subspecies' range is unknown.

The principal factor affecting the marbled murrelet throughout the southern portion of its range (from California north to British Columbia) is the loss of old-growth and mature forests. In Oregon, historic records show that marbled murrelets were consistent summer residents, particularly in Lincoln, Tillamook, and Lane counties (Gabrielson and Jewett 1940). That is no longer true in Tillamook County, where nearly all of the old-growth forests near the coast have been cut, or lost due to fire. The species is no longer found in significant numbers during the nesting season near the mouth of the Columbia River, where old-growth forests have been cut. Loss of old-growth forests due to timber harvest also takes place in southeast Alaska, although the degree to which Alaskan populations are affected is unknown.

Old-growth and mature forests have declined throughout the range of the marbled murrelet as a result of commercial timber harvest, with additional losses from natural causes such as fire, windthrow, etc. Current estimates of 7.1 million acres of old-growth and mature forests in western Oregon and Washington indicate a reduction of over 60 to 90 percent in the past 190 years (USDA 1989). Old-growth forests in the douglas-fir/mixed conifer region of northwestern California may

VOL
56

1991
UMI

have undergone a similar reduction of about 45 to 60 percent since the mid-1800's (Laudenslayer 1985; Fox 1988; California Department of Forestry and Fire Protection 1988). This acreage is distributed over a broader geographic area than is occupied by the marbled murrelet but the amount and rate of habitat loss are similar within the murrelet's range.

Most suitable nesting habitat (old-growth and mature forests) on private lands within the range of the subspecies in Washington, Oregon, and California has been eliminated by timber harvest (Green 1985, Norse 1988, Thomas et al. 1990). Remaining tracts of potentially suitable habitat on private lands throughout the range are subject to continuing timber harvest operations.

Petition Process Background

The National Audubon Society submitted a petition to the Service on January 15, 1988, to list the California, Oregon, and Washington populations of the marbled murrelet as a threatened species. Section 4(b)(3)(A) of the Act requires that, to the maximum extent practicable, within 90 days of receipt of a petition to list, delist, or reclassify a species, a finding be made as to whether or not substantial information has been presented indicating that the requested action may be warranted. The 90-day finding stating that the petition had presented substantial information to indicate that the requested action may be warranted was published in the **Federal Register** on October 17, 1988 (53 FR 40479). Because of the increased research efforts and the amount of new data available, the status review period was reopened, with the concurrence of the petitioners, from March 5, 1990 through May 31, 1990 (55 FR 4913).

The marbled murrelet has been listed on the Service's Notice of Review for vertebrate wildlife as a category 2 candidate species for listing. A category 2 candidate is one for which information contained in Service files indicates that preparation of a proposal to list the species is possibly appropriate but additional data is needed to support a listing proposal. The best available scientific and commercial data have now been analyzed and evaluated as a result of the recent status review for the marbled murrelet. These data contributed to the information on which was based the decision to propose this subspecies in California, Oregon and Washington for listing. The review included the pertinent data available from both published and unpublished sources. Unpublished sources included solicited progress and final reports, file data, meeting notes, letters, and personal contact with agencies, organizations, and individuals. This proposed rule to list the marbled murrelet as a threatened species in California, Oregon and Washington constitutes the 12-month finding that the petitioned action is warranted, in accordance with section 4(b)(3)(B) of the Act.

Summary of Factors Affecting the Species

Section 4 of the Act and regulations promulgated to implement the listing provisions of the Act (50 CFR part 424) set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the marbled murrelet (*Brachyramphus marmoratus marmoratus*) in California, Oregon, and Washington, are as follows:

A. *The Present or Threatened Destruction, Modification, or Curtailment of the Species' Habitat or Range.* Western Oregon and Washington were covered by approximately 24 to 28 million acres of forest at the time of modern settlement (early to mid-1800's), of which about 70 percent (14 to 19 million acres) is estimated to have been old growth (Society of American Foresters Task Force 1983, Spies and Franklin 1988, Morrison 1988, Norse 1988). Historical estimates for northwestern California are not as precise, but suggest there were between 1.3 and 3.2 million acres of old-growth Douglas-fir/mixed conifer forest and approximately 2.2 million acres of old-growth coastal redwood forest (Society of American Foresters Task Force 1983, Laudenslayer 1985, Fox 1988, California Department of Forestry and Fire Protection 1988, Morrison 1988).

Current estimates of 7.1 million acres of old-growth and mature forests in western Oregon and Washington indicate a reduction of over 60 to 90 percent in the past 190 years (USDA 1989). Old-growth forests in the Douglas-fir/mixed conifer region of northwestern California have undergone a similar reduction of about 45 to 80 percent since the mid-1800's (Laudenslayer 1985, Green 1985; Fox 1988; California Department of Forestry and Fire Protection 1988). Recent estimates (Spies and Franklin 1988, Morrison 1988, Norse 1988) suggest that this reported decline in historical old-growth habitat, in fact, may be as high as 83 to 86 percent. Reduction of the remaining old-growth and mature forest has not been evenly distributed over western Oregon, Washington and northwestern California. Harvest has been concentrated at the lower elevations and the Coast Ranges (Thomas et al. 1990), generally equating with the range of the marbled murrelet. Reduction of these older forests is largely attributable to timber harvesting and land conversion practices, although natural perturbations, such as forest fires and windthrow, have caused losses as well.

Forests generally require approximately 200 years to develop old-growth characteristics, however, forests in Washington, Oregon, and northern California have been subjected to, and are proposed for, intensive management with average cutting rotations of 70 to 120 years to produce wood at a non-declining rate (USDI 1984, USDA 1988). Cutting rotations of 40 to 50 years are used for some private lands. Current preferred timber harvest strategies on Federal lands and some private lands emphasize dispersed clearcut patches for even-aged management as the pattern of harvest. Thus, public forest lands that are intensively managed for timber production (cutting rotations of 70 to 120 years) are, in general, not allowed to develop old-growth characteristics. As a result of this short rotation age and the continued harvest of old-growth and mature forests, loss and fragmentation of remaining suitable nesting habitat for marbled murrelets will continue throughout the forested range of the subspecies under current management practices, except in reserved areas.

The geographic distribution of the marbled murrelet along the west coast of North America is discontinuous. About one-third of the bird's range is in California, Oregon, and Washington and contains less than 10 percent of the entire population (Marshall 1988). The gap in the present distribution in the southern portion of the range in California was apparently the result of extensive clearcutting of forests in the earlier half of this century that eliminated most nesting habitat (Paton and Ralph 1988, Carter and Erickson 1988). Other local breeding populations, especially between the Olympic Peninsula in Washington and Tillamook County in Oregon, may have been eliminated through loss of their nesting habitat—old-growth and mixed old-growth/mature coniferous forests within 50 miles of marine environments (Nelson, OR Coop. Wildl. Res. Unit, pers. com.). Logging of those forests within the subspecies' range has been extensive. Most remaining nesting habitat within the petitioned states is on Federal and State owned lands, as most nesting habitat on private lands has been eliminated. Under current forest management practices, logging of the remaining old-growth and old-growth/mature forests is likely to continue.

Canada has officially listed the marbled murrelet as a threatened species in British Columbia. The primary threat in British Columbia is the harvest of marbled murrelet nesting habitat (old-growth and mature forests). Secondary threats identified in the Canadian listing report included gill-net fishing and oil spills (Rodway and COSEWIC 1990).

B. *Overutilization for Commercial, Recreational, Scientific, or Educational Purposes.* Not known to be applicable.

C. *Disease or Predation.* Predation on nests has been documented on several occasions. Predators include corvids (crows, ravens, and jays), great horned owls, and peregrine falcons. Although predators take nests (eggs and/or downy young), predation and disease are not known to be significant factors in the decline of marbled murrelet populations.

D. *Inadequacy of Existing Regulatory Mechanisms.* Marbled murrelets are protected from "take" by the Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*), but no protection is afforded habitat under this statute. Other laws and regulations to protect the subspecies' habitat in the United States have not been enacted by the Federal government. The marbled murrelet is identified as Sensitive by the USDA Forest Service and the Bureau of Land Management. California, Oregon, and Washington have legislative mandates and acts specific to listing and protecting species determined to be endangered or threatened. The marbled murrelet has not been declared endangered or threatened by any of these states, but is listed as a species of special concern in California by the California Department of Fish and Game and as Sensitive in Oregon and Washington by the Oregon Department of Fish and Wildlife and Washington Department of Wildlife, respectively. None of the above categories of status provide any mandated protection.

The National Forest Management Act of 1976 and its implementing regulations require the USDA Forest Service to manage National Forests to provide sufficient habitat to maintain viable populations of native vertebrate species, such as the marbled murrelet. These regulations define a viable population as one which "has the estimated numbers and distribution of reproductive individuals to insure its continued existence is well distributed" (36 CFR 219.19). Current management by the Forest Service in Oregon, Washington, and California (55 FR 23396), and Bureau of Land Management in Oregon protects proposed Habitat Conservation Areas (HCAs) for northern spotted owls (*Strix occidentalis caurina*) (Thomas et al. 1990). Some of these HCAs occur within portions of the range of the marbled murrelet (within 50 miles of the coast) in all three states. In Oregon and Washington, the HCAs, plus other set aside areas, would protect about 74 percent of the suitable marbled murrelet habitat, but only about 63 percent of the known occupied sites (USDA 1991). The majority of detections and number of birds in Oregon occur within 12 miles of the coast, where much of the suitable habitat and known sites are not protected (Nelson, OR Coop. Wildl. Res. Unit, pers. com.). In addition, since the relationship between patch size and occupancy or reproductive success through time is not known, long-term protection should not be assumed. Protection may not be adequate in such areas as Category 4 HCAs which are a maximum of 60 acres or sites on the edge of protected areas. Therefore, these HCAs and other set asides may not provide sufficient incidental protection for marbled murrelets. No analysis of HCA overlap with marbled murrelet nest stands has been completed for California.

On May 6, 1991, the Service proposed to designate 11.6 million acres as critical habitat for the northern spotted owl in Washington, Oregon and California (56 FR 20616). These critical habitat areas include most of the HCAs and add areas around and between them. It is not currently known to what extent these proposed critical habitat areas may provide additional protection for the marbled murrelet.

E. *Other Natural or Man-made Factors Affecting its Continued Existence.* Mortality from gill-net fishing and oil spills has had a negative impact on the marbled murrelet. Gill-net fishing is an annual occurrence in Washington and British Columbia. For example, about 1,200 gill-net licenses are issued each year in Washington. A gill-net fishery occurs in all areas of marbled murrelet concentrations in Washington (Speich et al. 1988). One study conducted in British Columbia along Vancouver Island documented gill-netting as responsible for killing approximately eight percent of the potential fall population of marbled murrelets (Carter and Sealy 1984). Gill-net fisheries exist in Washington but the mortality rate is unknown.

Marbled murrelets have a high susceptibility to mortality from oil spills because they tend to spend most of their time swimming on the sea surface and feeding in local concentrations close to shore. Oil spills are chance events but, depending on the location, extent, and season of spill, could have significant adverse effects on local or regional populations of marbled murrelets. The *Exxon Valdez* oil spill of 1989 occurred in Prince William Sound, Alaska, and adversely affected local populations of marbled murrelets (Piatt *et al.* 1990). Oil tanker use is substantial in coastal waters throughout the subspecies range. For the three-state area of this proposed rule, Puget Sound in Washington is a special concern.

Marbled murrelets are found both during the nesting season and during winter within areas affected by oil shipments. If approved, proposed oil exploration, possibly leading to production and increased movement of oil along the near-shore marine environment in Washington, Oregon, and California would increase the degree of threat from oil spills. Oiled marbled murrelets were reported in Washington during the *Seagate* oil spill of 1956 and during the *Arco Anchorage* oil spill of 1985 (Leschner and Cummins 1990). Several instances of marbled murrelet mortality due to oil spills have been documented in California, as well (Carter and Erickson 1988). Because the populations in Oregon, Washington, and California are small and locally concentrated, oil spills could result in local extirpations.

The marbled murrelet's reproductive strategy offers little opportunity for the population to rapidly increase in number. Murrelets may not reproduce every year, and pairs only lay one egg in a nest. Such a low reproductive rate is unlikely to yield a rapidly increasing population, or one that can easily recover once numbers have been depleted.

The Service has carefully assessed the best scientific and commercial data available and concluded that the marbled murrelet in California, Oregon, and Washington is threatened due to loss of mature and old-growth forests which provide suitable nesting habitat. Secondary threats include gill-net fisheries and oil spills. The degree of threat facing the marbled murrelet does not suggest that extinction is imminent, but continued loss of nesting habitat throughout the forested portion of its range, especially in California, Oregon, and Washington, indicates the species is likely to become endangered within the foreseeable future throughout a significant portion of its range.

The Act defines "endangered species" as any species which is in danger of extinction throughout all or a significant portion of its range. The term

VOL
56
ISS
119
JE

1991
UMI

"threatened species" means any species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

California, Oregon, and Washington constitute a significant portion of the marbled murrelet's range. In these states, the species is immediately threatened by the loss of nesting habitat (old-growth and mature forests). Although the proposed spotted owl HCAs in California, Oregon, and Washington would provide some protection, they would not provide sufficient protection for marbled murrelet nesting habitat. Critical habitat areas that have recently been proposed for the northern spotted owl may also provide some protection for the marbled murrelet, however, at this time it is not known to what extent. Mortality from gill-net fishing and the risk of mortality from oil spills are also threats, but these threats are not as immediate or as major as the loss of nesting habitat.

The status of marbled murrelets in Alaska is not well understood. Studies to be conducted during the summer of 1991 should provide information to better evaluate marbled murrelets in Alaska.

Critical Habitat

Critical habitat is defined as the specific areas within the geographical area currently occupied by a species on which are found the physical or biological features essential to the conservation of the species and that may require special management considerations or protection (16 U.S.C. 1532(5); 50 CFR 424.02(d)). Designations of critical habitat must be based on the best scientific data available and must take into consideration the economic and other relevant impacts of specifying any particular area as critical habitat (16 U.S.C. 1533(b)(2)). Section 4(a)(3) of the Act requires that, to the maximum extent prudent and determinable, the Secretary shall designate critical habitat at the time the species is listed as endangered or threatened.

The Service finds that critical habitat for the marbled murrelet is not presently determinable. The Service's regulations (50 CFR 424.12(a)(2)) state the critical habitat is not determinable if information sufficient to perform required analyses of the impacts of the designation is lacking or if the biological needs of the species are not sufficiently well known to permit identification of an area as critical habitat. Much of the old-growth and mature forests from central California to southeast Alaska have been fragmented by logging and many stands are isolated from each other or are too small in size to provide support for nesting marbled murrelets. Information on size, spatial configuration, and juxtaposition of habitat blocks essential to the conservation of the marbled murrelet is not available at this time. Inland survey data on marbled murrelet presence is also lacking throughout much of the species' range. Proposed HCAs for the spotted owl encompass some of the nesting areas currently utilized by marbled murrelets in California, Oregon, and Washington, but the extent of the overlap is not completely known, as is the extent of long-term commitment to HCA management. Additional information on nest sites, flight corridors, and other aspects of marbled murrelet behavior is needed to determine critical habitat.

During the comment period on the proposed listing, the Service will seek additional agency and public input on critical habitat, along with information on the biological status of the threats to the marbled murrelet. The Service will use this and other information in formulating a decision on critical habitat designation for the marbled murrelet.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recover actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. Regulations governing these conferences are found at 50 CFR 402.10. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

The U.S. Forest Service and Bureau of Land Management have active timber sale programs in Washington, Oregon and California, whereby private timber companies bid for timber on Federal land. A substantial portion of these timber sales occur in old-growth/mature forests. The Forest Service and Bureau of Land Management would review and assess the potential impacts of these timber sales on the murrelet, and would consult with the Service on these sales to ensure compliance pursuant to section 7 of the Act.

The Act and implementing regulations found at 50 CFR 17.21 and 17.31 set forth a series of general prohibitions and exceptions that apply to all threatened wildlife not covered by a special rule. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States, to take (defined as harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect; or to attempt any of these activities), import or export, transport in interstate or foreign commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce, any threatened species not covered by a special rule. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving threatened wildlife species under certain circumstances. Regulations governing threatened species permits are provided in 50 CFR 17.32. Unless otherwise provided by special rule, such permits are available for scientific purposes, to enhance the propagation or survival of the species, for economic hardship, zoological exhibition, educational purposes, special purposes consistent with the Act, and/or for incidental take in connection with otherwise lawful activities.

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule, are hereby solicited. Comments are particularly sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) of this species;

(2) The location of any additional populations of this species;

(3) The reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(4) Additional information concerning the range, distribution, and population size of this species; and

(5) Current or planned activities in the subject area and their possible impacts on this species.

Final action concerning this proposal will take into consideration the comments and any additional data received by the Service. Such communications may lead to a final regulation that differs from this proposal.

The Endangered species Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the field supervisor, Portland Field Station (see ADDRESSES section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

References Cited

A complete list of all references cited herein is available upon request from the Field Supervisor, U.S. Fish and Wildlife Service, Portland Field Station, 2600 S.E. 98th, suite 100, Portland, Oregon 97266.

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. It is proposed to amend § 17.11(h) by adding the following, in alphabetical order under Birds, to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name						
Birds							
Murrelet, marbled	*Brachyramphus marmoratus*	U.S.A. (CA, OR, WA, AK); Canada (British Columbia).	WA, OR, CA	T		NA	NA

Dated: June 14, 1991.

Richard N. Smith,

Deputy Director, U.S. Fish and Wildlife Service.

Notices

Federal Register
Vol. 56, No. 119
Thursday, June 20, 1991

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

Dated: June 14, 1991.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) Name and telephone number of the agency contact person.

Questons about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

BILLING CODE 3410–01–M

Forest Service

Ketchikan Pulp Company 50-Year Timber Sale Contract, Tongass National Forest, Ketchikan Area, Revillagigedo Island

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Department of Agriculture, Forest Service, will prepare a site-specific Environmental Impact Statement (EIS) as part of its on-going commitment to provide timber to Ketchikan Pulp Company (KPC) under the terms of an existing timber sale contract. The Record of Decision (ROD) will decide how to provide sufficient harvest units, roads, and associated timber harvesting facilities to meet the operational needs of KPC for an estimated 2 to 3 year period. Harvest units will be located within the primary sale area boundaries, mainly on Revillgigedo Island.

DATE: Comments concerning the scope of the analysis should be received by July 15, 1991.

ADDRESSES: Written comments and suggestions concerning the scope of the analysis must be sent to Dave Rittenhouse, Forest Supervisor, Tongass National Forest, Ketchikan Area, Federal Building, Ketchikan, AK 99901.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and environmental impact statement should be directed to Walter Dortch, Planning Staff Officer, Tongass National Forest, Ketchikan Area, Federal Building, Ketchikan, AK 99901, phone 907–225–3101.

SUPPLEMENTARY INFORMATION: The Agency proposes to authorize harvest of approximately 200 MMBF of timber, and to construct roads and facilities necessary to transport this timber, to salt water. The authorization is expected to include harvest of approximately 8,000 acres of land within Visual Quality Units (VCU's) 732, 733, 735, 736, 737, 738, 739, and 740, and will be made available to KPC, under the terms of the existing long-term timber sale contract, in several offerings.

The Responsible Official for this EIS is the Regional Forester, Michael A. Barton, who must decide on various unit locations and acreage necessary to meet the objectives of the EIS. He will select from a full array of alternatives presented in the EIS, including the alternative of "no action". Site-specific issues for this project are expected to include:

1. Do the harvest units being evaluated in the alternatives provide for an economically viable offering under the terms of the long-term timber sale contract?

2. What are the projected impacts to subsistence users of the land being proposed for timber harvest if harvest is authorized?

3. What are the effects of the harvest of timber and associated road construction on forest resources such as visual quality, fish and wildlife habitat, and upon wildlife species thought to be dependent upon old-growth habitat. Mitigation measures, as well as standards and guidelines for setting harvest units and roads, will be prescribed in the EIS for each harvest unit and road being evaluated.

4. What are the projected cumulative environmental effects resultant from harvesting individual units and roads within these prescription? Do these prescriptions provide results consistent with the expectations of the Tongass National Forest Land Management Plan Land Use Designations for the sites being evaluated?

5. The Tongass Timber Reform Act of 1991 provides for certain desired forest conditions with respect to proportionality and fisheries protection. Do the harvest units and roads proposed provide for those desired forest conditions?

Public participation will be especially important at several points during the analysis. The first point is during the scoping process. The Forest Service will be seeking information, comments, and assistance from Federal, State, and local agencies, and other individuals or organizations who may be interested in, or affected by, the proposed action. This input will be used in preparation of the Draft Environmental Impact Statement (DEIS). Scoping is to begin in June 1991. Public meetings are planned for Ketchikan in September 1991 and August 1992. Subsistence hearings, as provided for in ANILCA, are planned for July 1992. The DEIS should be filed with EPA April 1992, and the final EIS filed in December 1992.

The comment period on the DEIS will be 45 days from the date the Environmental protection Agency's notice of availability appears in the Federal Register. It is very important that those interested in this proposed action participate at this time. To be the most helpful, comments on the DEIS statement should be as specific as possible, and may address the adequacy of the statement or the merits of the alternatives discussed. (See The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviewers of DEIS statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and concerns. *Vermont Yankee Nuclear Power Corp* v. *NRDC*, 435 U.S. 519, 553 (1978). Environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final EIS. *City of Angoon* v *Hodel, Harris*, (9th Circuit, 1986), and *Wisconsin Heritages, Inc.* v *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

Permits required for implementation include the following:

1. U.S. Army Corps of Engineers:
—Approval of the discharge of dredged or fill materials into waters of the United States, under section 404 of the Clean Water Act.
—Approval of the construction of structures or work in navigable waters of the United States, under section 10 of the River and Harbor Act of 1899.

2. Environmental Protection Agency:
—National Pollutant Discharge Elimination System (402) permit.
—Review Spill Prevention Control and Countermeasure Plan.

3. State of Alaska, Department of Natural Resources:
—Tideland Permit and Lease or Easement.

4. State of Alaska, Department of Environmental Conservation:
—Solid Waste Disposal Permit.
—Certification of Compliance with Alaska Water Quality Standards (401 Certification).

Michael A. Barton, Regional Forester, Region 10, Box 21628, Juneau, Alaska 99802, is the responsible official. The responsible official will consider the comments, responses, disclosure of environmental consequences, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and rationale in the ROD.

Dated: June 11, 1991.

Michael A. Barton,
Regional Forester.

BILLING CODE 3410–11–M

Packers and Stockyards Administration

Proposed Posting of Stockyards

The Packers and Stockyards Administration, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act (7 U.S.C. 202), and should be made subject to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*)

GA–210—Sandy Point Horse & Tack Auction, Lizella, Georgia.

MO–270—Norwood Public Auction Yards, Inc., Norwood, Missouri.

NV–103—Fallon Livestock Auction, Fallon, Nevada.

Pursuant to the authority under section 302 of the Act, notice is hereby given that it is proposed to designate the stockyards named above as posted stockyards subject to the provisions of the Act as provided in section 302 thereof.

Any person who wishes to submit written data, views or arguments concerning the proposed designation may do so by filing them with the Director, Livestock Marketing Division, Packers and Stockyards Administration, room 3408-South Building, U.S. States Department of Agriculture, Washington, DC 20250, by June 29, 1991.

All written submissions made pursuant to this notice will be made available for public inspection in the office of the Director of the Livestock Marketing Division during normal business hours.

Done at Washington, DC this 14th day of June, 1991.

Daniel L. Van Ackeren,
Acting Director, Livestock Marketing Division.

DEPARTMENT OF COMMERCE

Under Secretary for Economic Affairs and Administrator, Economics and Statistics Administration; Advisory Committee of the Task Force for Designing the Year 2000 Census and Census-Related Activities for 2000–2009; Establishment

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. app. 2, and the General Services Administration (GSA) rule on Federal Advisory Committee Management, 41 CFR part 101–6, and after consultation with GSA, the Secretary of Commerce has determined that the establishment of the Advisory Committee of the Task Force for Designing the Year 2000 Census and Census Related Activities for 2000–2009 is in the public interest in connection with duties imposed on the Department by law.

The Committee will advise the Secretary, through the Under Secretary for Economic Affairs, on how the Department might best conduct the year 2000 decennial census of population and housing.

The Committee will consist of twenty-five (25) members to be appointed by the Secretary to assure a balanced representation among private sector census data users, minority groups, professional associations, the Congress, State and local governments, and other organizations. The Committee membership is designed to be as encompassing as possible of all perspectives on decennial censuses.

The Committee will function solely as an advisory body, and in compliance with provisions of the Federal Advisory Committee Act. The Charter will be filed under the Act, fifteen (15) days from the date of publication of this Notice.

VOL 56 ISS 119 JE 20 1991 UMI

Interested persons are invited to submit comments regarding the establishment of this Committee to Harry A. Scarr, Deputy Assistant Secretary for Statistical Affairs, Economics and Statistics Administration, room 4836, Department of Commerce, Washington, DC 20230. Telephone: 202–377–2760; Fax: 202–377–0432.

Dated: June 10, 1991.

Michael Darby,

Under Secretary and Administrator.

BILLING CODE 3510-07-M

Foreign-Trade Zones Board

[Docket 33–91]

Foreign-Trade Zone 125—South Bend, Indiana; Application for Subzone; Coachmen Compact Recreational Vehicle Plant, Middlebury, IN

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the St. Joseph County Airport Authority, grantee of FTZ 125, requesting special-purpose subzone status for a proposed compact recreational vehicle (RV) assembly operation at the plant of Coachmen Recreational Vehicle Company (Coachmen), (subsidiary of Coachmen Industries, Inc.) located in Middlebury, Indiana. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on May 31, 1991.

The Coachmen plant (468,636 sq. ft. on 130 acres) is located at 423 North Main St., Middlebury, Indiana, some 50 miles southeast of Chicago and 30 miles east of South Bend, Indiana. While the facility is currently used to assemble a variety of vehicles, including Type A RVs and camping trailers, subzone status is being requested only for the proposed manufacture of compact (micro-mini) RVs (<6,000-lb. GVW). The company projects that the new operation will employ some 85 persons in the first year of operation, rising to 300 at full production. The micro-mini RV would be built on a foreign-sourced light pickup truck cab/chassis. All other components and materials would involve domestic or duty-paid merchandise.

Zone procedures would exempt Coachmen from Customs duty payments on the foreign light pick-up truck cab/chassis used in vehicles produced for export. On its domestic sales, the company would be able to choose the lower finished vehicle duty rate (2.5 percent) rather than the pickup truck cab/chassis rate (25 percent). The application indicates that zone savings will help Coachmen improve its international competitiveness and increase export sales. Two other domestic RV plants currently operate under zone procedures: The Forest City, Iowa facility of Winnebago, Industries, Inc. (FTZ Subzone 107A, Board Order 273, 49 FR 35971, 9/13/84); and, the Perris, California facility of National RV (FTZ Subzone 50C, Board Order 484, 55 FR 35159, 8/28/90).

In accordance with the Board's regulations, an examiners committee has been approved to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Richard Roster, District Director, U.S. Customs Service, North Central Region, suite 217, 610 South Canal Street, Chicago, Illinois 60607; and Colonel Richard Kanda, District Engineer, U.S. Army Engineer District Detroit, McNamara Federal Building, 477 Michigan Avenue, Detroit, Michigan 48226.

Comments concerning the proposed subzones are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before July 29, 1991.

A copy of the application is available for public inspection at each of the following locations:

Office of the District Director, U.S. Department of Commerce, 1406 Mid-Continental Plaza Bldg., 55 E. Monroe St., Chicago, Illinois 60603.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th & Pennsylvania Avenue, NW., room 3716, Washington, DC 20230.

Dated: June 13, 1991.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 91–14746 Filed 6–19–91; 8:45 am]

BILLING CODE 3510-DS-M

[Docket 19–91]

Foreign-Trade Subzone 78A, Nissan Auto/Truck Plant, Smyrna, TN; Application for Expansion; Extension of Public Comment Period

The comment period for the above case, requesting authority to expand the subzone and the scope of manufacturing authority for Foreign-Trade Subzone 78A of Nissan Motor Manufacturing Corporation U.S.A. (56 FR 16067, 4/19/91), is extended to August 6, 1991, to allow interested parties additional time in which to comment on the proposal.

Comments in writing are invited during this period. Submissions should include 5 copies. Material submitted will be available at: Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, room 3716, 14th & Pennsylvania Avenue, NW., Washington, DC 20230.

Dated: June 13, 1991.

BILLING CODE 3510-DS-M

International Trade Administration

[A–201–803]

Preliminary Negative Determination of Critical Circumstances; Steel Wire Rope From Mexico

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

EFFECTIVE DATE: June 20, 1991.

FOR FURTHER INFORMATION CONTACT: David J. Goldberger, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–4136.

Preliminary Negative Determination of Critical Circumstances

The Department of Commerce (the Department) published its preliminary determination of sales at less than fair value in this investigation on April 22, 1991 (56 FR 16317). On May 14, 1991, petitioner alleged that critical circumstances exist with respect to imports of the subject merchandise. A supplement to that allegation was filed on May 28, 1991. Petitioner and respondent, Grupo Industrial Camesa, S.A. de C.V. (Camesa), submitted case briefs on June 3, 1991 to the Department, which included comments on the critical circumstances allegation. On June 4, 1991, we also received comments on the critical circumstances allegation from Cablesa S.A. de C.V., another Mexican manufacturer of the subject merchandise.

In accordance with 19 CFR 353.16(b)(2)(ii), when a critical circumstances allegation is filed later than 20 days before the scheduled date of the preliminary determination (as was done in this case), we must issue our preliminary determination not later than 30 days after the allegation is filed.

Section 733(e)(1) of the Act provides that the Department will preliminary determine that critical circumstances exist if we determine that there is a reasonable basis to believe or suspect:

(A) (i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and

(B) There have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 733(e)(1)(B), we generally consider the following factors in determining whether imports have been massive over a short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

In this investigation, we relied on U.S. Commerce Department import data to reach this determination. We did not request monthly shipment data from Camesa because, given that Camesa failed to correct the deficiencies in its questionnaire response that resulted in a preliminary determination based on the best information available, verification of the accuracy of any company-specific shipment data would have been unlikely. Moreover, the Harmonized Tariff Schedule (HTS) numbers under which the subject merchandise enters the United States are exclusive to the subject merchandise and are thus a reliable indicator as to whether or not there have been massive imports of steel wire rope since the filing of the petition.

Pursuant to 19 CFR 353.16(g), we compare the export volume for a minimum three-month period beginning with the month the petition was filed (the comparison period) with a minimum three-month period prior to the filing of the petition (the base period). Since complete import data are available to extend the comparison period to five months, we compared that five-month period to a five-month base period.

Petitioner has argued that we should include the month prior to filing of the petition, October 1990, in the comparison period, rather than the base period, contending that the Mexican producers of the subject merchandise had prior knowledge, through petitioner's extensive market research activities, that an antidumping petition would be filed. Thus, petitioner contends that the Mexican producers capitalized on this advance knowledge and shipped large quantities of the merchandise as early as October 1990 in order to avoid prospective antidumping duties. We find that there is no information on the record, apart from petitioner's claim, to support the contention that Mexican producers had prior knowledge of the petition. Consequently, we have not changed our base or comparison periods.

Our analysis of the imports of steel wire rope from Mexico shows that the volume of imports increased by less than five percent from the base period to the comparison period. Under 19 CFR 353.16(f)(2), unless imports of the subject merchandise have increased by at least 15 percent, we will not consider the imports massive. Consequently, we have found there have not been massive imports of the subject merchandise since the filing of the petition. Therefore, we do not need to consider whether there is a history of dumping or whether importers of steel wire rope knew or should have known that it was being sold at less than fair value. Thus, we preliminary determine that critical circumstances do not exist with respect to imports of steel wire rope from Mexico. We will make a final determination of critical circumstances by July 1, 1991.

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination.

Public Comment

Since this determination is being made subsequent to the due dates for public comment as published in our notice of preliminary determination of sales at less than fair value, we will accept written comments limited to this preliminary determination on critical circumstances if they are submitted to the Assistant Secretary for Import Administration no later than June 20, 1991.

This determination is published pursuant to section 733(f) of the Act.

Dated: June 13, 1991.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DR-M

Applications; for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Public Law 89–651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with subsections 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in room 4204, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC.

Docket Number: 91–076. *Applicant:* Wake Forest University, Department of Chemistry, Winston-Salem, NC 27109. *Instrument:* Stopped-Flow Spectrofluorimeter, Model DX.17MV/S. *Manufacturer:* Applied Photophysics Ltd., United Kingdom. *Intended Use:* The instrument will be used for research focussing on the chemistry of decomposition in aqueous solutions of N-alkyl-N'-nitro-N-nitrosoquanidines and alkane diazotates. The purpose of the research project is to understand the aqueous reaction chemistry of intermediates that are central to the bioactivity of a wide range of carcinogenic and cancer chemotherapeutic agnets. Specific interest is in the lifetimes of these species in aqueous solutions and the mechanisms by which they decompose. There is the need to know whether there are conditions—particular reagents or pH effects—that stimulate the decomposition of these intermediates. It is also essential to be able to

VOL 56 ISS 119 JE 20 1991 UMI

characterize the physical nature of the intermediates under the reaction conditions in terms of their ultraviolet and visible absorption spectra for the purposes of identification of these and related species in other reaction types. *Application Received by Commissioner of Customs:* May 14, 1991.

Docket Number: 91-077. *Applicant:* Baylor College of Medicine, One Baylor Plaza, Houston, TX 77030. *Instrument:* Automated Breath ^{13}Carbon Analyser System. *Manufacturer:* Europa Scientific Ltd., United Kingdom. *Intended Use:* The instrument will be used to determine the presence of Helicobacter pylori infection in individuals through the use of a non-invasive breath test. Experiments to be conducted deal with the efficacy of selected drugs in the eradication of the organism in order to find a way to prevent relapse of gastric and duodenal ulcers and eliminate the potential for development of gastric carcinoma. In addition, the instrument will be used for hands-on training for postgraduate scientists in the operation of the instrument and interpretation of isotope ratio data. *Application Received by Commissioner of Customs:* May 15, 1991.

Docket Number: 91-078. *Applicant:* Michigan State University, Department of Mechanical Engineering, Engine Research Facility, Engineering Building, East Lansing, MI 48824. *Instrument:* Excimer Laser, Model EMG-160T. *Manufacturer:* Lambda Physik, Inc., West Germany. *Intended Use:* The instrument will be used to measure radical species such as OH, CH, CN, NH, NO_x, SO_x and liquid/vapor phase of fuel-air mixtures in combustion engine and gas turbines. *Application Received by Commissioner of Customs:* May 20, 1991.

Docket Number: 91-080. *Applicant:* National Institutes of Standards and Technology, Nuclear Methods Group, Gaithersburg, MD 20899. *Instrument:* Automatic Sample Changer, Model ASC-50. *Manufacturer:* Tracerlab Instruments, West Germany. *Intended Use:* The instrument will be used with two germanium radioactivity detectors coupled with multi-channel analyzers, which measure the pulse height of gamma-ray emissions from samples made radioactive in the NIST nuclear reactor. The materials or phenomena to be studied include elemental foils for reactor fluence measurement research; trace elements in NIST superconductor materials, both starting materials and the final superconductor; trace elements in biological Standard Reference Materials such as total diet materials and apple leaves; coal fly ash samples for environmental research; and measurement of ultrahigh precision in trace element analysis through use of high counting rates, and the effect of high count rates on dead time errors. *Application Received by Commissioner of Customs:* May 21, 1991.

Docket Number: 91-081. *Applicant:* University of Nebraska, Department of Chemistry, Lincoln, NE 68588-0304. *Instrument:* (2) Computer System for Upgrade of Mass Spectrometers. *Manufacturers:* Kratos Analytical, United Kingdom. *Intended Use:* The instruments are to be integral parts of two mass spectrometers which will be used to obtain (1) high resolution mass spectra of a wide variety of compounds including: Natural products of plant and animal origin and products of chemical synthesis and (2) accurate molecular masses for chemical substances that are not amenable to EI and CI mass spectrometry. *Application Received by Commissioner of Customs:* May 21, 1991.

Docket Number: 91-082. *Applicant:* University of North Carolina at Chapel Hill, Department of Biochemistry and Biophysics, Campus Box 7260, Chapel Hill, NC 27599-7260. *Instrument:* Cryogenic Airstream Device. *Manufacturer:* Stoe Diffraction Systems, United Kingdom. *Intended Use:* The instrument will be used for studies of single crystals of proteins and other biological macromolecules by X-ray diffraction at very low temperatures in order to measure their diffraction data with greatly reduced radiation damage. The overall goal of the research is to specify the atomic positions of the non-hydrogen atoms in the structures for the purpose of studying enzyme mechanisms and other questions relevant to biotechnology. *Application Received by Commissioner of Customs:* May 22, 1991.

Docket Number: 91-083. *Applicant:* Fox Chase Cancer Center, 7701 Burholme Avenue, Philadelphia, PA 19111. *Instrument:* Electron Microscope, Model EM-900. *Manufacturer:* Carl Zeiss, West Germany. *Intended Use:* The instrument will be used for the study of ultrastructural details of human tumors, normal mortal and immortal human breast epithelial cells in culture, and cells treated with carcinogens or transfected with oncogenes. Investigations will be conducted for identification of (1) the cell of origin of human tumors, (2) the ultrastructural characteristics defining early changes of cell transformation and (3) specific cytoskeletal changes and modifications in cellular organelles relating to a process of cell immortalization, chemical carcinogen-induced transformation, and activation of oncogenes. In addition, the instrument will be used in courses entitled, "Tumor diagnosis by electron microscopy" to provide pathologists with training in electron microscopy techniques. *Application Received by Commissioner of Customs:* May 23, 1991.

Docket Number: 91-084. *Applicant:* University of California, Irvine, 250 Public Service Building, Irvine, CA 92717. *Instrument:* Time Resolved Picosecond Diffraction X-ray Streak Camera. *Manufacturer:* Kentech, United Kingdom. *Intended Use:* The instrument will be used to study the dynamics of structural deformation materials after laser illumination. Properties such as melting, isomerization and lattice deformation will be investigated for the purpose of devloping a sensitive picosecond detector and understanding molecular structural changes as a function of time. In addition, the instrument will be used in a course on physical chemistry research on ultrafast spectroscopy to teach the fundamentals of layers and time resolved x-ray diffraction to students and postgraduates. *Application Received by Commissoner of Customs:* June 5, 1991.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 91-14749 Filed 6-19-91; 8:45 am]

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Atlantic Mackerel, Squid, and Butterfish Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of approval of an amendment to a fishery management plan.

SUMMARY: NOAA announces approval of Amendment 3 to the Fishery Management Plan for the Atlantic Mackerel, Squid, and Butterfish Fisheries (FMP). The amendment contains definitions of overfishing for Atlantic mackerel, *Loligo* squid, *Illex* squid, and butterfish. No rulemaking is involved in this action.

EFFECTIVE DATE: June 13, 1991.

ADDRESSES: Copies of the amendment and environmental assessment are available from John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, room 21, 15 Federal Building, 300 S. New Street, Dover, Delaware 19901-6790.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones, Resource Management Specialist, 508-281-9273.

SUPPLEMENTARY INFORMATION: The mackerel, squid, and butterfish fisheries are managed under the FMP prepared by the Mid-Atlantic Fishery Management Council (Council), and its implementing regulations at 50 CFR part 655 under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act), as amended. In accordance with the Guidelines for Fishery Management Plans (50 CFR part 602), Amendment 3 adds to the FMP an objective and measurable definition of overfishing.

Amendment 3 was submitted by the Council for review and approval by the Secretary of Commerce (Secretary) on March 13, 1991. A notice of availability of Amendment 3 and request for comments was published in the **Federal Register** on March 21, 1991 (56 FR 11983). No comments were received.

Under the FMP, as revised by Amendment 3, overfishing is defined as follows:

Atlantic Mackerel

Overfishing is defined as the catch of Atlantic mackerel exceeding the annual quota for the species. The FMP provides for setting of annual quota for the species. The FMP provides for setting of annual quotas through quantitative biological parameters. The Initial Optimum Yield, Domestic Annual Harvest, Domestic Annual Processing, Joint Venture Processing, and the Total Allowable Level of Foreign Fishing are determined yearly by the Director, Northeast Region, NMFS, (Regional Director) and the Council based on the best scientific information available. The procedures for setting of annual quotas are intended to prevent overfishing.

Loligo and Illex Squid, and Butterfish

Overfishing for *Loligo pealei, Illex illecebrosus,* and butterfish is defined as occurring for a species when the 3-year moving average of pre-recruits from the Northeast Fisheries Center's autumn bottom trawl survey (mid-Atlantic to Georges Bank) falls within the lowest quartile of the time series (1967 to present for *Loligo,* 1968 to present for *Illex* and butterfish). This means, for example, that when the 1990 index is available (and thus a 24-year time series exists) that the sixth lowest annual index will be compared to the average of the 1988, 1989, and 1990 indices. If the 3-year average is below the sixth lowest index, overfishing will be defined as occurring. Quotas for these species are set annually by the Regional Director in accordance with the FMP. Annual Quotas can be set within the range of 0 to 44,000 metric tons (mt) for *Loligo,* 0 to 33,000 mt for *Illex,* and 0 to 16,000 mt for butterfish, based on the estimated maximum sustainable yields (MSY).

The basic assumption for these definitions is that in periods of sustained poor recruitment (a 3-year moving average of years), spawning stock, and thus fishable biomass, will decline. In order to reduce the harvest rate of spawners during periods of low spawning biomass, allowable landings (relative to the historical average as the basis for MSY and acceptable biological catch calculations) will be reduced.

The Northeast Fisheries Center NMFS (Center), has certified these definitions to be acceptable under the revised guidelines for fishery management plans with the following clarification: That the "annual quota" mentioned in the definition refers to the allowable biological catch (ABC), which in turn is a portion of the largest possible catch in the upcoming fishing years from the latest agreed upon stock assessment (as produced by the center), while maintaining a spawning stock biomass of 600,000 mt in the following year. The overfishing definition, therefore, is based on maintaining a minimum spawning stock biomass of 600,000 mt while allowing for a predicted Canadian catch and a fishing mortality rate that fluctuates according to the size of the stock. The Council concurred in this interpretation and will include it in Amendment 4 to the FMP, which is currently under preparation.

Classification

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), determined that Amendment 3 is necessary for the conservation and management of the Atlantic mackerel, squid, and butterfish fisheries and that it is consistent with the Magnuson Act and other applicable law.

Because Amendment 3 requires no implementing regulations, 5 U.S.C., section 553 of the Administrative Procedure Act, E.O. 12291, and the Regulatory Flexibility Act do not apply to this notice of approval.

This amendment does not contain collection-of-information requirements subject to the Paperwork Reduction Act.

The Council prepared an environmental assessment (EA) for this amendment that discusses the impact on the environment. Based on the EA, the Assistant Administrator found that there will be no significant impact on the environment as a result of this action. A copy of the EA and finsind of no significant impact may be obtained from the Council (see ADDRESSES).

This amendment does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

The Council determined that Amendment 3 is consistent to the maximum extent practicable with the approved coastal zone management programs of the applicable states. Connecticut, Delaware, Massachusetts, New Hampshire, New Jersey, New York, and Pennsylvania submitted letters of agreement with this determination. None of the other states commented, and; therefore, consistency is inferred.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 13, 1991.

Michael F. Tillman,

Acting Assistant Administrator for Fisheries National Marine Fisheries Service.

[FR Doc. 91-14656 Filed 6-19-91; 8:45 am]

BILLING CODE 3510-22-M

DEPARTMENT OF ENERGY

Assistant Secretary for International Affairs and Energy Emergencies

Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Uses of Atomic Energy, as amended, and the Agreement for Cooperation between the Government of the United States of America and the Government of Japan concerning Peaceful Uses of Nuclear Energy.

The subsequent arrangement to be carried out under the above-mentioned agreements involves approval of the following retransfer: RTD/JA(EU)-55, for the transfer of fuel elements for the JRR-3 research reactor from the Federal Republic of Germany to Japan, containing 66.875 kilograms of uranium, enriched to 19.95 percent in the isotope uranium-235.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

VOL 56 ISS 119 JE 20 1991 UMI

Issued in Washington, DC on June 17, 1991.

Richard H. Williamson,

Associate Deputy Assistant Secretary for International Affairs.

[FR Doc. 91-14717 Filed 6-19-91; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER91-483-000, et al.]

Arizona Public Service Company, et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

June 13, 1991.

Take notice that the following filings have been made with the Commission:

1. Arizona Public Service Company

[Docket No. ER91-483-000]

Take notice that on June 10, 1991, Arizona Public Service Company (Arizona) tendered for filing an Off-Peak Power Sales Agreement between Arizona Power Pooling Association (APPA) and Arizona executed on April 11, 1991.

This Agreement provides for the sale of seasonal off-peak capacity and energy by Arizona and APPA for a period of ten years commencing on June 1, 1991.

Copies of this filing are being served upon APPA, Electric District No. 2, and the Arizona Corporation Commission.

Comment date: June 28, 1991, in accordance with Standard Paragraph E at the end of this notice.

2. Pennsylvania Electric Company, et al.

[Docket No. ER91-482-000]

Take notice that on June 10, 1991, Pennsylvania Electric Company, Metropolitan Edison Company and Jersey Central Powers & Light Company (collectively, the GPU Companies) tendered for filing a new Schedule 5.011 to the GPU System Power Pooling Agreement as a change in rate schedule. Schedule 5.011 provides for transmission service charges among the GPU Companies for intrasystem transmission services under the Power Pooling Agreement to be provided for the delivery of capacity and energy being purchased by Metropolitan Edison Company and Jersey Central Power & Light Company from Cleveland Electric Illuminating Company' share of the Seneca Pumped Storage Hydro Electric Plan under a certain Power Supply Agreement dated January 3, 1990, which has been accepted for filing in Docket No. ER90-588. The GPU Companies have requested a waiver of the Commission's Regulations to permit the rate schedule to become effective May 1, 1991, coincident with the effective date of sales under the Seneca Power Supply Agreement.

Copies of the filing have been served on the Pennsylvania Public Utility Commission and Board of Public Utilities of the State of New Jersey.

Comment date: June 28, 1991, in accordance with Standard Paragraph E at the end of this notice.

3. Orange and Rockland Utilities, Inc.

[Docket No. ER88-112-000]

Take notice that on June 7, 1991, Orange and Rockland Utilities, Inc. (Orange and Rockland) tendered for filing an amendment to Orange and Rockland's previous filing of March 27, 1991, pursuant to the Federal Energy Docket No. ER88-112-000, of an executed Service Agreement between Orange and Rockland and Delaware Valley Cement Block Co., Inc.,

Comment date: June 28, 1991, in accordance with Standard Paragraph E at the end of this notice.

4. Pennsylvania Power & Light Company

[Docket No. ER91-481-000]

Take notice that on June 7, 1991 Pennsylvania Power & Light Company (PP&L) tendered for filing a Capacity Credit Sales Agreement (Agreement) between PP&L and Baltimore Gas and Electric Company (BG&E), which complements the Capacity and Energy Sales Agreement, dated January 26, 1988, as supplemented by a First Supplemental Agreement dated August 10, 1988, as supplemented by a Second Supplemental Agreement dated May 31, 1989, and as further supplemented by the Third Supplemental Agreement dated May 31, 1991, between PP&L and BG&E (the Capacity and Energy Sales Agreement) on file with the Commission as the Company's Rate Schedule FERC No. 92, as supplemented. The Agreement provides for the sale by PP&L to BG&E's use in the Pennsylvania-New Jersey-Maryland (PJM) Interconnection's planned and/or accounted for installed capacity accounting.

PP&L requests waiver of the notice requirements of Section 205 of the Federal Power Act and Section 35.3 of the Commission's Regulations so that the proposed rate schedule can be made effective as of June 10, 1991. Service under the Agreement is expected to commence on June 10, 1991.

PP&L states that a copy of its filing was served on BG&E, the Pennsylvania Public Utility Commission, and the Maryland Public Service Commission.

Comment date: June 28, 1991, in accordance with Standard Paragraph E at the end of this notice.

5. Jersey Central Power & Light Company

[Docket No. ER91-480-000]

Take notice that on June 7, 1991, Jersey Central Power & Light Company tendered for filing proposed changes in its currently effective rate schedule for supplemental and wheeling service to its wholesale customers and its contract for service to Allegheny Electric Cooperative, Inc. Jersey Central states that the charges produce additional revenues of $3,022,349 on an annual basis.

JCP&L requests an effective date of August 7, 1991.

Copies of the filing were served upon each customer and upon the New Jersey Board of Public Utilities.

Comment date: June 28, 1991, in accordance with Standard Paragraph E at the end of this notice.

6. Southern California Edison Company

[Docket No. ER79-150-017]

Take notice that on June 5, 1991, Southern California Edison Company (SCE) tendered for filing a Refund Report in the above-referenced docket pursuant to the Commission's order dated April 3, 1991.

Comment date: June 27, 1991, in accordance with Standard Paragraph E end of this notice.

7. D C Tie Inc.

[Docket No. ER91-435-000]

Take notice that on June 11, 1991, tendered for filing pursuant to Rule 215 of the Commission's Rules of Practice and Procedure, (18 CFR 385.215 (1990), an Amendment to its Petition filed on May 10, 1991. D C Tie's original Petition for Disclaimer of Jurisdiction Under section 201 of the Federal Power Act, Waivers, Blanket Approvals, and Order Accepting Rate Schedule was filed with the Commission on May 10, 1991. The original Petition sought certain waivers and blanket approvals under the Federal Power Act. In addition, D C Tie Inc., sought approval of its initial rate schedule, to be effective on July 10, 1991. The rate schedule provided for the sale of energy and capacity at agreed prices subject to a ceiling equal to the purchaser's alternative cost of energy. No contracts have been signed to the proposed rate schedule.

The Amendment to the Petition of D C Tie Inc., provides additional information which was requested by the Rate Filings Branch of the Commission. The additional information relates to the following areas: the ownership structure of D C Tie Inc.; the ownership's affiliation of lack of affiliation with any utility or inputs of the utility industry; and the ownership's agreements or lack of agreements with potential buyers or sellers. This Amendment also requests that the Commission waive the notice requirement and retain the July 10, 1991 effective date requested in the original Petition.

Comment date: June 27, 1991, in accordance with Standard Paragraph E at the end of this notice.

8. Interstate Power Company

[Docket No. ES91-35-000]

Take notice that on June 6, 1991, Interstate Power Company ("Applicant") filed an application with the Federal Energy Regulatory Commission pursuant to 204 of the Federal Power Act seeking authorization to issue not more than $60 million of short-term promissory notes and/or commercial paper on or before December 31, 1992, with a final maturity date no later than December 31, 1993.

Comment date: July 5, 1991 in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs:

E. Any person desiring to be heard or to protest said filing should file should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91-14675 Filed 6-19-91; 8:45 am]

BILLING CODE 6717-01-M

1. SEMASS Partnership

[Docket No. ER91-479-000]

June 11, 1991.

Take notice that on SEMASS Partnership (SEMASS), a qualifying small power production facility on June 6, 1991, tendered for filing as a rate schedule change an executed Second Amendment to power Sale Agreement for SEMASS Expansion dated as of May 24, 1991 (the "Second Amendment), between SEMASS and Commonwealth Electric Company (CEC). The Second Amendment relates to the Power Sale Agreement for SEMASS Expansion dated January 15, 1988 (the "PSA-11"-) between SEMASS and CEC which was accepted for filing by the Commission on February 16, 1989 (ER89-174-000). The PSA-II was previously amended by a certain Amendment to power Sale Agreement for SEMASS Expansion dated as of March 14, 1990 between SEMASS and CEC which was accepted for filing by the Commission on May 18, 1990 (ER90-317-000). The Second Amendment amends two provisions of the PSA-II. The first amended provision requires SEMASS to deliver to CEC a letter of credit which CEC may draw upon if SEMASS does not give the notice to proceed under the construction contract for the expansion unit by December 31, 1991. The second amended provision extends the date by which the in-service date for the expansion unit must occur to July 1, 1995 and requires SEMASS to pay monthly penalties in the event the in-service date does not occur by May 1, 1994. SEMASS is subject to the Commission's ratemaking jurisdiction because its power production capacity is in excess of 30 megawatts. SEMASS also requests waiver of the Commission's regulations requiring that rate schedules be submitted no more than 120 days before the rates are to become effective.

The Second Amendment is necessary because of unforseen delays which have occurred in the development of the expansion unit to which the PSA-II relates.

Copies of the filing were served upon CEC and the Massachusetts Department of Public Utilities.

Comment date: June 26, 1991, in accordance with Standard Paragraph E at the end of this notice.

2. PSI Energy, Inc.

[Docket No. ER91-474-000]

June 11, 1991.e

Take notice that PSI Energy, Inc. (PSI) on June 3, 1991, tendered for filing changes to the rates for certain of its services pursuant to the Interconnection Agreement between PSI and Northern Indiana Public Service Company (NIPSCO), dated January 1, 1974.

The filed changes modify the rates for services provided by PSI under the following Service Schedules of the Interconnection Agreement:

1. Service Schedule A—Emergency Service
2. Service Schedule B—Interchange Power
3. Service Schedule E—Short Term Power

Copies of the filing were served on the Northern Indiana Public Service Company and the Indiana Utility Regulatory Commission.

PSI has requested a waiver of the Commission's Rules and Regulations to permit the proposed rates for services to become effective April 15, 1991.

Comment date: June 26, 1991, in accordance with Standard Paragraph E at the end of this notice.

3. Dr. Kathryn A. McCarthy

[Docket No. ID-2033-000]

June 11, 1991.

Take notice that on June 4, 1991, Dr. Kathryn A. McCarthy (Applicant) tendered for filing an application under section 305(b) of the Federal Power Act to hold the following positions:

Director, Massachusetts Electric Company

Director, State Mutual Life Assurance Company of America

Comment date: June 27, 1991, in accordance with Standard Paragraph E at the end of this notice.

4. The Washington Water Power Company

[Docket No. ER91-476-000]

June 11, 1991.

Take notice that on June 3, 1991, The Washington Water Power Company (WWP), tendered for filing a Firm Energy Sale Agreement between WWP and Southern California Edison Company. WWP requests that the Commission (a) accept the Agreement for filing, effective as of February 1, 1991, and (b) grant a waiver of notice pursuant to 18 CFR 35.11, to allow the filing of the Agreement less than 60 days prior to the date on which service under the Agreement is to commence.

A copy of the filing was served upon Southern California Edison Company.

Comment date: June 26, 1991, in accordance with Standard Paragraph E at the end of this notice.

[Docket Nos. ER91-479-000, et al.]

SEMASS Partnership, et al. Electric Rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

VOL 56 ISS 119 JE 20 1991 UMI

5. United Illuminating Company

[Docket Nos. ER91-385-000 and ER91-386-000]

June 11, 1991.

Take notice that on May 22, 1991, United Illuminating Company (UI) tendered for filing an amendment in support of its original rate filings in the above referenced dockets. UI states that the amendment provides answers to questions asked by the Commission's staff.

Comment date: June 26, 1991, in accordance with Standard Paragraph E at the end of this notice.

6. Tampa Electric Company

[Docket No. EC91-15-000]

June 11, 1991.

Take notice that on June 6, 1991, Tampa Electric Company (Tampa Electric) tendered for filing an application for Commission authorization to purchase from the Sebring Utilities Commission (Sebring) certain transmission facilities with a value in excess of $50,000. The facilities include 21.5 miles of 69 kV transmission line and certain equipment and other property at the Phillips and Diner Lake substations.

Tampa Electric states that the transmission facilities will continue to be used to serve Sebring's municipal distribution system, and to transmit excess power from Tampa Electric's Phillips and Dinner Lake generating plants.

Copies of the application have been served on Sebring and the Florida Public Service Commission.

Comment date: June 27, 1991, in accordance with Standard Paragraph E at the end of this notice.

7. New England Power Company

[Docket Nos. ER90-525-000 and ER90-526-000]

June 11, 1991.

Take notice that on June 7 1991, New England Power Company (NEP) filed a Compliance Refund Report and supporting documentation that effectuates the terms of an uncontested settlement agreement in the W-12(a) rate proceeding in the referenced dockets.

NEP states that appropriate refunds, including interest, were made on May 22, 1991 for the period January 1, 1991 through March 31, 1991.

Comment date: June 26, 1991, in accordance with Standard Paragraph E at the end of this notice.

8. Massachusetts Municipal Wholesale Electric Company v. Northeast Utilities Service Company

[Docket No. EL91-36-000]

June 11, 1991.

Take notice that on May 28, 1991, the Massachusetts Municipal Wholesale Electric Company (MMWEC) tendered for filing a complaint against Northeast Utilities Service Company (NU), in its capacity as agent for the Connecticut Light and Power Company and Western Massachusetts Electric Company.

In its complaint, MMWEC challenges the imposition by NU (through New England Power Company) of "capability responsibility" or "tie line" adjustment charges, which are included in the Non-firm Agreement. In addition, to requesting that complaint proceedings be initiated with respect to the tie line adjustment charge, MMWEC requests that the issue be consolidated with pending review of the identical tie line adjustment in Northeast Utilities Service Company, FERC Docket Nos. ER90-390-000, *et al.*

Comment date: July 11, 1991, in accordance with Standard Paragraph E at the end of this notice.

9. Delano Energy Company Inc.

[Docket No. QF84-52-002]

June 11, 1991.

On May 31, 1991, Delano Energy Company Inc. (Applicant) of 101A First Avenue, Waltham, Massachusetts 02254-9047 submitted for filing an application for recertification of a facility as a qualifying small power production facility pursuant to Section 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility is located in Kern County, California. The primary energy source is biomass in the form of orchard and vineyard prunings, cotton ginnings, almond shells, wood fuels and other agricultural residues. The maximum net electric power production capacity is 49.9 MW.

The original certification was issued on March 23, 1984 (28 FERC 62,302. The instant recertification is requested due to a change in ownership. On December 4, 1990, the Applicant's right, title and interest to the facility were transferred to Manufacturers Hanover Trust Company of California, not in its individual capacity but as owner trustee for the benefit of Westinghouse Credit Corporation.

Comment date: July 22, 1991, in accordance with Standard Paragraph E at the end of this notice.

10. Cogentrix of Mayaquez, Inc.

[Docket No. QF91-154-000]

June 11, 1991.

On May 30, 1991, Cogentrix of Mayaquez, Inc. of 9405 Arrowpoint Boulevard, Charlotte, North Carolina 28273 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to Section 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Mayaquez, Puerto Rico. The facility will consist of two coal-fired boilers and two extraction/condensing steam turbine generators. Thermal energy recovered from the facility will be used in the food processing plants for the cooking, washing and sterilizing operations associated with the processing and canning of tuna fish. The primary energy source will be coal. The net electric power production capacity will be 316.24 megawatts. Installation of the facility will begin after January 1, 1994.

Comment date: July 22, 1991, in accordance with Standard Paragraph E at the end of this notice.

11. Central Vermont Public Service Corporation

[Docket No. ER91-463-000]

June 11, 1991.

Take notice that on May 31, 1991, Central Vermont Public Service Corporation (CVPS) tendered for filing the 1990 Cost Report required under Article 2.4 on Second Revised Sheet No. 18 of FERC Electric Tariff, Original Volume No. 3 of CVPS.

Comment date: June 26, 1991, in accordance with Standard Paragraph E at the end of this notice.

12. Central Vermont Public Service Corporation

[Docket No. ER91-462-000]

June 12, 1991.

Take notice that on May 31, 1991, Central Vermont Public Service Corporation (CVPS) tendered for filing the 1990 Cost Report required under Paragraph Q-1 on Original Sheet No. 18 of the RS-2 rate schedule under which CVPS sells electric power to Connecticut Valley Electric Company Inc.

Comment date: June 26, 1991, in accordance with Standard Paragraph E at the end of this notice.

13. Central Vermont Public Service Corporation

[Docket No. ER91-461-000]

June 12, 1991.

Take notice that on May 31, 1991, Central Vermont Public Service Corporation (CVPS) tendered for filing the 1990 Cost Report required under Article 2.3(A) on Original Sheet No. 21 of FERC Electric Tariff, Original Volume No. 4, of CVPS.

Comment date: June 26, 1991, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance wth Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for pulic inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 2282-004—Maine]

Central Maine Power Co.; Availability of Environmental Assessment

June 14, 1991.

In accordance with the National Environmental Policy Act of 1969 and the Federal Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47910), the Office of Hydropower Licensing (OHL) has reviewed the application for amendment of license at the Gulf Island-Deer Rips Project to allow Central Maine Power Company (licensee) to grant an easement to the Joint Venture for Gulf Island Oxygenation Project (Joint Venture). The easement will allow the Joint Venture to construct an oxygen diffuser system in the Androscoggin River in order to meet state water quality standards.

The staff of OLH's Division of Project Compliance and Administration has prepared an Environmental Assessment (EA) for the proposed action. In the EA, the staff concludes that approval of the amendment would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Reference and Information Center, room 3308, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[FR Doc. 91-14680 Filed 6-19-91; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 663-001, Puerto Rico]

Puerto Rico Electric Power Authority; Availability of Environmental Assessment

June 14, 1991.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for a major license for the existing Rio Blanco Project located on the Rio Blanco in the municipality of Naguabo, near Naguabo, Puerto Rico, and has prepared an Environmental Assessment (EA) for the project. In the EA, the Commission's staff has analyzed the potential environmental impacts of the project and has concluded that approval of the project would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3308, of the Commission's offices at 941 North Capitol Street, N.E., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. ST91-8463-000 through ST91-8638]

Red River Pipeline; Self Implementing Transactions

[June 14, 1991].

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to part 284 of the Commission's regulations, sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA) and section 5 of the Outer Continental Shelf Land Act.[1]

The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction.

A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeline or a local distribution company pursuant to § 284.102 of the Commission's regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's regulations and section 311(a)(2) of the NGPA.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate pipeline or local distribution company pursuant to section 284.163 of the Commission's regulations and section 312 of the NGPA.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.222 and a blanket certificate issued under § 284.221 of the Commission's regulations.

A "G-S" indicates transportation by interstate pipelines on behalf of shippers other than interstate pipelines pursuant to section 284.223 and a blanket certificate issued under section 284.221 of the Commission's regulations.

A "G-LT" or "G-LS" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.224 of the Commission's regulations.

A "G-HT" or "G-HS" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under

[1] Notice of a transaction does not constitute a determination that the terms and conditions of the proposed service will be approved or that the noticed filing is in compliance with the Commission's regulations.

VOL 56 ISS 119 JE 20 1991 UMI

§ 284.224 of the Commission's regulations.

A "K" indicates transportation of natural gas on the Outer Continental Shelf by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.303 of the Commission's regulations.

A "K–S" indicates transportation of natural gas on the Outer Continental Shelf by an intrastate pipeline on behalf of shippers other than interstate pipelines pursuant to § 284.303 of the Commission's regulations

Lois D. Cashell,

Secretary.

[CP91-2172-000,[2] CP91-2173-000, CP91-2174-000, CP91-2175-000, CP91-2176-000]

June 10, 1991.

Take notice that on June 4, 1991, Applicants filed in the above referenced dockets, prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to transport natural gas on behalf of various shippers under their respective blanket certificates issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection and in the attached appendix.

Information applicable to each transaction including the identity of the shipper, the date of the transportation service agreement between the Applicant and the respective shipper, the reference number of the transportation service agreement, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day, and annual volumes, and the docket number and initiation dates of the 120-day transactions under § 284.223 of the Commission's Regulations has been provided by the Applicants and is included in the attached appendix.

The Applicants allege that they would provide the proposed service for each shipper under an executed transportation service agreement and would charge rates and abide by the terms and conditions of the referenced transportation rate schedules. The Applicants contend that construction of facilities is not required with each of the Applicants using existing facilities to provide the proposed transportation service.

Comment date: July 25, 1991, in accordance with Standard Paragraph G at the end of this notice.

[2] These prior notice requests are not consolidated.

5. Northern Natural Gas Company

[Docket No. CP91-2242-000]

June 11, 1991.

Take notice that on June 10, 1991, Northern Natural Gas Company (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP91-2242-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Enron Oil & Gas Company, a producer, under the blanket certificate issued in Docket No. CP86-435-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northern states that, pursuant to an agreement dated May 10, 1991, under its Rate Schedule IT-1, it proposes to transport up to 50,000 MMBtu per day equivalent of natural gas. Northern indicates that it would transport 37,500 MMBtu on an average day and 18,250,000 MMBtu annually. Northern further indicates that the gas would be transported from various receipt points, and would be redelivered in Kansas, Texas, Oklahoma, Wisconsin, and Iowa.

Northern advises that service under § 284.223(a) commenced May 10, 1991, as reported in Docket No. ST91-8862-000.

Comment date: July 26, 1991, in accordance with Standard Paragraph G at the end of this notice.

6. Transcontinental Gas Pipe Line Corporation, et al.

[Docket Nos. CP91-2197-000, [4] CP91-2198-000, CP91-2199-000, CP91-2200-000]

June 11, 1991.

Take notice that the above referenced companies (Applicants filed in the above referenced dockets, prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under their blanket certificates issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection and in the attached appendix.

Information applicable to each transaction, including the identity of the shipper, the type of transaction service, the appropriate transportation rate schedule, the peak day, average day, and annual volumes, and the docket numbers and initiation dates of the 120-day transactions under § 284.223 of the Commission's Regulations, has been provided by the Applicants and is included in the attached appendix.

The Applicants also state that each would provide the service for each shipper under an executed transportation agreement, and that the Applicants would charge the rates and abide by the terms and conditions of the referenced transportation rate schedules.

Comment date: July 26, 1991, in accordance with Standard Paragraph G at the end of this notice.

[1] Quantities are shown in dt for Transco; MMBtu for Columbia and Stingray; and Mcf for Sea Robin.
[2] Offshore Louisiana and offshore Texas are shown as OLA and OTX, respectively.
[3] The CP and RP docket corresponds to applicant's blanket transportation certificate. If an ST docket is shown, 120-day transportation service was reported in it.

7. Commonwealth Gas Company

[Docket No. CI91-85-000]

June 11, 1991.

Take notice that on May 14, 1991, Commonwealth Gas Company (COMGas), a local distribution company, of 157 Cordaville Road, Southborough, Massachusetts 01772, filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abandonment authorizing sales for resale in interstate commerce of any natural gas including gas purchased in a first sale, imported natural gas and liquified natural gas, natural gas purchased from interstate and intrastate pipelines and from local distribution companies, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: July 1, 1991, in accordance with Standard Paragraph J at the end of this notice.

8. Allied Producers Gas Service, Inc.

[Docket No. CI91-81-000]

June 11, 1991.

Take notice that on May 3, 1991, Allied Producers Gas Service, Inc. (Allgas) of suite 2230, LB 127, Plaza of the Americas, 600 North Pearl Street, Dallas, Texas 75201, filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abandonment authorizing sales in interstate commerce for resale of natural gas subject to the Commission's jurisdiction including imported gas, liquified natural gas, gas purchased from interstate natural gas pipelines pursuant to interruptible sales service programs, and gas purchased for "non-first sellers" such as intrastate pipelines and local distribution companies, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: July 1, 1991, in accordance with Standard Paragraph J at the end of this notice.

9. Yates Petroleum Corporation

[Docket No. CI91-86-000]

June 11, 1991.

Take notice that on May 15, 1991, Yates Petroleum Corporation (Yates) of 105 South Fourth Street, Artesia, New Mexico 88210, filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abandonment authorizing sales in interstate commerce for resale of natural gas from any source including sales for resale of imported natural gas and liquified natural gas, gas purchased from non-first sellers pursuant to interstate pipelines discount sales authority and gas purchased from other non-first sellers such as intrastate pipelines and local distribution companies, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: July 1, 1991, in accordance with Standard Paragraph J at the end of this notice.

10. Husky Gas Marketing Inc.

[Docket No. CI91-87-000]

June 11, 1991.

Take notice that on May 16, 1991, Husky Gas Marketing Inc. (HGMI), c/o Husky Oil Operations Ltd., 707—8th Avenue, SW., Box 6525, Station D, Calgary, Alberta, Canada T2P 3G7, filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abandonment authorizing sales for resale in interstate commerce of any natural gas including all NGPA categories of NGA gas, imported natural gas or liquified natural gas, and natural gas sold under any existing or subsequently approved pipeline blanket certificate authorizing interruptible sales of surplus system supply, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: July 1, 1991, in accordance with Standard Paragraph J at the end of this notice.

11. Doswell Limited Partnership

[Docket No. CI91-88-000]

June 11, 1991.

Take notice that on May 20, 1991, Doswell Limited Partnership (Doswell) of 2112 West Laburnum Avenue, suite 108, Richmond, Virginia 23227, filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate

VOL 56 ISS 119 JE 20 1991 UMI

with pregranted abandonment authorizing sales for resale in interstate commerce of all NGPA categories of gas subject to the Commission's NGA jurisdiction, gas purchased from non-first sellers such as intrastate pipelines and local distribution companies, imported natural gas or liquified natural gas, and natural gas sold under any existing or subsequently approved pipeline blanket certificate authorizing interruptible sales of surplus system supply, all as more fully set forth in the applications which is on file with the Commission and open for public inspection.

Comment date: July 1, 1991, in accordance with Standard Paragraph J at the end of this notice.

12. National Fuel Gas Supply Corporation

[Docket Nos. CP91-2234-000, CP91-2235-000, CP91-2236-000, CP91-2237-000, CP91-2238-000, CP91-2239-000, CP91-2240-000]

June 12, 1991.

Take notice that on June 10, 1991, National Fuel Gas Supply Corporation (National), 10 Lafayette Square, Buffalo, New York 14203, filed in the above-referenced dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of shippers under its blanket certificate issued in Docket No. CP89-1582-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the requests that are on file with the Commission and open to public inspection.[1]

Information applicable to each transaction, including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day and annual volumes, and the initiation service dates and related ST docket numbers of the 120-day transactions under § 284.223 of the Commission's Regulations, has been provided by National and is summarized in the attached appendix.

Comment date: July 29, 1991, in accordance with Standard Paragraph G at the end of this notice.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Standard Paragraph

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

[FR Doc. 91-14673 Filed 6-19-91; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP91-2207-000, et al.]

Viking Gas Transmission Company, et al.; Natural Gas Certificate Filings

July 13, 1991.

Take notice that the following filings have been made with the Commission:

1. Viking Gas Transmission Company

[Docket No. CP91-2207-000]

Take notice that on June 7, 1991, Viking Gas Transmission Company (Viking), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP91-2207-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Wisconsin Public Service Corporation, an LDC, under the blanket certificate issued in Docket No. CP90-273-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Viking states that, purusant to an agreement dated September 21, 1990, under its Rate Schedule IT-2, it proposes to transport up to 11,820 Dth per day equivalent of natural gas. Viking indicates that the gas would be transported from Wisconsin, Minnesota, and North Dakota, and would be redelivered in Wisconsin, Minnesota, and North Dakota. Viking further indicates that it would transport 11,820 Dth on an average day and 4,314,300 Dth annually.

Viking advises that service under § 284.223(a) commenced February 1, 1991, as reported in Docket No. ST91-8896.

Comment date: July 29, 1991, in accordance with Standard Paragraph G at the end of this notice.

2. Columbia Gas Transmission Corporation

[Docket No. CP91-2248-000]

Take notice that on June 10, 1991, Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, SE. Charleston, West Virginia 25314, filed in Docket No. CP91-2249-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to install and operate on new delivery point as a jurisdictional sales facility to accommodate natural gas deliveries to Delta Natural Gas Company, Inc. (Delta) in Lee County, Kentucky for the Market Area of Beattyville, under Columbia's blanket certificate issued in Docket No. CP83-76-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is said that the sales through this delivery point would be under Columbia's SGS rate schedule to Delta for residential, commercial and/or industrial service. It is further said that the quantities to be provided through the new delivery point are within Columbia's currently authorized level of service and would be within existing peak day entitlements of Delta.

Comment date: July 29, 1991, in accordance with Standard Paragraph G at the end of this notice.

3. Panhandle Eastern Pipe Line Company

[Docket No. CP91-2169-000]

Take notice that on June 3, 1991, Panhandle Eastern Pipe Line Company (Panhandle) filed in Docket CP91-2169-000 an application pursuant to section 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon partically the sale of natural gas to Central Illinois Light Company (CILCO) and for authorization to increase the service level for Northern Indiana Public Service Company NIPSCO), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Panhandle states that it serves CILCO and NIPSCO pursuant to Panhandle's Rate Schedule G. It is stated that due to recent developments, CILCO and NIPSCO have executed new service agreements to reflect their desired level of contract demand quantity. Panhandle indicates that CILCO's new service agreement would provide for a reduction of its contract demand levels and that NIPSCO's new service agreement would reallocate its summer period monthly contract demand levels, resulting in an overall increase in its annual contract demand. Panhandle states that each of these service agreements would be effective April 1, 1991, and would continue until October 31, 1992.

Panhandle indicates that CILCO's annual contract demand would decrease by 4,071,225 Mcf from the current figure of 27,156,525 Mcf to 23,085,300 Mcf. Panhandle further indicates that NIPSCO's annual contract demand would increse by 14, 900 Mcf from the current figure of 18,803,800 Mcf to 18,818,700 Mcf. Panhandle requests an effective data of April 1, 1991.

Comment date: July 5, 1991, in accordance with Standard Paragraph F at the end of this notice.

4. United Gas Pipe Line Company; Transcontinental Gas Pipe Line Corporation

[Docket Nos. CP91-2247-000, CP91-2246-000]

Take Notice that United Gas Pipe Line Company, P.O. Box 1478, Houston, Texas 77251-1478, and Transcontinental Gas Pipe Line Corporation, P.O. Box 1396, Houston, Texas 77251, (Applicants) filed in the above-referenced dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of shippers under the blanket certificates issued in Docket No. CP88-6-000 and Docket No. CP88-328-000, respectively, pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the requests that are on file with the Commission and open to public inspection.[1]

Information applicable to each transaction, including the identify of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day and annual volumes, and the initiation service dates and related ST docket numbers of the 120-day transactions under § 284.223 of the Commission's Regulations, has been provided by Applicants and is summarized in the attached appendix.

Comment date: July 29, 1991, in accordance with Standard Paragraph G at the end of this notice.

[1] These prior notice requests are not consolidated.

5. Louisiana-Nevada Transit Company

[Docket No. CP91-2160-000]

Take notice that on May 31, 1991, Louisiana-Nevada Transit Company (LNT), P.O. Box 488, Hope, Arkansas 71801, LNT filed a request with the Commission in Docket No. CP91-2160-000 pursuant to section 7(b) of the Natural Gas Act, as amended, and part 157 of the Regulations thereunder, for permission and approval to abandon service to: (1) Arkansas Louisiana Gas Company (Arkla) under LNT's Rate Schedule G-1; and (2) United Gas Pipe Line Company (United) under LNT's Rate Schedule X-2. LNT states that it also proposes to cancel said Rate Schedules G-1 and X-2, all as more fully set forth in the application on file with the Commission and open to public inspection.

LNT states that the service to Arkla sought to be abandoned was authorized by Commission order issued September 30, 1961, in Docket No. G-1440-001, where LNT was authorized to sell to Arkla up to 5,000 Mcf of natural gas per day, but not more than 1,013,185 Mcf of gas for any 12-month period beginning September 1 of each year. LNT also states that by notice dated September 4, 1986, LNT notified United that LNT did not wish to renew the subject service agreement, and that Arkla, by letter dated December 16, 1986, notified LNT of the cancellation of that service agreement, effective December 17, 1986. It is asserted that such service has been provided under LNT's Rate Schedule G-1, which LNT proposes to cancel.

LNT indicates that the service to United sought to be abandoned was authorized by Commission order issued February 27, 1961, in Docket No. CP60-488. LNT avers that such order authorized it to sell to United certain imbalance gas in conection with an exchange agreement, and certain other volumes of gas as LNT may have available. LNT states that such sales were made pursuant to a gas purchase agreement dated August 5, 1960, which contained a 10-year term, that sales terminated as of February 1987, and that such agreement has terminated by its terms. It is stated such service has been provided under LNT's Rate Schedule X-2, which LNT proposes to cancel.

In addition, it is stated that LNT requests an effective date of June 1, 1991, for abandonment to both Arkla and United, to coincide with the proposed effective date in a section 4 rate filing submitted to the Commission concurrently with the abandonment application.

Comment date: July 5, 1991, in accordance with Standard Paragraph F at the end of this notice.

6. National Fuel Gas Supply Corporation

[Docket Nos. CP91-2226-000, CP91-2227-000]

Take notice that the above referenced companies (Applicants) filed in respective dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under blanket certificates issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection.[3]

Information applicable to each transaction including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day, and annual volumes, and the docket numbers and initiation dates of the 120-day transactions under § 284.223 of the Commission's Regulations has been provided by the Applicants and is included in the attached appendix.

The Applicants also state that each would provide the service for each shipper under an executed transportation agreement, and that the Applicants would charge rates and abide by the terms and conditions of the referenced transportation rate schedules.

Comment date: July 29, 1991, in accordance with Standard Paragraph G at the end of this notice.

[3] These prior notice requests are not consolidated.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. TM91-8-4-000]

Granite State Gas Transmission, Inc.; Proposed Changes in Rates

June 14, 1991.

Take notice that on June 12, 1991, Granite State Gas Transmission, Inc. (Granite State), 300 Friberg Parkway, Westborough, Massachusetts 01581 filed the tariff sheets listed below in its FERC Gas Tariff, Second Revised Volume No. 1, proposing changes in rates.

Second Revised Sixth Revised Sheet No. 21
Second Revised Sheet No. 22
Third Revised Sheet No. 24

Granite State proposes an effective date of July 1, 1991 for Second Revised Sixth Revised Sheet No. 21 and Second Revised Sheet No. 22. Granite State proposes an effective date of July 13, 1991 for Third Revised Sheet No. 24.

According to Granite State, its filing is submitted to track the passthrough to its customers of take-or-pay buydown and buyout costs charged Granite State by Tennessee Gas Pipeline Company (Tennessee).

Granite State states that on May 31, 1991, Tennessee filed revised tariff sheets to recover additional new transition costs in Docket No. RP91-29-000. According to Granite State, its tariff sheets reflect the changes in Tennessee's allocation of take-or-pay costs to Granite State in the May 31, 1991 Tennessee filing, and also comply with the requirements of the reallocation of costs to small customers pursuant to Order No. 528-A.

According to Granite State the proposed rate changes are applicable to its jurisdictional sales services rendered to Bay State Gas Company and Northern Utilities, Inc. and to a sale to a direct customer, Pease Air Force Base. Granite State further states that copies of its filing were served upon its customers and the regulatory commissions of the states of Maine, New Hampshire and Massachusetts.

Any person desiring to be heard or to make any protest with reference to said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before June 21, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

[Docket No. TA88-3-7-001]

Southern Natural Gas Co.; Request for Authorization for Residual Three-Year Surcharge Balance

June 14, 1991.

Take notice that on May 16, 1991, Southern Natural Gas Company (Southern), filed with the Commission a request for authorization from the Commission to transfer to its regular Account No. 191 that unrecovered portion of the principal amount included in the three-year surcharge adjustment authorized by the Commission in Docket Nos. TA88-3-7-000, as of the end of the three-year surcharge period, April 1, 1991.

Southern states that the amount to be transferred ($4,464,559) represents less than 14% of the initial balance, and includes no interest since all interest was computed as if the entire principal balance of the three-year surcharge was to be recovered in one year.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 21, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are alreadyparties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

[Docket No. RP91-72-003]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

June 14, 1991.

Take notice that Texas Eastern Tranamission Corporation (Texas Eastern) on June 11, 1991 tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, six copies of the following tariff sheets.

Proposed to be Effective February 15, 1991

Sub Eleventh Revised Sheet No. 72
Sub Eleventh Revised Sheet No. 73
Sub Tenth Revised Sheet No. 74
Sub Eleventh Revised Sheet No. 75
Sub Alt Original Sheet No. 483.1
Sub Alt Original Sheet No. 483B.1
Sub Original Sheet No. 483F.1

Proposed to be Effective April 28, 1991

1st Revised Original Sheet No. 463D.1

Proposed to be Effective July 1, 1991

Sub First Revised Sheet No. 483D.1

Texas Eastern states that the purpose of this filing is to revise the date through which carrying charges on excess take-or-pay surcharge amounts were collected in Docket Nos. RP91-73, RP91-74, and RP91-75 and set forth a refund provision to refund amounts to customers that have paid excess take-or-pay surcharge amounts in Docket No. RP91-72.

The proposed effective dates of the tariff sheets are as listed above.

Texas Eastern states that copies of the filing were served on Texas Eastern's jurisdictional customers,

VOL 56 ISS 119 JE 20 1991 UMI

interested state commissions and all parties in Docket Nos. RP91–72, *et al.*

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.214 and 385.211. All such protests should be filed on or before June 21, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Office of Fossil Energy

[Fe Docket No. 91–22–NG]

Bonus Gas Processors, Inc.; Blanket Authorization To Import and Export Natural Gas, Including Liquefied Natural Gas

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of an order granting blanket authorization to import and export natural gas, including liquefied natural gas.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice that it has issued an order granting Bonus Gas Processors, Inc. blanket authorization to import and export a combined total of up to 110 Bcf of natural gas, including liquefied natural gas, over a two-year period beginning on the date of first import or export. Under this order, Bonus is authorized to import and export natural gas from and to any country with which trade in natural gas has not been prohibited.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, room 3F–056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, June 13, 1991.

Clifford P. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 91–14716 Filed 6–19–91; 8:45 am]

BILLING CODE 6450–01–M

Office of Hearings and Appeals

Issuance of Decisions and Orders During the Week of May 13 Through May 17, 1991

During the week of May 13 through May 17, 1991 the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

Daniel P. Smith, 5/16/91, LFA–0110

Daniel P. Smith (Smith) filed an Appeal from a denial by the Department of Energy's Chicago Operations Office (COO) of a Request for Information which Smith had filed under the Freedom of Information Act (FOIA). In his request, Smith sought a technical proposal that Engineering Resources, Inc. had submitted to COO in response to a Notice of Program Interest. COO released to Smith a copy of the proposal that COO had redacted pursuant to Exemption 4 of the FOIA. In his Appeal, Smith sought the deleted portions of the portions of the proposal. The Office of Hearings and Appeals (OHA) found that COO had properly withheld certain secrets and proprietary commercial information under Exemption 4, but had failed to segregate and release non-exempt items from the proposal. Consequently, OHA remanded the case to COO for segretation and release of non-exempt information.

James L. Schwab, 5/17/91, LFA–115

James L. Schwab filed an Appeal from a determination issued by the DOE's Freedom of Information and Privacy Acts Activities Branch (FOI Branch) of a request for information under the Freedom of Information Act. Mr. Schwab, a former employee of a DOE subcontractor, requested information concerning the temination of his employment. The FOI Branch interpreted Schwab's request to mean that he was seeking documents concerning the termination of his employment by the DOE. Because Schwab had never been employed by the DOE, and had not been terminated by the agency, the FOI Branch determined that no responsive documents could possibly exist. In considering the Appeal, the Office of Hearings and Appeals (OHA) found that although the request submitted by Schwab contained some inaccuracies, and could possibly be interpreted in the manner chosen, the FOI Branch, should have attempted to clarify the request. Accordingly, the OHA granted Schwab's Appeal, and remanded the matter to the FOI Branch to make a new determination on the Appellant's restated request.

Refund Application

Atlantic Richfield Company/Agway Petroleum Corporation, 5/15/91, RF304–1922

The DOE issued a Decision and Order in the ARCO special refund proceeding concerning an Application for Refund filed by Agway Petroleum Corporation (Agway). Agway, a farm supply and food marketing agricultural cooperative owned by 90,000 member-stockholders, resold a total of 68,210,475 gallons of propane, gasoline and #2 heating fuel to members as well as non-members. Agway was granted a full volumetric refund under the end-user/cooperative presumption of injury based on the 1,943,999 gallons of ARCO product that it sold to members. The full volumetric refund yielded $2,068 ($1,429 in principal and $659 in interest). Agway was then granted a medium range presumption of injury refund for the 66,266,476 gallons of ARCO products that it resold to non-members. The medium range refund yielded $29,177 ($19,989 in principal plus $9,208 in interest). The total amount of the refund granted in the Decision was $31,285 ($21,398 in principal and $9,887 in interest).

Atlantic Richfield Company/Galassos Arco Service, Et Al., 5/13/91, RF304–3486, et al.

The DOE issued a Decision and Order concerning nine applications for refund in the Atlantic Richfield Company (ARCO) special refund proceeding. Each of the applications had originally been filed by P.A.D., a "filing service" that was subsequently barred from representing any refund claimants before the DOE. Second applications were then filed on behalf of the same claimants under the same case numbers by Akin Energy, Inc. and/or Fuel Refunds, Inc. The DOE granted refunds to all nine applicants and directed that the refunds be paid directly to the applicants on the basis that the Akin Energy and Fuel Refunds submissions were superfluous and not considered.

The refunds granted in this decision totaled $13,628, including $4,280 in accrued interest.

Exxon Corporation/Fred Wachel Exxon Et Al., 5/17/91, RF307–6220 et al.

The DOE issued a Decision and Order concerning five Applications for Refund filed in the Exxon Corporation special refund proceeding. All of these applications involved two retail outlets that operated as partnerships. Each of the outlets purchased directly from Exxon and was a reseller whose allocable share is less than $5,000. Each applicant was determined to be eligible for either one-half or one-fourth of the allocable share of his respective outlet. The sum of the refunds granted in this Decision is $1,461 ($1,041 principal plus $420 interest).

Exxon Corporation/GAF Corporation, 5/17/91, RF307–6243

The DOE issued a Decision and Order concerning an Application for Refund filed by GAF Corporation in the Exxon Corporation special refund proceeding. GAF, an end-user of products purchased directly from Exxon, was found to be eligible to receive a refund equal to its full allocable share. The refund granted in this Decision is $13,066 ($9,315 principal puls $3,751 interest).

Gulf Oil Corporation/Dock Rabon Gulf, North Trimble Car Wash, Inc., 5/13/91, RR300–19, RR300–20

The DOE issued a Decision and Order concerning Motions for Reconsideration filed by Dock Rabon Gulf and North Trimble Car Wash, Inc. in the Gulf Oil Corporation special refund proceeding. Both applicants had previously filed Applications for Refund in the Gulf Proceeding which were dismissed because the applicants did not provide the information requested by the DOE. In their motions, the applicants provided the required information. Both motions were granted and the applicants were granted refunds totaling $1,596.

North Bergen Piece Dye Works, 5/16/91, RF272–52576

North Bergen Piece Dye Works (North Bergen), a company that consumed petroleum products in the process of dyeing and finishing textiles, filed an Application for Refund in the subpart V crude oil special refund proceeding being conducted by the Office of Hearings and Appeals of the Department of Energy (DOE). The North Bergen Application had been filed by Federal Action, a filing service. The DOE determined, after conversations with the President of Federal Action, that Federal Action had inadequately represented the Applicant and thus the refund would be sent directly to North Bergen. In order to derive the amount of the firm's purchases, the DOE determined the average prices for No. 6 heating oil for the years 1973, 1974, 1975, and 1981. As an end-user, North Bergen Piece Dye Works received a refund of $727.

Quintana Energy Corporation, et al./ Texaco, Inc., 5/14/91, RF332–1

The Office of Hearings and Apeals (OHA) issued a Decision and Order concerning an Application for Refund submitted in the Quintana Energy Corporation, *et al.*, special refund proceeding by Texaco, Inc. The OHA made an initial determination that Texaco was a spot purchaser. The OHA notified Texaco about the initial determination and gave Texaco an opportunity to either show that it was not a spot purchaser or prove that it was injured by its purchases from the consent order firm. Texado did not respond. Accordingly, the OHA denied Texaco's claim based upon the presumption of non-injury for spot purchasers.

Shell Oil Company/Western Motor Service, Inc., Western Motors Service, Inc., 5/14/91, RF315–7032, RF315–10138

The DOE issued a Decision and Order denying the refund application of Kiyoshi Teshima, former owner of Western Motor Service, Inc., and granting the application of Elvin Kaiakapu, present owner of Western Motors Service, Inc. The sale transaction between Mr. Teshima and Mr. Kaiakapu transferred all of the corporation's stock and assets, including the right to receive a refund, to Mr. Kaiakapu.

Texaco, Inc./Coulter Oil Company, Inc., Et Al., 5/17/91, RF321–6966 Et Al.

The DOE issued a Decision and Order concerning six Applications for Refund filed in the Texaco Inc. special refund proceeding. The six applicant firms were owned by the same corporation, but requested that the applications be considered separately because the firms had been unrelated during the consent order period. This request was denied and the purchase volumes were combined in determining the applicable presumption of injury. The sum of the refunds granted in this Decision is $14,464 ($11,712 principal and $2,752 interest).

Texaco Inc./Fred C. Burns Distributing Co. Et Al., 5/16/91, RF321–2309 Et Al.

The DOE issued a Decision and Order concerning four Applications for Refund filed in the Texaco Inc. special refund proceeding. The Applications were all based on the purchases of Texaco products by Fred C. Burns, a Texaco jobber and consignee. Two applications, filed by Fred C. Burns Distributing Co., the corporation that purchased the business were denied because the right to a refund was not transferred upon the sale of the business. The firm was a sole proprietorship before the sale and it was found that there was not transfer of the rights to the refund with the sale of the business. The other applications, filed by Fred C. Burns, the owner of the business during the consent order period, were approved. The refund granted was $12,349 ($10,000 principal plus $2,349 interest).

Texaco Inc./Freeway Texaco, 5/14/91, RR321–24

Robert A. Williams filed a Motion for Reconsideration of a Decision and Order that denied a refund application that he had filed under the name Richard Raine, the former owner of Freeway Texaco. In the Motion, Mr. Williams stated that he had signed Mr. Raine's name because during a portion of the refund period Mr. Raine was the lessee of the station. Mr. Williams also asserted that he intended to forward to Mr. Raine a portion of the refund attributable to the period of time in which Mr. Raine operated the station. The DOE denied the Motion, finding that Mr. Williams had presented no compelling reason for reconsidering the denial of his refund application on the grounds that it had been fraudulently filed.

Texaco Inc./Marshall's Texaco, 5/16/91, RF321–15249

On June 15, 1990, the DOE issued a Decision and Order in the Texaco Inc. refund proceeding concerning an Application for Refund filed by Marshall's Texaco, a retailer of Texaco products. That refund was based upon the applicant's claim that he operated the retail outlet from May 1978 to January 1981, and the volume of purchases at that location between those dates. Subsequently, another applicant filed an application for refund for the same retail location for the period ending December 1978. That second applicant submitted documentary evidence to support its claim. Accordingly, the DOE found that the owner of Marshall's Texaco should repay, with interest, the portion of the refund attributable to purchases made before December 1978.

Washington County, Cecil County Public Schools, Marvland State

VOL 56 ISS 119 JE 20 1991 UMI

Highway Administration, State of Maryland Department of General Services, 5/17/91, RF272–63493, RF272–63496, RF272–63623, RF272–63624

The Department of Energy (DOE) issued a Decision and Order granting refund monies from crude oil overcharge funds to four governmental entities within the State of Maryland that sought refunds based on their purchases of refined petroleum products during the period August 19, 1973 through January 27, 1981. The DOE rejected objections filed by Phillip P. Kalodner, counsel for utilities, transporters and manufacturers in regard to the latter two of these Applications. The four applicants were granted refunds totaling $402,847.

Whiteford Transport Systems, Inc., 5/14/91, RF272–48380

The DOE issued a Decision and Order granting an Application for Refund filed in the crude oil special refund proceeding. The Applicant, Whiteford Transport Systems, Inc. (Whiteford), is a transportation and leasing company. A group of state governments and two territories of the United States (the States) objected to the application filed by Whiteford and provided evidence concerning resellers and retailers. During the period of price controls, Whiteford was engaged in two distinct lines of business: Transportation and leasing. Whiteford has stated that during the crude oil price control period it did lease trucks to customers who were required to pay the cost of fuel. Whiteford's crude oil refund claim, however, was only for those gallons which it consumed as a transporter. The Decision determined that Whiteford was eligible to receive a refund for the gallonage identified in its refund application and granted the firm a $20,177 refund.

Refund Applications

The Office of Hearings and Appeals issued the following Decisions and Orders concerning refund applications, which are not summarized. Copies of the full texts of the Decisions and Orders are available in the Public Reference Room of the Office of Hearings and Appeals.

EXPORT-IMPORT BANK OF THE UNITED STATES

Open Meeting of the Advory Committee of the Export-Import Bank of the United States; Correction

ACTION: Notice of correction of revised meeting agenda.

SUMMARY: The Advisory Committee was established by Public Law 96–181, November 30, 1983, to advise the Export-Import Bank on its programs and to provide comments for inclusion in the reports of the Export-Import Bank to the United States Congress.

TIME AND PLACE: Tuesday, July 2, 1991, from 9:30 a.m. to 12 noon. The meeting will be held at Eximbank in room 1143, 811 Vermont Avenue NW., Washington, DC 20571.

AGENDA: This notice corrects the meeting agenda previously published in the Federal Register June 17, 1991 (56 FR 27752). The revised agenda will include a discussion of the following topics: Program Activity Report/Tied Aid Status, Advisory Committee Comment on Competitiveness Report, Advisory Committee Discussion of Project Financing Parameters, Subcommittee Status Reports: (Emerging Trade Finance—Small Business—Banking), Next Steps, and other topics.

All other information remains the same.

Joan P. Harris,

Corporate Secretary.

BILLING CODE 6690–01–M

FEDERAL MARITIME COMMISSION

Virginia International Terminals, Inc., et al.; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No: 224–200530.

Title: Virginia International Terminals, Inc./Montemar S.A. Terminal Agreement.

Parties:

Virginia International Terminals, Inc. (VIT)

Montemar S.A. (Pan American).

Synopsis: The Agreement provides for Pan American to have the non-exclusive use of the marine terminal facilities at Newport News Marine Terminal (Port), and VIT shall furnish terminal services connected with the operation. Pan American guarantees movement of a minimum of 35,000 short tons per year through the Port. VIT grants Pan American an incentive of 15% discount off tariff charges for wharfage, portainer rental, transtainer-toploader, maintenance and repair inspections, receiving and delivery charges. The term of agreement is for three years.

By Order of the Federal Maritime Commission.

Dated: June 17, 1991.

Joseph C. Polking,

Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[Announcement Number 127]

Pilot and Epidemiologic Studies To Determine the Relationship Between Human Exposure to Hazardous Substances and Adverse Health Outcomes

Introduction

The Agency for Toxic Substances and Disease Registry (ATSDR) announces the continuation of its Superfund-related cooperative agreement/grant program to conduct pilot studies, analytic epidemiologic studies, and site-specific surveillance to determine the relationship between human exposure to hazardous substances in the environment and adverse health outcomes (e.g., selected cancers, birth defects and reproductive diseases, kidney dysfunction, liver dysfunction, immune dysfunction, neurotoxic disorders, and lung and respiratory diseases). The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority areas of Environmental Health and Surveillance and Data Systems. (For ordering a copy of Healthy People 2000, see the Section WHERE TO OBTAIN ADDITIONAL INFORMATION.)

Authority

This program is authorized in section 104(i)(15) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended by the Superfund Amendments and Reauthorization Act (SARA) [42 U.S.C. 9604(i)(15)].

Eligible Applicants

Eligible applicants are the official public health agencies of the states and the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Federated States of Micronesia, the Republic of the Marshall Islands, the Republic of Palau, the Northern Mariana Islands, American Samoa, and federally recognized Indian Tribes. Local health jurisdictions may apply with written concurrence of the state health officer.

Availability Of Funds

Approximately $3,300,000 is available in Fiscal Year 1991 to fund approximately 13 awards. It is expected that 8 non-competing continuations totaling approximately $1,800,000 and about 2 to 5 new and competing renewal awards totaling $1,500,000 will be made. It is anticipated that awards will be for a 12-month budget period with a proposed project period ranging from 1 to 3 years. The length of the project period will depend on the complexity of the problems associated with any particular hazardous substance site. Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds. Pending availability of funds in Fiscal Year 1992 ATSDR will continue approved projects and may fund new projects. Funding estimates may vary and are subject to change.

Purpose

The purpose of this program is to enhance the recipients' capabilities to characterize the relationship between exposure to hazardous substances and adverse health outcomes through the development and use of site-specific health study protocols, studies at multiple sites with similar hazardous substances, and the implementation of site-specific or multiple-site health investigations.

Project Types

Assistance, both financial and technical, will be provided to the recipients for conducting the following types of projects:

A. Pilot Studies of Exposed Individuals

A pilot study is defined as any investigation of exposed individuals, using epidemiologic methods, which would assist in determining exposures or possible public health impacts by defining health problems requiring further investigation through epidemiologic studies, environmental monitoring or sampling, surveillance, or registries. A number of possible investigative plans may be available for conducting pilot studies.

1. Human biologic indicator exposure studies may consist of the sampling of biologic indicators of persons at potentially high risk of exposure to determine whether exposure can be verified. Test results will be compared with published normal values or with results from unexposed reference populations. The biologic tests may include direct assay of chemicals or their metabolites or an indirect assay testing for other biologic markers of exposure. If exposure to hazardous substances can be verified, additional investigations may be recommended to determine whether adverse health effects are occurring. Follow-up recommendations may include public education, additional environmental sampling, additional biologic exposure studies, analytic epidemiologic studies, registries, surveillance projects, or remedial actions.

2. Cluster investigation studies are investigations of putative disease clusters to determine whether the cases represent an unexpected excess in the number of cases in the concerned community. Investigations are designed to confirm the case reports; determine whether they represent an unusual disease occurrence; and, if possible, explore possible etiologic and environmental factors. Follow-up recommendations may include public education, additional environmental sampling, biologic exposure studies, epidemiologic studies, registries, analytic surveillance projects, or remedial actions.

3. Disease- and symptom-prevalence studies are designed to measure the occurrence of self-reported diseases that may be validated through medical records, if available, or specific medical examination. In these studies investigators collect citizens' health concerns in a standardized manner and determine whether a health problem exists in the community that requires further investigation. If an unusual disease occurrence is discovered, additional investigations may be undertaken to determine etiologic factors. The recommendations developed for identified health problems may include public education, additional environmental sampling, biologic exposure studies, analytic epidemiologic studies, registries, surveillance projects, or remedial actions.

B. Analytic Epidemiology Studies

Analytic epidemiologic studies are investigations designed to evaluate the casual nature of associations between exposure to hazardous substances and disease outcome by testing scientific hypotheses. Information to be considered includes the strength of the association between two factors and the biologic plausibility of the outcome. Case-control, cohort, cross-sectional, mortality, or other scientifically valid study designs may be considered, as appropriate. Recommendations may include public education, additional environmental sampling, registries, surveillance projects, or remedial actions.

Surveillance

Surveillance at a particular site may focus on specific hazardous substances at that site as well as monitoring plausible health outcome data (morbidity or mortality) for a specific medical condition. Periodic follow-up of a well-defined, unexposed cohort can be a useful measure of baseline patterns for that disease. The site-specific surveillance may detect usual or unusual patterns of disease; the latter may trigger further investigations, such as a pilot study of exposed individuals or an analytic epidemiologic study. Recommendations based on site-specific surveillance data may include continued surveillance, additional site-specific environmental sampling, remedial action, public education, or the development of a formal exposure or disease registry.

Program Requirements

Applicants must specify the type of award for which they are applying, either grant or cooperative agreement. These two types of federal assistance are explained below.

A. Grants

In a grant, the applicant will be required to conduct the pilot study of exposed individuals, analytical epidemiologic study, and site-specific surveillance without substantial programmatic involvement. Therefore, the grantee's application should be presented in a manner that demonstrates the applicant's ability to address the environmental health problems. In addition, the applicant's protocol should contain consent forms and questionnaires, baseline morbidity and mortality information, procedures for collecting biologic and environmental specimens and for conducting laboratory analysis and medical evaluation of the test results of biologic specimens and statistical and epidemiologic analysis of the study information, and a description of the safeguards for protecting the confidentiality of individuals on whom data are collected.

The grantee is expected to maintain accurate and timely accounting records with proper classification of expenditures to allow a full cost recovery of funds awarded under the grant.

By comparison, the activities of the recipient and the ATSDR for a cooperative agreement are described in paragraph B.

B. Cooperative Agreements

In a cooperative agreement, the funding agency will assist the collaborator in conducting the studies to determine the relationship between exposure to hazardous substances and illness. The application should be presented in a manner that demonstrates the applicant's ability to address the health problem in a collaborative manner with the funding agency.

The cooperative activities of the recipient agency and the funding agency are:

1. Recipient Activities

a. Recipient will review Superfund related environmental sampling information, human disease surveillance information, and other appropriate information to identify populations potentially exposed to hazardous substances.

b. Recipient will design, develop, and implement a protocol to conduct the necessary pilot study of exposed individuals, epidemiologic study, or site-specific surveillance.

c. Recipient is expected to maintain accurate and timely accounting records with proper classification of expenditures to allow a full cost recovery of funds awarded under the grant or cooperative agreement.

d. Recipient is required to provide proof, by citation of State code or regulation or other state procurement given the authority of law, that medical information obtained pursuant to the agreement, which pertains to an individual and is therefore considered confidential, will be protected from disclosure when the consent of the individual to release identifying information is not obtained.

e. Recipient is required to provide written explanation to detail the disposition of technical review comments on all protocols, studies, and results of research (example: final report, scientific presentation, etc.). These technical review comments will be provided to recipient through ATSDR.

f. Recipient will develop a mechanism for ongoing interaction with the affected community.

2. ATSDR Activities

a. ATSDR will assist in developing the pilot study, analytic epidemiologic study, or site-specific surveillance.

b. ATSDR will assist in analyzing the information on background morbidity and mortality rates for the study area.

c. ATSDR will provide epidemiologic and other technical assistance in both the planning and implementation phases of the field work called for under the study protocol.

d. ATSDR will provide consultation and assist in monitoring the collection and handling of information and the sampling and testing activities.

VOL
56
ISS
119
JE
20
1991
UMI

e. ATSDR will participate in the statistical and epidemiologic analysis.

f. ATSDR will collaborate in interpreting the study findings.

g. ATSDR will perform technical review as noted above.

Evaluation Criteria

All applications will be reviewed and evaluated based on the following criteria:

1. Scientific and Technical Review Criteria of New Applications

a. Appropriateness and Knowledge of Study Design—30%

The extent to which the applicant's proposal addresses (1) a rationale for the proposed study design; (2) the identification of a target (exposed/diseased) population; (3) the identification of an appropriate comparison group; (4) a consideration of sample size; (5) a plan for exposure assessment and/or a plan for evaluating adverse health outcomes; and (6) a detailed plan for analysis of the data.

b. Proposed Study—30%

The adequacy of the proposal relevant to (1) the study purpose, objectives, and rationale; (2) the quality of program objectives in terms of specificity, measurability, and feasibility; (3) the specificity and feasibility of the applicant's timetable for implementing program activities and timely completion of the study; and (4) the likelihood of the applicant agency completing proposed program activities and attaining proposed objectives based on the thoroughness and clarity of the overall program.

c. Applicant Capability and Coordination Efforts—15%

The extent to which the proposal has described (1) the capability of the capability of the applicant's administrative structure to foster successful scientific and administrative management of a study; (2) the capability of the applicant to demonstrate appropriate plan for interaction with the community; and (3) the suitability of facilities and equipment available or to be purchased for the project.

d. Quality of Data Collection—15%

The extent to which (1) the questionnaire ascertains the information necessary to meet the objectives, including (but not limited to) information on pathways of exposure and confounding factors; (2) the quality control and quality assurance of questionnaire data are provided, including (but not limited to) interviewer training and consistency checks of data; (3) the laboratory tests (if applicable) are sensitive and specific for the analyte or disease outcome of interest; and (4) the quality control, quality assurance, precision, and accuracy of information for the proposed tests are provided and acceptable.

e. Program Personnel—10%

The extent to which the proposed program staff is qualified and appropriate, and the time allocated for them to accomplish program activities is adequate.

f. Program Budget—(Not Scored)

The extent to which the budget is reasonable, clearly justified, and consistent with intended use of cooperative agreement/grant funds.

2. Review of Continuation Applications

Continuation awards within the project period will be made on the basis of the following criteria:

a. Satisfactory progress has been made in meeting project objectives;

b. Objectives for the new budget period are realistic, specific, and measurable;

c. Proposed changes in described long-term objectives, methods of operation, need for grant/cooperative agreement support, and/or evaluation procedures will lead to achievement of project objectives; and

d. The budget request is clearly justified and consistent with the intended use of cooperative agreement/grant funds.

Other Requirements

A. Objective Review

Applications will be reviewed by an ATSDR convened ad hoc review group established in accordance with the Public Health Service Grants Policy Statement.

B. Technical Review

All protocols, studies, and results of research that ATSDR carries out or funds in whole or in part will be reviewed to meet the requirements of CERCLA section 104(i)(13) as amended by SARA. ATSDR funded or conducted studies must:

1. Be reported or adopted only after appropriate review.

2. Be technically reviewed within a period of 60 days to the maximum extent practical.

3. Be reviewed by no fewer than three or more than seven reviewers who (a) are selected by the Administrator, ATSDR; (b) are disinterested scientific experts; (c) have a reputation for scientific objectivity; and (d) who lack institutional ties with any person involved in the conduct of the study or research under review.

C. Paperwork Reduction Act

Clearance by the Office of Management and Budget (OMB) under Paperwork Reduction Act, is required whenever a *cooperative agreement* recipient uses a reporting form or plans to collect identical kinds of information or data from 10 or more persons. The recipient will not be authorized to expend any funds or take any action whatsoever in soliciting data from any of the public respondents until the CDC Grants Management Officer has notified the recipient that OMB clearance has been obtained.

D. Protection of Human Subjects

This program requires research on human subjects, therefore, all applicants must comply with 42 U.S.C. 289, as implemented by 45 CFR Part 46 regarding the protection of human subjects. Assurances must be provided that the project or activity will be subject to initial and continuing review by an appropriate institutional review committee. The applicant will be responsible for providing evidence of this assurance in accordance with the appropriate guidelines and forms provided in the application kit.

Executive Order 12372 Review

Applications are subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs. E.O. 12372 sets up a system for state and local government review of proposed Federal assistance applications. Applicants (other than federally-recognized Indian tribal governments) should contact their state Single Point of Contact (SPOC) as early as possible to alert them to the prospective applications and receive any necessary instructions on the state process. For proposed projects serving more than one state, the applicant is advised to contact the SPOC of each affected state. A current list of SPOC's including their names, addresses, and telephone numbers is included in the application kit. The due date for state process recommendations is 60 days after the application deadline date for new and competing continuation awards. The granting agency does not guarantee to "accommodate or explain" for state process recommendations it receives after that date.

The following state departments have elected not to participate in the "Intergovernmental Review of Federal Programs": Alaska, Idaho, Kansas, Minnesota, Nebraska, Virginia, American Samoa, the Marshall Islands, the Federated States of Micronesia, and The Republic of Palau.

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance number is 93.161, Health Programs for Toxic Substances and Disease Registry.

Application Submission and Deadline Dates

The original and two copies of application form PHS Form 5161–1 (revised 3/89) shall be submitted to Henry S. Cassell, III, Grants Management Officer, CDC Procurement and Grants Office, 255 East Paces Ferry Road NE., Room 300, Atlanta, Georgia, 30305 by July 19, 1991. By formal agreement, the CDC Procurement and Grants Office will act for and on behalf of ATSDR on this matter.

1. Deadline: Applications shall be considered as meeting the deadline if they are either:

a. Received on or before the deadline date, or

b. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants should request a legibly-dated U.S. Postal Service postmark or obtain a legibly-dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

2. Late Applications: Applications that do not meet the criteria in 1.a. or 1.b. above are considered late applications. Late competing applications not accepted for processing may either be returned to the applicant or held for the next scheduled review cycle.

Where To Obtain Additional Information

If you are interested in obtaining additional information on application procedures, copies of application forms, and other material, please contact the following CDC/ATSDR personnel.

Business Management Technical Assistance: Mr. Van Malone, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., Room 300, Mail Stop E–14, Atlanta, Georgia 30305 or by calling (404) 842–6630 or FTS 236–6630.

Programmatic Technical Assistance: Ms. Terry C. Maricle, Division of Health Studies, Agency for Toxic Substances and Disease Registry, 1600 Clifton Road NE., Mail Stop E–31, Atlanta, Georgia 30333 or by calling (404) 639–0550 or FTS 236–0550.

Please Refer to Announcement Number 127 When Requesting Information and Submitting an Application.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report, Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report, Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (Telephone (202) 783–3238).

Dated: June 13, 1991.

Walter R. Dowdle,

Acting Administrator, Agency for Toxic Substances and Disease Registry.

Centers for Disease Control

Sixth National Conference on Chronic Disease Prevention and Control

The Centers for Disease Control (CDC), the Association of State and Territorial Health Officials, and the Association of State and Territorial Chronic Disease Program Directors (ASTCDPD) will cosponsor the following meeting.

Name: Sixth National Conference on Chronic Disease Prevention and Control: Making Prevention a Reality.

Time and Date: Registration—12 noon–6 p.m., October 21, 1991, and throughout the conference. 8:30 a.m.–5:30 p.m., October 22–23, 1991. 8:30 a.m.–11:30 a.m., October 24, 1991.

The preregistration deadline is September 18, 1991. Preregistration fee is $35; on-site registration fee is $40. Make checks payable to ASTCDPD and mail to Chronic Disease Conference, Pace Enterprises, Inc., 17 Executive Park Drive, Suite 200, Atlanta, Georgia 30329.

Place: Omni Shoreham Hotel, 2500 Calvert Street NW, Washington, DC 20008, telephone 202/234–0700. Conference attendees receive special room rates of $97 for single occupancy and $116 for double occupancy. Reservations should be made directly with the hotel.

Status: Open to the public, limited only by available space.

Purpose: Attendees from around the nation and the world will have both structured and informal opportunities to exchange information, skills, knowledge, and experiences related to chronic disease prevention and control.

Matters to be Discussed: Potentially preventable chronic diseases such as cardiovascular disease, cancer, and women's health issues which account for more than 70 percent of all deaths that occur in the United States and diminish the quality of life of millions of Americans will be discussed.

Contact Person for More Information: Mr. Jack Friel, Chief, Conference Management Operations, Center for Chronic Disease Prevention and Health Promotion, CDC, 1600 Clifton Road, NE, Mailstop K–43, Atlanta, Georgia 30333, telephone 404/488–5390 or FTS 236–5390.

Dated: June 13, 1991.

Associate Director for Policy Coordination, Centers for Disease Control.

[FR Doc. 91–14699 Filed 6–19–91; 8:45 am]

BILLING CODE 4160–18–M

Technical Advisory Committee for Diabetes Translation and Community Control Programs; Meeting

In Accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control (CDC) announces the following committee meeting.

Name: Technical Advisory Committee for Diabetes Translation and Community Control Programs.

Time and Date: 8 a.m.–4:30 p.m., Tuesday, July 23, 1991.

Place: Rhodes Building, 4th Floor Conference Room, 3005 Chamblee-Tucker Road, Atlanta, Georgia 30341. (Exit Chamblee-Tucker Road off I–85).

Status: Open to the public, limited only by the space available.

Purpose: This committee is charged with advising the Director, CDC, regarding priorities and feasible goals for translation activities and community control programs designed to reduce morbidity and mortality from diabetes and its complications. The Committee advises regarding policies, strategies, goals and objectives, and priorities; identifies research advances and technologies ready for translation into widespread community practice; recommends public health strategies to be implemented through community interventions; advises on operational research and outcome evaluation methodologies; identifies research issues for further clinical investigation; and advises regarding the coordination of programs with Federal, voluntary, and private resources involved in the provision of services to people with diabetes.

Matters to be Discussed: The Committee will work to identify long-range goals and objectives for the Technical Advisory Committee for Diabetes Translation and Community

VOL 56 ISS 119 JE 20 1991 UMI

Control Programs. In addition, Division of Diabetes Translation (DDT) staff will provide a comprehensive review of diabetes control programs located in 28 states and territories nationwide.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Frederick G. Murphy, Program Analyst, DDT, Center for Chronic Disease Prevention and Health Promotion, CDC, 1600 Clifton Road, NE, (K-10), Atlanta, Georgia 30333, telephone 404/488-5005 or FTS 236-5005.

Dated: June 13, 1991.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

Office of Community Services

[Program Announcement No. OCS-91-1]

Request for Applications Under the Office of Community Services' Fiscal Year 1991 Discretionary Grants Program; Correction

AGENCY: Office of Community Services, ACF, DHHS.

ACTION: Request for applications under the Office of Community Services' Discretionary Grants Program; correction.

SUMMARY: This notice is being issued to correct certain information in the Program Announcement which was published June 4, 1991 (56 FR 25492-25523). All other information, as published, remains the same.

FOR FURTHER INFORMATION CONTACT: Joseph D. Reid, Chief, Division of Discretionary Grants, 202-401-9345.

In FR Doc. 91-13041, in the issue of June 4, 1991, make the following corrections:

On page 25494, in the second column, second paragraph, last sentence, the amount of the grants should read $50,000.

On page 25497, third column, first complete paragraph, the date for the comment period should read September 6, 1991.

On page 25523, second column, Attachment J, should read as follows:

Attachment J—Checklist for Use in Submitting OCS Grant Applications (Optional)

The application should contain:

1. A signed "Application for Federal Assistance" (SF-424). The letter code for the priority area should be in the lower right-hand corner of the paper;

2. "Budget Information—Non-Construction Program (SF-424A);

3. A signed "Assurances—Non-Construction Program" (SF-424B;

4. A Project Narrative consisting of the following elements preceded by a consecutively numbered Table of Contents that will describe the project in the following order:

(a) Eligibility Confirmation
(b) Analysis of Need
(c) Organizational Experience and Staff Responsibilities
(d) Work Program
(e) Appendices, including By-Laws; Articles of Incorporation; proof of non-profit status where applicable; resumes; Single Point of Contact comments; and, for Priority Area 1.4 only, a written agreement signed by the applicant and an organization funded by the Department of Labor in FY 90 under the YOU Program.

The total number of pages for the entire application package should not exceed 50 pages.

On page 25523, following Attachment J, the following should be inserted:

Attachment K—List of Organizations Funded by the Department of Labor under the YOU Program and Contact Persons

Ms. Gloria Moore, Job Training Division, City of Los Angeles Community Development Department, 215 Sixth Street/10th Floor, Los Angeles, California 90014, 213-237-1747.

Ms. Frankie Coleman, Columbus Private Industry Council, 400 East Town Street/Suite 220, Columbus, Ohio 43215, 614-228-3907.

Ms. Margie Rosas, San Diego Private Industry Council, 1551 4th Avenue/Suite 600, San Diego, California 92101, 619-235-1445 or 619-525-1739.

Ms. Jean Denson, Mississippi Economic Development Department, 301 W. Pearl Street, Jackson, Mississippi 39203, 601-949-2123.

Ms. Ana Palmer, Office of Employment Development, 417 East Fayette Street/Room 468, Baltimore, Maryland 21212, 301-396-5586.

Ms. Deborah Johnson, Philadelphia Private Industry Council, 1617 JFK Boulevard, Suite 1300, Philadelphia, Pennsylvania 19103, 215-567-5627.

Mr. Alvin Darden, Atlanta Private Industry Council, 100 Edgewood Avenue/Suite 1600, Atlanta, Georgia 30303, 404-658-6681.

Dated: June 14, 1991.

Karen Saunders,

Deputy Director, Office of Community Services.

BILLING CODE 4130-04-M

Health Care Financing Administration

Statement of Organization, Functions, and Delegations of Authority

Part F. of the Statement of Organizations, Functions, and Delegations of Authority for the Department of Health and Human Services, Health Care Financing Administration (HCFA) is amended to reflect minor changes to the Bureau of Data Management and Strategy (BDMS). The Division of Medicaid Statistics (DMS) is established in the Office of Program Systems, (OPS) Bureau of Data Management and Strategy, Office of the Associate Administrator for Management and the Medicaid Data Branch, National Claims History Division (NCHD), OPS is abolished. The DMS will gain the responsibility formally vested with the NCHD for input data relating to the Medicaid Statistical Information System. The NCHD will be concerned with the integrity of the National Claims History database for the Medcare program and related hardware requirements.

The Specific Amendment to Part F. is Described Below

• Section FH.20.D.3.b., National Claims History Division (FHE32) is amended and Section FH.20.D.3.c., Division of Medicaid Statistics (FHE33) is added to reflect a focal coordinating point for Medicaid statistics, formerly located within the National Claims History Division. The new sections read as follows:

b. National Claims History Division (FHE32)

• Manages and directs the receipt, control, editing, quality assurance, and basic monitoring of the common working file claims and program liability data.

• Performs the planning, organization, technical consultation, and coordination activities required to design, develop, document control, and ensure the integrity of HCFA's National Claims History database (NCHDB) for the Medicare program and related hardward requirements.

• Defines systems accesses, interfaces, and operational requirements to ensure the efficient development and use of the NCHDB for program purposes.

• Negotiates user requirements and develops design alternatives, systems specifications, test, conversion and implementation plans, operation plans (e.g., HDC support requirements), and documentation for the NCHDB and related applications.

• Defines and coordinates an NCHDB and beneficiary record quality assurance program including the development of process controls, edits, and statistical measures to ensure database validity and integrity for use in program development and evaluating ongoing program operations. Defines and coordinates a beneficiary record quality assurance program to ensure the consistency of data maintained at the Common Working File sites with the enrollment databases.

• Manages NCH database administration activities directed toward ensuring the integrity of the databases.

• Participate in the development and establishement of data standards used for HCFA programs, including uniform billing, uniform coding systems, and common reporting systems.

c. Division of Medicaid Statistics (FHE33)

• Manages and directs the receipt, control, edit, quality assurance, and basic monitoring of input data relating to the Medicaid Statistical Information System (MSIS) and the HCFA-2082.

• Performs the planning, organization, technical consultation, and coordination activities required to design, develop, document control, and ensure the integrity of HCFA's National Claims History database (NCHDB) for the Medicaid program and related hardware requirements.

• Provides standard and ad hoc data files and reports on Medicaid data.

• Designs, implements, and maintains the Medicaid drug information databases.

• Develops, implements, and maintains ADP application telecommunications software to provide access and front end quality control for the various systems maintained in the branch.

• Designs, implements, maintains, and ensures the continuing operations of software applications which array Medicaid dtat in accordance with the ongoing program management needs of HCFA.

• Develops short- and long-range Medicaid IRM plans to ensure that the proper hardware and software is maintained to meet the Agency's PM operations support needs.

• Negotiates user requirements and develops design alternatives, systems specifications, test, conversion and implementation plans, operation plans (e.g., HDC supprot requirements), and documentation for Medicaid and related applications.

• Defines and coordinates a Medicaid data quality assurance program including the development of process controls, edits, and statistical measures to ensure that the databases are reliable for use in program development and evaluating ongoing program operations.

• Identifies and implements processes and procedures that will take maximum advantage of HCFA's multi-level data processing architecture; e.g., taking advantage of the microcomputers to put data and application development at the desk-top where appropriate, as well as to maximize the efficient use of the mainframe to process large-scale applications.

Dated: June 11, 1991.

Robert A. Streimer,

Associate Administrator for Management.

National Institutes of Health

National Institute; Meeting of the Cancer Biology-Immunology Contracts Review Committee

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Cancer Biology-Immunology Contracts Review Committee, National Cancer Institute, National Institutes of Health, June 27, 1991, Executive Plaza North, Conference Room H, 6130 Executive Boulevard, Rockville, Maryland 20892.

This meeting will be open to the public from 9 a.m. to 10 a.m. to discuss administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and section 10(d) of Public Law 92-463, the meeting will be closed to the public from 10 a.m. to adjournment for the review, discussion and evaluation of individual contract proposals. These proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the proposals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Committee Management Officer, National Cancer Institute, Building 31, room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496-5708) will provide summaries of the meeting and rosters of committee members upon request.

Dr. Lalita D. Palekar, Scientific Review Administrator, Cancer Biology-Immunology Contracts Review Committee, 5333 Westbard Avenue, room 805, Bethesda, Maryland 20892 (301/496-7575) will furnish substantative program information.

This notice is being published less than 15 days prior to the meeting due to the difficulty of coordinating the attandance of members because of conflicting schedules.

(Catalog of Federal Domestic Assistance Program Numbers: 93.393, Cancer Cause and Prevention Research; 93.394, Cancer Detection and Diagnosis Research; 93.395, Cancer Treatment Research; 93.396, Cancer Biology Research; 93.397, Cancer Centers Support; 93.398, Cancer Research Manpower; 93.399, Cancer Control)

Dated: June 17, 1991.

Betty J. Beveridge,

Committee Management Officer, NIH.

National Cancer Institute; Meeting: Biometry and Epidemiology Contract Review Committee

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Biometry and Epidemiology Contract Review Committee, National Cancer Institute, National Institutes of Health, June 24, 1991, Executive Plaza North, Conference Room G, 6130 Executive Boulevard, Rockville, Maryland 20892.

This meeting will be open to the public from 9 a.m. to 9:30 a.m. to discuss administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and section 10(d) of Public Law 92-463, the meeting will be closed to the public from 9:30 a.m. to adjournment for the review, discussion, and evaluation of individual contract proposals. These proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the proposals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Committee Management Office, National Cancer Institute, Building 31, room 10A06, National Institutes of Health, Bethesda, Maryland 20892, Tel. 301-496-5708, will provide a summary of meeting and a roster of committee members upon request.

Dr. Harvey P. Stein, Scientific Review Administrator, Biometry and Epidemiology Contract Review Committee, 5333 Westbard Avenue,

VOL 56 ISS 119 JE 20 1991 UMI

room 807, Bethesda, Maryland 20892, Tel. 301–496–7030, will furnish substantive program information.

This notice is being published less than 15 days prior to the meeting due to the difficulty of coordinating the attendance of members because of conflicting schedules.

BILLING CODE 4140–01–M

Public Health Service

Meeting of the Advisory Committee on Scientific Integrity, Public Health Service

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Advisory Committee on Scientific Integrity, Public Health Service, on July 15–16, 1991 at the National Institutes of Health, Bethesda, MD. The meeting will take place July 15 from 8:30 a.m. to 4:30 p.m., and on July 16 from 8:30 a.m. to 12:30 p.m., Building 31, C Wing, Conference room 7. The meeting will be open to the public.

The Committee reviews and evaluates, on an ongoing basis, the efficacy of policies and procedures of the Department of Health and Human Services in detecting, deterring, investigating, and resolving allegations of scientific misconduct and makes recommendations to the Secretary and the Assistant Secretary for Health on improving these policies and procedures.

The purpose of the meeting will be to introduce the Committee to the structure and function of the PHS Scientific Integrity programs and to examine ongoing activities. The Committee members will also begin to formulate future plans for the Committee.

Henrietta D. Hyatt-Knorr, Executive Secretary, Advisory Committee on Scientific Integrity Review, Rockwall II, suite 1113, 5515 Security Lane, Rockville MD 20852, (301) 443–5300, will furnish the meeting agenda, a roster of the Committee members, and substantive program information upon request. Members of the public wishing to make presentations should contact the Executive Secretary and forward a copy of their presentation at least two weeks ahead of time. Depending on the number of presentations and other considerations, the Executive Secretary will allocate a time frame for each speaker.

Lyle W. Rivers,

Director, Office of Scientific Integrity Review.

BILLING CODE 4160–17–M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Central Arizona Project (CAP) Water Allocations and Water Service Contracting

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of proposal water reallocation decision for uncontracted CAP non-Indian agricultural water allocations and request for comments.

SUMMARY: The purpose of this action is to provide public notice of the Department's proposes reallocation of currently uncontracted CAP non-Indian agricultural water allocations. Except as noted below, the Department proposed to reallocate 29.3 percent of CAP uncontracted non-Indian agricultural water allocations as recommended by the Arizona Department of Water Resources (ADWR) and to offer amendatory or new subcontracts for such water to non-Indian agricultural users. The contracting process which follows the final allocation decision will include consideration of a full range of contracting terms and conditions and will provide an opportunity for public review and comment. The Department will reserve for discretionary use any non-Indian agricultural allocations that are uncontracted after completion of the contracting process.

DATES: All written comments relevant to the proposed reallocation decision that are received on or before July 22, 1991, will be considered.

ADDRESSES: Interested parties should contact Mr. Donald Walker, Contracts and Repayment Specialist, Bureau of Reclamation, Department of the Interior, 1849 C Street, NW., Washington, DC 20240 (telephone: 202–208–5671) or Mr. Steve Hvinden, Regional Economist, Bureau of Reclamation, PO Box 427, Boulder City, Nevada 89005 (telephone 702–293–8651).

SUPPLEMENTARY INFORMATION: Previous Departmental Federal Register notices relating to CAP water allocations are as follows: 37 FR 28092, December 20, 1972; 40 FR 17297, April 18, 1975; 41 FR 45863, October 18, 1976; 45 FR 52936, August 8, 1980; 45 FR 81265, December 10, 1980; 46 FR 29544, June 2, 1981; 48 FR 60656, December 11, 1981; and 48 FR 12446, March 24, 1983. CAP water allocation decisions are made pursuant to the Reclamation Act of 1902, as amended and supplemented (32 Stat. 388, 43 U.S.C. 391), the Boulder Canyon Project Act of December 21, 1928 (45 Stat. 1057, 43 U.S.C. 617), the Colorado River Basin Project Act of September 30, 1968 (82 Stat. 885, 43 U.S.C. 1501), the Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act (40 CFR part 1505), the Implementing Procedures of the Department of the Interior (516 DM 5.4), and in recognition of the Secretary's trust responsibility to the Indian tribes of central Arizona.

Forcing Event

Section 11(h) of the Salt River Pima-Maricopa Indian Community Water Rights Settlement Act of 1988 (Pub. L. 100–512) (102 Stat. 2550) provides that the Secretary must reallocate uncontracted non-Indian agricultural CAP water within 180 days of receiving ADWR's recommendations. The official date of receipt of ADWR's allocation recommendations was January 29, 1991, thereby establishing July 28, 1991, as the deadline for this reallocation decision.

Background

The CAP is a multi-purpose project which provides water for municipal and industrial (M&I), Indian, and non-Indian agricultural uses. The last allocations of CAP water, the conditions upon which those allocations were made, and the procedures for water service contracting were published in the Federal Register (48 FR 12446, March 24, 1983). That notice contained the Secretary's final decision, summarized CAP issues, and provided basic background information applicable to this proposed reallocation.

In the 1983 notice, the Secretary allocated 638,823 acre-feet of water per year to non-Indian M&I users and 309,828 acre-feet of water per year to Indian users. The non-Indian agricultural water users were to receive any CAP supply that remained after the non-Indian M&I and Indian entities used their entitlements. The supply allocated to each of the 23 non-Indian agricultural users was stated in terms of a percentage of the total non-Indian agricultural supply. The non-Indian agricultural allocation was based on a percentage which represented each allottee's portion of the total irrigated acreage, with an adjustment to reflect any other surface water supply available to the allottee.

Since the 1983 notice was published, the Central Arizona Water Conservation District (CAWCD) and the Bureau of Reclamation (Reclamation) have been entering into long-term CAP water service subcontracts with those entities receiving an allocation of CAP agricultural water. CAWCD is the entity which has contracted with Reclamation for repayment of the costs of the project. The combined entitlement for entities which have entered into CAP water service subcontracts subsequent to the 1983 notice represents 70.7 percent of the non-Indian agricultural supply. Eleven entities have declined their CAP water allocation for a total of 23.82 percent of the non-Indian agricultural supply. Two entities which were allocated the remaining 5.48 percent of the agricultural supply have not yet contracted for such water.

Water deliveries pursuant to the subcontracts will begin following Reclamation's issuance of a notice of completion for CAP. It is anticipated that such a notice will be issued sometime in late 1992. In the meantime, CAP water deliveries have been made and are being made through completed portions of the CAP aqueduct pursuant to interim water service contracts.

The 1983 notice provided for a reallocation of the CAP water after the initial round of water service contracting had been completed. An interest in proceeding with the reallocation has existed for several years. However, the Department and ADWR have refrained from proceeding with the reallocation until there was more certainty about the amount of allocations involved and until ongoing negotiations for Indian water rights settlements had been completed. The Salt River Pima-Maricopa Indian Community Water Rights Settlement Act of 1988, in effect, compelled the Secretary to request ADWR in November of 1988 to make a recommended reallocation of uncontracted non-Indian CAP agricultural water to the Secretary. The amount of time that ADWR had to respond to the request was not specified. However, ADWR was required to complete its recommendation by January 7, 1991, by the decision of the Arizona Superior Court in the case, *Central Arizona Irrigation and Drainage District et al.* v. *Plummer*, No. CIV–30612.

In response to the request from Reclamation and in compliance with the Court order, ADWR recommended to the Secretary by its letter dated January 7, 1991, how the remaining 29.3 percent of the non-Indian agricultural supply should be reallocated. In arriving at its recommendations, ADWR conducted an extensive public input and review process which elicited numerous opinions, options, and alternatives. By letter dated January 15, 1991, ADWR supplemented its recommendations to the Secretary with a report explaining the methodologies used to calculate the water recommendations, discussing the factors considered in making the recommendations, and addressing issues and concerns raised by public comments. Some of these issues and concerns are discussed below.

ADWR's report submitted with the January 15, 1991, letter was fully considered and used in developing options for consideration. Anyone interested in receiving a copy of ADWR's letters dated January 7 and 15, 1991, and accompanying report, should refer to the "Addresses" section of this notice for a contact person.

Policy and Legal Issues

Issue 1. Reallocation of uncontracted non-Indian agricultural water allocations for use in central and southern Arizona Indian water rights settlements.

Discussion: Negotiated water rights settlements with Indian tribes have been and are being pursued by the United States for tribes in central and southern Arizona. Generally, the United States participates in settlements by making contributions of water and/or money. Potential water supplies for existing and future settlements are limited. Some parties view the uncontracted CAP agricultural water supply as a potential source of water for Indian water rights settlements.

The Department believes that there are barriers which prohibit the first round reallocation of non-Indian agricultural water for Indian water rights settlements. As noted in the "Forcing Event" section of this notice, subsection 11(h) of the Salt River Pima-Maricopa Indian Community Water Rights Settlement Act of 1988 provides that "Within thirty days after the date of enactment of this Act, the Secretary shall request the Arizona Department of Water Resources to recommend a reallocation of non-Indian agricultural CAP water that has been offered to but not contracted for by potential non-Indian agricultural subcontractors. Within one hundred and eighty days of receipt of such recommendation, the Secretary shall reallocate such water for non-Indian use, and the Secretary and CAWCD shall thereafter offer amendatory or new subcontracts to non-Indian agricultural users." A similar provision is included in existing CAP water service subcontracts with agricultural subcontractors. The subcontracts provide that "After consultation with the Arizona Department of Water Resources, the Secretary shall reallocate to non-Indian agricultural use all entitlements to Agricultural Water that were not contracted for by the entities to which such entitlements were first made available."

Issue 2. Impact of reallocation decisions on CAP cost allocation.

Discussion: CAWCD is the repayment entity for CAP through its repayment contract with the United States. CAWCD will rely on revenues received from the sale of power, ad valorem taxes, and revenues from its water service subcontractors to make its annual payments to the United States. The question arises as to how any reallocation decision will impact the CAP cost allocation.

If the reallocation decision only alters the distribution of uncontracted water allocations among the non-Indian agricultural entities, there would be no change in the amount of costs allocated to CAWCD. If some of the non-Indian agricultural allocations were allocated for Indian water rights settlement purposes, the CAP cost allocation would be affected.

Issue 3. Impact of reallocation decision on the repayment capabilities of CAP non-Indian irrigation districts.

Discussion: Existing CAP water entitlements for each irrigation district which contracts for CAP water will change. In almost all cases the quantities of CAP water available to each irrigation district will increase. This will affect the districts' operation and maintenance cost structure since the districts will probably use more CAP water and less ground water than would have been the case in the absence of the reallocation. If CAP water costs more than ground water, which is likely to be the case for most districts in the early years of CAP operations, the reallocation might have an adverse impact on the districts' ability to pay CAP water service charges and to repay the debt owed to the Federal Government for CAP distribution systems.

Issue 4. Local concerns addressed by ADWR.

Discussion: During its public involvement process, ADWR heard numerous local concerns, which are discussed in its January 15, 1991, reallocation report entitled "Recommendation to the Secretary of the Interior on Reallocation of Central Arizona Project Non-Indian Agricultural Water". These concerns, among others, included whether (1) new entities should be considered for an allocation, (2) entities outside of the CAWCD three-

VOL 56 ISS 119 19 JE 20 1991 UMI

county service area should be considered for an allocation, and (3) CAP water should be reallocated to the State active management areas (AMA) in the same proportion as in the 1983 allocation.

The Department does not believe that the reallocation must be limited to the existing subcontractors. With respect to whether CAP water can only be delivered for use within CAWCD's three-county service area (Maricopa, Pinal, and Pima Counties), CAWCD's repayment contract provides for delivery of CAP water outside of CAWCD's service area if the Contracting Officer approves such delivery. Therefore, the Department believes that CAP agricultural water can be allocated, as ADWR recommends, for use outside the three-county area.

Entities in the Tucson area have indicated that agricultural water allocations that were rejected in the original contracting process should be reallocated to the same AMA. These entities have indicated that the ADWR recommendations result in a gain to the other AMA's at the expense of the Tucson AMA.

The Department does not believe that the water allocation relationships that existed in the 1983 allocation must necessarily be preserved in the reallocation. Non-Indian agricultural supplies for CAP have been allocated and continue to be allocated on the basis of eligible acreage. Since some of the irrigation districts within the Tucson AMA rejected their CAP water allocations, there are fewer eligible lands within the Tucson AMA that can participate in the reallocation. The Department cannot require entities in the Tucson AMA to contract for CAP agricultural water. Allocation of CAP water on the basis of eligible acreage cannot be accomplished by adhering strictly to the water allocation relationships among AMA's that existed in the 1983 allocation.

Options

1. Reallocate in accordance with ADWR recommendations.

2. Reallocate to the 10 existing subcontractors, with the stipulation that any allocations not contracted for within 180 days of the reallocation decision shall revert to the Secretary for discretionary use.

3. Reallocate as recommended by ADWR, with the stipulation that any allocations not contracted within the timeframes recommended by ADWR shall revert to the Secretary for discretionary use.

Option 1. Reallocate in accordance with ADWR recommendations. The complete text of the ADWR recommendations is quoted below. Bracketed words are inserted for clarification purposes.

1. Entitlements contained in article 4.13(a) of all existing non-Indian agricultural subcontracts be adjusted pursuant to article 4.13(b) as follows:

Irrigation district (subcontractor)	Existing entitlement (percent)	Proposed new entitlement (percent)
Central Arizona IDD	18.01	22.74
Chandler Heights Citrus ID	0.28	0.30
Harquahala Valley ID	7.67	6.79
HoHoKam ID	6.36	6.97
Maricopa-Stanfield IDD	20.48	22.75
New Magma IDD	4.34	7.23
Queen Creek ID	4.83	4.83
Roosevelt Water CD	5.96	6.33
San Tan ID	0.77	0.77
Tonopah ID	1.98	1.98

2. Entitlements for entities which received original allocations [48 FR 12446, March 24, 1983] but the contracting deadlines have not been imposed [entities which have not entered into water service subcontracts] be adjusted as follows:

Subcontractor	Original entitlement (percent)	Adjusted entitlement (percent)
Farmers Investment Co. [FICO]	1.39	1.64
San Carlos IDD [SCIDD]	4.09	6.84

3. New subcontracts be offered with the indicated entitlements to:

Subcontractor	Entitlement (percent)
Arizona State Land Department:	
Lease #01-00694 (Picacho Pecans)	0.54
Lease #01-077685 (Aguirre)	0.11
McMullen Valley Water CDD [MVWCDD]	3.17
Roosevelt ID [RID]	5.0

4. No subcontract be offered to an entity in Recommendation No. 3 above unless within one year from [the Secretary's] decision on the allocation the entity provides the following:

a. Demonstration to the satisfaction of both the Secretary and Department [ADWR] that it is economically feasible to distribute CAP water for agricultural production to the eligible lands in the entity's leasehold or service area and there is no impediment to any necessary exchange agreements.

b. A commitment to relinquish any allocation of "Hoover B" electric power [Incremental capacity and energy resulting from the up-rating program of the Hoover Dam Power Plant pursuant to Pub. L. 98-381 (98 Stat. 1333)].

c. Demonstration to the satisfaction of the Secretary and the Department [ADWR] that there will be in place provisions to comply with section 304(c)(1) of Public Law 90-537 for any entity located outside of an existing Active Management Area or Irrigation Non-expansion Area.

5. A determination of eligible acres be made [by the Secretary] before a subcontract is offered to an entity in Recommendation No. 3 above and the allocation adjusted, if necessary, in a manner consistent with the methodology used by the Department [ADWR] in this recommended reallocation.

6. Once the record of decision is made [by the Secretary], the adjustments to the existing subcontractor's entitlements be completed in 6 months. New subcontracts should be executed within 6 months [with the allottees listed in item No. 3] after the requirements of Recommendation No. 4 have been completed.

7. If any of the allottees decides [sic] on a lesser entitlement than the amount recommended, or that it does not want to subcontract, then all remaining entities' entitlements should be increased [by the Secretary] in a manner consistent with the methodology used by the Department [ADWR] in this recommended reallocation.

Discussion: ADWR developed three criteria for determining whether an entity should be included in the reallocation. These criteria include the following: (1) The entity must have lands that are eligible to receive CAP agricultural water; (2) the entity must be located in an area experiencing a declining ground water table; and (3) the entity must currently be providing water for agricultural use.

In addition to the 10 entities that have signed CAP water service subcontracts, ADWR has recommended allocations to: (1) Three new entities (MVWCDD and the two State leases); (2) two entities included in the 1983 allocation (SCIDD and FICO) but which have not yet signed a CAP subcontract; and (3) one entity (RID) which had previously rejected a CAP subcontract but subsequently decided to seek an allocation during the reallocation recommendation process.

With one exception, all of the allottees would take direct delivery of CAP water. RID would benefit from the reallocation through an effluent exchange with the city of Phoenix. RID's CAP agricultural water would be delivered to Phoenix and Phoenix would deliver treated effluent to RID for agricultural purposes. Under the State's recommendation, RID would have to document to the Secretary and ADWR that there is no impediment to implementing such an exchange as a prerequisite to receiving an offer of a CAP water service subcontract. The facilities to deliver effluent from Phoenix to RID will be constucted as part of an exchange agreement under the Salt River Pima-Maricopa Indian Community Water Rights Settlement Act of 1988.

The State's recommendation would expand the eligible land base (418,890 acres) to receive CAP agricultural water, thereby increasing the possibility that Arizona will be able to use its full apportionment of Colorado River water. One of the primary purposes of CAP is to provide a means for the State to fully utilize such apportionment. The land base currently under subcontract may not be great enough to use all available CAP agricultural water in the early project years. Presently, the State does not have the capability to recharge large amounts of CAP water during the early years of the project.

Expanding the eligible land base increases Federal oversight required for administering the Reclamation Reform Act of 1982. However, these additional Federal costs are not expected to be substantial.

ADWR has recommended that MVWCDD receive a water allocation. The city of Phoenix owns most of the lands in the District. Phoenix has purchased the lands in MVWCDD as a water farm and intends to eventually transport ground water from such lands to the Phoenix service area. Phoenix plans to farm the land until such time as the ground water is needed within its service area. The use of CAP agricultural water on the MVWCDD lands will allow Phoenix to retain more ground water in the aquifer for future use in its service area.

An allocation to MVWCDD would require a high pump lift (approximately 600 feet) to convey CAP water to the District's lands. Nearly all of the CAP agricultural water for other CAP users will be delivered by gravity systems. Because of the high lift required for MVWCDD to utilize CAP water, the State has recommended that MVWCDD document that it has the financial capability to take and use CAP water for agricultural purposes before a subcontract can be offered to MVWCDD. The State has also recommended that the financial feasibility requirement be applied to RID and the two State leases.

ADWR has recommended that two other conditions be imposed on MVWCDD in order for MVWCDD to receive an offer of a CAP subcontract. The CAP authorizing legislation provides that subcontracts must require that adequate measures are in effect to control expansion of irrigation from aquifers in the subcontractor's service area. There is nothing under State law which would prevent MVWCDD from expanding its irrigation service area after it receives a CAP subcontract. The State has recommended that MVWCDD must satisfy the Department and ADWR that MVWCDD can meet the Federal requirement. ADWR has also recommended that MVWCDD must relinquish its allocation of Hoover B electric power as a condition of receiving a CAP water service subcontract. This condition would place MVWCDD on the same footing as the existing CAP water subcontractors, which were required to relinquish their entitlement to Hoover B power as a condition of receiving CAP water. Hoover B power is capacity and energy made available due to the up-rating of the power plant at Hoover Dam that was authorized by the Hoover Dam Power Plant Act of 1984 (Pub. L. 98-381, 98 Stat. 1333).

Under the CAP agricultural water service subcontracts, the agricultural water service subcontractors have the right to convert the agricultural entitlement to an M&I entitlement at the rate of 1 acre-foot per acre when the agricultural entitlement is no longer needed for agricultural purposes or when the eligible lands convert to M&I use. Any expansion of the CAP eligible acreage increases the potential for M&I conversions in the future. Since M&I water made available as a result of conversions has the same priority as the original 640,000 acre-feet of water that was allocated for M&I use, the allocation of agricultural water to new areas has the potential to further dilute the priority of the entire CAP M&I water supply during times of CAP water shortages.

Selection of this option would indicate that the Secretary had accepted the State's criteria and rationale for the reallocation. The Department has a history of giving deference to the State's recommendations regarding the use of Colorado River water by non-Indian entities.

Option 2. Reallocate uncontracted agricultural water allocations to the 10 existing subcontractors with the stipulation that any allocations not contracted for within 180 days of the reallocation decision shall revert to the Secretary for discretionary use. Water service contracts would be offered based on the percentages shown in the table below.

Irrigation district (Subcontractor)	Existing entitlement (Percent)	Proposed new entitlement (Percent)
Central Arizona IDD	18.01	27.67
Chandler Heights Citrus ID	0.28	0.36
Harquahala Valley ID	7.67	10.62
HoHoKam ID	6.36	8.45
Maricopa Stanfield IDD	20.48	27.67
New Magma IDD	4.34	5.78
Queen Creek ID	4.83	5.83
Roosevelt Water CD	5.96	7.70
San Tan ID	0.77	0.91
Tonopah ID	1.98	1.98

Discussion: Under this option, all CAP agricultural water allocations would be reallocated to existing subcontractors located in existing State-identified critical ground water basins.

The reservation feature of this option may provide a source of water for meeting the Secretary's obligation as trustee for Indian tribes. Litigation concerning Indian reserved water rights in central and southern Arizona has been proceeding for more than 15 years. Settlements have been reached in several cases, and negotiations are ongoing for the San Carlos Apache Tribe and the Gila River Indian Community. The Secretary has not yet identified firm supplies of water to meet his obligations under existing water rights settlement acts, and must identify and secure additional blocks of water for pending settlements. The Secretary is committed to finding sources of water for existing Indian water rights settlements where sources of water have not been identified and in finding sources of water for use in pending Indian water rights settlements. This option would also be consistent with the Secretary's legal obligation to protect the Federal reserved rights of Indian tribes.

Option 3. Reallocate uncontracted agricultural water allocations as recommended by ADWR, with the stipulation that any allocations not contracted for within the timeframes recommended by ADWR shall revert to the Secretary for discretionary use.

Discussion: This option is a combination of options 1 and 2 above. By selecting this option, the Secretary would be adopting the State's criteria and rationale for the reallocation but would be retaining some flexibility for use of the non-Indian agricultural allocations in Indian water rights settlements and for other purposes in the event that some of the uncontracted allocations are not placed under

VOL 56 ISS 119 JE 20 1991 UMI

contract. Please refer to the discussion under options 1 and 2. This option would not fully accept the State's recommendation because it does not reallocate any agricultural allocations remaining after the contracting process to the remaining subcontractors.

Proposed Reallocation Decision

Option No. 3. The State has adopted reasonable criteria for developing its allocation recommendations, and the recommendations were developed through a process which solicited public input. Given the existing contracts and the legal requirements contained in section 11(h) of the Salt River Pima-Maricopa Indian Community Water Rights Settlement Act that the uncontracted water allocations must be allocated for non-Indian agricultural use, the Department believes that it is appropriate to defer to the State with respect to the allocation of the non-Indian agricultural water supply. The Department has a history of giving deference to the State's recommendations regarding the allocation of water among non-Indian entities and a policy of deferring to the State on water issues unless there is an overriding Federal interest. The Department believes, however, that it is appropriate that the Secretary retain some flexibility to use any allocations that become available following completion of the contracting program for use in Indian water rights settlements or for other purposes. With that understanding, the Department proposes to reallocate uncontracted CAP non-Indian agricultural water allocations and to proceed with water service contracting as recommended by ADWR.

Compliance with the National Environmental Policy Act of 1969 (NEPA)

Previous notices concerning compliance with NEPA in connection with CAP water allocations were published on June 2, 1981 [46 FR 29544]; December 4, 1981 [46 FR 58316]; December 11, 1981 [46 FR 60658]; and March 24, 1982 [47 FR 12669]. The Department has prepared an environmental assessment (EA) on the proposed reallocation decision and on alternative reallocation options. The draft EA is currently being circulated for public review and comment. Anyone interested in receiving a copy of the draft EA should contact Mr. Bruce Ellis, Chief, Environmental Division, Arizona Projects Office, Bureau of Reclamation, P.O. Box 9980, Phoenix, Arizona 85068 (telephone 602-870-6767).

Once the EA has been completed, the Department will determine whether to prepare a "Finding of No Significant Impact" or an environmental impact statement. Implementation of the reallocation decision will be subject to further compliance with the requirements of NEPA.

Effect on Previous Decisions

When finalized, the proposed decision will supplement, and to the extent it is inconsistent therewith, supersede the non-Indian agricultural water allocation published by Secretary Watt on March 24, 1983.

Dated: June 17, 1991.

Manuel Lujan Jr.,

Secretary of the Interior.

[FR Doc. 91-14750 Filed 6-19-91; 8:45 am]

BILLING CODE 4310-RK-M

Bureau of Land Management

[AZ-930-01-4214-12; A-702, A-2885]

Termination of Multiple-Use Classification and Natural Area Designation; AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Present action terminates the multiple-use classification and natural area designation on approximately 44 acres of public land and will allow for a land exchange for the enhancement of other Bureau programs. The subject area is in an area of potential development and no longer suitable for multiple-use management or natural area designation. Disposal of the property is in conformance with recommendations in the Arizona Strip Resource Management Plan.

EFFECTIVE DATE: July 22, 1991.

FOR FURTHER INFORMATION CONTACT: John Mezes, Bureau of Land Management, Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011, (602) 640-5509.

SUPPLEMENTARY INFORMATION: On June 20, 1967, and November 15, 1968, the land described below was included as a part of multiple-use classification actions segregating it from most forms of entry under the general land laws and the mining laws pursuant to the terms and conditions of the Act of September 19, 1964. On January 10, 1969, the area was designated a Class III natural environment area under the Bureau of Outdoor Recreation system of classification.

With the passage of the "Arizona Wilderness Act of 1984" on August 28, 1984, the Paria Canyon-Vermillion Cliffs area was designated as wilderness. With boundary adjustments allowed by the Wilderness Act, the subject area was eliminated from the wilderness designation. The lands retained its multiple-use classification and natural area designation. Lands affected by this action are located and identified as follows:

Gila and Salt River Meridian

T. 39 N., R. 7 E.,
Section 7, Lots 6 and 7, S½S½ (that portion between the wilderness boundary, Vermillion Cliffs Lodge and the private land belonging to the Badger Creek Homeowners lying west of Highway 89A).

The area contains approximately 44 acres in Coconino County.

1. The classification decisions dated June 20, 1967, and November 15, 1968, and the natural area designation dated January 10, 1969, as published in the Federal Register are hereby terminated in their entirety as they affect the above-described lands.

2. At 10 a.m. on June 20, 1991, the above-described land will be opened to operation of the public land laws, subject to valid existing rights and the provisions of applicable law.

3. At 10 a.m. on June 20, 1991, the above-described land will be opened to location and entry under the United States mining laws, subject to valid existing rights, the provision of existing withdrawals, any segregation of record and the requirements of applicable law. Appropriation of lands described in this order under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Beaumont C. McClure,

Deputy State Director, Lands and Renewable Resources.

BILLING CODE 4310-32-M

[UT-050-01-4233-16]

Off-road Vehicle (ORV) Designation

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of the Henry Mountain Resource Area ORV Designations.

SUMMARY: Notice is hereby given relating to the use of ORV's on public lands according with the authority and requirements of Executive Orders 11644 and 11989 and regulations contained in 43 CFR part 8340. The following described lands under administration of the Richfield District of the Bureau of Land Management are designated as closed, limited, or open to ORV use.

The 1,413,490 acres of public land affected by the designations are within the Henry Mountain Resource Area in Wayne and Garfield Counties, Utah. The designations are a result of resource management decisions made in the Henry Mountain Resource Area Management Framework Plan, revised in 1982. Public comments concerning the implementation plan were received during August of 1990.

These designations for the Public land located within the areas listed below are effective immediately and will remain in effect until modified or rescinded by the Authorized Officer.

SUPPLEMENTARY INFORMATION: ORV designations are effective for the Henry Mountain Resource Area.

A. Open Designation—942,926 acres
B. Limited Vehicle Use Area—312,639 acres
C. Closed Designation—157,925 acres

For further information contact Sheldon Wimmer, Area Manager, Henry Mountain Resource Area, PO Box 99, Hanksville, UT 84734.

Dated: June 11, 1991.

Sam Rowley,

Assistant District Manager Resources.

[OR-943-4214-10; GP1-211; OR-6761(WASH)]

Opening of National Forest Lands; Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action will terminate the temporary segregative effect as to 1,120 acres of National Forest System lands included in an application for withdrawal involving the extension of the White Pass Recreation Area.

EFFECTIVE DATE: October 20, 1991.

FOR FURTHER INFORMATION CONTACT: Linda Sullivan, BLM, Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503-280-7171.

SUPPLEMENTARY INFORMATION: Pursuant to the regulations contained in 43 CFR 2310.2-1(e), at 8:30 a.m., on October 20, 1991, the following described lands will be relieved of the temporary segregative effect of withdrawal application OR-6761(WASH). The withdrawal application will continue to be processed unless it is cancelled or denied:

Willamette Meridian

Gifford Pinchot and Snoqualmie National Forests

T. 13 N., R. 11 E., unsurveyed,
Sec. 1, S½NW¼;
Sec. 2, S½NE¼;
Sec. 10;
Sec. 11, S½S½;
Sec. 12, S½S½.

The areas described aggregate approximately 1,120 acres in Lewis and Yakima Counties.

Dated: June 10, 1991.

Robert E. Mollohan,

Chief, Branch of Lands and Minerals Operations.

Realty Action; Recreation and Public Purposes (R&PP) Act Classification; Trinity Co., CA

ACTION: Notice of Realty Action; Recreation and Public Purposes (R&PP) Act Classification; Trinity County, California.

SUMMARY: The following public land in Trinity County, California has been examined and found suitable for classification for lease to the Douglas City Community Services District, under provisions of the Recreation and Public Purposes Act, as amended (43 USC 869, et seq). The Douglas City Community Services District proposes to use the land for a fire station.

Mount Diablo Meridian

T. 33 N., R. 9 W.,
Section 34: Lot 7; portion of
Containing 1.00 acre, more or less.

The lands are not needed for Federal purposes. Lease is consistent with current Bureau of Land Management land-use planning and would be in the public interest.

DATES: For a period of 45 days from the date of publication of this notice, interested parties may submit comments regarding the proposed lease or classification of the lands to the Area Manager, Redding Resource Area, 355 Hemsted Drive, Redding, California 96002. Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification will become effective August 19, 1991.

SUPPLEMENTARY INFORMATION: Upon publication of this notice in the Federal Register, the lands will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for lease under the Recreation and Public Purposes Act and leasing under the mineral leasing laws.

ADDRESSES: Detailed information concerning this action is available for review at the Office of Bureau of Land Management, Redding Resource Area, 355 Hemsted Drive, Redding, California 96002.

FOR FURTHER INFORMATION CONTACT: Patricia Cook, Realty Specialist, at the address listed above.

Mark Morse,

Area Manager.

Realty Action, Acquisition of Lands in Humboldt Co., Calif., Through Exchange

ACTION: CA CA 26604 PT, Notice of Realty Action, Acquisition of Lands in Humboldt County, California, through Exchange.

SUMMARY: Pursuant to section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716), the Bureau of Land Management, Arcata Resource Area, has identified the following described private lands in Humboldt County, California, as being suitable for acquisition by the United States by way of a land exchange with The Nature Conservancy subject to valid existing rights:

T.2S., R.2W., Humboldt Meridian, California
Section 17, W2NW, NENW;
Section 18, NWSE.
T.2S., R.3W., Humboldt Meridian, California
Section 12, Lot 3;
Section 13, Lots 1 & 2.

Lands are shown on the Humboldt County Assessor's records as AP 104-181-04, 105-031-05, 104-183-01, 105-031-01, containing a total of 308.39± acres.

This notice deals exclusively with the private lands listed above. An amended Notice of Realty Action will address the public (selected) lands to be disposed of by the Bureau of Land Management.

The purpose for acquiring the lands listed above is to improve the Bureau's management of adjoining public land, and to enhance public recreation.

VOL 56 ISS 119 JE 20 1991 UMI

wildlife and riparian habitat at the mouth of the Mattole River. This exchange acquisition will meet the Bureau's land use planning goals and objectives as outlined in the Scattered Tracts Management Framework Plan and interim management under the Draft Arcata Resource Management Plan.

The publication of this notice is for the purpose of soliciting comments on the offered private lands listed above. For a period of 45 days from the date of first publication of this notice, interested parties may submit comments to the address below.

FOR FURTHER INFORMATION: Detailed information concerning the exchange, including the draft environmental assessment, is available for review at the address given below, or by calling (707) 822-7648, Lynda J. Roush, Area Manager, BLM—Arcata Resource Area, 1125 16th Street, Room 219, Arcata, CA 95521-5580.

D.E. Averill,
Supervisory Resource Management Specialist.

Exchanges of Public and Private Lands in Kern County, California, and Order Providing for Opening of Public Lands

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice and opening order.

SUMMARY: The purpose of these exchanges was to acquire non-Federal lands within the designated Desert Tortoise Research Natural Area. The public interest was well served through completion of these exchanges. The lands acquired in these exchanges will be opened to the operation of the public land laws, subject to all the laws and regulations governing the particular kind of entry, selection, or other disposal. The lands will be opened to mineral leasing. The lands are closed to mining.

EFFECTIVE DATE: July 22, 1991.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, BLM California State Office, Federal Office Building, 2800 Cottage Way, room E-2845, Sacramento, California 95825, 916-978-4820.

SUPPLEMENTARY INFORMATION: Public Land Order 5694, published in the Federal Register, 45 FR 7815, February 5, 1980, withdrew the land described therein from location and entry under the general mining laws, 30 U.S.C. ch. 2, in aid of a program of the Department of the Interior for the preservation and protection of the desert tortoise for a period of 20 years from the date of publication of the order. The private lands described in this notice became subject to this ordr upon acceptance of title on behalf of the United States.

1. The United States issued exchange conveyance documents to the exchange proponents listed below under section 206 of the Act of October 21, 1976 (43 U.S.C. 1716), for the following described lands:

Sigmund J. Lichter and Elizabeth C. Lichter, as Trustees of The Sigmund and Elizabeth Lichter Revocable Trust dated August 14, 1980
Serial No. CACA 23833
Date of conveyance: May 1, 1991
Public land description: N½S½SE¼ and S½S½SE¼ sec. 8, T. 11 N., R. 10 W., S.B.M., containing 80 acres.

Hans Niederberger and Elizabeth R. Niederberger
Serial No. CACA 23834
Date of conveyance: February 22, 1990
Public land description: NW¼SW¼ sec. 14, T. 32 S., R. 38 E., M.D.M., containing 40 acres.

Mark H. Batz
Serial No. CACA 23836
Date of conveyance: March 4, 1991
Public land description: NW¼NW¼ and SW¼SW¼ sec. 8, T. 11 N., R. 10 W., S.B.M., containing 80 acres.

Victor Maron, as Trustee under the Victor Maron and Florence P. Maron Trust Agreement dated April 11, 1973
Serial No. CACA 23839
Date of conveyance: July 20, 1990
Public land description: E½NE¼ and W½NW¼ sec. 14, T. 32 S., R. 38 E., M.D.M., containing 160 acres.

Barton H. Welsh and Olivia W. Welsh
Serial No. CACA 23914
Date of conveyance: February 28, 1990
Public land description: NW¼NW¼NW¼, NE¼NW¼NW¼, SW¼NW¼NW¼, SE¼NW¼NW¼, NW¼NE¼NW¼, NW¼SW¼NW¼, NE¼SW¼NW¼, SW¼SW¼NW¼, SE¼SW¼NW¼, S½NE¼NW¼, NE¼NE¼NW¼, SE¼NW¼, NW¼SW¼, SW¼SW¼, E½SW¼, and W½SW¼SE¼ sec. 22, T. 32 S., R. 38 E., M.D.M., containing 340 acres.

George M. Novicoff and Betty Ruth Novicoff
Serial No. CACA 23915
Date of conveyance: January 28, 1990
Public land description: SW¼SW¼ sec. 14, T. 32 S., R. 38 E., M.D.M., containing 40 acres.

Walter A. Detjen and Patricia A. Detjen
Serial No. CACA 23920
Date of conveyance: February 5, 1990
Public land description: NW¼NE¼, NE¼NE¼, N½SE¼NE¼, and SW¼SE¼NE¼ sec. 22, T. 32 S., R. 38 E., M.D.M., containing 110 acres.

Raymond H. Smith, Earl Lee Miller, Ronald Jay Stahl, Guyle W. Stahl, Dennis Lee Stahl, Gwendolyn Ione Day, Chris A. Stahl, Henry J. Sanchez, Barbara A. Sanchez, Odysseas Christou, Anastasia Christou, Gloria H. Berry, John A. Handon, Jr., and Dorothy Ferguson.
Serial No. CACA 24290
Date of conveyance: September 13, 1990
Public land description: NE¼NW¼ sec. 14, T. 32 S., R. 38 E., M.D.M., containing 40 acres.

William J. Howard, Frances E. Howard, Ronald K. Ortt, Henry P. Loustalet, and Clarice W. Gorman
Serial No. CACA 24291
Date of conveyance: July 20, 1990
Public land description: SE¼NW¼ sec. 14, T. 32 S., R. 38 E., M.D.M., containing 40 acres.

Wojtek Andre Jaskiewicz
Serial No. CACA 24307
Date of conveyance: August 2, 1990
Public land description: S½N½SE¼ sec. 8, T. 11 N., R. 10 W., S.B.M., containing 40 acres.

Gale McMahon
Serial No. CACA 24454
Date of conveyance: March 26, 1991
Public land description: NE¼NW¼SE¼, NW¼NE¼SE¼, and NE¼NE¼SE¼ sec. 8, T. 11 N., R. 10 W., S.B.M., containing 30 acres.

The areas described aggregate 1,000 acres of public land.

2. In exchange for these lands, the United States acquired the following described lands from the above named exchange proponents:

Private land description: Portions of secs. 19, 21, 27, 31, and 33, T. 31 S., R. 38 E., M.D.M.

The areas described aggregate 997.85 acres of private lands.

A specific description of these acquired lands, including exceptions and reservations too numerous to list in this notice, is available in the above listed case files which are located in the California State Office.

3. At 10 a.m. on July 22, 1991, the lands described in paragraph 2 will be opened to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on July 22, 1991, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. At 10 a.m. on July 22, 1991, the lands described in paragraph 2 will be opened to applications and offers under the mineral leasing laws.

The values of the Federal public lands and the non-Federal lands in the exchange were appraised at $316,100 and $315,000, respectively. An equalization payment in the amount of $2,000 was paid to Barton W. Welsh and Olivia W. Welsh by the United States, and equalization payments in the amounts of $2,400, $1,200, and $1,500 were paid to the United States by Sigmund J. Lichter and Elizabeth C. Lichter, the Desert Tortoise Preserve Committee on behalf of Wojtek Andre Jaskiewicz, and Gale McMahon, respectively.

Dated: June 10, 1991.
Nancy J. Alex,
Chief, Lands Section.

Realty Action: Exchange of Public and Private Lands in Grand and Jackson Counties, Colorado

AGENCY: Bureau of Land Mangement, Department of Interior.

ACTION: Notice of realty action.

SUMMARY: Pursuant to section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716), the Bureau of Land Management, Kremmling Resource Area is considering the following described land in Grand and Jackson Counties as suitable for disposal by exchange. This action is in response to a land exchange proposal submitted by Daniel Ritchie, Grand River Ranch.

Selected Public Land

Sixth Principal Meridian, Colorado

Muddy Pass—4632.68 acres.
T. 4N., R. 81W.,
Sec. 6, Lots 1 & 2, SE¼NE¼, NE¼SE¼.
Sec. 7, Lots 3 & 4, SE¼NE¼, E½SE¼, SW¼SE¼,
Sec. 8, NW¼NW¼, S½NW¼, W½SE¼,
Sec. 17, NW¼, NW¼NE¼, N½SW¼, SE¼SW¼,
Sec. 18, NE¼NE¼;
T. 4N., R. 82W.,
Sec. 1, Lots 5-8;
T. 5N., R. 81W.,
Sec. 7, Lots 12 & 13,
Sec. 17, Lots 11-13,
Sec. 18, Lots 7-10, 13, 19 & 20,
Sec. 19, Lots 5, 6, 11-14, 19 & 20,
Sec. 20, Lots 2-5, 11 &12,
Sec. 29, Lots 5-9 & 11-15,
Sec. 29, Lots 5-8,
Sec. 30, Lots 5 & 8-12,
Sec. 31, Lots 5-12, 15-18 & 20,
Sec. 32, Lots 3 & 9
Sec. 33, Lots 4, 5 & 12;
T. 5N., R. 82W.
Sec. 23, Lots 1-5
Sec. 24, Lots 3-5, 12 & 14,
Sec. 25, Lots 1 & 10.
Tyler Mtn.—385.04 acres.
T. 3N., R. 82W.,
Sec. 24, Lots 3 & 4,
Sec. 25, Lots 1, 2, 5 & 6,
Sec. 36, Lots 1, 4, 5 & 11.
Mitchell—345.42 acres.
T. 3N., R. 80W.,
Sec. 30, Lots 8 & 9,
Sec. 31, Lot 6;
T. 3N., R. 81W.
Sec. 25, W½NE¼, E½NW¼, SW¼SE¼, SE¼SW¼

The selected lands described above contain 5,568.09 acres, more or less.

In exchange for these lands, the United States will acquire the following described lands from Daniel Ritchie, Grand River Ranch.

OFFERED PRIVATE LAND:

Sixth Principal Meridian

Williams Fork—2,638.03 acres more or less.
Metes and Bounds description in Sections 28, 29, 31, 32 and 33, T. 1S., R. 78W., and Sections 5, 7, 8, 17, and 18, T. 2S., R. 78W., and Sections 12 and 13, T. 2S., R. 79W.; containing 2,638.03 acres more or less.
Red Dirt Reservoir—803.16 acres.
T. 3N., R. 82W.,
Tracts 46, 49 & 48A;
T. 2N., R. 82W.,
Tract 36A.
Diamond Creek—91.11 acres.
T. 5N., R. 81W.,
Sec. 33, Lots 10 & 15
The offered lands described above contain 3,322.3 acres more or less.

FOR FURTHER INFORMATION AND PUBLIC COMMENT: Additional information concerning this exchange, is available for review in the Kremmling Resource Area Office at 1116 Park Avenue, Kremmling, Colorado 80459. For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Craig District Office, Bureau of Land Management, 455 Emerson Street, Craig, Colorado 81625. Any adverse comments will be evaluated by the State Director, who may sustain, vacate or modify this realty action.

SUPPLEMENTARY INFORMATION: The purpose of this exchange is to facilitate improved resource management and to dispose of scattered, difficult to manage public land parcels while consolidating ownership of other public lands.

The exchange will be completed on an equal value basis. Full equalization of values will be achieved through acreage adjustment, or by cash payment in an amount not to exceed 25 percent of the value of the lands being transferred out of federal ownership.

The exchange will not be completed until all necessary field inventories and environmental assessments are completed.

The following reservations will be made in a patent issued for the public lands:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. A reservation to the United States of all mineral deposits of known value.

3. A reservation of all existing and valid land uses, including grazing leases, unless waived.

Publication of this notice in the Federal Register segregates the public lands from operation of the public land laws and the mining law, except for mineral leasing and exchange under section 206 of FLPMA. The segregated effect will end upon issuance of patent or two years from the date of publication, whichever occurs first.

Dated: June 10, 1991.
William J. Pulford,
District Manager.

Realty Action; Sales, Leases, etc.; Nevada; Correction

ACTION: Notice of Realty Action Correction.

SUMMARY: This is a correction of the Notice of Realty Action (NORA) published in the Federal Register, April 25, 1991, Vol. 56, No 80, pp. 19122-23 (FR Doc. 91-9729). The NORA is hereby corrected to read as follows:

"Notice is given that pursuant to the Act of October 21, 1976 (43 U.S.C. 1713, sec. 203), the Bureau of Land Management is offering for sale, two parcels of public land, ten acres each. The parcels will be sold to the highest bidder for no less than the appraised value of $250.00 per acre. Bids may be received by the Bureau of Land Management on either parcel or both. Do Not submit a bid for part of one parcel. The parcels are described as follows:

Mount Diablo Meridian, Nevada

T. 37 N., R. 36 E., Sec. 33,
Parcel 1: SE¼SE¼SW¼
Parcel 2: SE¼NE¼SE¼

The date of the sale is changed from June 19, 1991 to July 15, 1991. All other information contained in the NORA as published April 25, 1991, remains the same and is not changed.

FOR FURTHER INFORMATION CONTACT: Hal Green, District Realty Specialist, Winnemucca District Office, Bureau of Land Management, 705 E. 4th St., Winnemucca, NV 89445, (702) 623-1530.

Dated: June 5, 1991.
Ron Wenker,
Winnemucca District Manager.

VOL 56 ISS 119 JE 20 1991 UMI

[ID-943-01-4214-11; IDI-16701]

Proposed Continuation of Withdrawal; Idaho

AGENCY: Bureau of Land Management, Idaho.

ACTION: Notice.

SUMMARY: The Bureau of Land Management proposes that a 134.30 acre withdrawal for Powersite Classification No. 50, continue for an additional 20 years. The land has a potential for waterpower development. These lands will remain closed to surface entry, but have been and would remain open to mineral leasing and mining.

DATE: Comments should be received on or before September 18, 1991.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, Idaho State Office, BLM, 3380 Americana Terrace, Boise, Idaho 83706, (208) 384-3166.

The Bureau of Land Management proposes that the existing land withdrawal made by Secretarial Order dated September 29, 1922, for Powersite Classification No. 50, be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, insofar as it affects the following-described land:

Boise Meridian

T. 27 N., R. 1 E.,
Sec. 15, lot 4.
T. 24 N., R. 21 E.,
Sec. 10, lot 1;
Sec. 18, lots 4 and 9.
The area described contains 134.30 acres in Idaho and Lemhi Counties.

The withdrawal is essential for protection of potential waterpower development. The withdrawal closed the described land to surface entry but not to mineral leasing and mining. No change in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued; and if so, for how long. The final determination of the withdrawal will be published in the Federal Register. The existing withdrawal will continue until such final determination is made.

Dated: June 6, 1991.

William E. Ireland,
Chief, Realty Operations Section.

National Park Service

Natchez National Historical Park; Environmental Impact Statement

AGENCY: National Park Service, Interior.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: In accordance with section 102(2)(C) of the National Environmental Policy Act of 1969, Public Law 91-190, the National Park Service (NPS), Natchez National Historical Park, is preparing an Environmental Impact Statement (EIS) to assess the impacts of alternative management strategies for the park, which will be described in a General Management Plan (GMP). A range of alternatives will be formulated for resource protection, visitor use and interpretation, facilities development and operations.

Persons wishing to provide input to the scoping process for the GMP and EIS should address comments to the Superintendent, Natchez National Historical Park, P.O. Box 1086, Natchez, Mississippi 39121. Comments should be received no later than 60 days from the publication of this notice. For further information, contact the Superintendent, Natchez National Historical Park, at the above address, or at telephone (601) 442-7047.

The responsible official is Robert M. Baker, Regional Director, Southeast Regional Office, National Park Service, 75 Spring Street, SW, Atlanta, Georgia 30303. The draft GMP and EIS are expected to be completed and available for public review by early 1992. The final GMP, EIS and Record of Decision are expected to be completed in late 1992.

Dated: June 11, 1991.

C.W. Ogle,
Acting Regional Director, Southeast Region.

BILLING CODE 4310-70-M

Gulf Islands National Seashore; Advisory Commission Meeting

AGENCY: National Park Service, Interior.

ACTION: Notice of Advisory Commission meeting.

SUMMARY: Notice is hereby given in accordance with the Federal Advisory Committee Act of 1972, Public Law 92-463, 86 Stat. 770, that a meeting of the Gulf Islands National Seashore Advisory Commission is scheduled for Friday, July 26. The commission was established pursuant to Public Law 91-660, January 8, 1971. The purpose of the commission is to consult with the Secretary of the Interior, or his designee, with respect to matters relating to the development of the Gulf Islands National Seashore and on matters relating to zoning within the seashore. The meeting will convene on July 26 at the Naval Live Oaks Visitor Center auditorium in Gulf Breeze, Florida, at 1:30 p.m.

The matters to be discussed at this meeting will include:

(1) Superintendent's Annual Report.
(2) Status of natural resource management projects.
(3) Status of cultural resource management projects.
(4) Other business.

The meeting will be open to the public. However, facilities and space for accomodating members of the public are limited, and it is expected that not more than 20 persons will be able to attend the meeting in addition to the commission members. Any member of the public may file with the commission a written statement concerning the matters to be discussed. Written statements may also be submitted to the Superintendent. Further information concerning this meeting may be obtained from the Superintendent, Gulf Islands National Seashore, 1801 Gulf Breeze Parkway, Gulf Breeze, Florida 32561.

Dated: June 11, 1991.

C.W. Ogle,
Regional Director, Southeast Region.

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 290 (Sub No. 5) (91-3)]

Quarterly Rail Cost Adjustment Factor

AGENCY: Interstate Commerce Commission.

ACTION: Approval of rail cost adjustment factor and decision.

SUMMARY: The Commission has approved the third quarter 1991 rail cost adjustment factor (RCAF) and cost index filed by the Association of American Railroads. The third quarter RCAF (Unadjusted) is 1.146. The third quarter RCAF (Adjusted) is 1.045, a decrease of 0.8 percent from the second quarter 1991 RCAF (Adjusted) of 1.045. Maximum third quarter 1991 RCAF rate levels may not exceed 99.4 percent of maximum second quarter 1991 RCAF rate levels.

EFFECTIVE DATE: July 1, 1991.

FOR FURTHER INFORMATION CONTACT: William T. Bono, (202) 275-7354; Robert C. Hasek, (202) 275-6838; TDD for hearing impaired (202) 275-1721.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision write to, or call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or telephone (202) 289-4357/4359. (Assistance for the hearing impaired is available through TDD service (202) 275-1721.)

This action will not significantly affect either the quality of the human environment or energy conservation.

Decided: June 13, 1991.

By the Commission, Chairman Phillips, Vice Chairman Emmett, Commissioners Simmons, Phillips, and McDonald.

Sidney L. Strickland, Jr.,
Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 31880]

Wisconsin Central Ltd.—Purchase—Chicago and North Western Transportation Co. Line Between South Itasca and Cameron, WI; Decision

AGENCY: Interstate Commerce Commission.

ACTION: Notice of decision accepting application for consideration.

SUMMARY: The Commission is accepting for consideration, the application filed on May 21, 1991, by Wisconsin Central Ltd. (WCL) and Chicago and North Western Transportation Company (CNW) (collectively applicants). WCL seeks to purchase a 97.03-mile continuous line of CNW railroad between South Itasca and Cameron, WI. Pursuant to 49 CFR part 1180, the Commission finds this to be a minor transaction.

DATES: Written comments must be filed with the Interstate Commerce Commission no later than July 22, 1991 and concurrently served on applicants' representatives, the United States Secretary of Transportation, and the Attorney General of the United States. Comments from the Secretary of Transporation and Attorney General of the United States must be filed by August 6, 1991. The Commission will issue a service list shortly thereafter. Comments must be served on all parties of record within 10 days of the Commission's issuance of the service list and confirmed by certificate of service filed with the Commission indicating that all designated individuals and organizations on the service list in this proceeding have been properly served copies of these comments. Applicants' reply is due by August 26, 1991.

ADDRESSES: Send original and 10 copies of all documents to: Office of the Secretary, Case Control Branch, attn: Finance Docket No. 31880, Interstate Commerce Commission, Washington, DC 20423.

In addition, concurrently send one copy of all documents to the United States Secretary of Transportation, the Attorney General of the United States, and to applicant's representatives:

Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, room 8201, 400 Seventh St., SW., Washington, DC 20590.

Attorney General of the United States, United States Department of Justice, 10th & Constitution Ave., Washington, DC 20530.

William C. Sippel, Oppenheimer Wolff & Donnelly, Two Illinois Center, 233 North Michigan Avenue, suite 2400, Chicago, IL 60601.

Stuart F. Gassner, Chicago and North Western Transportation Company, 165 North Canal Street, Chicago, IL 60606.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275-7245, (TDD for hearing impaired: (202) 275-1721).

SUPPLEMENTARY INFORMATION: By application filed May 21, 1991, Wisconsin Central Ltd. (WCL) and Chicago and North Western Transportation Company (CNW), collectively referred to as applicants, seek approval under 49 U.S.C. 11343, *et seq.*, for WCL to purchase CNW's line between milepost 49.60 at Cameron, WI and milepost 97.13 at Trego, WI and between milepost 0.00 at Trego (same point) and milepost 56.90 at South Itasca, WI, a total distance of 97.03 miles (Cameron Line).[1] Applicants intend to consummate the transaction as soon as practicable after the Commission's order approving this application becomes effective. Applicants contend that this is a minor transaction under 49 CFR 1180.2(c), and they have submitted an application in accordance with the railroad consolidation procedures at 49 CFR part 1180 for minor transactions.

Applicants also intend to consummate, simultaneously with the purchase of the Cameron Line, related transactions in the following proceedings: (1) Finance Docket No. 31881, Wisconsin Central Ltd.—Trackage Rights Exemption—Over Duluth, Missabe and Iron Range Railway Company (notice of exemption served June 6, 1991), where the Duluth, Missabe and Iron Range Railway Company (DMIR) has agreed to grant trackage rights to WCL between South Itasca and Saunders, WI and South Itasca and Ambridge, WI, allowing WCL to access the Cameron Line at the north end and to effect interchange with other rail carriers at Superior, WI; (2) Finance Docket No. 31882, Chicago and North Western Transportation Company—Trackage Rights Exemption—Over Wisconsin Central Ltd. (notice of exemption served June 6, 1991), where WCL has agreed to grant trackage rights to CNW between Cameron and Wisconsin Rapids, WI, providing CNW with an alternate route between Cameron and CNW's main line at Necedah, WI; and (3) Docket No. AB-303 (Sub-No. 8X), Wisconsin Central Ltd.—Abandonment Exemption—In Barron County, WI (petition for exemption filed under 49 U.S.C. 10505 on May 21, 1991), where WCL seeks to abandon its exiting parallel line between Cameron and Rice Lake, WI.

WCL, an Illinois corporation, is a Class I common carrier operating over 2,000 route miles of rail lines in the States of Illionis, Michigan, Minnesota and Wisconsin and in the Province of Ontario, Canada.[2] At the time of the original acquisition of the lines from Soo Line Railroad Company (Soo) that created WLC, Soo declined to sell to WCL its line between Ladysmith, WI and Superior, WI (Ladysmith Line) and instead granted restricted trackage

[1] As part of the transaction, WCL will purchase CNW's terminal and yard facilities at Spooner, WI and also acquire the right to use a portion of CNW's "New Yard" at South Itasca.

[2] WCL had been a Class II carrier since its formation in 1987, but was reclassified as a Class I carrier effective January 1, 1991. In Ex Parte No. 492 (Sub-No. 1) Montana Rail Link, Inc. and Wisconsin Central Ltd., Petition for Temporary Accounting and Reporting Exception from 49 CFR part 1201 (not printed), served February 4, 1991, the Commission temporarily excepted WCL for 1 year from the accounting and reporting requirements otherwise applicable to Class I rail carriers.

VOL 56 ISS 119 JE 20 1991 UMI

rights prohibiting WCL's handling of most overhead traffic over that line.[5] These trackage rights have otherwise given WCL direct access to the Duluth, MN/Superior, WI (Duluth/Superior) market, including access to all industries open to WCL and interchange with rail and water carriers at Duluth/Superior.

CNW, a Delaware corporation, is a Class I common carrier operating over 5,000 route miles of rail lines in the States of Illinois, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, South Dakota, Wisconsin and Wyoming. It will retain overhead trackage rights over the Cameron Line. It will also continue to own and operate the Trego-Hayward, WI branch line and will continue to serve all industries at Trego exclusively.

Applicants do not expect that the proposed transaction will in any way lessen intramodal competition nor create a monopoly or restrain trade in freight surface transportation in any region in the United States. Applicants state that the proposed transaction is pro-competitive and will improve the adequacy of transportation service to the public. As a result of the proposed transaction, WCL will have an alternate route to Duluth/Superior free of the contractual traffic restrictions associated with its existing route via trackage rights over Soo's Ladysmith Line. According to applicants, WCL will be able to solicit and compete on an unrestricted basis with the other competing carriers—CNW, Soo and Burlington Northern Railroad Company (BN)—for overhead traffic moving via the Duluth/Superior gateway. By virtue of its retained trackage rights over the Cameron Line, newly acquired trackage rights over WCL's lines between Cameron and Wisconsin Rapids, and existing trackage rights between South Itasca and Necedah, WI, CNW would also have an alternate service route in the Duluth/Superior-Chicago corridor. Applicants say that the proposed transaction therefore will provide shippers with increased intramodal competition and new price and service options on overhead traffic between Duluth/Superior and Chicago.[6]

Applicants also say that all local industries on the Cameron Line not served by CNW will be served by WCL, that no industry will lose rail service as a result of the proposed transaction, that the increased line density brought about by the consolidation of CNW and WCL operations over a single line will permit maintenance of the line to competitive standards, and that WCL will maintain the Cameron Line and its lines between Ladysmith and Wisconsin Rapids at FRA Class III standards to maintain an effective service route between Duluth/Superior and Chicago. Applicants also note that the proposed transaction has the potential for serving as the initial phase of a multi-carrier rationalization of lines in northwestern Wisconsin with the potential to eliminate excess rail facilities and improve service without any reduction in competition.[7]

Under the Asset Purchase Agreement, WCL will pay CNW $5,600,000 for the Cameron Line and other related assets, plus the additional amounts for listed equipment. CNW will pay $.35 per loaded car mile for trackage rights over WCL lines between Cameron and Wisconsin Rapids. As an incentive to CNW to operate its trains over WCL's line between Cameron and Wisconsin Rapids (in lieu of CNW's own line via Eau Claire, WI), WCL will pay CNW $11.90 per loaded car handled by CNW over WCL's line between Cameron and Ladysmith. WCL projects an increase of approximately 14,000 carloads (excluding existing traffic and overhead iron ore traffic) generating approximately $10.8 million in gross freight revenue in the first year following acquisition of the line. In addition, WCL expects to save approximately $1 million annually in trackage rights fees by handling existing Duluth/Superior through traffic via the Cameron Line instead of via its trackage rights over Soo's Ladysmith Line. Subtracting the cost of maintaining the Cameron Line, yields net savings of approximately $250,000 annually.[8]

WCL will not incur any additional debt in connection with its purchase of the Cameron Line. Consequently, the proposed transaction will not result in any increase in fixed charges. The proposed purchase will be funded with internally generated funds and does not involve the issuance of any new securities.

WCL currently operates one through train in each direction per day between the Duluth, Winnepeg and Pacific's Pokegema Yard at Superior and WCL's yard at Stevens Point, WI (on WCL's Twin Cities-Chicago mainline 11 miles east of Junction City, WI). These trains operate via trackage rights over Soo's Ladysmith Line. Extra through trains, such as to handle iron ore traffic, are operated as needed. After the transaction is completed, these through trains will be rerouted to operate between Pokegema Yard and Stevens Point via the Cameron Line. WCL expects to create 11 additional positions to handle the increased traffic volumes and maintenance responsibility associated with acquisition of the Cameron Line.[9] The proposed transaction will have no effect on existing WCL employees.

The transaction will result in the abolition of 13 CNW positions.[9] CNW does not expect abolition of any train or engine positions as a result of the proposed transaction. Applicants acknowledge that the appropriate level of labor protection in a purchase transaction is that set forth in New York Dock Ry.—Control—Brooklyn East. Dist., 360 I.C.C. 60 (1979), as clarified in Wilmington Term. RR, Inc.—Pur. & Lease—CSX Transp., Inc., 6 I.C.C. 2d 799 (1990).

Under 49 CFR 1180.4(b)(2)(iv), we must determine whether a proposed transaction is major, significant, minor, or exempt. Although the proposal here involves two Class I rail carriers,[9] it has no regional or national significance and will not result in a major market extension. Between Duluth/Superior and Chicago, WCL's primary gateway, the Cameron Line route is approximately 30 miles longer than via WCL's existing Ladysmith Line route. Acquisition of the Cameron Line therefore will not create a shorter route for WCL to and from Duluth/Superior. By acquiring the Cameron Line, WCL will have the opportunity to compete for overhead traffic on an unrestricted basis in the Duluth/Superior market. Three other rail carriers (BN, CNW, and Soo) currently serve this market and WCL has served all other segments of this market since its formation in October of 1987. Thus, WCL's acquisition of the Cameron Line will not extend its haul on any existing traffic beyond existing interchanges, will not significantly increase its service capabilities on traffic moving to and from Duluth/Superior, and will not result in any curtailment of service by any of the other competing rail carriers now serving Duluth/Superior.

Accordingly, we find that the proposal is a minor transaction as defined in 49 CFR 1180.2(c). Since the application complies with our regulations governing minor transactions, we are accepting it for consideration.

The application and exhibits are available for inspection in the Public Docket Room at the Offices of the Interstate Commerce Commission in Washington, DC. In addition, they may be obtained upon request from applicants' representatives named above.

Any interested persons, including government entities, may participate in this proceeding by submitting written comments. Any person who files timely written comments shall be considered a party of record if the comments include a request for that status. Accordingly, no petition for leave to intervene need be filed.

Consistent with 49 CFR 1180.4(d)(1)(iii), written comments must contain:

(a) The docket number and title of the proceeding;

(b) The name, address, and telephone number of the commenting party and its representative upon whom service shall be made;

(c) The commenting party's position, i.e., whether it supports or opposes the proposed transaction;

(d) A statement of whether the commenting party intends to participate formally in the proceeding or merely comment upon the proposal;

(e) If desired, a request for an oral hearing with reasons supporting this request; the request must indicate the disputed material facts that can only be resolved at a hearing; and

(f) A list of all information sought to be discovered from applicant carriers.

Because we have determined that the proposal in this proceeding constitutes a minor transaction, no responsive applications will be permitted. The time limits for processing a minor transaction are set forth at 49 U.S.C. 11345(d).

Discovery may begin immediately. We admonish the parties to resolve all discovery matters expeditiously and amicably.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

1. This application is accepted for consideration as a minor transaction under 49 CFR 1180.2(c).

(2) The parties shall comply with all provisions as stated above.

3. This decision is effective on June 19, 1991.

Decided: June 12, 1991.

By the Commission, Chairman Philbin, Vice Chairman Emmett, Commissioners Simmons, Phillips, and McDonald.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 91-14736 Filed 6-19-91; 8:45 am]

BILLING CODE 7035-01-M

---

[5] The Ladysmith Line roughly parallels the Cameron Line that WCL seeks to purchase from CNW. WCL attempted to purchase the Ladysmith Line last fall, but parties were unable to agree on terms. Since 1989, Soo for a fee has waived the overhead traffic restriction to permit WCL to handle approximately 12,000 carloads of certain iron ore traffic between Duluth/Superior and Chicago.

[6] Applicants also note that the proposed transaction will assure an additional friendly connection to Canadian National Railway Company (CN) and its subsidiary, Duluth, Winnipeg and Pacific Railroad Company (DWP), for the Canadian traffic moving via DWP through the Duluth/Superior gateway as a partial substitute for Soo as Soo is absorbed into Canadian Pacific, Ltd.'s rail system, CN's major competitor.

[7] As noted, WCL has attempted unsuccessfully to purchase the Ladysmith Line from Soo. However, a dispute over Soo's right under the original asset purchase agreement with WCL to require WCL to purchase the Ladysmith Line and the terms on which Soo may exercise that right are currently the subject of litigation in the *Soo Line Railroad Company* v. *Wisconsin Central Ltd.*, No. 3-90-91 (D. Minn.). If WCL should purchase the Ladysmith Line, it would rationalize the two parallel lines by filing the appropriate applications or petitions for exemption with the Commission at that time. According to applicants, consummation of the Cameron Line purchase is in no way contingent on any future transaction with Soo involving the Ladysmith Line.

[8] In addition, there will be annual savings to WCL from the related abandonment of its Cameron-Rice Lake line, although the amount has not been quantified.

[9] At Spooner, WCL expects to add one maintenance of way foreman, one maintenance of way laborer, and one maintenance of way machine operator. At Solon Springs, WI, WCL expects to add one maintenance of way foreman and one maintenance of way laborer. At Stevens Point, WCL expects to add six train service employees.

[9] At Spooner, CNW expects abolition of 11 BMWE (maintenance) personnel positions and one signal maintainer position. At Altoona, WI, CNW expects abolition of one lineman electrician position.

[9] As noted, WCL has been temporarily excepted from only the accounting and reporting requirements for Class I railroads.

DEPARTMENT OF JUSTICE

Antitrust Division

[Civil Action No. 91-CV-32-74]

United States v. Brown University, et. al.; Competitive Impact Statements and Proposed Consent Judgment

Correction

In notice document 91-13287 concerning *U.S.* v. *Brown University, et al.*, appearing in the issue of Thursday, June 6, 1991 at 56 FR 26156, the following corrections are made to the published signatures to the Stipulation: Ronald G. Carr (Counsel for the Trustees of Princeton University), Bruce D. Sokler (Counsel for the Trustees of Dartmouth College), and Roger Fendrich (Counsel for Yale University).

Counsel for Massachusetts Institute of Technology ("MIT") was also incorrectly identified as signing the Stipulation. MIT is not a signatory to the Stipulation.

Joseph H. Widmar,

Director of Operations Antitrust Division.

BILLING CODE 4410-01-M

National Cooperative Research, Bell Communications Research, Inc.; Notification

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Bell Communications Research, Inc. ("Bellcore") on May 21, 1991, filed a written notification on behalf of Bellcore and Nederlandse Philips Bedrijven B.V., ("Philips") simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the venture and (2) the nature and objective of the venture. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the venture, and its general area of planned activities, are given below.

Bellcore is a Delaware corporation with its principal place of business at 290 W. Mt. Pleasant Avenue, Livingston, New Jersey 07039.

Philips is a corporation of The Netherlands having a place of business whose address is P.O. Box 218, 5600 MD Eindhoven, The Netherlands.

On April 22, 1991, Bellcore and Philips entered into an agreement to engage in cooperative research in the field of video communication including architectures for such video communication systems and transmission and coding techniques and to cooperate in studies to obtain a better understanding of the feasibility and applicability of the above-mentioned technologies and of the possible partitioning of various functions over the public network (including exchange and exchange access portions thereof), the network access point, the in-house communication system, and the connected sets, including prototype fabrication and demonstration of the mentioned technologies in experimental systems.

BILLING CODE 4410-01-M

National Cooperative Research Ethanol Joint Venture; Notification

Notice is hereby given that, on May 16, 1991, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Amrep, Incorporated filed a written notification simultaneously with the

VOL 56 ISS 119 JE 20 1991 UMI

Attorney General and the Federal Trade Commission disclosing a change in the membership of the Ethanol Joint Venture ("Joint Venture"). The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. The current membership is:

Amrep, Inc.; CCL Custom Manufacturing, Inc.; Calgon Vestal Laboratories; Caltech Industries Inc.; Catalytic Generators; Cello/Grow Group, Inc.; Central Solutions Inc.; Chemical Specialties Manufacturers Association; Claire Manufacturing; Ecolab, Inc.; Dymon, Inc.; Hysan Corporation; S.C. Johnson Wax; L & F Products Group (National Laboratories); MDT Corporation; Penn Champ, Inc.; Spartan Chemical Company; and Zep Manufacturing Company.

No other changes have been made in either the membership, the objectives or the planned activities of the Joint Venture.

On June 1, 1990, S.C. Johnson & Son, Incorporated filed the original notification concerning the Joint Venture pursuant to section 6(a) of the Act. The Department of Justice published a notice in the Federal Register pursuant to section 6(b) of the Act on July 5, 1990, at 55 FR 27700.

Joseph H. Widmar,

Director of Operations Antitrust Division.

BILLING CODE 4410-01-M

National Cooperative Research (MCNC; Notification

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), MCNC (formerly the Microelectronics Center of North Carolina) on April 2, 1991, filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing a change in the membership of MCNC. The additional written notification was filed for the purpose of extending the protections of Section 4 of the Act, limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On June 6, 1988, MCNC filed its original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the Federal Register pursuant to Section 6(b) of the Act on August 1, 1988 (53 FR 28922). On December 19, 1989, MCNC filed an additional written notification. The Department published a notice in the Federal Register in response to the additional notification on February 12, 1990 (55 FR 4916).

Effective April 2, 1991, NCR Corporation and LAM Research Corporation have been admitted as affiliates of MCNC, and Megatest Corporation is no longer an affiliate of MCNC.

Joseph H. Widmar,

Director of Operations Antitrust Division.

BILLING CODE 4410-01-M

National Cooperative Research Petroleum Environmental Research Forum; Notification

Notice is hereby given that, on May 13, 1991, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301, *et seq.* ("the Act"), the Petroleum Environmental Research Forum ("PERF") filed written notifications simultaneously with the Attorney General and with the Federal Trade Commission disclosing a change in the membership of PERF. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Specifically, the notification stated that the following additional parties have become members of PERF: Lion Oil Company, 1000 McHenry Avenue, El Dorado, Arkansas 71730; and Phibro Refining, Inc., 8934 Manchester, Houston, Texas 77012.

No other changes have been made in either the membership or the planned activities of PERF.

On February 10, 1986, PERF filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the Federal Register pursuant to section 6(b) of the Act on March 14, 1986 (51 FR 8903). On May 6, 1986, May 27, 1986, June 23, 1986, February 3, 1988, March 21, 1989, October 31, 1989, April 19, 1990, and June 25, 1990, PERF filed additional written notifications. The Department published notices in the Federal Register in response to these additional notifications on June 9, 1986, (51 FR 20937), June 19, 1986 (51 FR 22305), July 17, 1986 (51 FR 25957), March 1, 1988 (54 FR 8607), April 20, 1989 (54 FR 16014), December 8, 1989 (54 FR 50661), May 30, 1990 (55 FR 21951), and July 18, 1990 (55 FR 21951), respectively.

BILLING CODE 4410-01-M

National Cooperative Research Notification; Reckitt & Colman Household Products (MY 235 Consortium) Joint Venture

Notice is hereby given that, on May 20, 1991, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), written notice has been filed by Reckitt & Colman Household Products simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the New York 235 Consortium ("Joint Venture") and (2) the nature and objectives of the Joint Venture. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the Joint Venture and its general areas of planned activity are given below.

The parties to the Joint Venture are: J&L Adikes, Inc.; American Cyanamid Company; American Home Products Corporation; American Household Products; American Wax Co. Inc.; Amrep, Inc.; Avon Products, Inc.; Bengal Chemical, Inc.; Betco Corporation; Big D Industries, Inc.; Bonide Products; Brondow, Inc.; Buckingham Wax Co., Inc.; Butcher Company; Calgon Vestal Laboratories; Caltech Industries, Inc.; Car Freshner Corporation; Carroll Company; Carter Wallace, Inc.; Cello/Grow Group, Inc.; Cetylite Industries, Inc.; Chase Products Company; Chemical Specialties Manufacturers Association; Chemsico; Ace Hardware; K-Mart; Spectrum Group; Chevron Chemical Co.; Church & Dwight, Co., Inc.; Claire Manufacturing Co.; Combe Incorporated; ConAgra Pet Products, Inc.; CSA Limited, Inc.; Davies-Young Company; Buckeye International, Inc.; E. Davis Inc.; Dexol Industries; The Dial Corporation; Diversey Wyandotte Corporation; DowBrands, Inc.; The Drackett Company; DuBois Chemicals, Inc.; DVM (Dermatologics for Veterinary Medicine); Dymon, Inc.; Ecolab Inc.; Eight in One Pet Products Inc.; Enforcer Products; Epic Industries; Fairfield American Corporation; Farnum Companies, Inc.; FMC Corporation; Foster & Co. Inc.; Four Paws Products, Ltd.; Fuller Industries Inc.; Halbro Control Industries; Hartz Mountain Corporation; Huntington Laboratories, Inc.; Hysan Corporation; IBC Corporation; Waico-Linck Co.; IGI, Inc.; International Minerals & Chemicals Corporation; Coopers Animal Health Inc.; Pitman-Moore, Inc.; S.C. Johnson Wax; King Research Inc.; Knight Oil Co.; L & F Products Group; The d-Con Company; National Laboratories; U.S. Professional Laboratories; Winthrop Pharmaceuticals; Withrop Veterinary; Magnum Research Corporaiton; Mason Chemical Company; McLaughlin Gormley King Co.; Midco Prod. Co., Inc.; CDC Products Corporation; Miles Inc.; National Chemical Laboratories, Inc.; NCH Corporation; Noble Pine Products Co.; Omni Tech International; OSR-Cleaning Specialties; Platte Chemical Co.; Pollitt, Inc.; Stanson Corporation; PortionPac Chemical Corporation; Positive Formulators, Inc.; Prentiss Drug & Chem. Co., Inc.; J.L. Prescott Company; Purex Industrial; Reckitt & Colman Household Products; Airwick Industries; Boyle Midway; Aveco Company, Inc.; Fort Dodge Laboratories, Inc.; Franklin Laboratories, Inc.; Rite-Off, Inc.; RocCorp, Inc.; Rockland Chemical Co.; Roussel Bio Corp.; Russall Products, Inc.; Safeguard Chem. Corp.; Contact Industries; Schering-Plough Healthcare Products Inc.; Scott Sani-Fresh International; Scott's Liquid Gold-Inc.; Service Master Co.; Terminix International; Sidmar Enterprises, Inc.; SmithKline Beecham Animal Health; Adams Veterinary Laboratories; Affiliated Laboratories; Beecham Laboratories; Norden Laboratories; SmithKline Beecham Consumer Brands; Spartan Chemical Co., Inc.; Speer Products, Inc.; Shirlo Division; Sprayon Products, Division of Sherwin Williams; Stanhome Inc.; State Chem. Manufacturing Co.; Stearns Packaging Corporation; UAP Special Products; Uncle Sam Chemical Co., Inc.; Union Camp Corporation; Unsmoke, USA Group; Virbac, Inc.; Carson Chemicals, Inc.; Waterbury Companies, Inc.; Wave Energy Systems, Inc.; Whink Products Co.; Whitmire Research Laboratories, Inc.; Zema Corporation; Zep Manufacturing Co.; Zoe Chemical Co.; Zoecon Corporation.

The objective of the Joint Venture is to sponsor and conduct reserach studies relating to the reduction of VOC emissions resulting from the use of air freshener, disinfectant and insecticide products sold within the New York Metropolitan area as required by the New York State Department of Environmental Conservation (NYSDEC) pursuant to 6 NYCRR 235 and to submit the results of this research to NYSDEC as required by part 235, Environmental Conservation Law, sections 3-0301 and 19-G301(1)(a).

Membership in the Joint Venture remains open, and the parties intend to file additional written notification disclosing any changes in membership.

Joseph H. Widmar,

Director of Operations Antitrust Division.

BILLING CODE 4410-01-M

UNIX International, Inc; National Cooperative Research Notification

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), UNIX International, Inc. ("UNIX") on May 17, 1991, filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The additional written notification was filed for the purpose of extending the protections of section 4 of the Act, limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On January 30, 1989, UNIX filed its original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the Federal Register pursuant to section 6(b) of the Act on March 1, 1989 (54 FR 8608). On May 4, 1989, August 1, 1989, October 31, 1989, January 31, 1990, May 1, 1990, July 30, 1990, November 13, 1990, and February 6, 1991, UNIX filed additional written notifications. The Department published notices in the Federal Register in response to the additional notifications on June 22, 1989 (54 FR 26266), August 17, 1989 (54 FR 33985), November 29, 1989 (54 FR 49124), March 14, 1990 (55 FR 9517), May 21, 1990 (55 FR 20862), September 17, 1990 (55 FR 38173), December 28, 1990 (55 FR 53368), and March 15, 1991 (56 FR 11273), respectively.

As of May 9, 1991, the following have become members of UNIX International, Inc.:

Advanced SW Technology Res. Inst. of Kyoto
Centre National d'Etudes des Telecomms
Chinese University of Hong Kong

BILLING CODE 4410-01-M

Parole Commission

Elimination of the Western Region and Incorporation of States Formerly in the Western Region in the North Central and South Central Regions

AGENCY: United States Parole Commission, Justice.

ACTION: Notice of regional office closing and redefinition of regional boundaries.

SUMMARY: The U.S. Parole Commission is eliminating its Western Region and Western Regional Office, and incorporating the states presently included in the Western Region into the North Central and South Central Regions. The purpose of this change is to permit the Commission to manage its affairs more efficiently in view of its declining caseload and statutorily-scheduled abolition on November 1, 1997.

EFFECTIVE DATE: October 18, 1991.

FOR FURTHER INFORMATION CONTACT: Richard Preston, Attorney, Telephone (301) 492-5959.

SUPPLEMENTARY INFORMATION: The U.S. Parole Commission has the authority, under 18 U.S.C. 4203(a)(2) (1976), to "* * * create such regions as are necessary to carry out the provisions of this chapter [The Parole Commission and Reorganization Act of 1976]." There are currently five regions. Under this system, all cases not specially designated for the Commission's original jurisdiction are initially decided by Regional Commissioners, or Acting Regional Commissioners, who exercise delegated authority from the Commission to grant or deny applications for parole, to impose parole conditions, and to modify or revoke an order of parole. See 18 U.S.C. 4203(c)(1) (1976).

Under the Sentencing Reform Act of 1984 (as amended) Public Law 98-473,

VOL
56
ISS
119
JE
20
1991
UMI

the Parole Commission's jurisdiction is limited to federal prisoners and parolees who committed their offenses prior to November 1, 1987, and the Commission is scheduled for abolition on November 1, 1997. Accordingly, the Commission's caseload is declining, and the Commission is obliged to implement an orderly reduction of its operations. This includes the closing of regional offices, as well as reductions in the agency's staff.

In addition to the consolidation of the Northeast and Southeast Regional Offices with the Commission's headquarters in Chevy Chase, Maryland (with a view toward eventual creation of a single Eastern Region), the Commission has decided to eliminate its Western Region, and to close the Western Regional Office in Belmont, California. The states that now comprise the Western Region will be reassigned to the North Central and South Central Regions, so as to divide among the Regional Commissioners for those regions the jurisdiction presently exercised by the Acting Regional Commissioner for the Western Region. As of the effective date of this action (October 18, 1991), all cases in the Western Region that are pending a decision from the Commission will fall under the jurisdiction of either the North Central or the South Central Region, according to the assignment of states listed below.

In preparation for this transfer of jurisdiction, the Commission will attempt to have its case files transferred to the appropriate regional office at least two weeks prior to the effective date. Prisoners, parolees, and interested members of the public are advised, in addressing administrative appeals, petitions for reopening, and other communications to the Commission after October 1, 1991, to address their communications to the appropriate regional office in order to avoid delay. The addresses are as follows:

North Central Regional Office, U.S. Parole Commission, 10920 Ambassador Drive, Airworld Center, suite 220, Kansas City, Missouri 64153.

South Central Regional Office, U.S. Parole Commission, 525 Griffin Street, suite 820, Dallas, Texas 75202.

Jurisdiction is determined by the state in which the prisoner is confined, or in which the parolee is under supervision, or in which the hearing has been held in the case to be decided.

Accordingly, the Commission has taken the following actions:

1. The Western Region will be eliminated effective October 18, 1991.

2. The following states presently included in the Western Region shall be included in the North Central Region effective October 18, 1991: Alaska, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming.

3. The following states and territories presently included in the Western Region shall be added to the South Central Region effective October 18, 1991: Arizona, California, Hawaii, and Guam.

Dated: June 12, 1991.

Carol Pavlick Getty,

Chairman, U.S. Parole Commission.

[FR Doc. 91-14653 Filed 6-19-91; 8:45 am]

BILLING CODE 4410-01-M

MERIT SYSTEMS PROTECTION BOARD

Opportunity To Comment on the 1992 Research Agenda of the Merit Systems Protection Board (MSPB), June 1991

AGENCY: Merit Systems Protection Board.

ACTION: Notice of opportunity to comment on the 1992 research agenda of the U.S. Merit Systems Protection Board.

SUMMARY: The U.S. Merit Systems Protection Board (MSPB) is required by law to conduct special studies of the civil service and other Federal merit systems to determine whether they adhere to the merit principles governing the Federal civil service. MSPB is also required by law to report annually to the President and the Congress on the "significant actions" of the Office of Personnel Management (OPM). Based on this research, MSPB reports to the Congress and the President on whether the public interest in a civil service free of prohibited personnel practices is being adequately protected. MSPB is in the process of determining its 1992 research agenda. This notice invites public comment on personnel management issues to be considered as topics for merit systems studies, and solicits suggestions regarding OPM programs and activities to be included in the annual review and analysis of OPM significant actions.

DATE: Comments must be received on or before July 22, 1991.

ADDRESS: Comments must be made in writing and sent to the Office of Policy and Evaluation, U.S. Merit Systems Protection Board, 1120 Vermont Avenue NW., 8th Floor, Washington, DC 20419, Attention: Ms. Karen Robinson.

FOR FURTHER INFORMATION CONTACT: Ms. Karen Robinson, Research Analyst, Office of Policy and Evaluation, U.S. Merit Systems Protection Board, 1120 Vermont Avenue NW., 8th Floor, Washington, DC 20419, (202) 653-5812.

SUPPLEMENTARY INFORMATION: The Civil Service Reform Act of 1978 established a list of statutory merit principles and prohibited personnel practices as standards for personnel management in the Federal Government. MSPB is responsible for protecting the public interest in a civil service administered according to these standards. The Office of Policy and Evaluation has principal responsibility within MSPB for OPM oversight and merit systems studies.

(a) What Is a Merit System Study?

The law does not specify criteria for MSPB to use in determining the scope and nature of merit systems studies. In exercising its discretion as to which studies to conduct, MSPB relies on its internal research staff as well as input from a broad range of outside individuals and organizations. In conducting any study, MSPB is also authorized to make such inquiries as may be necessary and, unless otherwise prohibited by law, to have access to personnel records or information from OPM or other agencies as needed.

(b) What Is an OPM Significant Action?

The law also does not specify criteria for MSPB to use in determining which actions of OPM are significant for purposes of preparing its report. In exercising its discretion as to which actions of OPM to study, MSPB considers the following:

(1) Any OPM policy or program which might conflict with the statutory merit principles or contribute to the commission of a prohibited personnel practice;

(2) The extent to which other major decisions made or actions taken by OPM are in accord with and promote the merit principles; and

(3) OPM's overall impact on personnel management within the merit systems of the Federal civil service.

(c) Public Comment on MSPB's 1992 Research Agenda

MSPB invites any interested person or organization to comment on: Any systemic personnel management issues or practices the examination of which would assist MSPB in determining adherence to the merit principles and the absence of prohibited personnel practices. Individual personnel actions are outside the scope of the research agenda.

Interested persons or organizations are further invited to comment on: which actions of OPM since January 1990 were "significant" for the merit systems, and whether those actions were consistent with merit system principles and free from prohibited personnel practices. Although comments are invited on any action taken by OPM since January 1990, they should be consistent with the criteria described above.

(d) Format for Comments

The comments should contain for each topic a short statement of the issue being raised, a brief explanation as to why it should be studied, and a description of the impact of the issue on the Federal service.

(e) Acknowledgement of Comments

Due to the nature of this notice (i.e., a request for suggestions), no acknowledgement or response will be provided to those who submit comments.

(f) Confidentiality

MSPB will protect the identity of persons submitting comments and the confidentiality of such comments to the extent permitted by law.

Dated: June 14, 1991.

Robert E. Taylor,

Clerk of the Board.

[Notice 91-58]

NASA Advisory Council (NAC), Space Science and Applications Advisory Committee (SSAAC), Space Station Science and Applications Advisory Subcommittee (SSSAAS); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Science and Applications Advisory Committee (SSAAC), Space Station Science and Applications Advisory Subcommittee (SSSAAS).

DATES: July 22, 1991, through July 24, 1991, 8 a.m. to 10:30 p.m. each day; July 25, 1991, 8 a.m. to 5:30 p.m.; and July 26, 1991, 8:30 a.m. to Noon.

ADDRESSES: The Stanley Hotel, Estes Park, CO 80517.

FOR FURTHER INFORMATION CONTACT: Dr. Edmond M. Reeves, Code SM, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-1570).

SUPPLEMENTARY INFORMATION: The Space Station Science and Applications Advisory Subcommittee (SSSAAS) reports to the Space Science and Applications Advisory Committee (SSAAC) and consults with and advises the NASA Office of Space Science and Applications (OSSA) on the new capabilities to be made available by the Space Station program and how these may be most effectively utilized. It also advises the NASA Space Station Freedom Office on how the Space Station program may most effectively support potential science and applications users. The Subcommittee will meet to discuss restructured Space Station accommodations, scientific perspectives, and science operations status. The Subcommittee is chaired by Dr. Robert J. Bayuzick and is composed of 16 members. The meeting will be open to the public up to the seating capacity of the room (approximately 100 people including members of the Subcommittee). It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Type of Meeting: Open.

Agenda

Monday, July 22

8 a.m.—Orientation and Workshop Overview.
8:30 a.m.— Space Station Freedom (SSF) Program and Policy Overview.
9 a.m.—The Restructured Station—its Capabilities and Changes: Technical Perspective.
10:30 a.m.—The Restructured Station—its Capabilities and Changes: Science Perspective.
11:15 a.m.—Attached Pressurized Module Status, Capabilities and Utilization Plans.
1 p.m.—Japanese Experiment Module Status, Capabilities and Utilization Plans.
1:30 p.m.—Canadian Elements: Status, Capabilities and Utilization Plans
2 p.m.—Status of OSSA Utilization Plans.
3 p.m.—Office of Aeronautics, Exploration and Technology Utilization Plans.
3:15 p.m.—Office of Commercial Programs Utilization Plans.
3:30 p.m.—Data Management and Communication Systems.
5:30 p.m.—Break.
7 p.m.—Reconvene: Data Systems Utilization.
8 p.m.—Discussion and Preparation of Draft SSSAAS Recommendations.
10:30 p.m.—Adjourn.

Tuesday, July 23

8 a.m.—OSSA Strategic Plan.
8:30 a.m.—Early Utilization—Microgravity Transition Science.
9:30 a.m.—Early Utilization—Life Sciences.
10:15 a.m.—Utilization Flights/Assembly Flights: Capabilities and Plans.
10:45 a.m.—Space Station Freedom Capabilities for Untended Operations.
Noon—Break.
7 p.m.—Reconvene: Splinter Group Discussions—Payload Descriptions, Science Strategies, Opportunities and Limitations.
10:30 p.m.—Adjourn.

Wednesday, July 24

8 a.m.—Life Sciences: Payloads and Science Programs.
9 a.m.—Material Sciences: Payloads and Science Programs.
10 a.m.—Mature Science Operations: Payload Operations Integration Center/Integrated Science Operations Center Functions and Relationships.
10:45 a.m.—European Space Agency

(ESA) Telescience Workshop Report.
11:15 a.m.—Operations Discussion.
Noon—Break.
7 p.m.—Reconvene: Splinter Group Sessions—Mature Operations and Utilization.
10:30 p.m.—Adjourn.
Thursday, July 25
8 a.m.—Multilateral Science Working Group Report.
8:15 a.m.—Utilization Technology Working Group Report/Steering Committee.
8:30 a.m.—Responses to SSSAAS Recommendations.
10 a.m.—Report from the ESA Columbus VII Symposium.
10:15 a.m.—OSSA Participation in Astronaut Selection.
10:30 a.m.—Unresolved Space Station Accommodation Issues.
1 p.m.—Preparation of Splinter Group Reports.
2 p.m.—Preparation of Recommendations and Findings.
5:30 p.m.—Adjourn.
Friday, July 26
8:30 a.m.—Discussion of Workshop Findings and Recommendations.
11:45 a.m.—Committee Discussion.
Noon—Adjourn.

Dated: June 14, 1991.

AGENCY: The National Education Goals Panel.

ACTION: Notice of meeting.

SUMMARY: The National Education Goals Panel was established by a Joint Statement between the President and the Nation's governors dated July 31, 1990. The panel will determine how to measure and monitor progress toward achieving the national education goals and to report to the nation on the progress toward the goals. Members of the National Education Goals Panel are six governors appointed by the Chairman of the National Governor's Association, four senior Administration officials, and four Congressional leaders. Governor Roy Romer of Colorado is the initial chairman.

TENTATIVE AGENDA ITEMS: The tentative agenda for the meeting includes discussion of indicators to include in the September 1991 report card to the Nation.

DATE: The seventh meeting is scheduled for Monday, July 1, 1991. Time TBA.

ADDRESS: Location TBA.

FOR FURTHER INFORMATION CONTACT: Pat Forgione at the National Education Goals Panel office to indicate attendance or for further information on specific time and location. The phone number is (202) 632-0952.

Dated: June 14, 1991.

Roger B. Porter,

Assistant to the President for Economic and Domestic Policy.

BILLING CODE 3127-01-M

Interim Council on Standards and Testing; Meeting

AGENCY: The National Education Goals Panel.

ACTION: Notice of meeting.

SUMMARY: The National Education Goals Panel was established by a Joint Statement between the President and the Nation's governors dated July 31, 1990. The panel will determine how to measure and monitor progress toward achieving the national education goals and to report to the nation on the progress toward the goals.

The Interim Council on Standards and Testing is composed of 28 members, including members of the panel, members of Congress, Federal officials, and members of the education and labor communities. The council will report to the panel by December 31, 1991 on issues related to developing national standards and a national assessment system for education. Governor Roy Romer and Governor Carroll Campbell serve as co-chairmen.

TENTATIVE AGENDA ITEMS: The tentative agenda for the meeting includes discussion of current standard setting activities in five core academic subjects.

DATE: The first meeting is scheduled for Monday, June 24, 1991. Time TBA.

ADDRESS: Grand Hyatt, 1000 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: David Stevenson at the National Education Goals Panel office. The phone number is (202) 632-0952.

Dated: June 14, 1991.

Roger B. Porter,

Assistant to the President for Economic and Domestic Policy.

BILLING CODE 3127-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS) and Advisory Committee on Nuclear Waste (ACNW); Notice of Proposed Meetings

In order to provide advance information regarding proposed public meetings of the ACRS Subcommittees and meetings of the ACRS full Committee, of the ACNW, and the ACNW Working Groups the following preliminary schedule is published to reflect the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published May 23, 1991 (56 FR 23725). Those meetings which are definitely scheduled have had, or will have, an individual notice published in the Federal Register approximately 15 days (or more) prior to the meeting. It is expected that sessions of ACRS full Committee and ACNW meetings designated by an asterisk (*) will be closed in whole or in part to the public. ACRS full Committee and ACNW meetings begin at 8:30 a.m. and ACRS Subcommittee and ACNW Working Group meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during ACRS full Committee and ACNW meetings, and when ACRS Subcommittee and ACNW Working Group meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the July 1991 ACRS and ACNW full Committee meetings can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committees (telephone: 301/492-4600 (recording) or 301/492-7288, Attn: Barbara Jo White) between 7:30 a.m. and 4:15 p.m., Eastern Time.

ACRS Subcommittee Meetings

Extreme External Phenomena, July 10, 1991, Bethesda, MD. The Subcommittee will discuss the NUMARC/EPRI Fire Vulnerabilities Evaluation (FIVE) Methodology for the IPEEE.

AC/DC Power Systems Reliability, July 30, 1991, Bethesda, MD. The Subcommittee will discuss the implementation status of the station blackout rule for current operating plants.

AC/DC Power Systems Reliability, July 31, 1991, Bethesda, MD. The Subcommittee will discuss adoption of the N+2 concept for electrical systems design for future nuclear plants (GE, W, CE and EPRI).

Advanced Reactor Designs, August 6, 1991, Bethesda, MD. The Subcommittee will review the modular high-temperature gas cooled reactor (MHTGR) and the power reactor innovatively small (PRISM) designs sponsored by DOE.

Extreme External Phenomena, August 7, 1991, Bethesda, MD. The Subcommittee will discuss the results of the Diablo Canyon Long-Term Seismic Program.

Instrumentation and Control Systems, August 29, 1991, Bethesda, MD. The Subcommittee will discuss EPRI's reactor set-point methodology for future designs.

Advanced Pressurized Water Reactors, September 4, 1991, Bethesda, MD. The Subcommittee will continue its review of the CE System 80+ Standard Plant with a detailed look at the NUPLEX 80+ Advanced Instrumentation and Control System design and the Probabilistic Risk Assessment as applied to this new design.

Improved Light Water Reactors, September 17, 1991, Bethesda, MD. The Subcommittee will review draft safety evaluation reports corresponding to chapters 1 and 10 of the EPRI's Requirements Document for Evolutionary Designs.

Advanced Boiling Water Reactors, September 18, 1991, Bethesda, MD. The Subcommittee will review draft safety evaluation reports corresponding to chapters 1, 2, 3, 4, 5, 6 and 17 of the GE/Standard Safety Analysis Report.

Thermal Hydraulic Phenomena, Date to be determined (August, tentative), Bethesda, MD. The Subcommittee will continue its review of the NRC staff program to address the issue of interfacing systems LOCAs.

Joint Thermal Hydraulic Phenomena and Core Performance, Date to be determined, Bethesda, MD. The Subcommittee will continue its review of the issues pertaining to BWR core power stability.

Thermal Hydraulic Phenomena, Date to be determined, Bethesda, MD. The Subcommittee will review the status of the application of the Code Scaling, Applicability, and Uncertainty (CSAU) Evaluation Methodology to a small-break LOCA calculation for a B&W plant.

Severe Accidents, Date to be determined, Bethesda, MD. The Subcommittee will discuss elements of the Severe Accident Research Program.

Regulatory Activities, Date to be determined, Bethesda, MD. The Subcommittee will review the proposed final resolution of Generic Safety Issue-113, "Dynamic Qualification Testing of Large Bore Hydraulic Snubbers."

Occupational and Environmental Protection Systems, Date to be determined, Bethesda, MD. The Subcommittee will review the regulatory guides related to the implementation of the revised 10 CFR part 20 rule.

Systematic Assessment of Experience, Date to be determined, Bethesda, MD. The Subcommittee will discuss the safety significance of the lessons learned from the operating experience with solenoid-operated valves (SOVs). Also, it will discuss the comments received from the Nuclear Utility Group on Equipment Qualification regarding the AEOD's findings on SOV problems at U.S. nuclear powerplants.

Thermal Hydraulic Phenomena, Date to be determined, Los Alamos, NM. The Subcommittee will review the documentation associated with the TRAC-PF1/MOD2 code version.

ACRS Full Committee Meetings

375th ACRS Meeting, July 11-13, 1991, Bethesda, MD. Items are tentatively scheduled.

*A. *Reactor Operating Experience (Open/Closed)*—Briefing by and discussion with representatives of the NRC staff regarding recent nuclear powerplant incidents and events, including a loss of all off-site power event at the Vermont Yankee nuclear station and a generator fire at the Maine Yankee nuclear plant.

*B. *Fire Vulnerabilities Evaluation (Open/Closed)*—Briefing by and discussion with representatives of NUMARC/EPRI and the NRC staff regarding the NUMARC/EPRI fire vulnerabilities evaluation methodology (FIVE) and the draft NRC position on this matter.

C. *Meeting With Director, NRC Office for Analysis and Evaluation of Operating Experience (Open)*—Meeting with the Director, AEOD, to discuss items of mutual interest including the status and general use of the NRC performance indicator program, and activities of the NRC Committee to Review Generic Requirements.

*D. *General Electric SBWR (Open/Closed)*—Briefing by and discussion with representatives of the GE Company and the NRC staff regarding design features of the Simplified Boiling Water Reactor (SBWR) passive nuclear powerplant.

*E. *Fitness for Duty (Open/Closed)*—Briefing by and discussion with representatives of the NRC staff regarding experience associated with current NRC fitness for duty regulations including incidents at nuclear power stations that have involved fitness for duty considerations. Representatives of the nuclear industry will participate, as appropriate.

F. *Review of Evolutionary and Advanced Nuclear Power Plant Designs (Open)*—Briefing by and discussion with representatives of the NRC staff and the Department of Energy regarding anticipated schedules for review and evaluation of evolutionary and advanced nuclear power plant designs. Also, discussion among committee members of key technical issues in need of early resolution.

G. *NRC Safety Research Program (Open)*—Discussion among committee members regarding the scope and nature of proposed ACRS report to the Commission on the NRC Safety Research Program and budget.

H. *ACRS Subcommittee Activities (Open)*—Reports of and discussion regarding the status of assigned ACRS Subcommittee activities, including the May 30, 1991 Advanced BWRs Subcommittee meeting on the GE/ABWR design, and June 18-19, 1991

VOL 56 ISS 119 JE 20 1991 UMI

Regional Programs Subcommittee meeting, and other related activities of the Committee members.

I. *Use of Probabilistic Risk Assessment (Open)*—Discussion of a proposed committee report to the NRC regarding use of probabilistic risk assessment in the regulatory process.

J. *Future ACRS Activities (Open)*—Discussion of anticipated Subcommittee activities and items proposed for full consideration by the full Committee.

K. *Improved Guidance for Performing Regulatory Analyses (Open)*—Briefing by and discussion with representatives of the NRC staff regarding SECY–91–114, Proposed Actions to Improve Guidance for Performing Regulatory Analyses.

L. *Operator Requalification (Open)*—Briefing by and discussion with representatives of the NRC staff regarding the program for requalification of operators including the impact of using symptom-based emergency procedures on the requalification of nuclear power plant operators.

M. *Preparation of ACRS Reports (Open)*—Discussion of proposed Committee reports to NRC on proposed resolution of Generic Safety Issue 130, Essential Service Water System Failures at Multi-Unit Sites, risks associated with low-power and shutdown operations at nuclear power plants, and the proposed schedule for NRC/ACRS review of Evolutionary and advanced nuclear power plant designs including the proposed EPRI Requirements for Advanced LWRs.

N. *Miscellaneous (Open)*—Complete discussion of items that were not completed during previous ACRS meetings as time and availability of information permit.

378th ACRS Meeting, August 8–10, 1991—Agenda to be announced.

377th ACRS Meeting, September 5–7, 1991—Agenda to be announced.

ACNW Full Committee and Working Group Meetings

33rd ACNW Meeting, July 25–26, 1991, Bethesda, MD. Items are tentatively scheduled.

A. Meet with the NRC Commissioners to discuss items of mutual interest.

B. Discuss a recent trip to and meeting at the Center for Nuclear Waste Regulatory Analyses.

C. Discuss the use of expert judgment in conducting performance assessments in support of licensing of high-level and low-level waste repositories. Prepare a report for the Commission on the proper role of expert judgment in performance assessment.

D. Hear a briefing by the NRC/RES staff on proposed revisions to the NRC regulations on transportation of radioactive materials that are being revised to be consistent with the IAEA recommended guidance.

E. Discuss anticipated and proposed Committee activities, future meeting agenda, administrative, and organizational matters, as appropriate. Also, discuss matters and specific issues that were not completed during previous meetings as time and availability of information permit.

34th ACNW Meeting, August 28–29, 1991—Agenda to be announced.

35th ACNW Meeting, September 25–27, 1991—Agenda to be announced.

36th ACNW Meeting, October 23–24, 1991—Agenda to be announced.

37th ACNW Meeting, November 20–21, 1991—Agenda to be announced.

38th ACNW Meeting, December 18–19, 1991—Agenda to be announced.

ACNW Working Group on Preparation of Regulatory Guides for Implementing Revisions to 10 CFR part 20, August 20–22, 1991, Bethesda, MD. The Working Group will review nine regulatory guides related to the implementation of the revised 10 CFR Part 20, which assess the impacts of handling, storage and treatment of nuclear waste materials, as well as other activities related to nuclear energy.

ACNW Working Group on NRC staff Computer Modeling and Performance Assessment Capabilities in High-Level and Low-Level Waste, September 11–13, 1991. The Working Group will review the NRC staff's capabilities to make independent evaluations of licensee proposals with respect to the performance of low-level and high-level radioactive waste disposal facilities. Emphasis will be placed on computer capabilities involving modeling, documentation, verification and validation.

ACNW Working Group on Geologic Dating, October 22, 1991, Bethesda, MD. The Working Group will review the problems and limitations with various Quaternary dating methods to be used in the assessment of volcanic features and materials for the site characterization of a high-level waste repository.

ACNW Working Group on Residual Contamination Clean-up Criteria, October 25, 1991, Bethesda, MD. The Working Group will review the clean-up criteria for unrestricted use of contaminated sites that have been, or were at one time, under AEC or NRC license. The NRC staff is in the process of determining acceptable levels for uranium- and thorium- contaminated soils and structures to be released for unrestricted use.

ACNW Working Group on the Impact of Long-Range Climate Change in the Area of the Southern Basin and Range, November 19, 1991, Bethesda, MD. The Working Group will review the potential long-range climate changes and their impact on performance assessments of a proposed high-level repository.

ACNW Working Group on Post-Closure Monitoring, November 22, 1991, Bethesda, MD. The Working Group will review the potential problems and possible limitations associated with the post-closure monitoring of a proposed high-level waste repository. The potential utilization of non-invasive methods for the attainment of such a capability as well as the duration of such monitoring, and the significance and impact of results will also be considered.

ACNW Working Group on Inadvertant Human Intrusion Related to the Presence of Natural Resources at a High-Level Waste Site, December 17, 1991, Bethesda, MD. The Working Group will review the methodologies for assessment of the potential for natural resources at a proposed high-level waste site.

Dated: June 14, 1991.

John C. Hoyle,

Advisory Committee Management Officer.

FR Doc. 91–14640 Filed 6–19–91; 8:45 am]

BILLING CODE 7590–01–M

Solicitation of Public Comments on Generic Issue 23, "Reactor Coolant Pump Seal Failure", Extension of Public Comment Period

The U.S. Nuclear Regulatory Commission (NRC) is announcing an extension of the public comment period regarding Generic Issue 23, "Reactor Coolant Pump Seal Failure." The public comment period was to expire on July 31, 1991. (See **Federal Register** Notice dated April 19, 1991, Page 16130). The NRC has decided to extend the public comment period to September 30, 1991, due to requests for additional time to prepare responses.

Dated at Rockville, MD this 11 day of June, 1991.

For the Nuclear Regulatory Commission.

Warren Minners,

Director, Division of Safety Issue Resolution, Office of Nuclear Regulatory Research.

[FR Doc. 91–14732 Filed 6–19–91; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–213]

Connecticut Yankee Atomic Power Co.; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–61 issued to Connecticut Yankee Atomic Power Company (the licensee, CYAPCO) for operation of the Haddam Neck Plant located in Middlesex County, Connecticut.

The proposed amendment would replace footnotes (a) and (b) to table 3.3–2, items 3.a.1, 3.a.2, and 6.a with footnotes (c) and (d), to allow the feedwater isolation system to be defeated during surveillance testing and the Limiting Condition for Operation would only be applicable when the feedwater control system is in the automatic mode.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the request for amendment involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee has provided the following analysis:

1. *Involve a significant increase in the probability or consequences of an accident previously evaluated.*

Most of the proposed changes consist of clarifications or editorial changes. The one significant change (Note "c" for Item 6.a of Table 3.3–2) specifies that the (steam generator (SG)) overfill protection system is required to be operable only when feedwater control is in the automatic mode. This is a relaxation from the recently issued Technical Specification that requires the SG overfill protection system to be operable at all times when the reactor is above 10% power.

As discussed in CYAPCO's February 28, 1991 license amendment request, the design basis analysis does not take credit for the automatic feedwater control system. Therefore, no design basis accidents are affected by this change. There is no impact on the probability of occurrence or the consequences of any design basis events. No safety systems are adversely affected by these changes.

It was CYAPCO's intention to add the feedwater isolation function to the Tables for ESFAS operability and surveillance requirements to enhance the reliability of the SG overfill protection system when the feedwater control system is in the automatic mode. The changes proposed herein do not detract from that original intention.

2. *Create the possibility of a new or different kind of accident from any previously evaluated.*

The changes proposed herein do not alter the operation of the plant such that there is the potential for an unanalyzed accident. Without the proposed changes, plant operation above 10% power would be eventually prohibited. With the changes as proposed, plant operation can continue as it was prior to the issuance of License Amendment No. 136.

3. *Involve a significant reduction in margin of safety.*

Since the proposed changes do not affect the consequences of any accident previously analyzed, there is no reduction in any margin of safety. The proposed changes do not have any adverse impact on the protection boundaries. As stated previously, the feedwater isolation function is not credited in any design basis analysis.

Therefore, based on the above considerations, the Commission has made a proposed determination that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P–223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By July 22, 1991, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555 and at the Local Public Document Room located at the Russell Library, 123 Broad Street, Middletown, Connecticut 06457. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of

VOL 56 ISS 119 JE 20 1991 UMI

the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the request for amendment involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If a final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten [10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John F. Stolz: (petitioner's name and telephone number), (date petition was mailed), (plant name), and (publication date and page number of this Federal Register notice). A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Garfield, Esq., Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06457, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated June 14, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Local Public Document Room located at the Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

Dated at Rockville, MD, this 17th day of June 1991.

For the Nuclear Regulatory Commission.

Alan B. Wang,

Project Manager, Project Directorate I-4, Division of Reactor Projects-I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 91-14731 Filed 6-19-91; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-322]

Long Island Lighting Co.; Issuance of Amendment to Facility Operating License and Final Determination of No Significant Hazards Consideration

The U.S. Nuclear Regulatory Commission (the Commission) has issued *Amendment No. 7 to Facility Operating License No. NPF-82*, issued to Long Island Lighting Company (*LILCO* or the licensee), which revised the Technical Specifications for operation of the Shoreham Nuclear Power Station, Unit 1 (the facility) located in Suffolk County, New York. This license amendment will become effective ten (10) working days after the date of publication in the Federal Register of the Notice of Issuance of this amendment. If during this period a motion for a stay is filed with the U.S. Court of Appeals, the date when this amendment becomes effective will automatically be extended an additional ten (10) working days to provide the court with time to review the matter.

The amendment removes the licensee's authority to operate the Shoreham facility. The amendment modifies License No. NPF-82 from a full-power operating license to a possession-only license. The amendment is published herewith, without Appendices.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with this action was published in the Federal Register on August 21, 1990 (55 FR 34098). A request for a hearing was filed on September 20, 1990, by the Shoreham-Wading River Central School District and the Scientists and Engineers for Secure Energy, Inc. Additionally, counsel for both organizations filed, on October 10, 1990 and February 11, 1991, supplemental comments on the staff's proposed no significant hazards consideration determination.

Further the Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration, and that the facility can continue to be maintained by the licensee without endangering the health and safety of the public. The basis for this determination is contained in the Safety Evaluation related to this action.

Additionally, the Commission has determined that this amendment satisfies the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for this amendment.

For further details with respect to the action see (1) the application for amendment dated January 5, 1990, and supplemented by letter dated August 30, 1990, October 30, 1990, February 26, 1991, March 11, 1991, and March 26, 1991. [These supplemental letters did not change the scope of the initial application request and did not affect the staff's initial no significant hazards determination), (2) Amendment No. 7 to Facility Operating License No. NPF-82 (including Appendix A Technical Specification, and Appendix B Environmental Protection Plan), (3) the Commission's related Safety Evaluation, and (4) Commission Memorandum and Order, CLI-91-08, dated June 12, 1991. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC, at the Shoreham-Wading River Public Library, Route 25A, Shoreham, New York, 11786-9697. A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC, 20555, Attention: Director, Division of Advanced Reactors and Special Projects.

Dated at Rockville, Maryland this 14th day of June 1991.

For the Nuclear Regulatory Commission.

Seymour H. Weiss,

Director, Non-Power Reactors, Decommissioning and Environmental Project Directorate, Division of Advanced Reactors and Special Projects, Office of Nuclear Reactor Regulation.

Long Island Lighting Co.; Shoreham Nuclear Power Station, Unit 1 Amendment to Possession Only License; Docket No. 50-322

Amendment No. 7, License No. NPF-82

1. The U.S. Nuclear Regulatory Commission (the Commission) has found that:

A. The application for amendment by Long Island Lighting Company (the licensee), dated January 5, 1990 and supplemented on August 30, 1990, October 30, 1990, February 26, 1991, March 11, 1991, and March 26, 1991, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I;

B. The facility will be maintained in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;

C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;

D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and

E. The issuance of this amendment is in accordance with 10 CFR part 51 of the Commission's regulations and all applicable requirements have been satisfied.

2. Accordingly, Facility Operating License No. NPF-82 is hereby amended in its entirety to read as follows:

A. The license applies to the Shoreham Nuclear Power Station, Unit 1, a boiling water nuclear reactor and associated equipment, owned by the licensee. The facility is located in Suffolk County, New York, and is described in the licensee's Defueled Safety Analysis Report (DSAR), which includes, by reference, the appropriate sections of the Updated Safety Analysis Report (USAR), as supplemented and amended, and the licensee's Environmental Report, as supplemented and amended.

B. Subject to the conditions and requirements incorporated herein, the Commission hereby licenses the Long Island Lighting Company (LILCO, the licensee):

(1) Pursuant to section 103 of the Act and 10 CFR part 50, to possess, use, but not operate the facility at the designated location in Suffolk County, New York, in accordance with the procedures and limitations set forth in this license;

(2) Pursuant to the Act and 10 CFR part 70, to receive, possess, and use at any time special nuclear material as reactor fuel, in accordance with the limitations for storage and amounts required for reactor operation, as described in the Updated Safety Analysis Report, as supplemented and amended;

(3) Pursuant to the Act and 10 CFR parts 30, 40, and 70, to receive, possess, and use at any time any byproduct, source and special nuclear material as sealed neutron sources for reactor startup, sealed neutron sources for reactor instrumentation and radiation monitoring equipment calibration, and as fission detectors in amounts as required;

(4) Pursuant to the Act and 10 CFR part 30, 40, and 70, to receive, possess, and use in amounts as required any byproduct, source or special nuclear material without restriction to chemical or physical form, for sample analysis or instrument calibration or associated with radioactive apparatus or components; and

(5) Pursuant to the Act and 10 CFR parts 30, 40, and 70, to possess, but not separate, such byproduct and special nuclear materials as may be produced by the operation of the facility.

C. This license shall be deemed to contain and is subject to the conditions specified in the Commission's regulations set forth in 10 CFR Chapter I and is subject to all applicable provisions of the Act and to the rules, regulations, and orders of the Commission now or hereafter in effect and is subject to the additional conditions specified or incorporated below:

(1) *Maximum Power Level.*

The licensee is not authorized to operate the facility at any core power level.

(2) *Technical Specifications and Environmental Protection Plan.*

The Technical Specifications contained in Appendix A and the Environmental Protection Plan contained in Appendix B, as revised through Amendment No. 7 are hereby incorporated into this license. Long Island Lighting Company shall maintain the facility in accordance with the Technical Specifications and the Environmental Protection Plan.

(3) *Requirement to Obtain NRC Approval to Place Fuel in the Reactor Vessel.*

The licensee shall not place any fuel assemblies in the reactor vessel without the prior approval of the NRC staff.

D. The licensee shall implement and maintain in effect all provisions of the approved fire protection program as described in the Fire Hazards Analysis Report and the Defueled Safety Analysis Report for the facility and as approved in the SER dated April 1981 and Supplements 2 dated February 1982 and 9 dated December 1985, subject to the following provision:

The licensee may make changes to the approved fire protection program

VOL 56 ISS 119 JE 20 1991 UMI

without prior approval of the Commission only if these changes would not adversely affect the ability to maintain the fuel in the Spent Fuel Pool in a safe condition in the event of a fire.

E. The licensee shall fully implement and maintain in effect all provisions of the Commission-approved physical security, guard training and qualification, and safeguards contingency plans including amendments made pursuant to provisions of the Miscellaneous Amendments and Search Requirements revisions to CFR 73.55 (51 FR 27817 and 27822) and to the authority of 10 CFR 50.90 and 10 CFR 50.54(p). The plans, which contain Safeguards Information protected under 10 CFR 73.21, are entitled: "Shoreham Nuclear Power Station Security Plan for Fuel Storage in the Spent Fuel Pool," with revisions submitted through April 5, 1990; the "Shoreham Nuclear Power Station Guard Training and Qualification Plan," with revisions submitted through December 14, 1983; and "Shoreham Nuclear Power Station Safeguards Contingency Plan," with revisions submitted through May 13, 1988. Changes made in accordance with 10 CFR 73.55 shall be implemented in accordance with the schedule set forth therein.

F. The licensee shall have and maintain financial protection of such type and in such amounts as the Commission shall require in accordance with section 170 of the Atomic Energy Act of 1954, as amended, to cover public liability claims.

G. This license shall expire at midnight on April 13, 2013.

3. This license amendment will become effective ten (10) working days after the date of publication in the Federal Register of the Notice of Issuance of this amendment. If during this period a motion for a stay is filed with the U.S. Court of Appeals, the date when this amendment becomes effective will automatically be extended an additional ten [10] working days to provide the court with time to review the matter.

Dated of Issuance: June 14, 1991.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Director, Division of Advanced Reactors and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 91-14730 Filed 6-19-91; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-440-A and 50-346-A; ASLBP No. 91-644-01-A]

Ohio Edison Co., Cleveland Electric Illuminating Co. and Toledo Edison Co.; Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the Federal Register, 37 FR 28710 (1972), and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and/or requests for hearing and to preside over the proceeding in the event that a hearing is ordered.

Ohio Edison Co.
Perry Nuclear Power Plant, Unit 1
Facility Operating License No. NPF-58
The Cleveland Electric Illuminating Co.
The Toledo Edison Co.
Perry Nuclear Power Plant, Unit 1
Facility Operating License No. NPF-58
Davis-Besse Nuclear Power Station, Unit 1
Facility Operating License No. NPF-3
(Suspension of Antitrust Conditions)

This Board is being established pursuant to a notice published by the Commission on May 1, 1991 in the Federal Register (56 FR 20057) entitled, "Notice of Denial of Applications for Amendments to Facility Operating Licenses and Opportunity for Hearing."

The purpose of the licensees' amendment requests was to suspend the antitrust conditions in the two operating licenses as they apply to the respective licensees. The NRC staff has advised the licensees that the proposed amendments are denied, based on the staff's evaluation of the arguments made in support of the applications, the extensive public comments received on the proposed amendments, and the views expressed by the Department of Justice. The licensees were notified of the Commission's denial of the proposed amendments in a letter dated April 24, 1991. However, the licensees have been advised that they may demand a hearing with respect to the denial described above. Any person whose interest may be affected by this proceeding may file a written petition for leave to intervene.

The Board is comprised of the following administrative judges:

Marshall E. Miller, Chairman, 1920 South Creek Boulevard, Spruce Creek Fly-In, Daytona Beach, FL 32124

Charles Bechhoefer, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

John H. Frye, III, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

All correspondence, documents and other materials shall be filed with the judges in accordance with 10 CFR 2.701.

Issued at Bethesda, MD, this 13th day of June, 1991.

B. Paul Cotter, Jr.,

Chief Administrative Judge Atomic Safety and Licensing Board Panel.

[FR Doc. 91-14733 Filed 6-19-91; 8:45 am]

BILLING CODE 7590-01-M

RESOLUTION TRUST CORPORATION

Statement of Policy Regarding the Payment of State and Local Property Taxes

AGENCY: Resolution Trust Corporation.

ACTION: Policy statement.

SUMMARY: After considering (1) the powers granted to it under the Constitution and Federal law, (2) its obligation to maximize recoveries from the disposition of financial institutions and their assets, and (3) the potential effect of its actions upon state and municipal tax schemes, the Resolution Trust Corporation (the "Corporation") has issued the following policy statement to provide guidance as to how it will administer its statutory responsibilities in this area.

DATES: This policy statement is effective June 4, 1991.

FOR FURTHER INFORMATION CONTACT: David R. Wiley, Senior Asset Specialist, RTC, (202) 416-7136, Robert I. Dodge, Assistant Director for Real Estate Management, RTC, (202) 417-7475, David N. Wall, Senior Counsel, Legal Division, (202) 736-0115, or Camille E. Evans, Senior Attorney, Legal Division, (202) 416-7028.

SUPPLEMENTARY INFORMATION:

A. Scope and Applicability

This policy statement generally applies to the Corporation when it is liquidating assets in its corporate and receivership capacities. The policy statement generally does not apply when the Corporation is acting (1) as conservator; (2) with respect to special asset pools covered by assistance transactions where the Corporation does not retain ownership or (3) with respect to a subsidiary of a receivership.

B. Taxes

Payment of Taxes

The Corporation will pay its proper tax obligations when they come due. Furthermore, the Corporation will pay claims for delinquencies as promptly as is consistent with sound business practice and the orderly administration of the institution's affairs. The Corporation may decline to pay property tax claims in situations where abandonment of its interest in the property is appropriate.

Owned Real Property

Owned real property of the Corporation is subject to state and local real property taxes, if those taxes are assessed according to the property's value. The Corporation is immune from real property taxes assessed on other bases.

Secured Interests in Real Property

Real property which is subject to a security or lien interest is subject to *ad valorem* taxes and taxes assessed on other bases.

Personal Property

The Corporation is immune from all forms of personal property taxation on owned personal property.

Other Related Taxes

The Corporation is immune from taxes other than *ad valorem* real property taxes. Taxes on sales, transfers, or other dispositions of Corporation property are generally in the nature of excise taxes which are levied on the transaction and not on the property (although the calculation of the amount of tax may be based on the property's sale price); the Corporation is immune from such taxes.

C. Interest and Penalties

Interest

The Corporation will pay claims for interest on delinquent taxes properly owed at the rate provided under state law. The Corporation will generally follow a state's own characterization as to whether a delinquency charge constitutes a penalty, but will reserve its right to challenge any charge (or portion thereof) called interest that is demonstrably a penalty.

Penalties

The Corporation is not liable for any amounts in the nature of fines or penalties. The Corporation will not pay, nor recognize liens for, such amounts. The Corporation will not pay attorneys' fees or other similar costs that may be imposed under state law in connection with the resolution of tax disputes.

D. Tax Liens

General Principles

If any property taxes (including interest) on Corporation owned property are secured by a valid lien (in effect before the property became owned by the Corporation), the Corporation will pay those claims. With respect to property not owned by the Corporation, but in which the Corporation has a lien interest, and property taxes (including interest) secured by a valid lien with priority over the Corporation's lien interest will be paid. However, if abandonment of its interest in the property is appropriate, the Corporation may elect not to pay such claims.

Foreclosure

No property of the Corporation is subject to levy, attachment, garnishment, foreclosure, or sales without the Corporation's consent. Furthermore, a lien for taxes and interest may attach, but the Corporation will not permit a lien or security interest held by it to be eliminated by foreclosure without the Corporation's consent.

Sales of Tax Liens

In cases in which a tax lien has been sold to a private party under state law, if (1) the tax lien has priority over the Corporation's lien, and (2) the Corporation desires to eliminate the tax purchaser's interest, the Corporation will pay the amount required by state law to satisfy such interest (other than any fees or penalties specifically imposed to redeem such interest). If the tax lien does not have priority, the Corporation will take whatever action is necessary to ensure that its interest is satisfied first.

E. Challenges to Assessments

The Corporation is only liable for state and local taxes which are based on the value of the property during the period for which the tax is imposed, notwithstanding the failure of any person, including prior record owners, to challenge an assessment under the procedures available under state law. In the exercise of its business judgment, the Corporation may challenge assessments which do not conform with the statutory provisions, and during the challenge will generally pay tax claims based on the assessment level deemed appropriate. The Corporation will generally limit challenges to the current and immediately preceding taxable years and to the pursuit of previously filed tax protests. However, the Corporation may, in the exercise of its business judgment, challenge *any* prior taxes and assessments provided that (1) the Corporation's records (including appraisals, offers or bids received for the purchase of the property, etc.) indicate that the assessed value is clearly excessive, (2) a successful challenge will result in a substantial savings to the Corporation, (3) the challenge will not unduly the sale of the property, and (4) there is a reasonable likelihood of a successful challenge.

F. Dispute and Notification Procedures

Disputes

The Corporation will attempt to advise taxing authorities of its statutory rights and resolve all tax disputes as taxes become due. In order to dispose of property subject to disputed tax claims, the Corporation may, as business judgment dictates, enter into agreements with taxing authorities, title companies, or prospective purchasers which provide for the disputed amounts to be held in escrow. When the closing of a transaction is threatened because of disputed tax amounts, the Corporation may, as business judgment dictates, elect to pay the disputed tax claims under protest. In all such cases the Corporation shall reserve its legal rights to a refund of such disputed amounts and may pursue, through litigation if necessary, a reimbursement of the disputed amounts and any attendant costs, and interest.

Notification

The Corporation will attempt to notify state and local taxing authorities of the existence of an interest in property which the Corporation believes to be within the authority's jurisdiction.

G. Subsidiaries and Conservatorships

For the present, the Corporation has determined not to assert Federal tax immunity on behalf of state-chartered corporations, the stock of which is wholly or partially owned by the Corporation acting in any of its capacities. Additionally, for the present, the Corporation will not assert Federal tax immunity for conservatorships or special asset pools covered by assistance transactions where the Corporation does not retain ownership. However, a conservatorship of a newly-formed institution is not liable for obligations not specifically assumed from a receiver (as in a "pass-through receivership"). In this situation, the *de novo* institution may not be liable for any penalties assessed prior to the "pass-through receivership," but would be liable for any penalties assessed after the establishment of the *de novo* institution. Finally, when acting in these

VOL 56 ISS 119 JE 20 1991 UMI

capacities, current and prior assessments may be challenged to the extent permitted by state law.

By order of the Board of Directors.

Dated at Washington, DC, this 4the day of June 1991.

William J. Tricarico,

Assistance Executive Secretary.

BILLING CODE 8714-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-29306; File No. SR-NYSE-91-21]

Self-Regulatory Organizations; Filing of Proposed Rule Change by the New York Stock Exchange, Inc. Relating to Rule 80A (Limitations on Trading During Significant Market Declines)

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on June 10, 1991, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

This proposed rule change seeks to make permanent the provisions of rule 80A regarding stabilization procedures as they apply to index arbitrage orders in component stocks of the S&P 500 Stock Price Index when the Dow Jones Industrial Average advances or declines by 50 points from the previous day's closing value.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections A, B, and C below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

In recent years, the securities markets have experienced unprecedented volatility. The Exchange and other market centers have been concerned that sophisticated trading strategies related to program trading may create excess volatility that undermines investor confidence in the fairness and orderliness of the securities markets, and may, in fact, constitute a threat to the viability of America's capital markets.

In response to these concerns, the Exchange adopted and the Commission approved rule 80A in 1988 (Limitations on Trading During Significant Market Declines). To respond to changes in market needs and conditions, the Exchange has amended the rule on various occasions. In brief, the rule addresses market volatility by providing the following:

(i) The Exchange, in conjunction with the Chicago Mercantile Exchange, developed procedures whereby program trading orders are diverted to a separate file for five minutes on any day that the price of the primary Standard and Poor's 500 ("S&P 500") Stock Price Index futures contract trade on the Chicago Mercantile Exchange declines 12 points below its closing value on the previous trading day. (See SR-NYSE-88-22).

(ii) All index arbitrage orders to sell in component stocks of the S&P 500 Stock Price Index must be entered with the instruction "sell plus" when the Dow Jones Industrial Average ("DJIA") declines 50 points or more from its previous trading day's closing value, and all index arbitrage orders to buy in component stocks of the S&P 500 index must be entered with the instruction "buy minus" when the DJIA advances 50 points or more from its previous trading day's closing value (See SR-NYSE-90-5). These requirements do not apply when the DJIA subsequently reaches a value that is no more than 25 points above (as to buy minus orders) or below (as to sell plus orders) the previous day's close.[1]

(iii) Regarding trading in the Exchange Stock Portfolio ("ESP"), when the DJIA is up 50 points or more from its previous close, no purchase of a basket may be made at a price equal to or greater than the aggregate Tier 1 offer in the cash market. When the DJIA is down 50 points or more from its previous close, no sale of a basket may be made at a price equal to or less than the aggregate Tier 1 bid in the cash market. Specialists are required to maintain Tier 1 and Tier 2 quotations in each of the specialty basket stocks. The ESP system automatically establishes the Tier 1 bid and offer for a basket's component stock.[2]

These requirements do not apply if the DJIA subsequently reaches a value that is no more than 25 points above (as to the restriction on a purchase of a basket of stocks) or below (as to the restriction on a sale of a basket of stocks) the previous day's close.[3]

These latter two provisions (paragraphs (c) and (d) of Rule 80A) were approved for a pilot program which will end on July 31, 1991. The Exchange is now seeking permanent approval of these provisions.

The Exchange believes that the provisions of rule 80A have been helpful in promoting market stability by minimizing excess volatility during periods of significant market movement on the NYSE, without adversely impacting the markets in derivative equity instruments.

Interim and Final Report on Pilot Program's Effect. In its Approval Order, the Commission requested an interim and final report analyzing the effects of rule 80A. On January 31, 1991, the Exchange forwarded an interim report as requested. Under separate cover, the Exchange has forwarded a final report on the effects of rule 80A.[4]

Additional Commission Requests. In addition to the interim and final reports referred to above, the Commission's staff has requested [5] information in a number of other areas. Responses to these requests are presented below:

Appropriateness of 50 Point Trigger Value. As outlines above, the order entry restrictions of rule 80A are triggered by a 50 point move in the Dow Jones Industrial Average from the previous day's closing value. The Commission has requested the Exchange's view as to whether this 50 point value continues to be the appropriate level.

While there is no specific, comparative data available to indicate that the 50 point trigger value represents an *ideal or optimal level* for the restrictions, the experience of the pilot to date is that the 50 point level appears to be high enough that it is not triggered too frequently, yet low enough to act as meaningful check on excess market volatility which might be associated with index arbitrage activity. The rule's provisions were invoked 22 times between August 1, 1988 and April 30, 1991. Twenty-three of these occurred in the first five months of the pilot. As was noted in the interim report, this period coincided with several events which themselves had an impact on financial markets, including the Gulf Crisis, difficult Federal budget negotiations and increasing evidence of a recession. Since January 1, 1991 the rule has been applied to date eight times over five months. This latter pattern (about twice a month) appears to be representative of a more "normal" instance of the rule's invocation. As noted in the interim report, "it seems that many investors take comfort from the fact that on volatile days when the market moves 50 points, index arbitrage orders must meet a tick test." In addition, it appears that the securities industry and the financial marketplaces have come to accept the 50 point level as appropriate.

The Exchange does not believe that there is a significant benefit to be gained by testing additional or alternate trigger levels. The Exchange believes that the marketplace has judged the 50 point level and found it acceptable.

Comments On the Operation of the Rule. The provisions of rule 80 A have been the subject of several public pronouncements and much media coverage. The Exchnage, however, has not received any written comments with respect to the rule.

(b) Statutory Basis

The basis under the Securities Exchange Act of 1934 ("the Act") for this proposed rule change is the requirement under section 6(b)(5) that an exchange have rules that are designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549.

Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by July 11, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: June 14, 1991.

Margaret H. McFarland,

Deputy Secretary.

[Rel. No. IC-18197; 811-5408]

Adirondack Income Shares, Inc.; Application

June 13, 1991.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "1940 Act").

APPLICANT: Adirondack Income Shares, Inc.

RELEVANT 1940 ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company under the 1940 Act.

FILING DATE: The application on Form N-8F was filed on April 10, 1991 and an amendment was filed on June 10, 1991.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on July 10, 1991, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, c/o DG Bank, 609 Fifth Avenue, New York, New York 10017-1021.

FOR FURTHER INFORMATION CONTACT: Felice R. Foundos, Staff Attorney, (202) 272-2190, or Jeremy N. Rubenstein, Branch Chief, (202) 272-3023 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management company organized as a corporation under the laws of the State of Maryland. On December 8, 1987, applicant filed a notification of registration pursuant to section 8(a) of the 1940 Act and a registration statement pursuant to

VOL 56 ISS 119 JE 20 1991 UMI

section 8(b) of the 1940 Act. Applicant's securities are not registered under the Securities Act of 1933. Applicant has no more than 100 security holders and has never made a public offering of its securities.

2. Applicant was organized primarily to provide institutional investors organized in the Federal Republic of Germany with an investment subject to favorable tax treatment. Pursuant to a new income tax treaty between the United States and what was then the Federal Republic of Germany, these tax advantages were eliminated as of December 31, 1990. Upon losing the tax advantages, applicant's shareholders requested the redemption of all outstanding shares. Because of the redemptions, on April 1, 1991, applicant's board of directors authorized the dissolution of applicant.

3. Pursuant to the liquidation, applicant's portfolio securities were sold through government dealers at market price without the payment of any brokerage commission.

4. On January 2, 1991, applicant distributed to its shareholders $9.29 per share, which represented all of applicant's assets on that date.

5. Applicant paid approximately $3,500 in legal and other expenses related to the liquidation.

6. Applicant is in the process of filing articles of dissolution with the State of Maryland.

7. As of the date of the application, applicant had no debts or liabilities, and was not a party to any litigation or administrative proceeding.

8. Applicant is neither engaged in nor proposes to engage in any business activities other than those necessary for the winding up of its affairs as an investment company.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

Applicant's Representations

1. Applicant is an open-end diversified management company organized as a corporation under the laws of the State of Maryland. On July 20, 1988, applicant filed a notification of registration pursuant to section 8(a) of the 1940 Act and a registration statement pursuant to section 8(b) of the 1940 Act. Applicant's securities are not registered under the Securities Act of 1933. Applicant has no more than 100 security holders and has never made a public offering of its securities.

2. Applicant was organized primarily to provide institutional investors organized in the Federal Republic of Germany with an investment subject to favorable tax treatment. Pursuant to a new income tax treaty between the United States and what was then the Federal Republic of Germany, these tax advantages were eliminated as of December 31, 1990. Upon losing the tax advantages, applicant's shareholders requested the redemption of all outstanding shares. Because of the redemptions, on April 1, 1991, applicant's board of directors authorized the dissolution of applicant.

3. Pursuant to the liquidation, applicant's portfolio securities were sold through government dealers at market price without the payment of any brokerage commission.

4. On January 2, 1991, applicant distributed to its shareholders $9.57 per share, which represented all of applicant's assets on that date.

5. Applicant paid approximately $3,500 in legal and other expenses related to the liquidation.

6. Applicant is in the process of filing articles of dissolution with the State of Maryland.

7. As of the date of the application, applicant had no debts or liabilities, and was not a party to any litigation or administrative proceeding.

8. Applicant is neither engaged in nor proposes to engage in any business activities other than those necessary for the winding up of its affairs as an investment company.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-18198; 811-5699]

June 13, 1991.

The Boston Company Index and Blue Chip Trust; Application

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

APPLICANT: The Boston Company Index and Blue Chip Trust.

RELEVANT 1940 ACT SECTIONS: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on October 22, 1990, and amended on June 12, 1991.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on July 8, 1991, and should be accompanied by proof of service on the Applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, One Boston Place, Boston, Massachusetts 02108.

FOR FURTHER INFORMATION CONTACT: Barbara Chretien-Dar, Staff Attorney, at (202) 272-3022, or Stephanie M. Monaco, Branch Chief, at (202) 272-3030 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.
